"(2) (A) With respect to any application under section 103 or section 104 b. for a license to manufacture a facility (other than a manufacturing license issued pursuant to section 194), any application under section 103 or section 104 b. for a construction permit or operating license for a facility, any application under section 104 c. for a construction permit or operating license for a testing facility, any application for an amendment or renewal of a license to manufacture or an amendment or a renewal of a construction permit or operating license for such facilities, any application under section 193 for an amendment or renewal of a site permit, or any application under section 194 for the amendment or renewal of an approval of a standardized facility design or major subsystem thereof, the Commission shall publish once in the *Federal Register* and twice in such major newspapers serving the affected areas as may be reasonably calculated to notify concerned or affected persons (except that with respect to an application under section 194 for an amendment or renewal of an approval of a standardized facility design or major subsystem thereof, newspaper publication shall be in such major newspapers as may be reasonably calculated to assure a broad national circulation), within thirty days after the receipt of any such application notices of the receipt thereof, and at least one hundred eighty days prior to the granting of any such application, a notice that consideration is being given to the granting thereof and that the Commission will grant a hearing upon the request of any person whose interest may be affected by the proceeding except that in the case of applications for amendments to manufacturing and operating licenses, construction permits, combined construction permits and operating licenses, site permits, and rules approving standardized facility designs such period shall be thirty days. The same one hundred eighty days notice shall be published with respect to applications under section 103 or section 104 b. for combined construction permit and operating license, under section 193 for the granting of a site permit, under section 194 for approval of a standardized final design or a major subsystem thereof except that such notice shall state that the Commission shall hold a hearing and shall admit any person whose interest may be affected as a party to the proceeding. The Commission may dispense with the thirty days' notice and publication with respect to any application for an amendment to a manufacturing license, an amendment to a construction permit and/or an operating license, an amendment to a site permit pursuant to section 193, or an amendment to a rule approving a standardized facility design pursuant to section 194, upon a determination by the Commission that the amendment involves no significant additional risk to the public health and safety. The Commission shall publish once in the *Federal Register* and twice in the appropriate newspapers notice of the issuance of such an amendment. With respect to any request for authorization to prepare a facility site or perform limited construction activities under section 185 c., the Commission shall publish once in the *Federal Register* and twice in such major newspapers serving the affected area as may be reasonably calculated to notify concerned or affected persons within thirty days after the receipt of any such request notice of the receipt thereof and that the Commission will grant a hearing on the findings required by 185 c. upon the request of any person whose interest may be affected.

"(B) The Commission shall also publish once in the *Federal Register* and twice in such major newspapers serving the affected area as may be reasonably calculated to notify concerned or affected persons at least one hundred eighty days prior to commencement of operation of any facility for which a combined construction permit and operating license had been issued, a notice that commencement of operation is expected to take place and that the Commission will grant a hearing upon the request of any person whose interest may be affected by such operation, but only upon a prima facie showing that, as a result of (1) significant new information or a significant new issue, or (2) a violation of a permit or license or rule, regulation or order issued by the Commission, some modification of the facility or other appropriate action should be taken which will provide substantial, additional protection for the public health and safety, or the common defense and security, or the protection of the environment.

"(C) Any hearing on an application subject to this paragraph or any hearing on the commencement of operation of any facility shall be limited to issues as to which there was no prior opportunity for hearing in a prior proceeding before the Commission or a State, unless the person requesting the hearing on the issue makes a prima facie showing in accordance with procedures established by the Commission that significant new information relevant to the issue has been discovered since the prior proceeding and that as a result thereof it is likely that the site or facility design will not comply with this Act or the Commission's regulations for protection of the public health and safety, the common defense and security, or the environment.

"(3) The Commission may, subject to the provisions of section 192, issue, in the case of a production or utilization facility, an interim operating license or an interim amendment to an operating license, or allow interim operation of a facility for which a combined construction permit and operating license had been issued, in advance of the conduct or completion of any required hearing. Prior to issuance of any such interim amendment, and at least thirty days prior to issuance of any such interim license or allowing any such interim operation, the Commission shall publish once in the *Federal Register* and twice in such major newspapers serving the affected area as may be reasonably calculated to notify concerned or affected persons a notice of intent to do so, requesting comments from interested persons and stating that a hearing shall be held on whether such action is, in the case of an interim operating license or in the case of allowing interim operation of a facility for which a combined construction permit and operating license had been issued, necessary because of an urgent public need or emergency or, in the case of an interim amendment to an operating license, necessary in the public interest. In the case of an interim operating license or allowing interim operation of a facility for which a combined construction permit and operating license had been issued, such hearing may be held either before or after the expiration of the thirty-day notice period. The Commission itself shall preside at any such hearing and shall determine, in its sole discretion, whether the hearing and decision will be formal or informal, conducted with or without regard to section 554, 556, or 557 of Title 5 of the United States Code. Selection of hearing and decision procedures by the Commission shall not be subject to judicial review."

INTERIM OPERATING AUTHORITY

SEC. 104. Section 192 of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"SEC. 192. INTERIM OPERATING AUTHORITY.—

"a. The Commission is authorized, subject to the provisions of subsection b. of this section, to issue an interim operating license or an interim amendment to an operating license for a production or utilization facility, or to allow interim operation of a facility for which a combined construction permit and operating license had been issued, in advance of the conduct or completion of any required hearing. Application for such interim operating authority shall be in writing and shall show, to the satisfaction of the Commission, that there is a need for the operation of the facility in advance of the conduct or completion of such hearing.

"b. (1) Prior to the issuance of an interim operating license or prior to commencement of interim operation, it shall be found by the Commission itself that:

"(A) issuance or commencement of opera-

tion is necessary because of an urgent public need or emergency; and

"(B) that the hearings provided for in paragraphs (1)(A) and (2) of section 189 a. have been completed on any significant, site-specific issue presented in such hearing pertaining to public health and safety or the common defense and security.

"(2) Prior to the issuance of an interim amendment to an operating license, it shall be found:

"(A) by the Commission itself, that the issuance thereof is in the public interest; and

"(B) by the Commission itself or its designee that, in all respects other than the conduct or completion of any required hearing, the requirements of this Act, including but not limited to matters of public health and safety and common defense and security, of the rules and regulations of the Commission, and of the National Environmental Policy Act of 1969, as amended, and as provided in section 195, have been met.

"c. (1) No interim operating license or interim amendment to an operating license shall be issued, and no interim operation shall be allowed, for a period to exceed twelve months, unless for good cause shown the Commission extends such period.

"(2) Any interim operating license or any interim amendment to an operating license shall contain and any interim operation shall be subject to such conditions as the Commission deems appropriate to assure that any subsequent findings and orders of the Commission with respect to the proceeding will be given full force and effect."

EARLY SITE APPROVAL

SEC. 105. The Atomic Energy Act of 1954, as amended, is amended by adding a new section 193 to read as follows:

"SEC. 193. EARLY SITE APPROVAL.—

"a. The Commission is authorized to issue a site permit for approval of a site for one or more thermal neutron power generation facilities upon the application of any person, notwithstanding the fact that no application for a construction permit or a combined construction permit and operating license for such facility or facilities has been filed. For all other purposes of this Act, a site permit is deemed to be a 'license'.

"b. Each application under subsection a. shall be in writing and shall contain such information as may be required by the Commission to determine the suitability of the site for its intended purpose, including:

"(1) the number, type or types, and thermal power level of the facilities with respect to which application for site approval is made;

"(2) the boundaries of the site;

"(3) the proposed general location of each such facility on the site;

"(4) the proposed maximum levels of

"(A) radiological effluents; and

"(B) thermal effluent

that each such facility will produce;

"(5) the type or types of cooling systems (intake or outflow) that may be employed by each such facility;

"(6) the seismic, meteorological, hydrologic and geologic characteristics of the proposed site and the population density of the area surrounding the site; and

"(7) such other information as the Commission may by rule or regulation require.

"c.(1) If, after considering all information submitted by the applicant regarding the matters specified in subsection b., and holding a hearing as provided by section 189a. (1), the Commission determines that the proposed site is suitable for the construction and operation of the facility or facilities described in the application consistent with public health or safety and protection of the environment, it shall grant the application under subsection a. and issue a site permit without condition or with such conditions as it deems appropriate.

"(2) In making any determination pursuant to paragraph (1) of this subsection, the Commission shall, with respect to each of the matters specified in subsection b., state in writing its findings regarding the suitability of the site for the facility or facilities described in the application.

"(3) Any final determination of the Commission on an application filed pursuant to this section shall be a final order of the Commission for purposes of section 189 b.

"d. (1) A site permit shall be valid with respect to a facility to be constructed on the site for which an application for a construction permit or a combined construction permit and operating license is filed within a period of ten years from the date of issuance of the site permit.

"(2)(A) No less than eighteen nor more than forty-eight months prior to the expiration of the ten-year period, the holder of the site permit may apply for a renewal of the site permit. Upon review by the Commission, the Commission may renew a site permit for additional ten-year periods from the date of renewal, pursuant to such rules and regulations as the Commission may deem appropriate.

"(B) Upon application for renewal of a site permit pursuant to subparagraph (A), the Commission shall renew the site permit unless it finds that significant new information relevant to the site has become available and that as a result thereof it is likely that the site will not comply with this Act or the Commission's regulations for protection of the public health and safety, the common defense and security, or the environment.

"(3) Any site permit issued puruant to subsection c. shall be valid only with respect to a thermal neutron power generation facility:

"(A) which is designed to produce levels of thermal power, radiological effluent and air emissions and thermal effluent no greater than the levels specified in the permit; and

"(B) which meets such other criteria as the Commission may by rule, prescribe.

"e. Any applicant for a construction permit or a combined construction permit and operating license for a thermal neutron power generation facility to be located on a site approved pursuant to subsection a. may, upon 30 days' prior written notice to the Commission and to the State in which the site is located, and upon publication twice in such major newspapers serving the affected area as may be reasonably calculated to notify concerned or affected persons notice of the scope of the intended preparation and unless otherwise ordered by the Commission or the State, prepare the approved site for construction and perform such limited construction activities thereat as the Commission may, by rule or regulation, determine to be permissible. Such activities shall be conducted at the risk of the applicant and shall be subject to modification or termination by the Commission at any time. Safety-related construction activities shall not proceed more than one year from the commencement of such activities unless the Commission, upon good cause shown, extends such period. Nothing in this subsection shall affect the authority of any State or local governmental unit with respect to the issuance of any required permit or license for the preparation of the site or the construction activities authorized by this subsection.

"f. For purposes of any evaluations and determinations relating to the approval of a proposed site under this section required by the National Environmental Policy Act of 1969, as amended, whether made by the Commission, a State or a regional organization, a finding of a generic future need for electric power shall constitute a definitive determination that there is a need for the power proposed to be provided at the site.

"g. Approval of a site under this section shall not preclude its approval or use as a site for an alternate or modified type of energy facility or for any other purpose.

"h. Nothing in this section shall preclude a request for a determination with respect to limited aspects of the suitability of the site for its intended purpose."

APPROVAL OF STANDARDIZED FACILITY DESIGNS

SEC. 106. The Atomic Energy Act of 1954, as amended, is amended by adding a new section 194 to read as follows:

"SEC. 194. APPROVAL OF STANDARDIZED FACILITY DESIGNS.—

"a. The Commission is authorized and directed to establish procedures whereby, through a rulemaking or manufacturing license proceeding in which a hearing shall be held, as provided by section 189 a. (1), it may approve the preliminary or final design for a thermal neutron power generation facility upon application by any person, notwithstanding the fact that no application for a construction permit or combined construction permit and operating license for such facility has been filed.

"b. The Commission is also authorized under this section to approve preliminary or final standardized designs for any major subsystem of a thermal neutron power generation facility which represents a discrete element of the facility, as defined by the Commission.

"c. Notwithstanding section 161 w. of this Act or the Independent Offices Appropriation Act of 1952, no application filing or issuance fees shall be required for an application for approval or for an amendment or renewal of an approval of a standardized facility or major facility subsystem design under this section, provided that the Commission is authorized to allocate the costs that would otherwise have been defrayed by fees required of applicants under this section among applicants for permits or licenses which propose to use the approved standardized design.

"d.(1) Any rule or license issued by the Commission under this section shall be valid with respect to an application for a construction permit or a combined construction permit and operating license which meets any conditions of the rule or license and is filed within a period of five years from the date of approval.

"(2)(A) No less than twelve nor more than eighteen months prior to the expiration of the five-year period provided under paragraph (1), the person to whom the rule or manufacturing license was issued may apply for a renewal of the rule or manufacturing license. Upon review by the Commission, the Commission may renew the rule or manufacturing license for additional three-year periods from the date of renewal pursuant to such rules and regulations as the Commission may deem appropriate.

"(B) Upon application for renewal of a rule or manufacturing license issued pursuant to subsections a. or b., the Commission shall renew the rule or license unless it finds that significant new information relevant to the design has become available and that as a result thereof it is likely that the design will not comply with this Act or the Commission's regulations for protection of the public health and safety, or the common defense and security.

"e. Within six months from the date of enactment, the Commission shall by rule or regulation determine which utilization facilities, for which applications for construction permits have been filed with the Commission, propose to employ designs which would be eligible to qualify as approved standardized facility designs under this sec-

tion. The Commission shall publish in the *Federal Register* a list of all such facilities. All provisions of this Act which apply to standardized facility designs shall apply to all such facilities.

"f. Nothing in this section or section 189 shall preclude the Commission from promulgating rules in accordance with section 553 of Title 5 of the United States Code which set forth standards and criteria for production or utilization facility designs, or which approve the preliminary or final designs for minor subsystems of thermal neutron power generation facilities, as defined by the Commission, or which approve the preliminary or final design for production or utilization facilities other than thermal neutron power generation facilities.

"g. Any final determination of the Commission on an application filed pursuant to subsections a., b., or d., shall be a final order of the Commission for purposes of section 189 b."

TITLE II—FEDERAL AND STATE REVIEWS

LICENSE APPLICATIONS

SEC. 201. Subsection 182 b. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"b. The Advisory Committee on Reactor Safety shall review each application under section 103 or section 104 b. for a manufacturing license for a facility, each application under section 103 or section 104 b. for a construction permit and/or an operating license for a facility, any application under section 104 c. for a construction permit or an operating license for a testing facility, any application under section 104 a. or c. specifically referred to it by the Commission, any application for a site permit under section 193, any proposed rule approving a standardized facility design under section 194 a. or b., and any application for an amendment or renewal of a manufacturing license or construction permit or an amendment or renewal of an operating license under section 103 or section 104 a., b., or c. or an amendment or renewal of a site permit under section 193 or a proposed amendment or renewal of a rule approving a standardized facility design under section 194 a., b., or d. specifically referred to it by the Commission, and shall submit a report thereon. Except with respect to applications for approval of standardized designs under section 194 a. or b. and for construction permits or operating licenses for facilities other than thermal neutron power generation facilities, unless the Commission specifically requests a review and report on an application or portion thereof, the Committee may dispense with all or part of such review and report by notifying the Commission in writing that all or part of such review by the Committee is not warranted. Except to the extent that security classification prevents disclosure, any report of notice required by this subsection shall be made part of the record of the application or rulemaking proceeding and available to the public and any notice by the Committee that review is not warranted shall be published in the *Federal Register*."

STATE ENVIRONMENTAL REVIEWS

SEC. 202. The Atomic Energy Act of 1954, as amended, is amended by adding a new section 195 to read as follows:

"SEC. 195. STATE ENVIRONMENTAL REVIEWS.—

"a. (1) Upon the filing of an application for a site permit, construction permit, or combined construction permit and operating license for a thermal neutron power generation facility, whichever is filed first, the Commission shall within ten days notify the State within which the facility is proposed to be located. A State may elect to determine the environmental acceptability of and/or need for proposed thermal neutron power generation facilities or proposed sites for such facilities with specified general site-related characteristics, or to evaluate discrete, limited aspects, as established by the Commission, of the environmental acceptability of and need for proposed thermal neutron power generation facilities or proposed sites for such facilities with specified general site-related design characteristics. Within sixty days after receipt of such notice, the State shall notify the Commission whether it has made or will make any or all of the evaluations and determinations provided for by this section, and whether it has a program, approved by the Commission under subsection e., for making such evaluations and determinations.

"(2) If the Commission receives notice that the State will make all the determinations provided for by this section and has an approved program:

"(A) it shall not issue the site permit, construction permit, or combined construction permit and operating license for the facility, whichever is requested first, unless it is notified by the State that the State has determined that in the case of a construction permit or combined construction permit and operating license, construction and operation of the thermal neutron power generation facilities will be environmentally acceptable or, in the case of a site permit, that the State has determined that construction and operation of the thermal neutron power generation facilities with specified general site-related design characteristics will be environmentally acceptable; and

"(B) it shall not issue a construction permit or combined construction permit and operating license for the facility unless it is notified by the State that the State has determined that there is a need for the facility.

"(3) If the Commission receives notice that the State will make some of the evaluations and determinations provided for by this section and has an approved program:

"(A) it shall not, in the case of a site permit, construction permit, or combined construction permit and operating license for the facility, whichever is requested first, determine that in the case of a construction permit or combined construction permit and operating license construction and operation of the thermal neutron power generation facilities will be environmentally acceptable or, in the case of a site permit, determine that construction and operation of the thermal neutron power generation facilities with specified general site-related design characteristics will be environmentally acceptable, until it has received from the State such evaluations and determinations as the State has elected to make; and

"(B) it shall not, in the case of a construction permit or combined construction permit and operating license, determine that there is a need for the facility, until it has received from the State such evaluations and determinations regarding the need for the facility as the State has elected to make.

"(4) Evaluations and determinations shall be made by a State under this section in accordance with the National Environmental Policy Act of 1969, as amended.

"(5) Evaluations and determinations made by a State under this section and under its approved program shall not be subject to further review by the Commission and shall not be subject to challenge either before the Commission or in a Federal court review of Commission action under the National Environmental Policy Act of 1969, as amended.

"b. (1) Notice from a State to the Commission that it has made or will make all the determinations provided for by this section and has a program, approved by the Commission, for making such determinations, will discharge the Commission from its responsibilities under the National Environmental Policy Act of 1969, as amended, with regard to such determinations.

"(2) Notice from a State to the Commission that it has made or will make some of the evaluations and/or determinations provided for by this section and has a program, approved by the Commission, for making such evaluations and determinations, will discharge the Commission from any of its responsibilities under the National Environmental Policy Act of 1969, as amended, to prepare an assessment of those discrete aspects of environmental acceptability and/or need for power covered by such evaluations and/or determinations. The Commission shall use the evaluations and determinations prepared by a State under this section in discharging its remaining responsibilities under the National Environmental Policy Act of 1969, as amended.

"(3) If no notice is received within sixty days by the Commission, as provided in subsection a., then the Commission shall have the exclusive authority, except as provided in section 185 a. and b., as against the State, to determine whether the thermal neutron power generation facilities will be in compliance with the National Environmental Policy Act of 1969, as amended.

"c. If a State has made some or all of the evaluations and/or determinations provided for by this section with respect to proposed thermal neutron power generation facilities or proposed sites for such facilities, then the provisions of this section shall apply with respect to such evaluations and determinations to each successive application with respect to the same facilities or site. The ongoing responsibilities of any State with a program approved under subsection e. of this section for such evaluations and/or determinations under the National Environmental Policy Act of 1969, as amended, shall be the same as those of the Commission with respect to any application for a facility proposed to be located in a State that does not have a program approved under subsection e. of this section.

"d. Nothing in this section shall affect in any way the Commission's authority to protect the public health and safety and the common defense and security pursuant to the Atomic Energy Act of 1954, as amended, or the Energy Reorganization Act of 1974, as amended, to be construed as vesting the States with any such authority not contained in existing law. If notice is received by the Commission that a State will make all the determinations provided for by this section and has an approved program, the Commission shall, pursuant to the provisions of the National Environmental Policy Act of 1969, as amended, assess the environmental aspects of radiological safety impacts of the operation of the facility and prepare and forward to the State a statement of its analysis and conclusions of the nature and extent of such impacts. The State shall include the radiological safety impacts as set forth by the Commission in its statement of conclusions in the State's determination regarding environmental acceptability provided for by this section. The Commission's statement of conclusions of the nature and extent of radiological impacts shall not be subject to review in any State administrative or judicial proceeding.

"e. The Governor of any State electing to make any or all of the evaluations and determinations provided for in subsection a. of this section shall submit a program for making such evaluations and determinations to the Commission for review and approval. The Commission is authorized to approve a State program in whole or in part and to specify for which evaluations and determinations a State program is approved. The Commission is authorized, in consultation with other Federal agencies and the States, to establish

guidelines for use in reviewing the State programs. Any State program approved under this section shall include:

"(1) provisions to assure compliance by the State official or officials who administer the program with the National Environmental Policy Act of 1969, as amended, including consent by a State official to assume the status of a responsible federal official within the meaning of such Act and authority for and consent by the State official to accept the jurisdiction of the Federal courts for the purpose of enforcement and review of responsibilities under such Act;

"(2) provisions to assure that the State will give reasonable consideration to economically feasible alternative source of power including but not necessarily limited to conservation, solar energy, coal-fired generating plants, and other technologies and that, with respect to an application for a site permit, the State will find a generic need for power as provided in section 193 f.;

"(3) provisions to assure that the State will have adequate resources and expertise to consider environmental impacts of and/or the need for proposed facilities. State determinations regarding environmental acceptability shall include all relevant environmental considerations, including decisions on certifications and discharge permits under sections 401 and 402 of the Federal Water Pollution Control Act, as amended, decisions on certification concurrences under section 307 of the Coastal Zone Management Act of 1972, as amended, and any other State decisions required by Federal or State law to prevent or mitigate environmental impacts from siting, construction, or operation of the thermal neutron power generation facilities;

"(4) provisions to assure open and early public participation, including provisions for hearings on final determinations under this section, under procedures comparable to those that would be employed for such determinations by the Commission;

"(5) provisions to assure that coordinated and timely decisions are reached to carry out the purposes of the Act with respect to the issuance by the Commission of site permits, construction permits or combined construction permits and operating licenses, including the establishment of a schedule for completing the evaluations and/or determinations provided for by this section;

"(6) provisions to assure that where more than one State agency is involved, an agency is designated to coordinate, direct and combine the reviews of all of the involved agencies and to cooperate with Federal authorities to insure adherence to the schedule established under paragraph (5);

"(7) provisions to assure coordination with related Federal reviews and for mutual assistance between Federal and State agencies to avoid duplication;

"(8) provisions to assure that, if the State elects to assume less than full responsibility for determining the environmental acceptability of and need for the thermal neutron power generation facility, the State, in consultation with the Commission, shall coordinate its evaluations and determinations with those of the Commission in order that the Commission may in a timely fashion make the determinations required by the National Environmental Policy Act of 1969, as amended; and

"(9) provisions to assure consideration of regional factors in determining environmental acceptability and need for power and that there is opportunity for participation of adjacent States, when affected.

"f. States are encouraged to establish and participate in interstate or regional organizations which, among other things, may discharge the State's responsibilities for determining need for power and/or determining whether the thermal neutron power generation facilities will be environmentally acceptable or evaluating such discrete, limited aspects thereof as the Commission may permit. Upon notice by a State to the Commission that such a regional or interstate organization is designated to act for it, the provisions of this section shall be applicable to that organization.

"g.(1) The Commission is authorized to review any program approved under this section and the performance of each State.

"(2) The Commission shall have the authority to suspend or terminate any financial assistance extended under this section and to suspend or terminate its approval of a State program if:

(A) it determines that the State is failing to adhere to the program approved by the Commission; and

(B) the State has been given notice of the proposed termination and withdrawal and given an opportunity to demonstrate compliance with its program.

"(3) If a State program is terminated or suspended, the appropriate Federal agency may take into account such record as may have been established in any proceeding pending at the time of termination or suspension, so as to avoid undue delay and duplication of State actions.

"h. States with programs approved under this section and States providing information and assistance as provided by subsection i. of this section may request and receive the assistance of Federal agencies, including national laboratories. The Federal agencies are authorized to provide such assistance, which may include manpower training, the loan of personnel, and such studies and data as may be required by the State to discharge its responsibilities under the approved program or under subsection i. of this section.

"i. Any State that does not have a program approved by the Commission under subsection e. may provide to the Commission such information and assistance with respect to the evaluations or determinations provided for by this section as the State may deem appropriate. Such information and assistance may include any decisions regarding the need for and any data, analyses, conclusions, findings and/or decisions regarding any or all environmental impacts (except radiological safety impacts of the operation of the facility) of the proposed thermal neutron power generation facilities. The Commission may rely on such data, analyses, and conclusions in discharging its responsibilities under the National Environmental Policy Act of 1969, as amended. Paragraph (5) of subsection a. shall not apply to such information and assistance.

"j. The Commission is authorized to make annual grants to any State or authorized interstate or regional agency for the purpose of assisting in the development or administration of a program specified in this section or the providing of information and assistance as provided by subsection i. of this section. Such grants shall be allocated among States and authorized interstate or regional organizations based on rules and regulations promulgated by the Commission. A State or authorized interstate or regional organization may, subject to the criteria contained in section 197 and the rules and regulations of the Commission issued pursuant thereto, use that portion of the money received under this subsection as may be permitted by the Commission to fund intervenors in proceedings held in furtherance of such State or interstate or regional organization's responsibilities under this section or under section 185 a. or b. There are authorized to be appropriated for this purpose such sums as may be necessary for the fiscal year ending September 30, 1979.

"k. Except as expressly provided by this section, the responsibility of the Commission or any other Federal agency to comply fully with the requirements of the National Environmental Policy Act of 1969, as amended, shall not be changed."

FEDERAL AND STATE COORDINATION

SEC. 203. The Atomic Energy Act of 1954, as amended, is amended by adding a new section 196 to read as follows:

"SEC. 196. FEDERAL AND STATE COORDINATION.—

"a. With respect to any application for a site permit, for approval of a standardized facility design, for a construction permit and/or operating license, or for a manufacturing license, the Commission shall establish a schedule for the conduct and completion of all required Commission reviews and decisions. The Commission is authorized to cooperate with other Federal and State or regional agencies with review and/or decision-making authority regarding the siting, licensing, construction, or operation of nuclear power reactor facilities in order to eliminate duplication of effort, establish a common data base for similar reviews and decisions, and assure timely decisions. The Commission shall establish, after consultation with the interested Federal and State or regional agencies, target dates consistent with the Commission schedule for completion of agency reviews and decisions. All Commission cooperative efforts, including establishment of schedules and target dates, shall be accomplished in a manner consistent with the statutory obligations of all Federal and State or regional agencies, and the Commission shall have no authority to require any agency to reach a particular decision on the merits of any matter pending before it. Neither the establishment of a schedule or target date by the Commission nor the failure of any affected Federal, State or regional agency to meet a target date shall be subject to judicial review, whether in a proceeding to review or set aside an individual affected Federal, State or regional agency decision, or otherwise.

"b. The Commission or a State that is making all the determinations provided for by section 195 shall be the lead agency for purposes of the preparation of any environmental impact statement required by section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, for any action taken under this Act.

BULK ELECTRIC POWER

SEC. 204. The Atomic Energy Act of 1954, as amended, is amended by adding a new sentence at the end of section 271 to read as follows:

"Nothing in this Act shall be construed to imply any delegation of authority to any State, political subdivision thereof or other authorized public authority to regulate, obstruct or burden commerce in bulk electric power."

TITLE III—INTERVENORS

FUNDING FOR INTERVENORS

SEC. 301. The Atomic Energy Act of 1954, as amended, is amended by adding a new section 197 to read as follows:

"SEC. 197. FUNDING FOR INTERVENORS.—

"a. (1) The Commission is hereby authorized to establish a pilot program for funding intervenors in initial or renewal licensing proceedings, including site permit, construction permit and/or operating license and amendment proceedings, but not including any proceeding for an export license, conducted by the Commission pursuant to the Atomic Energy Act of 1954, as amended, or the Energy Reorganization Act of 1974, as amended. The Commission may, in its sole discretion, also extend the pilot program to selected rulemaking proceedings conducted by it.

"(2) This section does not authorize the payment of funds for merely attending, as opposed to participating as a party in, Commission proceedings, nor for proceedings where the cost of participation is minimal.

"(3) This section does not create any new right to participate in any Commission proceeding which is not authorized by other provisions of law.

"b. The Commission shall, upon request and subject to available appropriations, the eligibility criteria set forth below, and any allocation determination under this subsection, pay for all or part of the cost of intervention of a party, including attorneys' fees, in Commission proceedings of the type described in subsection a. The amount paid, if any, need not cover all the costs of intervention and shall be determined based upon the intervenor's contribution to the proceeding, the provisions of this subsection and subsections f. and g., and procedures and criteria established by the Commission by rule or regulation for determining the eligibility of intervenors for funding and the amount of funds to be provided. These criteria shall include requirements to establish the following:

"(1) the intervenor's interest in the matter;

"(2) that the intervenor does not have reasonable access to alternative sources of funds;

"(3) that the intervention would not occur or its effectiveness would be significantly limited in the absence of funding;

"(4) that the intervenor's participation is likely to lead to presentation of substantive arguments and/or views that would not otherwise have been presented; and

"(5) that presentation of such views can reasonably be expected to contribute substantially to a fair determination in the proceeding.

The Commission shall by rule, regulation or order, allocate available funds for costs of intervention to types or classes of proceedings.

"c. Payments shall be made following the proceeding unless the intervenor establishes to the satisfaction of the Commission that advance payments are required in order that its participation not be substantially impaired.

"d. A person who receives payments after a final decision or order pursuant to this section or advance payments pursuant to this section shall be liable for repayment of part or all of such payments actually received, or for forfeiture of part or all of such payments for which such person is otherwise determined to be eligible, whenever the Commission determines that:

"(1) the person clearly has not provided the representation for which the payments were made or authorized; or

"(2) the person has acted toward any other participant or the Commission in such a way as to unjustifiably delay, mislead, or otherwise frustrate the objectives of the proceeding.

"e. The amount of costs of intervention awarded under this section for a particular proceeding shall be based upon the appropriations available and the prevailing market rates for the kind and quality of the services furnished, except that no expert, consultant or attorney shall be compensated at a rate in excess of the highest rate of compensation for experts, attorneys and consultants paid by the Commission.

"f. Whenever applications for payment under this section are submitted by more than one intervenor, the Commission may require consolidation of duplicative presentations, select one or more effective representatives to participate, offer compensation only for certain categories of expenses, or jointly compensate parties representing identical or closely related viewpoints.

"g. Any decision of the Commission made pursuant to this section shall be subject to review in court to the same extent as any other Commission decision, notwithstanding the fact that such decision may be interlocutory in nature, except that the courts of the United States shall have no jurisdiction to stay, restrain or otherwise enjoin the proceedings of the Commission based on an alleged violation of this section, nor shall the courts of the United States have jurisdiction to reverse, remand or otherwise require reconsideration of any other Commission decision solely on the basis of a Commission decision under this section, except where there has been a clear abuse of Commission discretion.

"h. The Commission shall, within ninety days after the date of enactment of this section, propose regulations to carry out the provisions of this section. Such regulations shall be adopted by the Commission and take effect no later than one hundred eighty days after the date of enactment of this section.

"i. Authority to fund intervenors under this section shall expire on December 31, 1983, except that the Commission may continue to fund intervenors in proceedings which were underway on that date and where applications for funding in such proceedings were already filed with the Commission before that date. On or before December 31, 1982, the Commission shall prepare and transmit to the Congress a report on the impact and effectiveness of this section."

"j. There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

TITLE IV—CONFORMING AMENDMENTS

ADVISORY COMMITTEE ON REACTOR SAFETY

SEC. 401. Section 29 of the Atomic Energy Act of 1954, as amended, is amended by deleting "Safeguards" wherever it appears and inserting in lieu thereof "Safety"; and in the second sentence by inserting ", as provided in section 182 b.," after the words "the Committee shall"; by deleting the word "and" after the word "studies" and inserting a comma in lieu thereof; by deleting the words "referred to it" after the word "applications" and by inserting in lieu thereof the words ", site permit applications, and proposed rules approving standard facility designs".

ANTITRUST PROVISIONS

SEC. 402. Section 105 c. of the Atomic Energy Act of 1954, as amended, is amended in the first sentence of paragraph (2) by inserting "and/" after the word "construct".

GENERAL PROVISIONS

SEC. 403. Section 161 O. of the Atomic Energy Act of 1954, as amended, is amended by inserting the words "authorized by section 193 or conducted" after the word "activities" the second time such word appears.

REVOCATION

SEC. 404. Section 186 a. of the Atomic Energy Act of 1954, as amended, is amended by inserting the words "or site permit" after the word "license" wherever it appears: and by inserting the words "or section 193" after the words "section 182".

MODIFICATION OF LICENSE AND SITE PERMITS

SEC. 405. Section 187 of the Atomic Energy Act of 1954, as amended, is amended by inserting the words "and site permits" after the word "licenses".

JUDICIAL REVIEW

SEC. 406. Section 189 b. of the Atomic Energy Act of 1954, as amended, is amended by adding a new sentence at the end thereof to read as follows:

"Decisions made by the Commission as provided in section 197 shall be subject to judicial review as provided in section 197, and shall not be subject to judicial review as part of the final Commission order in the proceeding."

ATOMIC SAFETY AND LICENSING BOARD

SEC. 407. Section 191 a. of the Atomic Energy Act of 1954, as amended, is amended by deleting the word "or" after the word "license"; inserting a comma in lieu thereof; and by inserting ", or site permit" after the word "authorization".

TITLE V—EFFECTIVE DATES

SEC. 501. a. Sections 104, 105, 106, 201, 203 and 204 shall take effect as of the date of enactment, and shall apply to all proceedings pending as of the date of enactment or commenced on or after the date of enactment.

b. Sections 102, 103, 401, 402, 403, 404, 405, 406 and 407 shall be effective as to all applications filed with the Commission on or after the date of enactment.

c. Section 301 shall be effective as to all applications filed with the Commission on or after one hundred eighty days after the date of enactment.

d. Sections 101 and 202 shall take effect one year after the date of enactment and shall be effective as to all applications filed with the Commission on cr after that date.

SECTION-BY-SECTION ANALYSIS

Section 2. Findings & Purposes.

Subsection a. sets forth Congressional findings, relating to the need for developing a more effective and efficient licensing process by facilitating siting, construction and operation of nuclear power plants consistent with sound environmental controls. These include a finding of an effect on interstate commerce of the siting, construction and operation of nuclear power plants; a finding that determinations respecting site-specific environmental impacts and general need for electric generating capacity should be made by competent State or regional authorities except where States do not elect to make such determinations or fail to make such determinations in a timely manner; a finding of the need for advance planning and public participation; and a finding of the need for a balanced consideration of alternate sources of energy. Additional findings include a recognition that siting and construction of nuclear power plants may be facilitated by use of standard nuclear power plant designs which reduce tho need for individual licensing reviews; and a finding that the national interest would be served by the Nuclear Regulatory Commission ("NRC") continuing to exercise its independent statutory responsibilities for the protection of the public health and safety and the common defense and security. This finding recognizes that absolute safety is an unattainable goal for any energy source, and that the NRC should consider the costs involved in prescribing additional safety requirements. However, adequate protection of the public health and safety in accordance with high standards is the paramount consideration.

Subsection b. sets forth the purposes of the legislation, including improving the effectiveness and efficiency of the nuclear power plant licensing process, consistent with sound environmental, safety and security principles; insuring early and open advance planning and public participation; recognizing the interests of regions, States, and subdivisions within a State in the siting process; facilitating the use of standardized facility designs, and maximizing cooperation and coordination between the Federal Government and the States.

TITLE I—PLANNING, SITING AND LICENSING

Section 101. Advance Planning and Early Notice.

This section amends the Atomic Energy Act of 1954, as amended ("AEA") by adding a new section 112 to provide the NRC with the authority to encourage open and advance planning.

Subsection a. of section 112 authorizes the NRC to take such action as it may deem necessary or desirable to encourage persons proposing to construct and/or operate

nuclear power plants or to obtain site permits for such facilities to engage in open and advance planning, with opportunity for participation by the NRC and by interested persons. As part of the planning process, this subsection provides that projections of future energy supply and demand available at that time should be considered. It mandates establishment of guidelines for participation in such planning and authorizes the NRC to establish priorities for license and permit reviews to encourage advance planning. Such guidelines and priorities must be published in the *Federal Register* and an informal public hearing is to be held to consider comments prior to issuance of final guidelines. One goal of this advance planning process is to identify and resolve problems early in the process with ample opportunity for public participation.

Subsection b. of section 112 directs the NRC to require anyone applying for approval of a standardized facility design, a construction permit and/or an operating license for a commercial or industrial production or utilization facility, or a site permit for such a facility, to provide a notice of intent to file an application for such permit, license or approval to the NRC and the state in which the facility will be located not less than 6 months prior to the filing of the actual application. Such notice shall be published in the *Federal Register* and twice in such major newspapers serving the affected areas as may be reasonably calculated to notify concerned or affected persons. In the case of an application for a standardized facility design, newspaper publication must assure a broad national circulation.

Subsection c. of section 112 directs the NRC to participate in the adequacy and reliability programs of the Department of Energy.

Section 102. Construction Permits and Operating Licenses.

This section amends section 185 of the AEA by deleting language providing that a construction permit must specify the earliest and latest dates for completion and that failure to complete a facility by the stated date shall result in forfeiture of the permit, absent good cause shown. This section also adds two new subsections to section 185.

Subsection a. of section 185 authorizes the NRC to grant a construction permit for a production or utilization facility and, upon additional findings, to grant an operating license. The NRC would not be authorized to grant a construction permit for a thermal neutron power generation facility unless the State or appropriate political subdivision within the State or other authorized public authority certified to the NRC the specific need for the facility. Such certification is effective only if made after a hearing held under procedures comparable to those of the NRC. A political subdivision within a State might have direct authority over a municipally-owned generating facility and would be, therefore, the appropriate body to issue the certification. An authorized public authority may be called upon to certify the need for the facility in those States in which public power authorities are not directly regulated by the State. If no public authority is authorized to issue such certification, the requirement for certification of the need for the facility shall be waived. This requirement for a certification of need for the facility provides the State, political subdivision, or public authority with explicit veto authority over the licensing of nuclear power plants in its jurisdiction. Unless the certification is made, the NRC is prohibited from issuing the construction permit. Once such certification is made, it shall be deemed to be conclusive for any other "need for power" requirements in this Act and any other Federal law. Under this section, an applicant will have to supply the State or other entity holding the certification hearing with a detailed statement supporting the need for power and listing possible conservation alternatives. In a judicial review of any determinations made in a certification hearing held under this section, the State or other entity that held the hearing shall defend such action in Federal Court. This subsection also requires the NRC to provide for on-site inspection of the construction of the facility to insure conformity with the permit and with the rules and regulations of the NRC.

Subsection b. of section 185 authorizes the issuance of a combined construction permit and operating license for a thermal neutron power generation facility, if the application contains sufficient information to support the issuance of both a construction permit and operating license. This would require the approval of a final facility design, a requirement for issuance of an operating license under current authorities. Issuance of the combined permit and license also requires a certification of need for the facility and NRC on-site inspection of the construction, as in subsection a. Certification of the need for the facility under this subsection will be determinative of the issue of need for power, as in subsection a. Notice of intended operation under a combined construction permit and operating license shall be published by the NRC, and operation shall be permitted by the NRC only upon a finding that the facility has been constructed and will operate in accordance with the combined permit and license, the provisions of this Act, and with the rules and regulations of the NRC. The requirements that on-site inspection be provided and that findings be made prior to commencement of operation are intended to emphasize and reinforce the on-going responsibility of the NRC to protect the public health and safety.

Subsection c. of section 185 authorizes the NRC to permit an applicant for a construction permit or a combined construction permit and operating license for a production or utilization facility to prepare the proposed facility site and perform such limited construction activities as the NRC deems permissible upon (1) determining that all findings required to be made under the National Environmental Policy Act of 1969, as amended ("NEPA"), have been made; (2) finding that there is reasonable assurance that the proposed site is suitable for the proposed facility from the standpoint of the protection of the health and safety of the public, and (3) determining, if any safety-related construction activities are sought to be undertaken, that there are no significant unresolved public health and safety issues. This subsection specifically provides that such construction shall be conducted at the risk of the applicant and shall be subject to termination or modification at any time. Any safety-related construction shall be limited to one year unless extended by the NRC.

At the risk of the applicant means that such things as activities undertaken by the applicant shall not prejudice subsequently safety or other reviews by the NRC or the decision by the NRC upon the application.

Subsection d. of section 185 provides that this section does not affect the authority of any State or local governmental unit regarding the issuance of any license or permit for a production or utilization facility.

Subsection e. of section 185 provides that nothing in this section shall affect the existing requirement that antitrust review, including a hearing on antitrust issues where necessary, be completed prior to the issuance of a construction permit or a combined construction permit and operating license.

Section 103. Hearings.

The hearing provisions of the AEA are substantially modified by this bill. The basic intent underlying these changes is to provide full opportunity for hearing on any issue but to preclude subsequent relitigation of issues if there has been an opportunity for hearing in a prior NRC or State proceeding. The intended effect of the section is to encourage consideration and resolution of issues at the earliest possible stage in the proceedings so that only a limited number of issues would remain to be addressed at a subsequent hearing.

Subparagraph (1)(A) of subsection a. of section 189 provides that hearings will be held only upon request in most proceedings, and includes proceedings for an amendment or renewal of a site permit or an approval of a standardized facility design among those proceedings for which a person whose interest may be affected may request such a hearing. The NRC would be required to hold a hearing in any proceeding for the granting of a site permit, the approval of a standardized facility design or major subsystem thereof or for the issuance of a combined construction permit and operating license.

Subparagraph (1)(B) hearings on proceedings covered by this paragraph shall be adjudicatory with respect to all issues arising under the AEA. Subparagraph (1)(C) of the bill changes current NRC practice by providing "hybrid" hearings for issues arising under NEPA, that is, legislative hearings (oral presentations with questioning by the presiding officer, no cross examination) on most issues with adjudicatory hearings (trial-type format with testimony under oath and cross-examination) only where necessary to resolve particular factual or legal questions which are essential to the outcome of the proceedings.

Recently enacted nonproliferation legislation provides that procedures for export licensing proceedings shall be determined exclusively under its provisions. Section 189 a. explicitly recognizes this exception to its provisions.

Subparagaph (1)(D) of subsection a. of section 189 restates existing law concerning conduct of other NRC rulemaking proceedings. Under the Administrative Procedure Act, public participation in these proceedings is usually in the form of an opportunity to provide written comments.

Paragraph (2)(A) of subsection a. of section 189 provides for notice to be placed in the *Federal Register* and twice in the appropriate newspapers within 30 days after receipt of applications listed therein relating to the siting, licensing or operation of a facility and at least 180 days prior to the granting of any such application, that the NRC will grant a hearing upon request of any person whose interest may be affected. For granting a combined construction permit and operating license, a site permit, or an approval of a standardized final design or a major subsystem thereof, the same 180 days notice shall be given, except that in these cases, a hearing by the NRC shall be mandatory. Applications for certain amendments and rules would only require thirty days notice prior to the granting of such amendments and rules, but the NRC could dispense with the 30 days notice upon a determination that there is no significant additional risk to the public health and safety. In such circumstances, the NRC shall publish notice of the issuance of such amendment. Within 30 days of receipt, the NRC is required to publish in the *Federal Register* and in such major newspapers serving the affected area as may be reasonably calculated to inform concerned people, notice of receipt of a request for limited work authorization and that the NRC will grant a hearing on the findings required by section 185 c.

upon the request of any person whose interest may be affected.

Paragraph 2(B) of subsection a. of section 189 provides for *Federal Register* notice at least 180 days prior to commencement of operation under a combined construction permit and operating license. The NRC will grant a hearing on the commencement of operation of a facility for which such a combined construction permit and operating license has been issued upon the request of any person whose interest may be affected. A hearing on commencement of operation will only be held upon a prima facie showing by the person requesting the hearing that significant new information or issues, or a violation of a permit or license, requires some modification of the facility or other appropriate action for the public health and safety, or the common defense and security, or the protection of the environment. Information as to a pre-existing condition that only becomes available after a previous hearing is included within the scope of "significant new information."

Paragraph 2(C) of subsection a. of section 189 provides that the scope of any hearing under paragraph 2 will be limited to issues for which there was no opportunity for hearing in a prior proceeding before the NRC or a State unless there is a prima facie showing that significant new information relevant to the issue has been discovered since the prior proceeding that would make it likely that the site or facility design would conflict with this Act or the NRC's regulations for protection of the public health and safety, the common defense, or the environment. The purpose of this provision is to prevent, absent the requisite showing, the relitigation of issues which could have been raised in an earlier proceeding. The NRC shall establish procedures for how it will implement the hearing limitation of making a prima facie showing.

Paragraph (3) of subsection a. of section 189 authorizes the NRC to issue, in the case of a production or utilization facility, an interim operating license or amendment to an operating license, or to allow interim operation of a facility prior to the conduct or completion of any required hearing on the license or amendment. Prior to issuing such interim amendment, and at least 30 days prior to issuing an interim license or allowing interim operation, the NRC shall request comments by publishing a notice in the *Federal Register* and in major newspapers serving the affected area. The notice shall provide that the NRC itself shall hold a hearing as to whether such action is, in the case of an interim operating license or in the case of allowing interim operation, necessary because of an urgent public need or emergency or, in the case of an interim amendment to an operating license, necessary in the public interest. Such hearing and decision shall be formal or informal, at the discretion of the NRC. In the case of an interim operating license or allowing interim operation of a facility for which a combined construction permit and operating license had been issued, such hearing shall be held either before or after the expiration of the 30-day notice period. NRC decisions on hearing and decision procedures shall not be subject to judicial review.

Section 104. Interim Operating Authority.

This section amends section 192 of the AEA by deleting that section and adding a new section 192. The earlier section 192 provided for temporary operating authority but by its own terms lapsed in 1973. This section was added because of the strongly-perceived need for interim authority in certain cases before the hearing on an operating license or amendment thereto was completed.

Subsection a. of section 192 authorizes the issuance of an interim operating license or an interim amendment to an operating license for a production or utilization facility and allows interim operation of a facility for which a combined construction permit and operating license had been issued prior to the conduct or completion of any required hearing. Authority for the NRC to issue an interim operating license is needed to expedite the testing and operation of new facilities which may be needed due to an urgent public need or emergency, while the interim amendment to an operating license may be needed so that an existing facility can continue to provide power where required in the public interest. Application for such authority by an applicant must be in writing and must show the need for such authority.

Paragraph (1) of subsection b. of section 192 provides that the NRC Commissioners must find that there is an urgent public need or emergency prior to the issuance of an interim operating license or prior to commencement of interim operation under a combined construction permit and operating license. The Commissioners must also find that the appropriate hearings provided under section 189 have been completed on any significant, site-specific issue presented in such hearing pertaining to public health and safety or the common defense and security.

Paragraph (2) of subsection b. of section 192 provides that prior to the issuance of an interim amendment to an operating license, the NRC Commissioners must find that the issuance of such amendment is in the public interest and the Commissioners or their designee must find that all requirements of the AEA, NEPA, and the rules and regulations of the NRC have been met, other than the conduct or completion of any required hearing.

Paragraph (1) of subsection c. of section 192 specifies that issuance of the interim license or amendment or interim operation shall be for a period not to exceed 12 months unless extend for good cause.

Paragraph (2) of subsection c. of section 192 provides that the NRC shall place such conditions in the interim license or amendment or on interim operation as are necessary to insure compliance with any subsequent NRC findings as a result of completion of the hearing process under section 189a.

Section 105. Early Site Approval.

This section adds a new section 193 to the AEA to authorize the approval of one or more sites for thermal neutron power generation facilities prior to the filing of any application to construct or operate such facility or facilities. The purpose of this authorization is to permit the resolution of site-specific questions at an early stage in the licensing process. This would serve to focus public participation on a crucial aspect of the overall facility planning and construction process at an early point in time when public participation can be most effective. This provision is an integral part of the effort to promote the early, effective and efficient resolution of issues in the licensing process.

Subsection a. of section 193 provides that an application for early site approval may be filed by any person, and the NRC is authorized to issue a site permit even though no application for a construction permit or a combined construction permit and operating license has been filed.

Subsection b. of section 193 outlines some of the information that the NRC shall require to be included in the written application for a site permit. Such information shall include the number, type or types, and location of such facilities, proposed maximum levels of thermal power and radiological and thermal effluents, the seismic, meteorological, hydrologic and geological characteristics of the proposed site.

Paragraph (1) of subsection c. of section 193 requires the issuance of a site permit after holding a hearing as provided by section 189 a. (1), if the NRC finds that the proposed site is suitable for the construction and operation of the type of facility described in the application consistent with the public health and safety and protection of the environment. A site permit may be issued with or without conditions.

Paragraph (2) of subsection c. of section 193 provides that the NRC shall state in writing its findings regarding the suitability of the proposed site or sites.

Paragraph (3) of subsection c. of section 193 provides that an NRC determination on a site permit application filed pursuant to this section shall be a final order of the NRC for purposes of judicial review.

Paragraph (1) of subsection d. of section 193 provides that a site permit shall be valid for a facility for which an application for a construction permit or a combined construction permit and operating license is filed within ten years from the date of issuance of the site permit.

Subparagraph (2)(A) of subsection d. of section 193 provides that the NRC may renew a site permit for additional ten-year periods from the date of renewal. Application for renewal of a site permit must be filed no less than eighteen nor more than forty-eight months prior to the expiration of the ten-year period originally granted.

Subparagraph (2)(B) specifies that the NRC shall renew a site permit for which a timely renewal application has been filed unless it finds that significant new information relevant to the site has become available and that, as a result, it is likely that the site will not comply with the AEA or with NRC regulations for protection of the public health and safety, the common defense and security, or the environment.

Paragraph (3) of subsection d. of section 193 establishes limitations on the use of a site permit by providing that the maximum levels of power, radiological effluent and air emissions and thermal effluent specified in the site permit cannot be exceeded by the proposed facility or facilities. Any proposed facility or facilities must also meet such other criteria as the NRC may establish.

Subsection e. of section 193 provides that any applicant for a construction permit or a combined construction permit and operating license for a thermal neutron power generation facility to be located on a previously approved site, upon 30 days' prior written notice to the NRC and to the State in which the site is located, upon publication of such notice twice in appropriate newspapers, and unless otherwise ordered by the NRC or the State, may prepare the approved site for construction and perform such limited construction as may be permitted. The applicant shall proceed at it's own risk and no activities by the applicant shall in any way prejudice subsequent review and decision by the NRC. Any safety-related construction activities shall be limited to one year from the commencement of such activities unless extended by the NRC. No State or local authority with respect to site preparation work or construction activities has been affected by this subsection.

The intent of this subsection is to allow the applicant to proceed with its site preparation and limited construction as quickly as possible, with no formal procedures to follow. Site suitability and environmental acceptability will have been determined at the site permit stage. Work shall continue unless ordered otherwise by the NRC or the State. There is no requirement that the finding of a specific need for the facility be made prior to work under this subsection.

Subsection f. of section 193 provides that for purposes of any evaluations and determinations required by NEPA, the determination of need for power at the proposed site may be based on a projection of generic future need for electric power facilities, whether such projection is made by the NRC, a State or a regional organization. Because

a site may not be utilized for many years, it is not necessary to find an actual need for the facility at the time of site approval. A generic determination that a need for the facility will exist in the future will be sufficient. At the time that a construction permit is applied for, the requirement for the issuance of a certification of need for power will insure that there is a need for such facility prior to its construction.

Subsection g. of section 193 provides that a site approved under this section for the location of one or more thermal neutron power generation facilities does not preclude that site from being approved or used as a site for an alternate type of energy facility. This paragraph is intended to emphasize that early site approval will not prejudice a land use plan or future planning involving other types of energy facilities.

Subsection h. of section 193 provides that there may be determinations respecting selected site-related issues in addition to full site approval. In situations where an applicant may not wish to seek full site approval at an early date, the applicant will still be able to resolve certain site-related issues at this early stage prior to the construction permit or combined construction permit and operating license proceeding.

Section 106. Approval of Standardized Facility Designs.

This section amends the AEA to add a new section 194, which provides for approval of standardized facility designs for thermal neutron power generation facilities. As with early site approvals, this section is intended to promote early resolution of design-related issues with full opportunity for participation by interested persons. Although the NRC currently has procedures for approving standardized designs, this section gives explicit statutory sanction to the standardization concept and establishes requirements for NRC approval of standardized designs.

Subsection a. of section 194 authorizes the NRC to approve the preliminary or final design through a rulemaking or manufacturing license proceeding. Prior to the approval, the NRC shall hold a hearing as provided by section 189(a)(1). The NRC is authorized to approve a design for a thermal neutron power generation facility, even though no application for a construction permit or combined construction permit and operating license has been filed by the applicant.

Subsection b. of section 194 authorizes the NRC to approve preliminary or final standardized designs for major subsystems of a thermal neutron power generation facility. Such authorization is needed when full standardization may not be possible, but approval of a major subsystem representing a discrete element of the facility is desired.

Subsection c. of section 194 provides that notwithstanding section 161 w. of the AEA or the Independent Officer Appropriation Act of 1952, no application filing or issuance fees shall be required for an application for approval or for an amendment or renewal of an approval of a standardized facility or major subsystem design. The NRC is authorized to allocate the costs that would otherwise have been defrayed by fees collected among future applicants for permits or licenses which propose to use the approved standardized design. This provision is added as an incentive to vendors and architect-engineer firms to develop and seek approval for standardized designs. The very high fees have acted as a deterrent to applications for such approvals in the past.

Paragraph (1) of subsection d. of section 194 provides that a standardized facility design shall be valid with respect to an application for a construction permit or a combined construction permit and operating license which meets the conditions of the rule or license and is filed within five years from the date of approval of the design.

Subparagraph (2)(A) of subsection d. of section 194 provides that a standardized design may be renewed for additional three-year periods, upon application to the NRC no less than twelve nor more than eighteen months prior to the expiration of the original five-year period by the person to whom the rules or license was issued.

Subparagraph (2)(B) of subsection d. of section 194 provides that in cases where there is a timely application for renewal of a standard design approval, the NRC shall renew the design approval unless it finds that significant new information relevant to the design has become available since the prior proceeding for approving the design and that, as a result, it is likely that the design will not comply with the AEA or NRC regulations for protection of the public health and safety or common defense and security.

Subsection e. of section 194 directs the NRC to determine whether or not any pending applications for construction permits already filed with the NRC propose to employ designs which could qualify as standardized facility designs under this section. The NRC shall publish a list of all such facilities that qualify in the *Federal Register*. This subsection is intended to cover applications that are already in the pipeline. In order for this Act to affect the current licensing process as quickly as possible, it is important to have its provisions apply to existing applications where possible. This subsection seeks to identify existing projects which may qualify as standard designs.

Subsection f. of section 194 preserves the NRC's existing rulemaking authority in accordance with section 553 of Title 5 of the United States Code to set standards and criteria for production or utilization facility designs, or to approve the preliminary or final designs for minor subsystems of thermal neutron power generation facilities, as defined by the NRC, or to approve the preliminary or final design for production or utilization facilities other than thermal neutron power generation facilities.

Subsection g. of section 194 provides that final NRC determination on applications for the issuance, renewal or modification of a rule or manufacturing license approving a preliminary or final standardized design for a thermal neutron power generation facility or a major subsystem thereof will be a final order for the purposes of judicial review.

TITLE II—FEDERAL AND STATE REVIEWS

Section 201. License Applications.

This section changes the name of the Advisory Committee on Reactor Safeguards to the Advisory Committee on Reactor Safety to more appropriately identify its jurisdiction and responsibilities. This section amends subsection b. of section 182 of the AEA to include among the applications to be reviewed by the Advisory Committee on Reactor Safety applications for a manufacturing license, a construction permit and operating license and a site permit, a proposed rule approving a standardized facility design under section 194 a. or b., and any amendments or renewals to the above specifically referred to the Committee by the NRC.

Unless specifically asked by the NRC to conduct a review, the Committee may dispense with its review on an application, in whole or in part, by notifying the NRC in writing that all or part of such review is not warranted, except with respect to its review on an application for approval of a standardized facility design or for facilities other than thermal neutron power generation facilities.

The Committee is given discretionary authority to dispense with reviews where warranted because of the work demands on the Committee. Eliminating the need to review every application in detail will enable the Committee to focus attention on those applications with the more significant safety considerations. Any decision that a review is not warranted shall be published and shall be made part of the record in the proceeding.

Section 202. State Environmental Reviews.

This section amends the AEA to add a new section 195 which provides the opportunity for States to discharge some or all of the NRC's responsibilities under NEPA or to otherwise have a more direct role in the review process. Current Federal law requires full environmental impact evaluation by the NRC while many State laws impose similar responsibilities on State authorities. Because of the duplication of effort associated with such dual reviews and because the majority of the issues involved in environmental acceptability and need for power determinations are particularly important to and within the competence of States, it is appropriate that those States electing to do so be authorized to make these determinations for thermal neutron power generation facilities. Such determinations are authorized at the earliest point in the proceedings, so that the NRC's NEPA responsibilities may be discharged at the site approval stage, when applicable.

Paragraph (1) of section 195 a. provides for notice to be given by the NRC to the affected State within 10 days following the filing of an application for a site permit, construction permit or combined construction permit and operating license for a thermal neutron power generation facility, whichever is first filed with respect to a specific site. Within 60 days, the State shall notify the NRC whether it has made or will make any or all of the evaluations and determinations relating to environmental acceptability and/or need for power and whether it has a program approved by the NRC for making such evaluations and determinations. The State is given the option in this subsection to decide whether it wants to make all of the necessary determinations and evaluations, whether it wants to make only some of them, or whether it chooses not to make any of them.

Paragraph (2) of subsection a. of section 195 provides that if the State elects to make all the determinations and has an approved program, the NRC will not issue the requested permit or combined permit and license until notified by the State that construction and operation of the proposed facility will be environmentally acceptable and, except for a site permit, that there is a need for the facility. A State determination that construction will be environmentally acceptable includes those cases in which environmental acceptability is contingent upon successful performance of a required condition.

Paragraph (3) of subsection a. of section 195 provides that if a State elects to make some, but not all, of the evaluations and determinations provided for by this section, the NRC shall not determine environmental acceptability or need for power prior to receiving such evaluations and determinations.

Paragraph (4) of subsection a. of section 195 provides that State evaluations and determinations on environmental acceptability and need for power issues shall be made in accordance with NEPA.

Paragraph (5) of subsection a. of section 195 provides that evaluations and determinations made by a State under its approved program will not be subject to revision by the NRC under NEPA and shall not be subject to challenge either before the NRC or in a Federal court review of NRC action. The intent of this paragraph is to insure that once a state has acted pursuant to an approved program, and such action is judicially reviewed, such action should be final and not reviewable again.

Paragraph (1) of subsection b. of section

195 provides that notice from a State that it has an approved program and that it will make all the determinations provided for by section 195 discharges the NRC of its responsibilities under NEPA regarding such determinations.

Paragraph (2) of subsection b. of section 195 applies a similar principle to the extent that States elect to make some but not all of the determinations provided for by section 195. NRC would use the State evaluations and determinations in discharging its remaining NEPA responsibilities.

Paragraph (3) of subsection b. of section 195 provides that if no notice from the state is received within 60 days, the NRC shall have exclusive authority, except with respect to the definitive certification of need for the facility by the State at the construction stage, to determine whether the thermal neution power generation facilities will be in compliance with NEPA. This exclusive authority only applies to compliance under NEPA and does not affect State or local authority under State or local statutes.

Section c. of section 195 provides that once a State elects to make some or all of the evaluations and/or determinations under this section, then the provisions of this section shall continue to apply in all succeeding proceedings with respect to the same facilities or site. This paragraph also defines the ongoing responsibilities of a State for such evaluations and/or determinations under NEPA pursuant to an approved program to be the same as those of the NRC with respect to an application for a facility proposed to be located in a State that does not have an NRC—approved program.

Subsection d. of section 195 provides that nothing in the section affects the NRC's authority to protect the public health and safety and the common defense and security pursuant to the AEA or the Energy Reorganization Act of 1974, or vests the States with any such authority not contained in existing law. The NRC shall continue to assess, pursuant to NEPA, the environmental aspects of the radiological safety impacts of reactor operation. Where a State elects to make all determinations under this section, and it has an approved program, the NRC shall prepare and forward to the State for its use a statement of the NRC conclusions regarding the radiological safety impacts of reactor operation, which shall not be subject to review in any State administrative or judicial proceeding.

Subsection e. of section 195 provides that the Governor of any State electing to make any or all of the evaluations and determinations on the issues of environmental acceptability and/or need for power shall forward to the NRC for its review and approval a program for making such evaluations and/or determinations. The NRC, in consultation with other Federal agencies and the States, is authorized to establish guidelines for reviewing such programs. The program shall include provisions to assure compliance by the State official or officials with the requirements of NEPA, including assuming the status of a responsible Federal official and accepting Federal court jurisdiction; that economically feasible alternate sources of power are considered and that with respect to an application for a site permit, generic power needs projections are determined; that the State will have adequate resources and expertise to make decisions regarding environmental acceptability and need for the facility; that there is open and early public participation, including hearings on final determinations under procedures comparable to those of the NRC; that timely decisions are reached pursuant to an established schedule; that there is coordination with related Federal reviews particularly where the responsibilities under NEPA are being shared between the State and the NRC; that there is mutual assistance between Federal and State agencies to avoid duplication; that one State agency is designated to coordinate the reviews of all State agencies and to cooperate with Federal authorities in adhering to time schedules; and that regional considerations are properly taken into acount when determining environmental and need for power issues.

Subsection f. of section 195 encourages States to establish and participate in interstate or regional organizations which may, upon authorization by a State and notice to the NRC, discharge the State's responsibilities in making the evaluations and/or determinations authorized by this section.

Paragraph (1) of subsection g. of section 195 authorizes the NRC to review any State program and the performance of each State.

Paragraph (2) of subsection g. of section 195 authorizes the NRC to suspend or terminate approval of a State program and to suspend or terminate financial assistance if it determines that the State is failing to adhere to its approved program. A State must be given notice of the proposed suspension or termination and an opportunity to demonstrate compliance with its program.

Paragraph (3) of subsection g. of section 195 provides that the record established in any proceeding pending at the time of suspension or termination of a State program may be used by the appropriate Federal agency to avoid duplicating work already done by the State.

Subsection h. authorizes Federal agencies to provide assistance, including the use of national laboratories, to States with approved programs and to States providing information and assistance to the NRC. The national laboratories are government-owned contractor operated facilities.

Subsection i. provides that any State that does not have an approved program may provide information and assistance to the NRC to assist the NRC in making its determinations of environmental acceptability and need for power. The Commission may rely on the information provided by a State regarding any or all environmental impacts of the proposed thermal neutron power generation facilities except radiological safety impacts of the operation of the facility, in discharging its responsibilities under NEPA. This provision resolves any doubt regarding the NRC's authority under NEPA to accept and rely on State data, analyses, and conclusions regarding non-radiological environmental impacts and need for the facility. In such State data, analyses or conclusions are challenged by any party to an NRC proceeding, either the NRC staff or the cognizant State officials who prepared the analysis could appear as witnesses in the NRC proceeding. State data, analyses, and conclusions would need to be provided to NRC in a timely fashion in order to be used by NRC in its NEPA review. This subsection, however, does not apply to information submitted by a State pursuant to an NRC-approved program. Information submitted pursuant to an approved program is not subject to review by NRC.

Subsection j. of section 195 authorizes the NRC to make annual grants to States or interstate or regional organization to assist in the development or administration of a program specified in this section, and authorizes the appropriation of funds for that purpose. Included among the possible uses of the funds is the funding of intervenors in State proceedings, both under an approved program and for proceedings for the certification of need under section 185 a. and b., subject to criteria contained in section 197 below and the rules and regulations of the NRC promulgated under that section and in such amounts as may be determined by the NRC.

Subsection k. of section 195 expressly provides that, except as provided by this section, the responsibility of the NRC or any Federal agency to comply fully with NEPA has not been changed or eliminated.

Section 203. Federal and State Coordination.

Subsection a. of section 196 provides that the NRC, consistent with its statutory responsibilities, shall establish a time schedule for the conduct and completion of all required NRC reviews and decisions for specified proceedings. Time schedules shall be set for proceedings on applications for site permits, approvals for standardized designs, and for construction permits and/or operating licenses.

The NRC is authorized to cooperate with other Federal and State or regional agencies to eliminate unnecessary and duplicative work. The NRC is also authorized to establish schedules and target dates for other Federal, States, and regional reviews. In the establishment of schedules and the setting of target dates for completion, the NRC is not authorized to require any other agency to reach its decisions on the schedule set by the NRC. Further, all cooperative efforts, including establishment of schedules, shall be conducted in a manner consistent with the statutory responsibilities of all other agencies. Schedules would not be subject to judicial review.

Subsection b. of section 196 provides that the NRC shall be the lead agency for purposes of preparing any environmental impact statement under NEPA for actions under this Act, except that where a State is making all of the NEPA determinations pursuant to section 195, the State shall be the lead agency.

Section 204. Bulk Electric Power.

This section amends section 271 of the AEA to make certain that the expanded State role established by this Act is not interpreted to give States authority to limit or restrict bulk power supply competition.

Interstate bulk power supply competition is not now a matter of State regulatory jurisdiction. Under this section, the bulk power supply activities of electric utilities in or affecting interstate commerce would remain outside the jurisdiction of the States.

TITLE C—INTERVENORS

Section 301. Funding for Intervenors.

This section amends the AEA to add a new section 197, which provides for the establishment of a pilot program for the funding of intervenors in described licensing and permit proceedings and, at the NRC's discretion, in rulemaking proceedings. This represents the first statutory authority for the NRC to fund intervenors.

Paragraph (1) of subsection a. of section 197 authorizes NRC to establish a pilot program for funding intervenors in NRC proceedings, excluding export licensing proceedings, conducted by the NRC pursuant to the AEA or the Energy Reorganization Act of 1974, as amended. The NRC is also authorized, in its sole discretion, to extend the pilot program to selected rulemaking proceedings.

Paragraph (2) of subsection a. of section 197 provides that mere attendance at a proceeding or participation where the cost of such participation is minimal will not qualify for funding.

Paragraph (3) of subsection a. of section 197 specifies that no new rights of participation in NRC proceedings are created by this section.

Subsection b. of section 197 directs the NRC, upon request, to pay some or all of the costs of intervention, including attorneys' fees, pursuant to procedures and criteria established by the NRC to determine eligibility of intervenors and the amount of any payment. Payments shall be made subject to available appropriations. The criteria to be established shall include requirements set forth in this subsection.

Subsection c. of section 197 provides for

payments to intervenors to be made following the proceeding, although there is provision for payment prior to or during the proceeding if the intervenor establishes to the satisfaction of the NRC that the advance payments are required in order that the intervenor's participation not be substantially impaired.

Subsection d. of section 197 provides for repayment of amounts received or forfeiture of future payments if the party has not provided the representation for which payments were made or if it has delayed, misled or has otherwise frustrated the objectives of the proceeding.

Subsection e. of section 197 provides that the costs of the proceedings awarded shall be based upon available appropriations and prevailing market rates of compensation not to exceed the rates of compensation paid by the NRC for its own expert assistance.

Subsection f. of section 197 authorizes the NRC to require consolidation of duplicative presentations, select the more effective representatives, compensate only certain expenses, or offer joint compensation, whenever more than one intervenor seeks funding.

Subsection g. provides for judicial review of decisions under this section to the same extent as any other NRC decision except that the courts are precluded from staying, restraining, or otherwise enjoining NRC proceedings on an alleged violation under this section. No court shall reverse, remand or otherwise reconsider any other NRC decision solely on the basis of an NRC decision under this section, unless a clear abuse of NRC discretion exists.

Subsection h. of section 197 provides that the NRC will propose regulations to carry out the intervenor funding program within 90 days after enactment. Such regulations shall be adopted and take effect no later than 180 days after enactment.

Subsection i. of section 197 provides that the pilot program for intervenor funding shall expire on December 31, 1983, except that the NRC is authorized to continue to fund intervenors in proceedings which were pending on that date and where applications for funding had already been filed, and that the NRC shall report to the Congress on the program's impact and effectiveness on or before December 31, 1982.

Subsection j. of section 197 provides authority for the appropriation of such sums of money as may be necessary to carry out the purposes of section 197.

TITLE IV—CONFORMING AMENDMENTS

Section 401. Advisory Committee on Reactor Safety. This section amends section 29 of the AEA to include site permit applications and proposed rules approving standard facility designs within the Advisory Committee's review functions. Also, the section amends the name of the Committee by changing "Safeguards" to "Safety."

Section 402. Antitrust Provisions.

This section amends paragraph (2) of subsection c. of Section 105 of the AEA to include an application for a combined construction permit and operating license for a utilization or production facility under Section 103 among those applications subject to review by the Attorney General for possible adverse antitrust aspects.

Section 403. General Provisions.

This section amends subsection o. of section 161 of the AEA to extend the authority of the NRC to require reports and recordkeeping to activities authorized by section 193, applications for early site approval and subsequent advance preparation of such approved site.

Section 404. Revocation.

This section amends subsection a. of section 186 of the AEA to acknowledge the fact that the sections of the Act covering early site approval and standardized facility designs are also covered by these standards for revocation.

Section 405. Modification of License and Site Permits.

This section amends section 187 of the AEA to include site permits among the licenses that are subject to the modification provisions set forth in this section.

Section 406. Judicial Review.

This section amends subsection b. of section 189 by adding a new sentence to provide that NRC decisions pursuant to section 197 shall not be subject to judicial review as part of the final NRC order in the proceeding, but shall be subject to judicial review as provided in section 197.

Section 407. Atomic Safety and Licensing Board.

This section amends subsection a. of section 191 of the AEA to include site permits among the proceedings for which the NRC may establish an atomic safety and licensing board to conduct hearings and make such intermediate and final decisions as the NRC may authorize.

TITLE V—EFFECTIVE DATES

Section 501 provides for the effective dates of the various sections of the Act.●

By Mr. DOLE:

S. 2776. A bill to amend the Internal Revenue Code of 1954 to provide that the use of the zero bracket amount will not reduce the benefits of income averaging; to the Committee on Finance.

INCOME AVERAGING

● Mr. DOLE. Mr. President, the Tax Reduction and Simplification Act of 1977 has created a very harsh result for those Americans who use income averaging as the method to calculate their tax liability. Today, I am introducing legislation to restore the benefits of income averaging.

The income averaging procedures are designed to save taxpayers who may have a windfall tax bite resulting from a sudden boost in income. Instead of paying full tax on increased income, the taxpayer can compare his current income with his average income over the 4 previous years, and hence pay a lower tax on the difference between his average income and his current income. However, the changes made in 1977 have significantly cut back on the tax savings through income averaging.

Mr. President, the problem was created by replacing the old standard deduction with the new "zero bracket" concept that reduces taxable income by $3,200. This change triggered an alteration in the definition of taxable income for income averaging purposes. By requiring addition of the zero bracket amount to each pre-1977 base year the Senator from Kansas believes the tax benefit has been seriously eroded.

My proposal provides that the 120-percent factor—a device used to compute liability—could be used on the income of the base. Then the zero bracket amount could be added to the prior base years. This change will put taxpayers in a position they enjoyed under prior law.

I ask unanimous consent that the text of my bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2776

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsections (a) and (b) (2) of section 1302 of the Internal Revenue Code of 1954 (defining average income and related terms) are each amended by striking out "taxable income" each place it appears and inserting in lieu thereof "modified taxable income".

(b) Section 1301 of such Code (relating to limitation on tax) is amended by striking out "120 percent of average base period income" and inserting in lieu thereof "the sum of (1) 120 percent of average base period income, plus (2) the taxpayer's zero bracket amount for the computation year".

(c) Subsection (c) of section 1302 of such Code (defining other related items) is amended by adding at the end thereof the following new paragraph:

"(5) Modified taxable income.—The term 'modified taxable income' means—

"(A) in case of a taxable year beginning before January 1, 1977, the taxable income for such year, or "(B) in the case of a taxable year beginning after December 31, 1976, the taxable income for such year reduced (but not below zero) by the taxpayer's zero bracket amount for such year."

(d) Subsection (b) of section 1302 of such Code (defining average base period income) is amended by striking out paragraph (3).

Sec. 2. The amendments made by the first section of this Act shall apply to taxable years beginning after December 31, 1976.●

ADDITIONAL COSPONSORS

S. 76

At the request of Mr. STONE, the Senator from Oregon (Mr. MARK O. HATFIELD) was added as a cosponsor of S. 76, a bill to authorize payment under the medicare program for certain services performed by chiropractors.

S. 990

At the request of Mr. MATHIAS, the Senator from Alaska (Mr. STEVENS) was added as a cosponsor of S. 990, a bill to amend title 5, United States Code, to provide special allowances to certain physicians employed by the United States in order to enhance the recruitment and retention of such physicians.

S. 1967

At the request of Mr. ROBERT C. BYRD, the Senator from Florida (Mr. STONE) was added as a cosponsor of S. 1967, a bill to amend section 218 of the Social Security Act to require that States having agreements entered into thereunder will continue to make social security payments and reports on a calendar-quarter basis.

S. 1976

At the request of Mr. ABOUREZK, the Senator from Arkansas (Mr. HODGES) was added as a cosponsor of S. 1976, a bill to add certain lands to the Redwood National Park in the State of California, to strengthen the economic base of the affected region, and for other purposes.

S. 2096

At the request of Mr. CRANSTON, the Senator from New York (Mr. JAVITS) was added as a cosponsor of S. 2096, the Financial Privacy Act.

S. 2400

At the request of Mr. BAYH, the Senators from New Jersey (Mr. CASE and Mr.

WILLIAMS), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 2400, a bill to establish a National Alcohol Fuels Commission.

S. 2565

At the request of Mr. MATHIAS, the Senator from Iowa (Mr. CLARK) was added as a cosponsor of S. 2565, a bill to provide for further research and services with regard to victims of rape.

S. 2674

At the request of Mr. PROXMIRE, the Senator from Indiana (Mr. LUGAR) was added as a cosponsor of S. 2674, a bill to assist cities and States by amending section 5136 of the revised statutes, as amended, with respect to the authority of national banks to underwrite and deal in securities issued by State and local governments.

S. 2699

At the request of Mr. JACKSON, the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of S. 2699, a bill to amend the act of June 27, 1960 (74 Stat. 220) as amended by the act of May 24, 1977 (88 Stat. 174, 176; 16 U.S.C. 469) relating to the preservation of historical and archeological data: to authorize appropriations under section 3(b) and 4(a) for fiscal years 1979 through 1983, and for other purposes.

SENATE JOINT RESOLUTION 102

At the request of Mr. ABOUREZK, the Senator from New Mexico (Mr. DOMENICI) was added as a cosponsor of Senate Joint Resolution 102, to protect the religious rights and practices of Native Americans.

SENATE RESOLUTION 420—SUBMISSION OF A RESOLUTION RELATING TO THE LEBANESE CRISIS

Mr. ABOUREZK submitted the following resolution, which was referred to the Committee on Foreign relations:

S. RES. 420

Whereas innocent lives are being lost hourly in southern Lebanon;

Whereas the Israeli invasion of southern Lebanon is a direct threat to the prospects of peace in the Middle East;

Whereas it is in the highest national interest of the United States and all parties to the Middle East conflict that an equitable just, and durable peace be negotiated: Now, therefore, be it

Resolved, That the United Nations Security Council Resolution 425 relating to the Lebanese crisis, adopted on March 19, 1978, be implemented immediately and that all parties concerned comply fully with provisions of such Resolution.

Sec. 2. The Secretary of the Senate shall transmit a copy of this resolution to the Secretary General of the United Nations.

(The remarks of Mr. ABOUREZK when he submitted the resolution appear earlier in today's proceedings.)

SENATE RESOLUTION 421—SUBMISSION OF A RESOLUTION AUTHORIZING PRINTING

Mr. RIBICOFF submited the following resolution, which was referred to the Committee on Rules and Administration:

S. RES. 421

Resolved, That the committee print of the Committee on Governmental Affairs entitled "Voting Rights in Major Corporations" be printed as a Senate Document, and that there be printed five hundred additional copies of such document for the use of that committee.

SENATE RESOLUTION 422—SUBMISSION OF A RESOLUTION RELATING TO THE LEBANESE CRISIS

Mr. ABOUREZK submitted the following resolution, which was ordered to lie over under the rule:

S. RES. 422

Whereas innocent lives are being lost hourly in southern Lebanon:

Whereas the Israeli invasion of southern Lebanon is a direct threat to the prospects of peace in the Middle East;

Whereas it is in the highest national interest of the United States and all parties to the Middle East conflict that an equitable, just, and durable peace be negotiated: Now, therefore, be it

Resolved, That the United Nations Security Council Resolution 425 relating to the Lebanese crisis, adopted on March 19, 1978, be implemented immediately and that all parties concerned comply fully with provisions of such Resolution.

Sec. 2. The Secretary of the Senate shall transmit a copy of this resolution to the Secretary General of the United Nations.

(The remarks of Mr. ABOUREZK when he submitted the resolution appear earlier in today's proceedings.)

AMENDMENTS SUBMITTED FOR PRINTING FARMER-SPONSORED AGRICULTURAL PRODUCTION AND STABILIZATION ACT OF 1978—S. 2736

AMENDMENT NO. 1740

(Ordered to be printed and referred to the Committee on Agriculture, Nutrition, and Forestry.)

Mr. ABOUREZK submitted an amendment in the nature of a substitute intended to be proposed by him to the bill (S. 2736) to regulate interstate and foreign commerce in agricultural products, to promote the general welfare by providing price and income protection to agricultural producers by securing to producers a price for agricultural commodities of not less than 100 percent of parity for such commodities; and to assure consumers of abundance of food and fiber at reasonable prices, and for other purposes.

● Mr. ABOUREZK. Mr. President, today I am introducing in the form of an amendment the finalized version of a bill entitled "the Farmer-Sponsored Agricultural Production and Stabilization Act of 1978." Just as its name implies, this piece of legislation owes it inception and form to the influence of the spontaneous farm movement that has come to have such a significant impact on us all in the last few months. The Senate Agriculture Committee has been laboring long and hard the past few weeks in an effort to come to some sort of agreement on the proper mix of measures with which to remedy the crisis that is threatening the family farmer with economic extinction.

Several measures have been reported as a result of these deliberations and we will soon be asked to decide on which route would be the best to take. As short-term relief measures, these measures combined have considerable merit. In my conversations with the members of the American Agricultural Movement here and back in my home State of South Dakota, however, I have been consistently struck by the unanimous conviction that there is a danger of these short-term measures being accepted as palliatives and that the crisis facing American agriculture will be merely put off until another time instead of being confronted and solved.

There is no doubt, Mr. President, but that the reason that the normally reticent farmer is here in Washington instead of in the fields is that previous governmental policy has been a superficial, "ad hoc" collection of patchwork measures that have done nothing more than to mollify him and send him back to the fields to subsidize the U.S. Government's cheap food policy.

The day of reckoning has finally come. There is no need to again recite the overwhelming statistical evidence that conclusively points to the imminent demise of the family farm system of agriculture in this country. The stream of farm failures that has been so stoically endured in the past will turn to a flood if a comprehensive, meaningful, and timely farm program is not put into effect.

Our farmers are asking us for 100 percent of parity. In the simplest form, all that means is that they are asking that they receive an income that offers them equivalent purchasing power with the other sectors of the economy. It does not mean that they will be guaranteed a profit unless they produce a crop, a qualification which still makes the agricultural producer in this country the biggest gambler around. We cannot legislate control of weather, nor can we make a farmer an efficient manager. We must, however, present him with the wherewithal to receive a price for his product once he delivers it that allows him to recover his costs of production plus a reasonable profit. We accord that right to virtually every other sector of our economy, why can we not do the same for the one sector from which this country's wealth originates?

There has been a great deal of doom-saying going on in this city lately about what disastrous implications the concept of parity holds for this country's economy. On the other hand, I have yet to see a study setting out the disastrous implications of a failure to maintain the economic viability of the independent family farmer. Of course, food prices will rise if 100 percent of parity were to become reality, although not as high as the conventional wisdom is predicting. But where are those figures that could show what full parity pricing would do to the purchasing power of the farm sector? Every $1 that a farmer makes generates $7 more as it works its way through the

national economy. It is easy to see that low farm income and high unemployment go hand in hand; already, implement manufacturers are laying off hundreds of employees because the farmer cannot afford to buy.

In 1977, farmers spent $85.7 billion on production inputs. They spent another $40 billion on family living expenses. The production, processing, and distribution of food and fiber accounts for 20 percent of the GNP and creates jobs for 15 percent of the national workforce—15 million people in all.

Mr. President, I think that it is time that we start listening to these dedicated men and women when they tell us that they will not be around next year unless something is done for them very soon. I think that it is time that we quit looking for imaginative ways to say that 100 percent of parity is impossible and look for some imaginative ways to make it possible. It is not just for the farmer's sake that we must do this; this country's economic future and the future of many millions of underfed people throughout the entire world depend on a sound and healthy farm economy.

The farmer-sponsored Agricultural Production and Stabilization Act of 1978 is far from perfect. I am introducing it so that the AAM can have a long-range-oriented piece of legislation that encapsulates its five-plank program. I sincerely hope that the movement and its supporters can incorporate the provisions in this bill that appeal to them with the provisions in the several other long-range parity bills that have already been introduced into a single piece of legislation that they can support with one unified voice. I believe that a unified AAM, with all of the persuasive instruments that it has at its disposal, will be able to convince the entire country that their demands are justified and that 100 percent of parity is not just a Quixotic campaign.

Mr. President, I ask unanimous consent that the text of the amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 1740

On page 1, strike all after the enacting clause and replace with:

TITLE I—FINDINGS, STATEMENTS OF PURPOSE AND DEFINITIONS

SEC. 101. This act may be cited as the "Farmer-Sponsored Agricultural Production and Stabilization Act of 1978."

SEC. 102. Congress finds that—

(1) the agricultural producers of the nation are beset with economic problems of major proportions, in that they are deeply in debt, receive prices for their products which do not recover their costs of producing such products, and are without means of escaping agricultural cycles of overproduction which drive levels of return to agricultural capital below subsistence levels;

(2) that agricultural production is the foundation of manufacture and commerce, that a strong, vigorous agriculture is essential to the welfare of the Nation; and that the agricultural producers of the Nation must be maintained as the most efficient and productive farmers in the world;

(3) that direct and immediate economic relief is required to prevent irreversible changes in the character of the agricultural producers of this Nation; for many small and medium agricultural producers are presently being forced into bankruptcy or to abandoning agricultural production for other means of earning a livelihood; that this trend toward small farm dissolution must be reversed.

(4) that current agricultural policies will not provide the economic infusion of money and market stability necessary to reverse the disastrous economic conditions afflicting agricultural producers;

(5) that certain domestic markets for agricultural commodities have been injured by imported agricultural commodities;

(6) that strong and consistent export policies have benefited agricultural producers of the Nation in the past, providing markets for the Nation's agricultural products and promoting and economic stability of the Nation by contributing to a favorable balance of trade; and

(7) that agricultural producers must have a method by which they may have a voice in the policies of the Nation which directly impact upon their livelihood.

SEC. 103. In light of the finding of Congress set forth in this title, the purposes of this Act are—

(1) to provide as a price to agricultural producers 100% of parity for all agricultural commodities subject to the provisions of this Act, whether sold in domestic markets or exported;

(2) to provide for a national reserve of the commodities subject to this Act;

(3) to provide and maintain a voice for agricultural producers in policies of the Nation which affect agriculture;

(4) to regulate import and export policies of the Nation regarding agricultural commodities to ensure that domestic agricultural producers receive 100 percent of parity for commodities affected by such policies;

(5) to provide a system whereby the transfer of unfavorable economic conditions from one agricultural commodity to another within the domestic agricultural economy will be curtailed; and

(6) to provide price stability in domestic and foreign markets for agricultural commodities at prices which are reasonable and reflect the true cost of producing such commodities.

SEC. 104. General Definitions—For the provisions of this Act—

(1) "Secretary" as used herein shall mean the Secretary of Agriculture;

(2) "Board" as used herein shall mean the National Agricultural Producers Board established by this Act;

(3) "President" as used herein shall mean the President of the United States;

(4) The term the "United States" means the several States and Territories and the District of Columbia, Puerto Rico, and the Virgin Islands;

(5) the term "agricultural commodity" means any poultry, livestock, and any farm product of the soil, and any product or by-product thereof, in an unmanufactured state, which is made subject to the provisions of this Act by Section 201 of this Act.

(6) The term "producer" shall mean the original producer of agricultural commodities as herein defined, whether for his own benefit or under contract or agreement to produce for another, and includes any individual, partnership, firm, joint-stock company, corporation, association, trust, or estate engaged in the production of agricultural commodities.

(7) The "Department" shall mean the Department of Agriculture.

TITLE II—NATIONAL AGRICULTURAL PRODUCERS BOARD

SEC. 201. (a) There is hereby established in the Department of Agriculture a Board to be known as the National Agricultural Producers Board (hereinafter referred to as the "Board").

(b) The Board shall be composed of 50 members, one to be elected from each of the 50 States. The Secretary shall prescribe by regulation the qualifications for voting in the election for members of the Board and the time and place for voting; but only persons engaged in the production of agricultural commodities shall be eligible to vote in such election. No person may be elected to the Board unless such person is engaged in the production of one or more agricultural commodities and earns at least one-half of such producer's income from such production.

(c) The duties of the Board shall include, but not be limited to, determining the optimum production level for each agricultural commodity covered in this Act which would result in a National Market Equilibrium as provided for in this Act, assisting the Secretary in formulating guidelines and objectives for any commodity for any year, and assisting in the development of policy for implementing this Act. The Board shall also advise and assist the President, the Secretary, and the Special Representative for Trade Negotiations in the formulation and implementation of international agricultural trade policy including, but not limited to, negotiations toward a more realistic world grain price. The Board shall be given such other duties as the Secretary may prescribe.

(d) The Secretary may also establish regional, State, and local producers boards to help advise on the administration of this Act.

TITLE III—MECHANISM FOR ATTAINING MARKET EQUILIBRIUM

SEC. 301. If the Board determines that there is a need for production or marketing agreements for any commodity in any year, it shall, in consultation with the Secretary, arrive at the proper combination of production or marketing agreements which will assure the desired market equilibrium. Producers shall be given the opportunity to express their preference on the form of agreements used, by way of nationwide referendum of those producers in the affected commodity groups.

(b) For the purposes of this Act, all commodities shall be included in the coverage of the above paragraph.

(c) Any announcement of such changes as may be necessitated by the determinations made under this section shall be made with sufficient prior notice so that the producer will have reasonable time to make any required adjustments in his operation.

(d) For the purpose of this Act, any such determination as described above shall be called a National Market Determination.

TITLE IV—PRICING POLICY

SEC. 401. (a) No agricultural commodity may be sold, traded, or otherwise disposed of in any marketing year at any price less than 100 percent of parity, as revised periodically by the Board, for each commodity for each marketing year.

TITLE V—IMPORTS

SEC. 501. Imports of all agricultural products which are domestically produced must be stopped until 100 percent of parity is reached. Thereafter, imports must be limited to the amount that the American producers cannot supply.

TITLE VI—RESERVES

SEC. 601. All quantities of agricultural commodities produced in any year which exceed the total market equilibrium quantities as determined by the Board in Title III of this Act shall be stored on the farm or in any approved commercial or cooperative storage facility.

SEC. 602. All sales of excess production stocks must be accompanied by an approved certification procedure as set forth by the Board.

SEC. 603. The Secretary may establish a National Strategic Reserve of any commodity. No sales from the National Strategic Reserve may be made except to fulfill necessary amounts of any commodity needed to meet under-production if no producer reserves are available to fulfill the requirements. No sales from the National Strategic Reserve may be made at less than 100 percent of parity prices.

SEC. 604. The Secretary may purchase overproduction of any commodity in any year not needed to meet the National Market Determination equilibrium for such commodity for such year but may not purchase any quantity in excess of the total certified production approved by the Board for such commodity for the marketing year concerned. Such purchases shall be made at 100 percent of parity prices.

TITLE VII—APPLICABILITY OF OTHER LAWS

SEC. 701. Whenever a National Market Determination provided for under this Act is made applicable to any commodity for any crop and marketing year, the provisions of all other laws, to the extent inconsistent with the provisions of this Act, (as determined by the Secretary) shall be inapplicable to such commodity for such crop and marketing year.

TITLE VIII—SANCTIONS

SEC. 801. Any person who buys, sells, trades, or otherwise disposes of any agricultural commodity in violation of this Act or any rule or regulation issued thereunder shall be fined not more than $10,000 or imprisoned not more than 6 months, or both.●

COMPREHENSIVE EMPLOYMENT AND TRAINING AMENDMENTS OF 1978—S. 2570

AMENDMENT NO. 1741

(Ordered to be printed and referred to the Committee on Human Resources.)

Mr. KENNEDY (for himself, Mr. JAVITS, and Mr. HATHAWAY) submitted an amendment intended to be proposed by them, jointly, to S. 2570, the Comprehensive Employment and Training Amendments of 1978.

● Mr. KENNEDY. Mr. President, I am today submitting for myself, Mr. JAVITS, and Mr. HATHAWAY, what I believe is an important amendment to S. 2570, the Comprehensive Employment and Training Amendments of 1978.

Mr. President, the No. 1 issue in the land—the first priority of economic justice—is providing jobs for American workers.

Employment is the key to achieving so many of our goals. It is, of course, an end in itself, for it is the luck and genius of this country that people want to work and would prefer working to getting a dole. Full employment is the key to a better economy; for we then reap the bounty of productive hands and minds. And full employment saves us the billions of dollars that we otherwise disgorge on welfare and unemployment compensation and gains for us billions in tax revenues which would otherwise never materialize.

The CETA program is a large part of bringing people who desire jobs into the economy.

One important aspect of the CETA program is that it provides countercyclical jobs to those people who are out of work because of the poor economic conditions which exist in their areas. These people need the positions which CETA has made available; the cities and organizations for which these people work are also the great beneficiaries of the service that these people perform.

Mr. President, I think that the training aspects of the CETA program are, if anything, even more important than the countercyclical aspects of the program. The current titles I and II are oriented toward the structurally unemployed, and title II of the proposed reauthorization is similarly oriented. As the purpose of the program is stated at the beginning of title II:

It is the purpose of this Title to establish programs to provide comprehensive employment and training services throughout the Nation. Such programs shall include the development and creation of training, upgrading, retraining, education, and other services needed to enable individuals to secure and retain employment at their maximum capacities so as to increase their earned incomes.

The object of the programs funded through these sections is to provide unskilled people with the skills necessary to get jobs in a modern economy. There are hundreds of thousands of jobs in this country which are waiting to be filled by people who can perform them.

Meanwhile, the jobs go undone and we do not reap the increased production that filling them would provide. Meanwhile, the people go unemployed and they do not reap the benefits of holding jobs. This is clearly a situation which this country cannot abide.

We must help provide these skills to people who can then use them to better their lives and ours, through service in the private sector and in the regular civil service.

Most of the prime sponsors have probably done a good job in giving this training to their enrollees. But we must insure that we are making the best efforts possible in this vital area.

Many of the witnesses who have testified on the CETA reauthorization have emphasized the lack of information that we have on what, and how well, the prime sponsors are doing. Currently, the training sections contain no provisions for the Department of Labor to monitor prime sponsors to see how well they have succeeded in their ostensible primary task under title II—

To provide training and employment services which enable people to secure and retain employment.

There is only a very general evaluation provision in title III.

And, we do have some clues that some prime sponsors are not maximizing the use of these funds for purposes expressed in the initial section of the structural title. Funds may be used as a simple supplement to title VI, merely providing "work experience," when training would be more helpful. In fact, some 45 percent of the title I enrollees in fiscal year 1977 were placed in "work experience" or public service employment slots. With the demonstrated desire of so many people to get jobs, it is hard to believe that we needed to spend so much to build people's confidence. Other prime sponsors may overemphasize on-the-job training, when their main purpose is actually to get people to perform those jobs.

Furthermore, even where funds are spent to train or help place people, we have no idea as to how successful these programs have been. There is no incentive for prime sponsors to choose the best training methodology. Sponsors may concentrate training where they have a surplus of people who know how to teach—and therefore a surplus of people in the industry. Or trainees may be placed with formal educational programs which are chosen for reasons other than their demonstrated effectiveness.

Finally, of course, there is no incentive for the prime sponsor to "go the distance," to constantly be on the alert for ways to train people and then move them into regular jobs.

Mr. President, the best way to insure that we are making the best efforts is not through layers and layers of regulations on what the prime sponsors may and may not do. The best way to insure that we are making the best efforts is not through requiring a specific curriculum or program mix. The best way is not through playing guessing games as to which people who are in "work experience" programs truly need the experience and which ones are only supplementing the civil service.

Mr. President, the best way to insure our efforts is through the marketplace. It is through rewarding those prime sponsors who do the job and not rewarding those who do not. It lies in measuring whether the prime sponsor has truly met the purposes of this section—whether people have been placed in regular jobs, whether they can command higher salaries, whether they can keep the jobs. In the new title II the taxpayers of the United States are consumers—they are consumers of employment services for the structurally unemployed. And we want to know who is doing the best job and we want to make our purchases accordingly.

So, Mr. President, the first part of the amendment which we are submitting would allow prime sponsors to ask the Department of Labor to evaluate the performance of those who have gone through a title II program, according to criteria such as rate of placement, length of time in job in which placed, salary and, eventually, amount of time in entry level position. Performance would be compared to the success rate of a comparable group in the prime sponsor's area of those who have not gone through a CETA program. This would give the Department some basis upon which to gather information which they can use to plan better programs. More importantly, this information would give the basis upon which to gage the effectiveness of prime sponsors.

At this point the program would be voluntary. The Department will be undertaking, for the first time, this comprehensive evaluation program, and it should not be inundated by having to evaluate all of the prime sponsors. In addition, while the evaluation program is getting underway, and the methodology is being workel out, there should be a free and open exchange of ideas and information among the prime sponsors who are being evaluated and the Department. It is obvious that it will be

very difficult for this exchange to take place if prime sponsors which are resistant to evaluation are forced into the exchange. Once the program is worked out, and if it is worked out satisfactorily, then we should consider making it mandatory.

Mr. President, monitoring alone will not be sufficient to create the incentives for the prime sponsors to do the best job possible, or to give greater authority to prime sponsors who do well. So, Mr. President, the second part of the amendment that we are proposing would establish a system of incentive grants for those prime sponsors who do well. Essentially, we will give more money to those who have shown that they can do the job—who meet our output criteria. More people would be trained by those who can do the job. Other prime sponsors will have the incentive to become more effective so as to get some more of the funds. A discretionary fund would be set up and distributed to prime sponsors based upon a measure of their success, rather than by demographic formula. This measure would include a composite of proportion of trainees placed in a job, longevity of the job and salary, as compared to the comparison group within the prime sponsor's area. These incentives should be based on performance which betters the lot of people within the area. It should not be based on a comparison to any national average of those who have gone through a CETA program, because basic economic conditions—beyond the control of the prime sponsor—vary so much from city to city. Thus, a prime sponsor in City A which places 75 percent of its enrollees, where only 50 percent of nonenrollees with the same characteristics can find jobs, has really done better with the situation which confronts it than has a prime sponsor in City B who places 80 percent of its enrollees, where 75 percent of the nonenrollees are able to find jobs anyway.

Mr. President, Federal funds should be directed at those who can do the best job in meeting our program goals. By establishing this simple principle as an important part of our dispersement system we achieve two aims. We create a real incentive for those from whom we purchase services to give us the best services. And by buying on this basis, we eliminate the need to burden all the prime sponsors with regulation after regulation, whose strictures are meant to serve as placebo incentives but which often result in nothing more than a cat and mouse game.

The Comprehensive Employment and Training Act has made a great contribution to our national purpose. The act is of great value today to the hundreds of thousands of people who are trained and employed through it. It will be of even greater service in the future, as it becomes part of a comprehensive welfare policy. We should act to insure that the program is as effective as it can be. I believe that this amendment will help to do that.

Mr. President, I ask unanimous consent that this amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page 63, line 4, insert after subsection (d) the following: "(e) Four per centum of the amounts available for this title shall be made available to prime sponsors as incentive grants as determined according to section 214(b)," and redesignate subsequent subsections accordingly.

On page 69, line 11, insert after section 213 the following:

"EVALUATIONS AND INCENTIVE GRANTS

"SEC. 214. (a) Any prime sponsor may volunteer for an evaluation of its title II programs by the Department of Labor. Such evaluation may include monitoring of the rate of placement of title II enrollees after leaving the title II program, the salaries paid to such enrollees, the length of time that they remain in the job and whatever other information that the Secretary determines, by regulation, is important in evaluating the performance of the prime sponsors. For purposes of making this evaluation, the performance of the prime sponsor shall be assessed by comparing enrollees to a comparable group of nonenrollees within the prime sponsor's area.

"(b) The Secretary shall make awards from the funds set aside under section 202(e) to those prime sponsors which have performed well in their title II functions. The Secretary shall make awards according to a unit measurement; each such unit may consist of some degree of improvement among title II enrollees in job placement, salary, longevity, and whatever other factors the Secretary determines, by regulation, are important (each factor shall be weighed by the Secretary in a manner which best effectuates the purposes of this Act), over performance on each of the criteria set forth in this section by a comparable group of nonenrollees in the prime sponsor's area.".●

AMENDMENTS AND DECLARATIONS SUBMITTED FOR PRINTING—PANAMA CANAL TREATY—EX. N, 95–1

AMENDMENTS NOS. 87 AND 80 AND DECLARATION NO. 2

(Ordered to be printed and to lie on the table.)

Mr. GOLDWATER submitted two amendments intended to be proposed by him to the Panama Canal Treaty, and a declaration of ratification intended to be proposed by him to the resolution of ratification of the Panama Canal Treaty, Ex. N, 95–1.

● Mr. GOLDWATER. Mr. President, I submit today for printing two amendments to the Panama Canal Treaty and one declaration to the resolution of ratification of the treaty which, if adopted, would uphold the constitutional requirement set forth in article IV that legislation enacted by both Houses of Congress is necessary in order to transfer property belonging to the United States to a foreign power.

I ask unanimous consent that the text of the amendments and the declaration be printed in the RECORD.

There being no objection, the amendments and declaration were ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 87

At the end of article XIII, add the following:

"5. The provisions of this Treaty relating to the disposal of the territory or other property belonging to the United States of America shall take effect only if the Congress of the United States of America enacts implementing legislation providing for the transfer of such territory or other property to the Republic of Panama.".

AMENDMENT NO. 88

At the end of article XIII, add the following:

"5. The provisions of this Treaty relating to the disposal of any real property of the United States of America which is located in the former Canal Zone and which, on the day before the date of entry into force of this Treaty, was under the jurisdiction of a Secretary of a military department of the United States of America enacts legislation providing for the transfer of such property to the Republic of Panama.".

DECLARATION NO. 2

Before the period at the end of the resolution of ratification, insert a comma and the following: "subject to the following declaration:

"That the United States Government declares that it will not deposit its instrument of ratification until after implementing legislation relating to the disposal of the territory or other property belonging to the United States has been enacted providing for the transfer of such territory or other property to the Republic of Panama." ●

AMENDMENT NO. 89

(Ordered to be printed and to lie on the table.)

Mr. BARTLETT submitted an amendment intended to be proposed by him to the Panama Canal Treaty, Ex. N, 95–1.

● Mr. BARTLETT. Mr. President, I submit an amendment, No. 89, in the nature of a substitute, revising the Panama Canal Treaty as a lease agreement between the United States and Panama.

After many years of public discussion and official negotiation, during four administrations, after weeks of debate here in the Senate, concluding in the ratification of the Treaty of Neutrality, the treaty ratification process now advances to the very heart of the Panama Canal issue.

Article I of the Panama Canal Treaty terminates all previous treaties between the United States and the Republic of Panama, redefines the rights and responsibilities which are delegated to the United States and Panama for the management, operation, and defense of the canal, and affirms the goal of uninterrupted, efficient operation of the canal.

In a sense, however, the real essence of this article, and of the entire treaty issue, is the recognition of Panama as territorial sovereign over the canal and Canal Zone. Both in Panama and the United States, the debate over the present treaty is virtually as old as the treaty itself. The focus of this debate has been the matter of sovereignty, a circumstance which has regrettably made discussion of the treaty far more emotional and complex than it might have been, had the new agreement conformed to the treaty precedent the United States had established a half century earlier.

The United States and Colombia, Panama's former sovereign, had long enjoyed a mutually beneficial commercial arrangement under the Bidlack-Mallarino Treaty of 1846. The treaty, while guaranteeing Colombia's sovereignty over the Isthmus of Panama, granted the United States—

The right of way or transit across the Isthmus of Panama upon any modes of communication that now exist or that way be, hereafter, constructed.

With the treaty, the United States acquired the right to preserve the neutrality of transportation routes across the isthmus. Thus, America's Panama Canal policy was truly formulated 65 years before the canal became a reality. In the exercise of that policy, the United States built the highly successful Panama railroad across the isthmus. It was also in the legitimate exercise of that policy that the United States deployed military forces and warships to Panama on occasions when transportation across the isthmus was jeopardized.

These principles were reaffirmed on January 22, 1903, when U.S. Secretary of State John Hay signed a treaty with Colombian Minister Tomas Herran. The Hay-Herran Treaty, while granting the United States the right to construct a canal across the isthmus, acknowledged Colombian sovereignty of the Canal Zone. The treaty established U.S. jurisdiction and control over the canal and Canal Zone by leasing the property to the United States for a period of 100 years. The lease was to be renewable indefinitely at the option of the United States.

This precedent was followed again by Secretary of State John Hay in treaty negotiations with the new Republic of Panama. The treaty originally drafted by Hay appropriately avoided the question of sovereignty and proposed instead a simple 100 year lease of the Canal Zone by the United States, renewable indefinitely by our country. Under Hay's proposal, it is quite possible that the matter of renegotiation of the treaty might never have arisen until the year 2003.

Fortunately, in the opinion of the Senate and the Roosevelt administration, the Hay proposal was substantially revised by Panama's own Envoy, Phillipe Bunau-Varilla. Rather than simply leasing the Canal Zone, the revised Treaty granted the United States "sovereign rights" over the Canal Zone "in perpetuity."

Thus, the new treaty was undermined from the beginning, as John Hay would later confess in a letter to Senator John C. Spooner of Wisconsin, champion of a Panamanian route versus a Nicaraguan route for the canal. Hay described the new treaty as "very satisfactory, vastly advantageous to the United States, and we must confess, with what face we can muster, not so advantageous to Panama * * * You and I know too well how many points there are in this treaty to which a Panamanian patriot could object."

In negotiating a new treaty with the Republic of Panama, the United States should have been guided by the precedents which existed before the Hay-Bunau-Varilla Treaty. We might have also been guided by another international agreement, negotiated, ironically, in the same year as the Panama Canal Treaty. The agreement, entered into force February 23, 1903, renewed in 1934, and remaining in effect indefinitely, provides for the lease to the United States by the Republic of Cuba of an area of land and water known as Guantanamo Bay.

The treaty is entitled "Lease of Lands for Coaling and Naval Stations," and, while its provisions are not precisely analogous to the issue of the Panama Canal, the language of Article III of the agreement is indeed relevant to our current dilemma. Article III states:

While on the one hand the United States recognizes the continuance of the ultimate sovereignty of the Republic of Cuba over the above described areas of land and water, on the other hand the Republic of Cuba consents that during the period of the occupation by the United States of said areas under the terms of this agreement the United States shall exercise complete jurisdiction and control over and within said areas. . . .

It is extremely important to note the manner in which the separate concepts of sovereignty and jurisdiction and control were addressed in this agreement. For this distinction is perhaps the primary reason the Guantanamo Bay lease remains in effect and undisputed today. Likewise, the absence of such a distinction is a principle defect, not only of the 1903 Panama Canal Treaty, but the proposed new treaty before us.

Mr. President, as I outlined in detail in a statement of February 23, 1978, the weight of evidence before the Senate affirms once again that the Panama Canal is vital to America's economic and national security interests, and that these interests will be secured only by continued U.S. administration and control of the Panama Canal.

It is clear that "America's Panama Canal policy," formulated a half century before the canal was constructed, remains valid today. I believe the course we must take to preserve that policy is equally clear.

The necessary revisions in the 1903 treaty between the United States and Panama will be achieved most appropriately and effectively through a lease agreement—an agreement similar in principle to those in force or proposed by the United States prior to the 1903 treaty, and to the existing treaty covering Guantanamo Bay, Cuba. Such an agreement would surely have appealed to the Republic of Panama. Within the framework of an international lease, every reasonable demand of Panama could be met.

First, the complex and emotional issue of sovereignty could finally be resolved in Panama's favor. At the same time, more tangible concessions could be made to address the justified resentment Panamanians have held for the U.S. presence, not only as a sovereign power, but a superior one in their own country. Duel economic, social, and legal standards would, and should, be dissolved.

Other appropriate concessions could include:

A substantial reduction of the land and water area of the Panama Canal Zone.

A substantial reduction in the number of U.S. military bases in Panama.

A substantial reduction in the level of U.S. forces in Panama.

A substantial increase in Panamanian employment in the operation of the canal and participation in higher levels of management of the canal.

A substantial increase in the share of the canal revenues for Panama.

A substantial increase in the U.S. annuity to Panama.

It should be noted that these provisions are not inconsistent with the terms of the Panama Canal Treaty before us. However, the proposed new treaty goes far beyond these generous concessions to phase out and eventually relinquish completely U.S. administration and control over the canal and Canal Zone.

During the recent debate over the Treaty of Neutrality, many Senators, perhaps even a majority, expressed serious misgivings about the loss of the U.S. rights to assure the continued effective operation of the canal. My amendment, revising the proposed new Panama Canal Treaty as a legitimate international lease agreement, reaffirms those rights. Unlike the 1903 treaty, however, it would do so in a fair and just manner, in good faith and without apology.●

ADDITIONAL STATEMENTS

DEPARTMENT OF ENERGY ACCOMPLISHMENTS

● Mr. BELLMON. Mr. President, I wish to share with my colleagues the excitement members of the Appropriations Subcommittee on Public Works felt the other day as a result of the testimony about the accomplishments of the Department of Energy's (DOE) Office of Energy Research. A portion of the testimony of Dr. John M. Deutch, Director of the Office of Energy Research follows:

ACCOMPLISHMENTS

This is a time of great discovery and exploration especially in the realm of the quark. The excitement and promise in high energy physics haven't been as great since the 1950's. Phenomena displaying the explicit properties of charm have been revealed through the copius production of the D mesons at SLAC—as opposed to the hidden charm that is characteristic of the J/Psi particles. The confidence in the quark concept was further extended this past year by the discovery at Fermilab of the upsilon particle, and ultra-heavy member analogous to the J/Psi particles but at about three times the mass of the J/Psi (ten times the mass of the proton). Just as the J/Psi signaled the existence of the fourth (charmed) quark, the upsilon is believed to be the first evidence of a fifth type of quark. Much excitement attends confirmation of this result and the search for new particles carrying the fifth quark.

There has also been substantial progress in other areas of study. There is considerable evidence now that heavy leptons, beyond the muon, are a reality. There are widespread indications of strong polarized spin effects at both ZGS and Fermilab energies in regions where none were anticipated. There is new progress in the study of neutrino interactions with the discovery of entirely new kinds of phenomena. The symbiotic relationships among experiments at proton accelerators, electron accelerators, polarized proton accelerators, and storage ring facilities, in concert with impressive progress in theoretical analysis techniques, have made it possible to produce new advances in knowledge of the basic constituents of matter.

Advances in superconducting and cryogenic techniques make possible the construction of facilities at much higher energy for much less cost and with reduction in electric power use. These new techniques may be applicable to electric power transmission, fusion research, MHD and energy storage. Accelerator technology developed for high energy physics has potential for the development of fusion initiated by energetic heavy ion beams as an alternative to laser

fusion and also for accelerator breeding of fissile materials.

Synchroton radiation from SPEAR at SLAC is being used with great success to explore solid state phenomena and the structure and behavior of biological systems. New facilities using this principle are expected to revolutionize research in these fields including permitting critical studies of catalysis and substantial subminiaturization of electronics.

In summary, the U.S. high energy physics program is now in a dynamic and highly productive phase and the potential for major discoveries in the near future is bright.

Mr. BELLMON. I doubt that any of you who were not there can imagine the excitement this testimony engendered in the hearts of the members of the committee. This excitement was produced at a total budget outlay in fiscal year 1978 of about a half-billion dollars. The requested appropriations for the Office of Energy Research in fiscal year 1979 is $618 million and that does not include about $250 million more than is being asked for a machine called Isabelle. When Isabelle begins relating symbiotically with SLAC and ZGS, and Dr. Deutch gets cooking with his half-billion dollars, can a solution to the energy problem be far off?

There are two things wrong with the kind of testimony this DOE official has presented to our committee. That testimony is supposed to persuade us Senators that we should appropriate the money requested. Well, not only am I not persuaded by the testimony; I do not even understand it. For me, the charm of quarks is well hidden. The other thing wrong with this testimony before our subcommittee is the envelopment of a program by the Magic Energy Clock. Even though I do not understand Dr. Deutch's testimony, I feel that I can state with some certainty that the construction and operation of Isabelle will not result in one less barrel of OPEC crude being imported to this country.

I had hoped that with the first appropriation request by the new Department of Energy that some of the errors of the past could be rectified. Some technologies have been oversold by their disciples in the past. We have been told, for example, that significant quantities of energy can be produced by magnetic fusion before this century is out. Other programs that realistically ought to be considered to be in the basic research stage are represented instead as if they would soon contribute significantly to energy supply. The energy supply category of the fiscal year 1979 budget for DOE amounts to $4.1 billion and that includes, among other things, $225 million for magnetic fusion and $295 million for quark hunting.

The Appropriations Committee has got to have a more realistic assessment of what we can expect in return for the money we appropriate. If the return on our investment in the high energy physics research program, for example, is enhanced prestige in the international scientific and technological communities, then we ought not be promised by DOE officials that the return will be barrels of oil.

I have asked Dr. Deutch to provide the committee a review showing how much money has been spent in years past in programs that this administration now claims are oriented toward increasing supply—budget function 271—and how much energy has been produced for the more than $12 billion that has been spent since 1974. I believe that a review of the kind I have requested will show that a lot of money has been spent in the guise of increasing supply, but that not much energy has been produced as a result. If my expectations are borne out, I believe that future DOE appropriation requests will be accompanied by justifications and testimony more easily appreciated and understood by members of the Appropriations Committee.●

ARGENTINE PRISONS

● Mr. ABOUREZK. Mr. President, I want to make available to my colleagues a recent press release issued by the Council for Hemispheric Affairs concerning the alarming incidents of March 14, 1978 at the Villa Devoto Prison on the outskirts of Buenos Aires, Argentina. The events involve what the Argentine Government calls a "prison uprising" among the political prisoners there which was brutally put down to mask the true conditions of the prison and the inmates there. The COHA statement serves as a reminder to all of us that repression and the deprivation of personal and civil liberties goes on in Argentina and that we must continue to bring pressure on the Argentine Government for a substantial improvement in the human rights situation. For the information and consideration of my colleagues I submit the COHA statement concerning the Devoto Prison incidents for the RECORD.

The statement follows:

ARGENTINE PRISON MASSACRE PROMPTS CALL FOR EMERGENCY PAROLE VISA PROGRAM FOR POLITICAL PRISONERS

In a statement distributed today, a private organization concerned with U.S.-Latin American relations called upon President Carter to take immediate steps to implement an emergency parole visa program for Argentine political prisoners whose very lives depend upon their immediate departure from the country for asylum in the U.S.

The Council on Hemispheric Affairs' statement said that recent occurrences at the Villa Devoto prison on the outskirts of Buenos Aires dramatically demonstrated the pressing need for the initation of such a program on a crash basis. At 8 A.M., on the morning of March 14, security forces of the Argentine Army and Federal Police moved in on the prison to suppress an uprising of uncertain origin within its walls. By 11 A.M. the same morning, the uprising had been suppressed and a reported 55 people had been killed and over 70 wounded in the melee. There were no reported casualties among the security forces.

According to Argentine government sources, the uprising had been staged by "common criminals", with no political prisoners being involved. Even in the unlikely case that this explanation is accurate, the COHA statement claimed that international human rights organizations and criminologists had long indicted the practices of the Argentine penal institutions which practice grossly inhumane physical and psychological policies that brutalized prison populations.

In its statement, COHA charged that events surrounding the prison incident suggest that another, perhaps more accurate explanation of what occurred at Villa Devoto, is that the uprising directly involved political prisoners and that the government used maximum force to put it down.

COHA noted that Villa Devoto prison was reported by Amnesty International to hold, as of November 1976, 2,794 female and 36 male political prisoners; of the total, 560 were eligible under Argentine law to leave the country for exile. A joint fact finding mission of U.S. lawyers organized by the Council on Hemispheric Affairs and the International Federation of Leagues for Human Rights, was told last month by the Argentine Interior Minister that one of the reasons these prisoners were not allowed to leave the country was because the U.S. government, among others, would not accept them. The U.S. Embassy in Buenos Aires later admitted that it was practically impossible to obtain a visa for the U.S. or otherwise obtain political asylum in this country.

In a telephone account received this morning from a reliable source in Europe, COHA was told that the International Red Cross had offered its assistance in providing internationally renown pathologists in order to make an independent autopsy on the dead prisoners. According to this source, Argentine authorities had turned down this request claiming that none of those who had been killed or wounded had been political prisoners. COHA also has received unconfirmed reports that the bodies of the dead had been cremated, thus preventing their positive identification or establishing whether they had died of bullet wounds.

In its statement, COHA also recalled that a document of uncertain origin, but possibly an internal U.S. government background paper, had come to its attention in early November 1977. This document, relating to the Argentine political prisoner situation, and the conditions in Argentine jails, was circulating among high State Department and National Security Council officials, as well as members of the U.S. Congress, and the Washington Press Corps. This material had also come to the attention of the Argentine Embassy in Washington. The background paper observed that:

"Prisoners have begun to organize various forms of protest ranging from hunger strikes to minor rioting. In these occasions, the authorities reacted violently, beating prisoners, selectively torturing, and, in some cases, executing apparent ring leaders, thus exacerbating the already explosive conditions. It is likely that in the next few months there will be an increase in prison protests that could flare up into full fledged rioting. The Argentine Government has elaborate contingency plans for such an eventuality. These plans call for massive killing during the rioting and selective execution of leaders and participants after the situations are brought back under control."

The COHA statement says that it has reason to believe that Secretary of State Cyrus Vance brought up the subject of the alarming conditions of Argentine jails with President Videla during his visit to that nation at the end of last November, but that the Vance initiative had been brusquely dismissed by the Argentine authorities.

The COHA statement went on to say that at the present time all the information that the press is carrying on what took place at Villa Devoto is what the government has been telling it. Wire services stories arriving in Washington have carried official government statements and fragmentary accounts being provided by people in the neighborhood of the jail. The government claims that those who died in the incident had been overcome by fire and fumes from burning mattresses that they themselves ignited. Yet reports from the neighborhood clearly stated that helicopters had been used in putting down the prison uprising and that machine gun fire, lasting about ½ hour, had been

heard at 8 A.M., three hours after the uprising had begun. Further reports had established the prisoners had barricaded themselves in Wing 7 of the jail when the government forces took their final action against them.

After the uprising had been repressed, the Argentine Minister of Justice and the Federal Director of the prison system issued statements that none of those who had been killed had died of bullet wounds but fell victim to fire and asphyxiation.

Our conclusion is that there is a very strong possibility that those who died on Tuesday in Villa Devoto were political prisoners and that the unusually harsh action used by the Argentine authorities to put down the uprising had been motivated by a desire to savagely suppress an action by political opponents of the military regime.

The Argentine authorities must realize that given its past human rights record and the fact that it has repeatedly eliminated its political opponents in staged events, they must go to unusual lengths to clarify what really took place at the prison. At the very least, if the bodies of the victims were cremated, the ashes should be turned over to independent authorities for chemical tests. The Argentine authorities must also make public the names of all those killed and wounded, as well as allow the survivors to speak before the word press to tell their version of the events at the prison.●

SEEK TIGHTER ENFORCEMENT OF SAFETY REGULATIONS

● Mr. SASSER. Mr. President, a great deal of information about the safety of our Nation's railroads has come to light since the disastrous explosion in Waverly, Tenn., caused by a derailed tank car carrying liquid propane. I believe this public awareness is a positive step toward effecting many needed changes in the railroad industry.

One example of the information which has come to light is the fact that 85 percent of the fatalities caused by exploding harzardous materials could be prevented. We have learned that the simple step of installing protective headshields could do that job. We have learned that existing tank cars could be retrofitted in a matter of months rather than a matter of years. In light of this information, it appears that the Department of Transportation may speed up the current program to install these devices in 4 years.

We have also learned much about the condition of the Nation's railbeds and the tracks themselves. I think this will help to encourage private enterprise and the Government to make a serious effort to take the steps needed to improve the rails and the roadbeds.

There are safer ways to transport hazardous materials. I think we are beginning to get a good idea of how to do that. Only through continued efforts to learn more and to make the public aware can we achieve that goal.

An excellent article written by Mr. Albert R. Karr appeared in this morning's Wall Street Journal. This article brings together a good deal of what we have learned in the past few weeks. I ask that it be printed in today's RECORD.

The article follows:

AGENCIES, FEARING RISE IN TANK-CAR DERAILMENTS, SEEK TIGHTER ENFORCEMENT OF SAFETY REGULATIONS

(By Albert R. Karr)

The recent freight-train derailments that killed 22 persons in Tennessee and Florida prompted fears of similar disasters among residents of areas far removed from those two states.

One such person was Leonard Bisk, a Philadelphia businessman. He grew concerned that Consolidated Rail Corp. trains that roll past his home near Jenkintown, Pa., might be carrying hazardous substances similar to the propane and chlorine gas involved in the Southern accidents. He registered that concern with the Federal Railroad Administration, which regulates rail safety. "We could have a major catastrophe very, very easily," Mr. Bisk says, because of what he terms worn track in the densely populated Jenkintown area.

The derailment last month in Waverly, Tenn., although it was in a less crowded region, led to the explosion of a propane tank car that killed 14 persons and injured about 50. A few days later, the derailment near Youngstown, in the Florida Panhandle, released highly toxic chlorine gas that killed eight persons and injured about 115 others.

While the concern is widespread, the worries naturally run strongest in places where tank-car derailments have already occurred. "Everyone is fearful" on such occasions, says Lloyd Fleming, the fire chief of Pensacola, Fla., the scene of a derailment, last fall. And, he adds, "they've certainly got a reason to be fearful."

A GROWING DANGER

Although tragedies like those in Tennessee and Florida seldom occur, rail-safety analysts warn that the danger is always there and that, in many ways, it is growing. Officials of the National Transportation Safety Board, among others, are worried by trends that seem to increase the chances of such disasters.

Each year, more and more hazardous substances are being produced and transported, by rail or otherwise. Government figures show a 40% rise in chlorine output and a 55% increase in anhydrous ammonia during the 1966-76 period. Such substances have become ingredients of many everyday products: heating fuels, clothing and fertilizer, for instance.

Alan Roberts, director of the Transportation Department's Office of Hazardous Materials, says his staff oversees shipments of more than four billion tons of dangerous goods each year, twice the level of a decade ago; perhaps 75% of this tonnage moves at least part of the way by rail.

For one reason or another, many trains—including some with dangerous cargo—are going off the track. Federal officials report that derailments now exceed 7,000 a year, and about one a day involves some shipment of hazardous substances. One big problem is deteriorating track. Although many railroads have been pouring large sums into repair, the industry has deferred track maintenance estimated to cost well over $4 billion. Defective wheels or other faulty equipment can also cause derailments. (So can sabotage; the safety board has said that caused the recent Youngstown, Fla., derailment.)

Moreover, to cut costs, trains are getting longer, and the tank cars carrying toxic or explosive cargo are getting bigger. The extra length and weight make it harder to control trains, adding to derailment dangers, and they increase the potential magnitude of any resulting disaster, federal officials say.

WASHINGTON VERSUS THE L&N

Aware of these perils, rail-safety authorities aren't resting easy. The Federal Railroad Administration has begun a drive to impose heavy penalties on railroads violating its safety rules—rules governing train operations, condition of track and equipment, and training of crews.

The agency's first big target is the Louisville & Nashville Railroad, which ran trains that derailed at Pensacola last fall, at Waverly, Tenn., last month and at Bowling Green, Ky., six days later. In the Pensacola accident, a cloud of anhydrous-ammonia gas from two punctured tank cars took two lives and injured 45 persons; Chief Fleming says the toll might have been far higher if the wind hadn't blown the gas away. The Kentucky derailment, however, didn't do any serious damage.

The L&N has a generally high accident rate and is a "very sloppy railroad," contends Raymond James, the agency's chief counsel. He suggests that inadequate operating and maintenance practices may have contributed to wheel and brake difficulties that showed up at Waverly, and also to equipment defects and operating "peculiarities" (including unusual train length) that investigators found at Pensacola.

Prime Osborn, the L&N's president, insists, however, that the railroad is doing all it can to operate safely, especially when carrying hazardous materails. He says the road tries vigorously to keep track in good shape, to run trains slowly on poor track, and to repair faulty equipment.

NEW SAFETY RULES

Government safety efforts aren't merely an outgrowth of the latest derailments. A few months before the Waverly and Youngstown accidents, the Federal Railroad Administration adopted new regulations that offer hope of saving lives. They require reinforcement of tank-car ends and installation of better couplings and insulation jackets on newly produced tank cars of certain types after Jan. 1 of this year; the jackets are designed to keep heat from the dangerous materials. Comparable old cars are due to be similarly refitted over four years, but because of the Florida and Tennessee accidents, officials are considering a speedup of this schedule; they may require some new safety features to be installed by the end of this year.

Cars of this kind make up only one-seventh of the entire U.S. fleet of 170,000 tank cars, but they have been involved in half the fatalities resulting from hazardous-materials accidents. Safety experts figure that the required improvements will help protect tank cars from being punctured and will contain cargo that might otherwise burst or leak out.

James King, the new chairman of the safety board, figures that the safeguards could prevent more than 90% of derailment-caused ruptures of tank cars carrying dangerous substances. He thinks that chemical companies and other shippers, which own most of the tank cars, should make these corrections voluntarily and quickly, without waiting the four years permitted. Otherwise, Mr. King says, the public might demand more drastic steps, like a ban on shipments of some substances. Waiting four years is "nonsense," he says—"there's no reason the public should play roulette."

Although railroads helped to develop the safety features that the Federal Railroad Administration recently required for tank cars, many railroads, tank-car builders and shippers vigorously resisted those regulations; some even went to court to try to get the rules nullified. But that opposition was weakened by a series of fatal accidents in recent years.

From 1960 through 1968, there hadn't been any deaths resulting from tank-car accidents. But fatalities occurred in both 1969 and 1970, and in 1974 the number rose to 10. After that, fatalities declined—until this year. Now, federal officials say, railroaders are more eager to promote safety than before.

But railroad executives still worry that the cost of making the tank-car improvements, plus further safety measures that federal, state or local governments might require, could force some shippers to switch to trucks for hauling hazardous materials. That might pose greater dangers, railroads warn.

The recent record does raise caution flags about added reliance on trucks. From 1975 through 1977, railroad accidents involving hazardous substances caused three deaths; in the same period, highway accidents involving tank trucks led to 75 fatalities. Explanations aren't hard to find: These trucks may travel through more towns than trains do and may make more frequent trips. But safety experts note that the disaster potential in a single rail accident is higher, simply because a train can carry so much more hazardous cargo than a truck can.●

THE AGRICULTURAL CRISIS

● Mr. BENTSEN. Mr. President, the Senate has spent almost 6 weeks now debating the Panama Canal treaties. We have heard over and over again that the treaties are important to our security; to our economy; to our standing in the world. The treaties have become an obsession for millions of Americans, an important symbol of what is right—or wrong—with this country.

Mr. President, I submit that the issue we are considering today—the 8-hour issue of our agricultural policy—is in many respects more far-reaching, more significant, and more important than the 6-week issue of the treaties.

In considering the Panama Canal treaties, we have constructed elaborate worst-case scenarios and debated at length "what would happen if."

In the case of agricultural policy, the worst case hypothesis is upon us. We are not talking about what might happen in Panama in the year 2001. We are talking about what is happening today to the American farmer and what this means to our Nation.

We are attempting to cope with a full-blown crisis that affects the economic future, the very likelihood, of 9 million Americans—our farmers and their families. We are debating the price the American consumer will pay for his food. We are discussing our future potential to compete effectively in international agricultural trade. We are seeking to determine whether there is still a place for the family farm in 20th-century America.

The American farmer is caught in a classic cost/price squeeze. A victim of his own efficiency and hard work, he has fallen prey to the irrevocable force of supply and demand.

Mr. President, at a time when many segments of our economy are calling out for relief from unfair or more efficient competition, the situation of the American farmer is unique. He is not inefficient—he can feed half the world. His equipment is not obsolete—it is the best money can buy. He has been quick to take advantage of technological breakthroughs. The American farmer is not only willing to put in a 14-hour day, 7 days a week. It is a sad but undeniable fact of life, Mr. President, that the American farmer today has little to show for his labor.

Like many of my colleagues, I have spoken with hundreds of farmers in recent months. I know their problems and their complaints. I have seen many Texas farms go up on the auction block during the past year. I have seen thousands of farm families forced off the land they have worked for generations.

I am convinced that the farmers of this Nation have a legitimate complaint; they have every reason to expect the Congress of the United States to come to their assistance. Today, before it is too late.

There is no requirement for a lengthy recital of why the American farmer is finding it difficult or impossible to make a dollar. The facts speak for themselves.

Let us consider very briefly the situation in Fisher County, Tex., a typical farm county. During the past decade the cost of petroleum products used by Fisher County farmers has risen by 216 percent—propane is up even more. Farm chemicals cost 175 percent more today than in 1967. Steel products like fencing are up by 245 percent; the cost of farm equipment is up 173 percent. Today a Fisher County farmer has to produce 19 tons of baled cotton to purchase a 100-horsepower tractor; he has to produce 87 pounds of wheat to buy one fencepost.

Farm prices have simply not kept pace with inflation in Fisher County, Tex. During the past 10 years cotton prices have increased by only 31 percent; wheat prices by 52 percent; milo by 28 percent.

The result, Mr. President, is that it costs the Fisher County farmer $130 to farm an acre of land and the crops he brings to market earn him only $100 per acre. This, I suggest, is a classic application of Micawber's law and the result, as Mr. Micawber so aptly noted, is misery.

Clearly, this situation is intolerable, not only for the American farmer, but to the American people who rely on the farmer. It is high time, Mr. President, to heed the warning of William Jennings Bryan—"destroy our farms and the grass will grow in the streets of every city in the country."

We have two proposals before the Senate to provide urgently required assistance to American agriculture. I am a cosponsor of Senator DOLE's flexibility parity bill. I believe it is the best possible response to the crisis confronted by millions of American farmers.

This bill is, indeed, a flexible act. Each farmer has the opportunity to select the target price and the set-aside level which best applies to his particular situation. This allows the farmer the flexibility he desires. It allows him to choose his own personal program and yet at the same time it will bring the total national production down to a level closer to our Nation's current demand, without Government fiat. The flexible Parity Act of 1978 does not guarantee the farmer a profit, but it does allow him a fair chance to receive a reasonable rate of return above his high costs of production.

I realize that flexible parity is a new idea, but it is an idea who's time has come. I am proud to support the flexible parity bill, and I hope my colleagues will not be too timid to join me.

I sincerely hope that the Congress will act today to treat the symptoms of the illness confronting American agriculture and will begin tomorrow to look for a long-term solution to the problems that have become so evident in this important sector of our economy.

Before yielding the floor, I would like to commend both the Senator from Georgia, the distinguished chairman of the Agriculture Committee, and the Senator from Kansas for their untiring efforts on behalf of the American farmer. I think the Nation owes them a vote of thanks and appreciation.●

MERIT SELECTION IN UTAH

● Mr. LUGAR. Mr. President, I take this opportunity to commend my colleagues from Utah for their active support of merit selection of Federal judicial officers.

Following the death of U.S. District Court Judge Willis Ritter, Senators GARN and HATCH acted immediately to establish a merit procedure for the selection of nominees to be considered by the President in filling this vacancy. This action is evidence of the Senators' personal integrity, and their deep commitment to the independent judiciary promised by the Constitution.

I am hopeful that Senators GARN and HATCH will receive the recognition due them by their constituents for rejecting the politics-as-usual approach to appointing a Federal judge. The people of Utah should know that under standard procedure in the Senate, either Senator from Utah could have effectively controlled the appointment of this new judge. Admirably they have chosen not to do so. Rather they have consciously decided that the Federal judiciary should stand above partisanship and political influence. They have rejected the most cherished of all political plums in favor of a system to select the best and most qualified U.S. district court judge for Utah.

Senators GARN and HATCH have also joined me and Senators WALLOP and STEVENS in cosponsorship of Senate Resolution 353, which provides for the merit selection of U.S. district court judges, attorneys, and marshals. This resolution would require that a merit selection procedure established by Senators from each State must meet certain minimum standards which insure genuine merit selection. The merit system established by the Senators from Utah meets the minimum standards required in Senate Resolution 353.

It should be noted here that other Senators have also expressed commitment to the genuine merit selection of Federal judicial officers, and have established commissions which meet the minimum standards contained in my resolution. With great respect and admiration, I wish to acknowledge these Senators, my colleagues from Kentucky, Iowa, Oklahoma, and Colorado. I wish to note here, also, that the Senators from California, New Mexico, and Pennsylvania have established merit selection systems which nearly meet these standards.

Once again, I compliment the Senators from Utah, and commend their action to the attention of all my colleagues.●

THE MASS SLAUGHTER OF BABY HARP SEALS

● Mr. HART. Mr. President, I would like to take this opportunity to praise the achievements of my colleague, Senator FLOYD K. HASKELL, for his work in the

field of environmental legislation. Congress has recognized the need to protect our environment and Senator HASKELL has been a leader in pushing through proposals which work to insure the preservation of our wildlife. He was responsible for securing additional lands for the Hunter-Fryingpan wilderness area in Colorado, and he authored the Weminuche, Flat Tops, and Eagles Nest wilderness designation and the Natural Resources Lands Management Act. Senator HASKELL has also worked for such legislation as the Endangered Species Act, the Endangered American Wilderness Act, and various other environmental proposals.

Senator HASKELL believes, as most of us do, that the environment consists of our most vital resources which we have no choice but to preserve. He feels we must protect the environment against further harmful intrusions so that future generations will be able to enjoy its unique beauty.

Senator HASKELL's concern for wildlife is further reflected by a statement read on his behalf to a group of approximately 300 citizens in Denver on Saturday, March 11, 1978. This group was protesting the mass slaughter of the baby harp seals off Newfoundland's coast. His statement demonstrates the depth of his feelings on the subject.

Mr. President, I submit Senator HASKELL's statement for printing in the RECORD.

The statement follows:

Each spring countless harp seal pups are hunted down for their fine white fur by Canadians and Norwegians on the ice off Newfoundland's coast. For over 200 years this yearly hunt has taken place with little or no concern for the welfare of these newborn pups. Indeed, these hunts were cloaked with adventure and courage, and the sealers were looked upon with a sense of admiration. Fortunately, this naive view has dramatically changed in the last few years, as the reality of the mass slaughter of these seal pups has become well-known.

This recognition has led to a series of actions to protect the seal pups. Helicopters carrying sealers to the ice have been banned since the 1960's. In 1971, international pressure was great enough to push the Canadian government into placing constraints on the hunting methods and numbers of seals harvested. Until 1977, quotas were set by the International Commission of North Atlantic Fisheries. This responsibility now lies with the Canadian government since it has extended its fisheries jurisdiction to 200 miles off its coast.

Unfortunately, the Canadian government has not been as responsive to world concern for these seal pups as was hoped. Canadian officials have insisted that the harp seals are being killed humanely, and that the harp seal population is increasing yearly. This statement has been met with skepticism by several groups, including a Vancouver based group called Greenpeace. Greenpeace contends that the harp seal population has actually dropped and the seal could face extinction in about 50 years.

The U.S. Government has tried to prevent this inhumane killing of these seals by enacting the Marine Mammal Protection Act which bans all imported products of the harp seals. A House Concurrent Resolution was passed last year to urge the Canadian Government to stop this slaughter, but it has thus far been ineffective. I sincerely hope, however, that the Canadians will soon realize how important it is to protect these seals and that they will take appropriate action to do so. The Canadian Government has been studying the seal population to determine the true numbers of seals, and their life cycle; however, I feel this government must take on the responsibility to do much more to protect these seals. I do not believe we can continue to condone the antiquated hunting methods which are used to kill these seal pups, nor do I believe that we can adequately determine reasonable hunting quotas without further studies of the harp seal and its environment.

In a world where the importance of our environment has been so widely recognized, it is hard to imagine that cruel hunting practices are still allowed. I firmly believe this situation demands Congressional attention, and I will personally continue to fight for the humane treatment of the harp seal.●

TOM STORRS GIVES ELOQUENT ANSWER TO SECRETARY CALIFANO

Mr. HELMS. Mr. President, Thomas I. Storrs is one of North Carolina's most prominent bankers. A former officer of the Federal Reserve Bank of Richmond, he now serves as chairman of the board of the North Carolina National Bank. He is a personal friend of long standing and one for whom I have the highest respect.

Tom Storrs is a patriotic American who clearly perceives the imminent threat to individual freedom in this country which Secretary Califano's antismoking crusade presents. Responding to a letter from Mr. Califano, my distinguished friend has forcefully dissented from the all too familiar notion that HEW bureaucrats have the unqualified right to impose their standards on American citizens in an area that should be left to personal choice and convenience.

Mr. Storrs has directed our attention to just another in a long line of perhaps well-intentioned, but misguided, bureaucratic initiatives which miss the mark and create more problems than they solve.

Mr. President, I ask that Secretary Califano's letter and Mr. Storr's reply be printed in the RECORD at the conclusion of my remarks.

The articles follow:

WASHINGTON, D.C., *February 16, 1978.*

Mr. THOMAS I. STORRS,
Chairman, NCNB Corporation,
Charlotte, N.C.

DEAR MR. STORRS: Last month I announced an expanded national program on smoking and health. As I stated then, cigarette smoking is the leading cause of premature death and disability in this country, more than 300,000 Americans died from diseases associated with smoking last year alone. Our estimates indicate that smoking annually adds between $5 and $7 billion to health-care bills and that it costs between $12 and $18 billion in lost productivity, foregone wages, and absenteeism.

In developing our new program, we reexamined our own internal guidelines on smoking within HEW buildings and facilities. As a result, we have adopted a new policy which restricts smoking in common areas and respects the rights of non-smokers to a smoke-free environment.

For your information, I am enclosing copies of both my announcement of the expanded program and our new internal policy. In considering the practices of your company with regard to smoking, I would hope that our policy might be useful as one possible model.

If this Department can be helpful to you in providing additional information related to smoking and health, please do not hesitate to call on us. If you have ideas to assist HEW and other companies in this important effort, I would appreciate hearing of them. It is only through our cooperative efforts that this health challenge can be met.

Sincerely,

JOSEPH A. CALIFANO, Jr.

CHARLOTTE, N.C.,
March 7, 1978.

Hon. JOSEPH A. CALIFANO, Jr.,
The Secretary of Health, Education, and Welfare, Washington, D.C.

DEAR SECRETARY CALIFANO: I am unable to join you in imposing further unnecessary restrictions on the personal freedoms of Americans. I cannot presume to be an expert on the health effects of smoking, and I cannot presume to impose either your or my conclusions on this subject on the employees of NCNB Corporation.

It is our policy to provide attractive and efficient spaces for our employees and our customers. Without exception, these include adequate air conditioning. There is no generalized problem in our company with regard to decisions by individuals to smoke or not to smoke. As a matter of good personnel policy, we are as responsive as possible to the wishes of individual employees concerning their immediate environment.

Looking beyond our own firm, I am disturbed by the philosophy underlying your letter and its attached address and statement of policy. It is, in my opinion, absolutely contrary to the basic concepts of this country for an employer to impose upon employees requirements or restrictions concerning individual conduct which go beyond the needs of the employment. Your letter clearly indicates that your guidelines are not relevant to work performance but are intended to implement a program relating to health by restricting smoking in those areas over which you have authority. I should disapprove of such action by any employer. I particularly resent it when taken by a government officer whose conduct toward his employees should be an example rather than a cause for concern.

I am sending a copy of this letter to the President to reflect the reaction of one of the addressees of your letter.

Sincerely yours,

THOMAS I. STORRS.●

RESOLUTION HONORING G. WERBER BRYAN

● Mr. HOLLINGS. Mr. President, recently the South Carolina General Assembly paid homage to a pioneer in our State's struggle to cope with the problems of the mentally ill. In honoring G. Werber Bryan, the general assembly has recognized the unparalled contributions of as dedicated a citizen and public servant as it has ever been my privilege to know. His efforts have borne fruit in many ways in our State, and recently these efforts were recognized with the dedication of the G. Werber Bryan Psychiatric Hospital. Here is a facility which will turn into reality the values and practices for which Werber Bryan has worked these many years. It has been a long road from those days a quarter of a century ago when the State made its first appropriation of any size for mental health. and that was with Werber Bryan in the South Carolina House of

Representatives fighting for it every step of the way.

Now we see the playoff of these efforts in facilities such as this one. But we best honor my good friend by our continuing and future efforts in the great cause for which he has given so much.

Mr. President, I submit the resolution passed by the South Carolina General Assembly on February 28, 1978, for printing in today's RECORD.

The resolution follows:

A CONCURRENT RESOLUTION

To congratulate the Honorable G. Werber Bryan of Sumter, South Carolina, on being honored with the dedication of the G. Werber Bryan psychiatric hospital in recognition and appreciation of his monumental and enduring contribution toward improving the treatment and understanding of the problems of the mentally ill

Whereas, The Honorable G. Werber Bryan, prominent attorney and civic leader of Sumter, can boast a long and distinguished career of public service in many areas but in none so noteworthy as his prolonged, dedicated struggle to focus public attention upon the desperate needs of the mentally ill; and

Whereas, the metamorphosis of this singular enterprise was conceived and nutured in 1951 while Mr. Bryan as a member of the South Carolina House of Representatives was elected Chairman of the Legislative-Governor's Commission on Mental Health. Through the efforts of Mr. Bryan and with the support of the committee members the first substantial appropriation for mental health was successfully approved by the General Assembly; and

Whereas, in the case of Werber Bryan the complete record of his accomplishments in Mental Health and his efforts in focusing public attention and concern on the mentally afflicted cannot be illustrated in a list of the offices and positions of responsibility and leadership which his peers bestowed upon him; rather it is in the man himself that the true record is written, his gentle persuasion, his generosity with his time, his endless hours in behalf of these unfortunate members of society. These intangible ingredients cannot be measured, they abide in his compassionate heart and in his humanity; and

Whereas, the G. Werber Bryan Psychiatric Hospital is testimony to Mr. Bryan's faithfulness to the commitment made in the first report of the Committee to Study the Problems of the Mentally Ill in 1952 wherein is stated "It is our duty to see to it that our hospital advances as medical science advances. We must see to it that our hospital is made an active treatment center maintained on the same high standards that the public demands of its other hospitals. We cannot in good conscience afford to commit the citizens of South Carolina, our friends and relatives, to any institution and then forget them"; and

Whereas, the G. Werber Bryan Psychiatric Hospital is a monument to a great humanitarian and a message to each of us that when we work for others our efforts return to bless us. Now, Therefore, Be it resolved by the House of Representatives, the Senate concurring:

That the General Assembly by this resolution congratulates The Honorable G. Werber Bryan of Sumter on being honored with the dedication of The G. Werber Bryan Psychiatric Hospital in recognition and appreciation of his monumental and enduring contribution toward improving the treatment and understanding of the problems of the mentally ill.

Be it further resolved that a copy of this resolution be forwarded to Mr. G. Werber Bryan, P.O. Box 2038, Sumter, South Carolina, 29150.●

AGRICULTURE

● Mr. GOLDWATER. Mr. President, it is a very uncomfortable role that I find myself in on this day when the Congress is trying, and I emphasize trying, to help American agriculture. I find myself in the position of not being able to support these efforts. My reasons are based solely on the inflationary effects that these measures will have. American agriculture today finds itself in these circumstances for the sole reason that the Federal Government has been engaged in the support of 30 percent of agriculture for many, many years. While this support has not been the sole reason for inflation, it has had an effect and a rather sizable one. The fact that the farmers today have to pay more for equipment, for labor, taxes, and so forth, can be blamed on one unpleasant fact of life that we have had with us since the middle 1930's; namely, inflation. It affects not only the farmer, it affects every single businessman, professional man and workingman in this country. If inflation is allowed to go its unabated way, if we in the Congress do not recognize that we are to blame for inflation, then the time is not far distant when, regardless of Federal support, no one in this country, including farmers, will be able to make a profit. I will recall to my colleagues' attention the fact that the downfall of the Roman Empire started with the support of agriculture and that the first support was only a small percentage on behalf of the Roman farmers. It was not long, however, before the others could not make money and then the kind of support agriculture was getting was extended to the rest of the economy. It resulted in the lowering of morals and contributed greatly to the decline and fall of Rome. I cannot support measures that add to the problems that we already have, and I dislike this, because I do not like to see farmers or anyone else in this country working for a living but who cannot quite "hack" it.●

RECLAMATION LANDS FAMILY FARM ACT AMENDMENTS

● Mr. ABOUREZK. Mr. President, earlier this week, Senator NELSON introduced an amendment in the nature of a substitute for S. 1812, the Reclamation Lands Family Farm Act. In order that those interested in this matter may have a chance to read the new version in its entirety, I submit the bill for the RECORD.

The bill follows:

S. 1812

On page 1, strike all after the enacting clause and substitute the following:

That this Act, divided into titles and sections in accordance with the following table of contents, may be cited as the "Reclamation Lands Family Farm Act".

TABLE OF CONTENTS

TITLE I—FINDINGS, PURPOSES, DEFINITIONS
Sec. 101. Findings and purposes.
Sec. 102. Definitions.
TITLE II—ACREAGE LIMITATIONS AND EQUIVALENCY
Sec. 201. Lands other than class 1 lands—acreage equivalency.
Sec. 202. Purchase of land for dependents of qualified purchaser.
TITLE III—EXCESS LANDS AND IRRIGATION RIGHTS
Sec. 301. Rights to water and termination or suspension of rights; moratorium on sale of excess lands.
Sec. 302. Disposition of excess lands.
Sec. 303. Speculation and profiteering prohibited.
TITLE IV—REPAYMENT OF PROJECT COSTS
Sec. 401. Project cost repayment provisions of contracts.
TITLE V—LEASING OF CERTAIN EXCESS LANDS
Sec. 501. Purchases of excess lands by the Secretary in order to lease these lands to family farmers.
Sec. 502. Leasing of Lemoore Naval Air Station land to family farmers.
TITLE VI—MISCELLANEOUS
Sec. 601. Guarantees by Department of Agriculture of loans made by private lenders to qualified leaseholders.
Sec. 602. Copies and explanations of this Act to be freely available.
Sec. 603. Negotiations of project contracts to be conducted in open sessions following public notice.
Sec. 604. Secretary's rules and regulations to be published.
Sec. 605. Department of Agriculture programs for family farmers.
Sec. 606. Authorizations of appropriations.

TITLE I—FINDINGS, PURPOSES, DEFINITIONS

FINDINGS AND PURPOSES

SEC. 101. (a) The Congress finds that:

(1) a populous, prosperous rural society is essential to the preservation of the national character, and rural prosperity must be based on a pattern of broadly distributed ownership and operation of productive agricultural land;

(2) the purpose of reclamation law is and has been to encourage the settlement of federally irrigated land by family farmers living on or near their land;

(3) the administration of a substantial amount of the acreage currently affected by reclamation law has not accomplished and is not likely to accomplish the statutory policy of settling family farmers on the land;

(4) the construction of reclamation projects, by law, involves substantial subsidies to landowners; and that the subsidies are intended to provide landowners with an incentive to sell excess land, presumably to family farmers, but too often land has been sold instead to nonfarming investors;

(5) there are large numbers of potentially successful family farmers, both with and without financing, who, as a consequence of practices approved by the Secretary of the Interior for the sale of reclamation land, are unable to move onto the land and thus fulfill the original purposes of reclamation law;

(6) appraisal techniques to determine the approved selling prices of excess land do not fully exclude enhancements in value attributable to projects;

(7) while vendors of excess land can dispute price approval decisions of the Bureau of Reclamation, no procedure exists for prospective purchasers to challenge these decisions; and

(8) due to a variety of weather conditions, soil qualities, and other natural characteristics affecting the productivity of farmland, it is inequitable to apply the same acreage limitations to every parcel of land.

(b) (1) It is the purpose of this Act to reaffirm as law and policy that—

(A) the congressional intention in reclamation law is and has been to foster the settlement of bona fide family farmers living on or near the land in Federal irrigation projects;

(B) those who do not comply with this purpose should be excluded from the right to receive federally supplied water;

(C) the intent of the law is to exclude project benefits from the price at which excess land initially receiving federally supplied water is sold; and

(D) there should be established procedures to assure sounder repayment practices from those receiving federally supplied water.

(2) It is the further purpose of this Act to provide that—

(A) the one-hundred-and-sixty-acre limitation shall be applied to less poductive lands in a manner, and in accordance with clear regulations, that will compensate for their less productive quality; and

(B) Federal financial assistance shall be provided to potential family farmers who would otherwise be unable to own or operate the land.

DEFINITIONS

SEC. 102. As used in this Act, the term—

(1) "family farm" means a farm (A) owned and operated or leased and operated by a family farmer; (B) of a size small enough to be maintained and operated by such family farmer and members of his family or with hired labor; (C) which provides sufficient income by itself in average or better agricultural years to enable the farmer to meet necessary family and operating expenses, including the maintenance of essential chattel and real property and the payment of debts; and (D) which is no more than three hundred and twenty acres of class 1 land or its equivalent in lands of lesser productivity; and is within the acreage limitations for farm ownership and operation as set forth in section 202 of this Act;

(2) "a cooperative family farm" means (a) a family farm jointly owned and operated or jointly leased and operated by more than one qualified purchaser or leaseholder, each of whom is a family farmer as defined by this Act, and (b) which is within the acreage limitations as set forth in section 202(b) of this Act. A cooperative family farm may, as specified in section 202(b), exceed three hundred and twenty acres of class one land or its equivalent in lands of lesser productivity.

(3) "family farmer" means an individual who (A) owns and operates, or leases and operates for his or her own account, a farm; (B) lives on or near the land which constitutes the farm; and (C) derives a major portion of his or her income during periods of normal agricultural productivity from the operation of that farm. The term does not include an individual whose participation in farming operations is primarily limited to management decisions with respect to land rented or leased to another person; but the term may include an individual, otherwise meeting the provisions of this definition, who operates a family farm in the partnership or corporate form of business organization;

(3) "qualified purchaser" means any individual who (A) is eligible under the Federal reclamation laws to purchase excess lands; (B) would be eligible, after having made such a purchase, to receive from a project or division, water for the lands purchased; and (C) does not own land receiving or eligible to receive federally supplied water in any project or division subject to Federal reclamation laws;

(4) "cooperative family farmer" means a family farmer who owns and operates or leases and operates for his or her own account a cooperative family farm with one or more other family farmers.

(5) "qualified leaseholder" means any individual who (A) is eligible under the Federal reclamation laws to purchase excess lands; (B) would be eligible, after having made such a purchase, to receive from a project or division water for the lands purchased; (C) certifies that lands leased pursuant to this Act will be used as a family farm, and that that individual will operate that farm as a family farmer; (D) does not have the financial resources necessary to purchase a farm of an economically feasible size; (E) has been unable to obtain adequate financing to purchase such a farm; and (F) has the ability to farm those lands as a family farmer;

(6) "dependent" means a person dependent on another person for over half of his or her support, within the meaning of the Internal Revenue Code (26 U.S.C. 152);

(7) "Secretary" means the Secretary of the Interior;

(8) "Federal reclamation laws" means the Act of June 17, 1902 (32 Stat. 388), as amended (43 U.S.C. 391), and Acts amendatory thereof or supplementary thereto, including this Act;

(9) "project" means a Federal irrigation project authorized by or subject to the Federal reclamation laws;

(10) "division" means a substantial irrigable area of a project designated as a division by order of the Secretary;

(11) "Administrator" means the Administor of the Farmers Home Administration; and

(12) "class 1 land" has the meaning defined in paragraph 2.5.2, "Class 1", of chapter 2.5, "Land Classes", of part 2, "Land Classification", of volume V, "Irrigated Land Use", of the United States Department of the Interior Bureau of Reclamation Manual, or comparable definition contained in a subsequent manual that is officially designated as the successor in function to that manual.

TITLE II—ACREAGE LIMITATIONS AND EQUIVALENCY

LANDS OTHER THAN CLASS 1 LANDS—ACREAGE EQUIVALENCY

SEC. 201. (a) Notwithstanding any other provisions of law, the Secretary, for purposes of administering Federal reclamation laws, may establish the acreage of land held in private ownership by any one individual owner, which is eligible as nonexcess lands to receive project water from, through, or by means of project works, at one hundred and sixty acres of class 1 land, or the equivalent thereof in other lands of lesser productive potential. Standards and criteria for the determination of land classes pursuant to this authority shall make use of, where possible, on land classification surveys that have been made or shall be made in feasibility studies at or before the time the project involved was begun. Where previous land classification surveys do not exist, the Secretary may establish acreage equivalency formulas on a project-by-project basis. In any classification for equivalency purposes, including those cases where preproject surveys already exist, the Secretary shall hold public hearings in the area affected before promulgating regulations. The regulations will go into effect sixty days after their final promulgation. This section shall not apply to any project, unit, or division of a project, or repayment contracting entity located in an area in which the average frost-free growing season, as as determined from published Department of Commerce records, exceeds one hundred and eighty days. In establishing such equivalency formulas, the Secretary shall certify to the Congress in writing that the acreage equivalency formula will be adequate to provide for operating expenses, debt retirement and family living expenses and (b) the goal of distributing the benefits of the reclamation program as widely as possible will be realized.

(b) The Secretary is authorized upon request of the holder of an existing contract under Federal reclamation laws to amend the contract to conform to the provisions of subsection (a) of this section, and to otherwise perform any and all acts appropriate to carrying out the purposes of this Act. All such amendments shall be negotiated and executed in keeping with the purposes and procedures set forth in sections 602, 603, and 604 of this Act.

PURCHASE OF LAND FOR DEPENDENTS OF QUALIFIED PURCHASER

SEC. 202. (a) A qualified purchaser will be eligible to purchase, and a qualified leaseholder will be able to lease, in addition to the one hundred and sixty acres for which he or she is qualified under reclamation law, one hundred and sixty additional acres for one dependent, with whom he or she has permanently resided for a period of at least one year prior to the date of purchase: *Provided*, That the purchaser is a family farmer as defined by this Act.

(b) In the case of an individual purchaser without dependents the Secretary may allow the purchase or lease of up to three hundred and twenty acres if the purchaser or leaseholder is otherwise qualified under reclamation law and will be a family farmer as defined in this Act.

(c) In the case of a cooperative family farm, qualified purchasers or qualified leaseholders may purchase or lease up to three hundred and twenty acres, or purchase and lease land in any combination up to three hundred and twenty acres: *Provided*, That none of the qualified purchasers or leaseholders are (1) married to each other or (2) under the age of 18: *And provided further*, That each purchaser or leaseholder is a family farming as defined by this Act, and is farming the land purchased or leased.

(d) An individual purchasing land but not operating the land as a family farmer will be entitled to purchase up to one hundred and sixty acres of land: *Provided*, That no other dependent of the purchaser has previously purchased land in any project: *And provided further*, That the purchaser permanently reside within twenty-five miles of the land purchased.

TITLE III—EXCESS LANDS AND IRRIGATION RIGHTS

RIGHTS TO WATER AND TERMINATION OR SUSPENSION OF RIGHTS; MORATORIUM ON SALE OF EXCESS LANDS

SEC. 301. (a) One year after the date of enactment of this Act, no water from any project or division shall be delivered to any lands unless (1) those lands comprise a family farm or a cooperative family farm, (2) those lands are described in subsection (b) of this section, or (3) thost lands are within a project or division which prior to the enactment of this Act had been exempted by statute from the one-hundred-and-sixty-acre limitation. The Secretary, through the Commissioner of Reclamation, shall take appropriate steps to insure that water deliveries to lands not in compliance with the preceding sentence are terminated.

(b) In addition to lands comprising family farms, the following lands shall be entitled to receive or continue to receive water from a project or division:

(1) land currently under recordable contract;

(2) land owned by a former family farmer who has retired from active farming, who had farmed that land as a family farmer for five years or longer before retiring, and who continues to reside on that land;

(3) land owned and operated by a family farmer who otherwise conforms and complies with the provisions of this Act, but who leases that land for not more than two years of any ten-year period, or in instances approved by the Secretary on the basis of extreme hardship to that family farmer, for more than two years of a ten-year period;

(4) subject to the provision of subsection (c) of this section, land acquired by foreclosure or other process or procedure in satisfaction of a mortgage or any other legal instrument securing a creditor's rights;

(5) subject to the provisions of subsection (c) of this section, land acquired by inheritance or devise; and

(6) subject to the provisions of subsection (c) of this section, land not under recordable

contract purchased prior to the date of enactment of this Act and actually receiving or lawfully entitled to receive water on that date.

(c) Lands that receive or are entitled to receive water pursuant to clause (4), (5), or (6) of subsection (b) of this section shall cease to receive or be entitled to receive water from any project or division unless those lands are sold to the Secretary pursuant to section 501 or to a qualified purchaser and operated as a family farm—

(1) in the case of lands described in clause (4) or clause (5) of subsection (b), three years after the date of acquisition of title to or other possessory rights in those lands by a person or persons not qualified purchasers or for operation otherwise than as a family farm; except where land is inherited by a direct lineal descendant of the purchaser, in which case the person or persons inheriting the land will have ten years in which to come into compliance with the provisions of this subsection;

(2) in the case of lands described in clause (6) of subsection (b), five years after the date of enactment of this Act.

(d)(1) Not less than sixty days prior to terminating deliveries or entitlement to deliveries of water to any lands pursuant to this section, the Secretary shall give notice by personal service or by certified mail to the record owner or owners of those lands, to any person or persons known to have a leasehold or other lawful possessory or security interest therein, and to the head or heads of any household or households of persons known to the resident thereon. The notice shall specify the legal reason or reasons for and the intended date of the termination. Each person having a right to receive such notice shall have a right, within the period after notice and prior to termination, to present to the Secretary or his delegate oral or written arguments that those lands are in compliance with this section and that deliveries or entitlement to deliveries of water accordingly should not be terminated.

(2) The Secretary, by regulation, shall establish procedures for the settlement of contested rights to water under this section. Those procedures shall provide for final determination of such rights at the administrative level not later than one year after the issuance of the sixty-day notice of intended termination. While any such contest is pending, lands involved in that contest may receive water for the duration of the growing season during which the intended termination date fell. After that growing season has ended, no deliveries of water shall be made to those lands during the pendency of the contest at the administrative level or in the courts: *Provided*, That if the Secretary shall upon inquiry find and by order declare that, in a particular case, the termination of deliveries of water would cause hardships to the recipients of water that substantially outweigh the benefits to enforcement of the policy and purpose of this Act, the date of suspension of deliveries of water during the pending contest may be deferred for not to exceed two additional growing seasons. Thereafter, no water shall be delivered to those lands until they have been duly found or adjudged to be in compliance with this section.

(e) Not later than three months after the enactment of this Act, the Secretary shall publish proposed regulations for the administration of this section and shall provide for hearings on those proposed regulations during the following six months. There shall be at least one day's public hearing in each region of the Bureau of Reclamation. The Secretary shall also provide for the filing of written comments on the proposed regulations during the six-month period following their publication. The Secretary shall promulgate final regulations, taking into account testimony heard and suggestions received, not prior to six months, not later than one year, after the date of enactment of this Act.

(f) No excess lands in any project or division receiving or eligible to receive federally supplied water shall be sold for a period of one year following the date of enactment of this Act: *Provided*, That, if the Secretary, upon inquiry finds and by order declares that, in a particular case, the moratorium on the right to sell land would cause hardships to the owner or owners of that land which substantially outweigh the benefits of the moratorium to achievement of the policy and purpose of this Act, the moratorium on land sales shall be waived in the case.

DISPOSITION OF EXCESS LANDS

SEC. 302. (a) A seller of excess land shall have the right to determine to which purchaser he or she will sell his or her land if that sale does not result in the retention of any interest other than purchase-money mortgages (or other equivalent purchase-money security instruments) on the part of the seller: *Provided*, That only qualified purchasers of that land may receive federally supplied water therefor under this Act and Federal reclamation laws. If the seller is unable or unwilling to choose among two or more offers for the same parcel of land from purchasers, the offer to be accepted shall be determined by lot, in accordance with subsection (b).

(b) The Secretary shall determine by lot which of two or more offers from qualified purchasers for the same parcel of excess land shall be accepted by the seller, when the seller is unable or unwilling to make a choice among competing offers from qualified purchasers. The Secretary shall promulgate regulations for the conduct of lotteries for that purpose. Those regulations shall provide that—

(1) Each prospective actual occupant of the excess land to be sold pursuant to a lottery among prospective qualified purchasers shall be entitled to one and only one chance in that lottery if that prospective occupant is a qualified purchaser or a dependent in whose right a qualified purchaser may purchase land pursuant to section 202.

(2) Persons who participated unsuccessfully in prior lotteries shall be entitled to separate, earlier chances in each new lottery for a different parcel of land, in accordance with their seniority as lottery participants. Whenever the Secretary is called upon to determine the purchaser of a parcel of excess land by lot under this section, he shall provide first for a lottery in which the chances drawn will be only those of the present qualified purchasers who have participated unsuccessfully in the greatest number of prior lotteries for the purchase of excess land, and only if no persons come forward in that class shall provision be made for a lottery in which the chances drawn will be only those of qualified purchasers who have participated unsuccessfully in the next-greatest number of prior lotteries. The Secretary shall prepare and maintain a roster of participants in lotteries for the purchase of excess land which shall indicate the lotteries in which each person has participated unsuccessfully, for purposes of carrying out this paragraph. Persons on that roster shall be given, at their last known address, direct-mail notice of each lottery until they indicate to the Secretary that they are no longer interested in purchasing excess land or have ceased to be qualified purchasers.

(3) Lottery chances and positions on the roster of unsuccessful participants in prior lotteries shall not be transferrable in any manner.

(c) The appraisal of excess lands for sale thereof shall be made without reference to any chattel, fixture, or other property which can be liquidated by the seller in a sale unrelated to the sale of the land, such as tractors, trucks, leasehold rights, securities and other items or materials. In all cases the price for excess land shall be no higher than the price the Secretary determines would result from taking the fair market value of the land at the initiation of actual construction of the project and indexing it by the Consumer Price Index for the period between the initiation of construction and the sale of the land.

(d) Disagreements between the seller and a qualified purchaser of excess lands covered by any recordable contract of sale as to price or any other condition of sale shall be resolved by arbitration. The Secretary shall promulgate regulations, pursuant to section 604, for the conduct of such arbitration.

SPECULATION AND PROFITEERING PROHIBITED

SEC. 303. After the date of enactment of this Act, no owner of land receiving or entitled to receive water from a project or division who purchased that land as excess lands and at a price limited by the Federal reclamation laws shall sell that land at a price greater than that owner's cost for the land, indexed by the Consumer Price Index for the period between that owner's purchase and sale of the land: *Provided*, That, if that owner has actually farmed that land as a family farmer for a period of ten years prior to that sale, the sale price may be at fair market value without reference to the Federal reclamation laws. The Secretary is authorized to approve or disapprove the price of land sold subject to this section and to institute such procedures, by regulations promulgated pursuant to section 604, as may be necessary to assure the settlement of family farmers on excess lands and to prevent speculation and profiteering in land receiving or entitled to receive water from any project or division, including speculation and profiteering by family farmers for a period of ten years.

TITLE IV—REPAYMENT OF PROJECT COSTS

PROJECT COST REPAYMENT PROVISIONS OF CONTRACTS

SEC. 401. (a) Notwithstanding any other provision of law, the Secretary, in the case of water right contracts or amendments to contracts entered into after the date of enactment of this Act, shall be required to stipulate in any such contracts that all rates and assessments to be paid by the contracting entity or the landowners in that entity shall be renegotiated every five years. The repayment capacity studies on which such rates and assessments may be based shall also be conducted every five years.

(b) Notwithstanding any other provision of law, the Secretary, in case of water right contracts or amendments to contracts entered into after the date of enactment of this Act, shall require that repayment for the distribution infrastructure systems shall commence for each section of the system when it begins regularly and permanently to deliver water. No section of the system shall be used to deliver water for more than one year unless repayment for that section has commenced.

TITLE V—LEASING OF CERTAIN EXCESS LANDS

PURCHASES OF EXCESS LANDS BY THE SECRETARY IN ORDER TO LEASE THOSE LANDS TO FAMILY FARMERS

SEC. 501. (a)(1) During the fiscal year beginning October 1, 1978, and each of the next following four fiscal years, the Secretary, subject to the availability of lands and appropriations, is authorized and directed to utilize all moneys appropriated for that purpose to purchase excess lands, and fixed equipment thereon, for lease to family farmers in accordance with the provisions of this section. The Secretary shall make no such purchases within any fiscal year in excess of the acreage he determines will be necessary to meet the demands of potential qualified leaseholders under this section during that

and the next following fiscal year. Such purchases may be made in any size units which the Secretary determines to be necessary to enable the leaseholders thereof to farm such lands as a family farm in accordance with the provisions of this Act: *Provided*, That the ultimate division of such lands shall be consistent with the provisions of this Act concerning ownership.

(2) There is authorized to be appropriated for the fiscal year commencing October 1, 1978, and for each of the next following four fiscal years, the sum of $5,000,000 to carry out the provisions of this subsection.

(b) (1) The Secretary is authorized to lease lands purchased pursuant to subsection (a) of this section to any qualified leaseholder in an amount of acreage which the Secretary determines will be necessary to farm the land as a family farm: *Provided*, That leasehold acreages shall be subject to the same conditions and limitations as those which would apply under section 202.

(2) Each such lease shall contain a requirement that the leasehold will be used as a family farm and the leaseholder will farm the lands as a family farmer.

(c) In determining the amount of rent which a leaseholder shall be required to pay, the Secretary shall require an amount sufficient to enable the Secretary to pay all costs, excluding interests, incurred in the ownership of land and the administration of the program established by this title. The Secretary, in determining the amounts, shall be authorized to adopt variable rental schedules in order to take into account both bountiful and natural-disaster conditions.

(d) Leases under this section shall not exceed, originally or by any extension or extensions, a total term of seven years, and in no case shall any such lease be issued for a term of less than two years. No leaseholder shall sublease lands covered by his or her lease unless approved by the Secretary on the basis of an extreme hardship to that leaseholder.

(e) The Secretary shall be authorized to terminate any lease for any failure to pay rents or other substantial violation thereof by the leaseholder in accordance with such regulations as he shall prescribe.

(f) In accordance with such regulations as the Secretary shall promulgate, a leaseholder shall be authorized, during the term of that lease, to make improvements within a five-acre area approved by the Secretary for that purpose. Upon the termination of that lease, the Secretary shall compensate the leaseholder for such improvements in an amount not to exceed the fair market value thereof.

(g) In those cases where two or more qualified leaseholders make application for lease of the same tract of land, the Secretary shall determine which of those applicants shall be entitled to that lease by lot in the same manner as provided under subsection (b) of section 302 of this Act for choosing among competing offers from qualified purchasers.

(h) In any case in which a qualified leaseholder certifies in a manner satisfactory to the Secretary that he or she does not have the financial resources necessary to operate the lands covered by that lease as a family farm, including nonfixed assets, such as tractors, trucks, and other items or materials, the leaseholder shall be entitled to receive financial assistance in accordance with the provisions of section 601 of this Act.

(i) In any case in which the Secretary determines, on the basis of a qualified leaseholder's use of the lands covered by his or her lease during the term thereof and such other factors as the Secretary, by regulation, shall prescribe, that that leaseholder can successfully manage and operate the lands covered by the lease as a family farm, the Secretary shall, upon application of that leaseholder submitted to the Secretary within six months prior to the expiration of the term of that lease, sell those lands to that leaseholder at the same price the Secretary paid for the land at the time of its acquisition indexed by the Consumer Price Index for the period between acquisition and sale of the land. If the leaseholder certifies in a manner acceptable to the Secretary that he or she does not have and has been unable to obtain adequate financial resources to make the purchase, the leaseholder shall be entitled to receive financial assistance in accordance with section 601 of this Act. All proceeds of those sales shall be placed in a fund to be administered by the Secretary for the purpose of purchasing additional lands for lease under the provisions of this title.

(j) Upon the purchase of land pursuant to subsection (i), the former leaseholder shall be subject to all of the conditions, limitations, and restrictions imposed by the Federal reclamation laws, including in particular title III of this Act, on excess lands and qualified purchasers thereof, except that, for purposes of section 303, the former leaseholder may count up to five years of the term of his leasehold as if he had been the owner of that land during that period.

(k) Notwithstanding any other provision of law, a qualified leaseholder shall be entitled to contract for water for lands covered by the lease in the same manner and to the same extent as if that leaseholder were the owner of those lands.

(l) In any action of the Secretary involving the denial or rejection of an application for a lease under this title, the Secretary shall require that the applicant be notified of that action by both oral and written communications. If the applicant believes that the Secretary has wrongfully denied or rejected the application, the applicant shall have thirty days following that denial or rejection within which to file a petition for review of the application and denial. By regulations promulgated pursuant to section 604, the Secretary shall establish procedures for the initial processing, granting, and denial of those applications, and, following rejection, for review thereof by a different authority.

LEASING OF LEMOORE NAVAL AIR STATION LAND TO FAMILY FARMERS

SEC. 502. Within ninety days following the date of enactment of this Act, the Secretary of the Navy shall transfer to the Secretary of the Interior administrative jurisdiction over the leasing of all lands owned by the Secretary of the Navy within the Westlands Water District which qualify as excess lands, for purposes of leasing those lands pursuant to this title. The Secretary of the Navy shall, however, be permitted to issue such rules and regulations as he may deem necessary for the operation of the Lemoore Naval Air Station and the Department of the Navy shall retain title to the land. On and after that transfer, those lands shall be available to the Secretary of the Interior for disposition under this title in the same manner and to the same extent as those lands purchased by the Secretary pursuant to section 501, except that those lands with respect to which the Secretary of the Navy retains title under this section shall not be available for purchase in accordance with subsections (i) and (j) of section 501. Notwithstanding the provisions of section 501(d) of this Act, the Secretary of the Interior is authorized, upon the expiration of any such lease, to renew the lease for a further term or terms.

TITLE VI—MISCELLANEOUS

GUARANTEES BY DEPARTMENT OF AGRICULTURE OF LOANS MADE BY PRIVATE LENDERS TO QUALIFIED LEASEHOLDERS

SEC. 601. (a) In order to furnish financial assistance for purposes referred to in subsections (h) and (i) of section 501, the Administrator may, in accordance with the provisions of this section, guarantee loans made by non-Federal lenders to qualified leaseholders for those purposes. No loan guarantee under this section for any such purpose may apply to so much of the principal amount thereof as exceeds 90 per centum of the cost of carrying out any such purpose.

(b) Individuals seeking guarantees of loans under this section shall submit to the Administrator applications, in a form which the Administrator shall prescribe, containing such information and assurances as may be required by the Administrator. The Administrator may approve any such application only if—

(1) there are in the application satisfactory assurances that the applicant will, if the loan is granted, keep those records, and afford such access thereto, and make those reports in the form and containing the information, as the Administrator may reasonably require; and

(2) the Administrator determines, in the case of a loan for which a guarantee is sought, that the terms, conditions, maturity, security (if any), and schedule and amount of repayments with respect to the loan are sufficient to protect the financial interests of the United States and are otherwise reasonable and in accord with regulations, including a determination that the rate of interest does not exceed the per centum per annum on the principal obligation outstanding as the Administrator determines to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the United States.

(c) In the case of any such loan guaranteed under this section, the United States shall be entitled to recover from the applicant the amount of any payments made pursuant to any such guarantee, unless the Administrator for good cause waives the right of recovery, and, upon making any such payment, the United States shall be subrogated to all of the rights of the recipient of the payments with respect to which the guarantee was made.

(d) Guarantees of loans under this section shall be subject to such further terms and conditions as the Administrator determines to be necessary to assure that the purposes of this section will be achieved, and, to the extent permitted by subsection (e), any of those terms and conditions may be modified by the Administrator to the extent he or she determines such modification to be consistent with the financial interest of the United States.

(e) Any guarantee of a loan pursuant to this section shall be incontestable in the hands of an applicant on whose behalf the guarantee is made, and as to any person who makes or contracts to make a loan to the applicant in reliance thereon, except for fraud or misrepresentation on the part of the applicant or such other person.

(f) The cumulative total of the principal of the loans outstanding at any time with respect to which guarantees have been issued under this section is authorized to be any amount not in excess of $50,000,000.

COPIES AND EXPLANATIONS OF THIS ACT TO BE FREELY AVAILABLE

SEC. 602. The Secretary, on request of any individual, shall furnish without cost to that individual a copy of this Act, together with a summary explanation of the provisions thereof written in simple English or in simple Spanish, as the requesting individual desires.

NEGOTIATIONS OF PROJECT CONTRACTS TO BE CONDUCTED IN OPEN SESSIONS FOLLOWING PUBLIC NOTICE

SEC. 603. After the date of enactment of this Act, all contract negotiations involving construction, reconstruction, enlargement, operation, repayment of costs, excess lands, rights to water, or other aspects of any

project or division existing under or subject to the Federal reclamation laws, or any combination of those subjects, shall be conducted in public sessions and pursuant to public notice given in a form and manner calculated to provide the widest practical actual notice to interested parties. All parties conducting such negotiations, including but not limited to the Secretary and his delegates, shall share responsibility for implementing the policy of this section to assure notice to and participation or observation by the public in all negotiations involving contracts, including amendatory and supplemental contracts, affecting projects or divisions.

SECRETARY'S RULES AND REGULATIONS TO BE PUBLISHED

SEC. 604. Beginning not later than one year after the date of enactment of this Act, the Secretary shall take no action pursuant to or in implementation of the Federal reclamation laws, except in accordance with published, formal rules and regulations promulgated by the Secretary. Those rules and regulations shall, in addition to other matters, be explicit in making provision for the disposition of excess lands. All such rules and regulations shall be published in the Federal Register not less than thirty days before becoming effective. All such rules and regulations, including amendments thereto, shall be subject to the provisions of subchapters I and II of chapter 5 of title 5, United States Code.

DEPARTMENT OF AGRICULTURE PROGRAMS FOR FAMILY FARMERS

SEC. 605. In order to facilitate the successful operation of the other titles and purposes of this Act, the Secretary of Agriculture is authorized and directed to make available, to the maximum extent authorized by law, to family farmers in each irrigation district, those benefits provided to farmers and stockmen under programs administered by the Farmers Home Administration, the Agricultural Stabilization and Conservation Service, the Soil Conservation Service, the Federal Crop Insurance Corporation, the Extension Service, and by such other agencies and offices of the Department of Agriculture as may be appropriate.

AUTHORIZATION OF APPROPRIATIONS

SEC. 606. For the fiscal year beginning October 1, 1977, and each fiscal year thereafter, there are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.●

SOVIET VIOLATIONS OF HUMAN RIGHTS

● Mr. HEINZ. Mr. President, the recent announcements by the Soviet Government that first General Grigorenko and now Mstislav Rostropovich and his wife had been stripped of their citizenship focuses attention once again on the Soviet Union's continuing harassment of its own citizens in violation of all accepted standards of human rights.

In both these cases and in others we are not witnessing the punishment of criminals. Rather we are dealing with several different kinds of persons of great dedication and integrity; those who have chosen to pursue their own careers and interests despite the wishes of a totalitarian state which is apparently unable to tolerate any individualism; those who have chosen to speak out against the inhumanity and oppression of the Soviet regime and strike a blow for freedom and liberty; and those who because of their faith choose to live elsewhere in a country where they are free to worship as they wish.

These freedoms are normal here. In Russia those who attempt to exercise them are martyrs to the narrow intolerance of a government which will permit no opposition, no questioning of its own omniscience, and no deviation from its conception of a person's proper role. It is a tragedy of our time that these injustices occur at the very time the Soviet Union continues its material economic progress and attempts to raise the standard of living of its citizens.

The Kremlin still has not learned that there is more to life than bread. The fact is, that as basic economic needs are satisfied, the cries for more fundamental freedoms will become all the louder.

The Solzhenitsyns, the Schcharanskys, the Grigorenkos, the Rostropovichs, each in their own way, express those freedoms. They can, in one unjust way or another, be cast out of Soviet society, but no amount of oppression can extinguish the spark of freedom they have ignited.

It is the responsibility of the United States to nurture that spark, to feed it and help it grow with our moral and material support. Our condemnation of the Soviet Union must not bow to political exigencies. We must remain committed to our own principles of liberty and justice and seek to spread them where we can. The Soviet Union's denial of those same principles condemns it in the eyes of freedom-loving peoples everywhere. Just as we hold to our own principles, we must be equally persistent in rejecting Soviet ideas so that freedom might spread.

Mr. President, the Soviet Union has embarked on an unprecedented campaign of grievous harassment of her citizens. Their apparent sin is to be themselves, to speak their minds, to work for a just society in their own country. We should condemn this campaign of oppression of the human spirit for what it is: The raising to a new level of the Soviets unremitting effort to stamp out the individual. I urge my colleagues to join in speaking out against this new violation of human rights in the U.S.S.R.●

AIRLINE REGULATORY REFORM

● Mr. CANNON. Mr. President, I read with great interest the statement of Senator McGOVERN in the February 23, 1978 CONGRESSIONAL RECORD concerning the subject of airline regulation and, in particular, S. 2493 which will soon be on the floor. The reservations expressed by the distinguished Senator are ones which I understand quite well since I too shared them before exploring the issues in substantial depth. After more than 2 years of study, however, which included countless hearings and hundreds of documents, I am firmly convinced that the very understandable fears expressed by Senator McGOVERN are unfounded. Let me explain why.

Basically four arguments are raised in his statement. They are that: First, less regulation will lead to industry concentration; second, when there are fewer carriers, there will be fewer flights and higher fares; third, thousands of employees will lose their jobs; and fourth, small communities will lose service. These are the principal arguments which have been raised all along by proponents of the status quo. I would like to respond carefully to each one.

First. Less regulation will not lead to the increased domination of the U.S. commercial airlines by a few carriers. In the first place, on a theoretical level it does not matter how many carriers there are so long as they are operating competitively. Right now there are 43 federally certificated air carriers—that fact has not resulted in a competitive environment nor prevented the bulk of the traffic from being carried by just a handful of carriers. I would much prefer to see a system with fewer carriers which are highly competitive than one with 43 carriers and no real competition.

Realistically, however, virtually all the economic evidence submitted in this controversy indicates that there is no substantial danger of industry concentration. The key to this conclusion is that there are no significant economies of scale in the airline industry; that is, beyond a relatively low threshold there is no advantage to size. Indeed, there are certain distinct diseconomies involved in large size. Most importantly, we have learned that optimum efficiency is attained when a carrier limits itself to just one aircraft type, allowing the greatest flexibility in interchanging parts and personnel and reducing training and inventory needs. Thus there is a distinct competitive advantage to specializing in transportation suitable to a single type of aircraft—long haul, medium haul, or short haul.

A perfect example is Southwest Airlines in Texas, operating relatively short hauls exclusively with B–737 equipment. They have managed to attain economies significantly greater than most federally certificated carriers.

We know from actual experience that even the most vigorous competition by large carriers against small efficient carriers will not endanger the existence of the smaller carrier. An excellent case in point is the situation in California where Pacific Southwest Airlines is faced with vigorous head-to-head competition by no fewer than 10 federally certificated carriers with combined assets and resources which dwarf those of PSA. Yet, the California carrier holds its own quite well, with its specialized operations and highly efficient operations.

While it is inherently impossible to predict with precision what would happen in a less regulated environment, many economists believe that there will be even more opportunity for specialization and hence more carriers. The capital barriers to entry into the airline business are relatively low. Equipment can easily be leased, complete with crews if necessary. Competition can be mounted on fairly short notice. Carriers could not afford to become fat and lazy in a less regulated environment because it would not be difficult to challenge incumbents unless the Federal Government intervenes to protect them.

The picture of a system dominated by just a few carriers and in which there is little competition is more reflective of the current situation than the dangers of a new one. This is a unique industry with respect to its competitive nature—there is none other that I can think of in which the capital is so mobile. If there is an opportunity anywhere in the country, the equipment necessary to take advantage of it can be there within hours or even minutes. This industry is a far cry from the highly immobile operations of a railroad, telephone company, utility plant, or other so-called "natural" monopolies.

Finally, this legislation imposes very strict antitrust standards on this industry, and places a duty upon the Civil Aeronautics Board to promote new entry. Thus, even if the economists are all wrong, as a safeguard, the CAB will have the legal responsibility to prevent the kind of concentration which Senator McGovern fears.

Second. There will not ultimately be fewer flights and higher fares. If anything, careful study of the system indicates that just the opposite is more likely. In the first place, this bill has carefully balanced the entry and pricing provisions. This is the key to the entire legislation. Wherever there is a credible threat of competition, prices will be kept down. That is why the automatic entry provisions are so very important. If carriers are aware that all of their routes are vulnerable to new entry, they will be motivated to keep their prices as low as possible on a systemwide basis to prevent such entry. But not taking any chances, we have gone further to prevent even short-term increases in fares by prohibiting price hikes on all monopoly routes unless specifically approved by the CAB. Thus, the public is protected—primarily by the threat of entry throughout the system and secondarily by the CAB when monopoly markets are concerned.

The contention that there will be fewer flights is based on the assumption that there will be fewer carriers who will concentrate their efforts in fewer markets. This will not happen. For the first time, every community in the country now receiving service is guaranteed to continue receiving it; hence, there cannot be a wholesale abandonment of markets throughout the country. Moreover, it is very important to recognize that for the most part, the amount of service being provided today is far in excess of that required of carriers to fulfill their minimum service obligation to each community they serve. Whenever this is the case, it means that the carrier is operating the level of service which it does because there is enough traffic to make a profit for the carrier. Nothing that the Congress can do will reduce the demand for air services—and if there is a profit to be made, somebody will always be there to take advantage of the opportunity.

Moreover, we are already seeing evidence that the lower fares which this legislation will encourage will probably result in more flights than currently offered. In virtually every case of low-fare experimentation during the past year, the traffic generated by the new low fare has been far in excess of expectations. The low fares have stimulated new passengers, load factors have increased and, after a point, additional frequencies are required.

In some markets, wasteful head-to-head service may be eliminated. But this is desirable. It is hard to believe, but under the current system there are 10 flights every evening during just one 10-minute period which depart from New York to Miami. Such excessive and costly service competition would be a luxury in which carriers could not engage under the new system. But in most cases, we expect lower fares to generate many more passengers and result in more service in the long run.

Third. There should be more jobs for airline employees. The argument raised by Senator McGovern that thousands of employees will lose their jobs is very disturbing to me, because just the opposite is true. There should be more employment resulting from this legislation.

The reason is quite simple. Lower fares are going to generate more traffic and as load factors increase new flights will be added. We have solid evidence that this will be the case. The existing experiments with low fares have produced a tremendous response from the traveling public. The result is more service, not less. More service means more jobs. A prime example is Delta's operations between St. Louis and Chicago's Midway Airport. After years of extremely low-volume service, Delta cut its fares. Its traffic has multiplied dramatically and now it is adding more flights in a market which has always been thought to be a sure loss. As a result, the public has better service and lower fares, Delta's employees have more work, and Delta has more profits. This can happen throughout the country.

At the same time the long-term exodus of carriers from small communities will be halted, maintaining existing opportunities for airline employees.

Meanwhile, there are comprehensive provisions for protection of airline employees in the event of any serious disruptions which, I repeat, we do not anticipate occurring anyway. But the existence of these labor protective provisions is decidedly not a recognition that a substantial number of airline employees will be without work, as Senator McGovern states in his statement. Far from it. I do not believe they will ever have to be used.

Fourth. Small communities will not lose service. The contention that small communities will lose service is completely wrong. Far from eliminating small community service, this legislation would guarantee it for the first time. Since 1960, over 175 communities throughout the country have lost certificated air service altogether. This trend will end immediately if this legislation is passed.

In the first place, service to every community now receiving it is absolutely guaranteed for a minimum of 10 years. At the end of that time the Civil Aeronautics Board has the specific mandate to maintain "a comprehensive and convenient system of continuous scheduled airline service for small communities and for isolated areas, with direct Federal assistance where appropriate."

In the second place, the CAB is instructed to review all those points which have lost service during the past 10 years to determine which of those should again receive subsidized service. Thus, not only will the trend toward elimination of service to small communities be stopped—it will be reversed.

Under the current system, which Senator McGovern indicates he prefers, service at four small communities in South Dakota has been completely eliminated with the approval of the CAB—Hot Springs, Lemmon, Mobridge, and Spearfish. This legislation would put a stop to the exodus of carriers from small communities once and for all. Never before has the CAB had the specific direction from the Congress to support small community service.

Moreover, the quality of the service is likely to increase. Under the current system, the CAB pays subsidy to carriers based on the needs of each carrier for a certain level of profits—regardless of the quality of service being provided. In many cases that service is completely second rate, with infrequent and poorly-timed flights which can meet the needs of very few travelers.

In contrast, this bill would require the CAB for the first time to actually go out to the communities involved and sit down with them to determine their specific air transportation needs. Once those needs are determined, the CAB has the obligation to see that they are met. At last, the community can have a substantial input into the decision concerning the cities to which it needs flights, the times of day it needs service, the type of aircraft which would be most suitable, and the fares which should be charged.

These are concepts which will be greatly beneficial to small communities throughout the country.●

UNIONS AND THE FEDERAL ELECTION CAMPAIGN ACT

● Mr. GOLDWATER. Mr. President, the news media has devoted much attention recently to the campaign finance bill that is being worked on in a House committee, H.R. 11315. Many independent observers have complained that the bill will change the rules in the middle of an election year and is over-partisan.

However, virtually no attention has been given to a brief, four-line provision of the bill that may have more importance to itself than all of the rest of the legislation. I am referring to section 301 (25) (ii) of the House measure which would exempt big labor from major limitations of the present election campaign law by considering the individual members of a local union to be members of the national AFL–CIO. Let me explain.

Mr. President, under present law there is a prohibition against the creation of

multiple segregated funds by organized labor and large corporations as a means of evading the statutory campaign ceiling limits on political contributions. This was added to the law in 1976 by Congress in order to prevent the proliferation into many political committees by what in fact is one group. Otherwise, the $5,000 ceiling of the law could easily be evaded by powerful economic interests who would not only shatter the purpose of having a ceiling, but reap an unfair advantage not allowed to natural persons.

This restriction on contributions is nailed down in paragraph (5) of subsection (a) in section 441a, of title II, United States Code, which reads in pertinent part as follows:

"(5) For purposes of the limitations provided by paragraph (1) and paragraph (2), all contributions made by political committees established or financed or maintained or controlled by any corporation, labor organization, or any other person, including any parent, subsidiary, branch, division, department, or local unit of such corporation, labor organization, or any other person, or by any group of such persons, *shall be considered to have been made by a single political committee, . . .*" (Emphasis added.)

The final sentence of this paragraph further clarifies the intent of Congress. It reads:

"In any case in which a corporation and any of its subsidiaries, branches, divisions, departments, or local units, or a labor organization and any of its subsidiaries, branches, divisions, departments, or local units establish or finance or maintain or control more than one separate segregated fund, all such separate segregated funds *shall be treated as a single separate segregated fund for purposes of the limitations* provided by paragraph (1) and paragraph (2)." (Emphasis added.)

Yet, in the face of this clear mandate of the law, it is on the public record that a single organization, the AFL–CIO, made numerous contributions in the 1976 elections vastly exceeding the $5,000 limit on contributions by political committees to any particular candidate. According to evidence compiled by the National Right To Work Committee, public filings of congressional candidates with the Federal Election Commission revealed several hundreds of instances where contributions by AFL–CIO unions far exceeded the legally permissible limit imposed on a single organization's political committee.

In the Senate race of one State, big labor's contributions went 10 times above the legal limit on contributions by a single political committee to any one candidate in the 1976 elections. In another case, which the National Right to Work Committee has documented, the Senate campaign of a candidate received seven times more funds from AFL–CIO contributions than the law allows to single political committees. These are just two of the proven evasions of the spirit, if not the letter, of the Campaign Act.

But at the same time big labor was considering itself and its union affiliates as constituting a multitude of separate organizations for purposes of the contributions limit of the campaign law, the same labor organizations were treating themselves as a single group under a different provision of the law. When engaging in registration and get-out-the-vote campaigns, the solicitation of funds, and communications with individual voters, these various AFL–CIO organizations claimed to be a single political committee.

In other words, when AFL–CIO affiliate unions, and the several State AFL–CIO federations want to make political contributions, they claim to be separate groups. But when the same unions want to conduct a massive voter drive aimed at individual union members, they suddenly achieve a transformation and become a single organization.

These activities, which were estimated by news accounts to cost union bosses in excess of $4 million, would have been legal only if the same 14 million individual union members of the AFL–CIO affiliates are considered members of the national AFL–CIO itself. This is exactly the loophole which the AFL–CIO needs for a special exemption from the law and which the bill pending in the House would create.

Under the theory being used by big labor, all the individual union members of the affiliated AFL–CIO organizations, the State federations, directly affiliated local unions, State and local central bodies and trade and industrial departments, are considered as one political committee. However, in a complaint filed on January 28, 1977, with the Federal Election Commission by the National Right to Work Committee, it is pointed out that the AFL–CIO constitution itself repudiates this theory. There is no provision in the AFL–CIO constitution for either the collection of money as dues from individuals or the suspension of individuals for non-payment of dues. The whole document deals with affiliated unions, not with individual union members.

Thus, the AFL–CIO has not only been directing get-out-the-vote campaigns as if it and all its affiliated unions are a single body, in contradiction to the theory under which big labor gives political contributions, but it has been addressing its political activities to millions of individuals who under the AFL–CIO constitution are not even members of the national organization.

Mr. President, this self-contradiction by the AFL–CIO in considering itself to be a single political organization for one purpose, and then a multitude of political committees for a different purpose under the Federal Election Campaign Act, has been brought to the attention of the Federal Election Commission by the National Right to Work Committee. Although the Commission has delayed acting by asserting it does not have sufficient information as yet, there is no question but that big labor or any other major economic group cannot have it both ways at the same time. They are either a single political committee or separate committees.

This is where the pending campaign finance bill comes in. In order to protect union bosses from application of these restrictions of present law, the House bill would eliminate their problems. The proposed bill would brazenly exempt big labor from an evenhanded application of the law.

As written, the new section 301(25)(ii) would amend only the definition of "member" with respect to a labor organization. No pretense is given of making a comparable exemption with respect to trade associations composed of corporate members.

If the amendment passes, big unions can do virtually anything they want under the election law by interpreting it to suit their own purposes. When the AFL–CIO wants its political arm to be a single committee, it can do so. On the other hand, when it wants to be composed of many separate groups, it can do that, too.

Mr. President, this obvious exercise of muscle by union bosses in attempting to change the law for their own ends is a shameless display of power. I hope that my colleagues will see what is going on and be willing to block it.

Now, I have mentioned that this situation has been uncovered by the National Right to Work Committee. But this is not the only possible violation of campaign law which the committee has turned up.

The committee has pressed at least three other serious complaints of AFL–CIO violations with the Federal Election Commission. In two of these cases, the committee has been successful in winning court decrees ordering that the Commission stop dragging its feet in enforcement of the law.

These other cases include a complaint charging the AFL–CIO with illegally spending millions of dollars of union treasury funds on partisan campaign activities in alleged violation of requirements that such activities be "nonpartisan."

A second complaint filed by the committee charges that the AFL–CIO made massive illegal in-kind contributions in the last Presidential election that were not reported.

A third complaint charges that the AFL–CIO transferred funds from its general treasury to the COPE Education Fund, a nonreporting body that is not a political committee, and that this fund then illegally transferred the general treasury funds into the COPE Political Contributions Committee. On December 14 of last year, the U.S. District Court in Washington, D.C., found that the Federal Election Commission had violated the campaign law by failing to act on two of these three complaints. Finally, on December 19, the Commission brought suit in court itself against the AFL–CIO for the alleged violation of law by funneling funds from its general treasury into its political contributions fund. The suit is still pending.

Mr. President, this was the second time the Federal Election Commission has been forced by a Federal court to adhere to the very law which it is charged by Congress with enforcing. The first instance also was initiated by the National Right To Work Committee, which won a court order forcing the Commission to

act against the National Education Association union for what was later held to be an illegal "reverse check-off" political fund collection scheme.

Mr. President, it is tragic that a private citizen's group must utilize the court processes to compel the Government monitoring office to carry out its duties. The Federal Election Commission has shown a serious unwillingness to enforce the law against big labor.

Clearly, the law now contains major loopholes which permit the use of compulsory dues for political activities and contributions contrary to the basic purpose of having a Federal campaign law, and it is becoming increasingly clear that the theoretical enforcement body will not fairly carry out its responsibilities.

If Congress acts on any changes at all this year to the campaign practices statute, this is the problem we should focus on, rather than the exact opposite, which is a flagrant attempt to immunize the AFL–CIO from restrictions applicable to everyone else.

Mr. President, it is we in Congress who drafted the Federal Election Campaign Act and we who set up the Commission. It is also the Congress who should correct our own creation.

We should be grateful that the National Right to Work Committee has assisted in bringing these alleged violations by big unions to public attention for it appears that otherwise nothing would have been done. I hope that we will keep this knowledge in mind as we consider proposed amendments to the election law later this year.●

STERILIZATION REGULATIONS

● Mr. ABOUREZK. Mr. President, at my request, the General Accounting Office investigated charges of federally funded sterilization abuse against American Indian and Alaskan Native people. The Department of Health, Education, and Welfare has recently published proposed regulations on this issue. I have commented to the agency on this most important matter and I submit these comments for the RECORD.

The material follows:

COMMENTS BY SENATOR JAMES ABOUREZK

As the Department is aware, I requested a General Accounting Office (GAO) investigation in April, 1975, in response to charges of federally funded sterilization abuse against American Indian and Alaska Native people. The subsequent November, 1976 GAO report documented severe weaknesses in the Department of Health, Education and Welfare's (HEW) Indian Health Service (IHS) direct service and contract care systems, especially in the area of noncompliance with the Federal sterilization regulations in existence at that time.

In regard to the proposed regulations on federally funded sterilizations, I generally endorse the proposed regulations. I do, however, have some very deep concerns which are not at all adequately addressed by the proposed regulations.

First, the new proposed regulations do not appear to include any monitoring and enforcement provisions substantially different from the present regulations. Second, there are no counselling provisions in the proposed regulations. Third, the proposed regulations do not explicitly provide for contract care compliance with these regulations.

MONITORING AND ENFORCEMENT

It is clear from the track record of HEW and IHS that the monitoring and enforcement of sterilization regulations is by far the largest and most important task. I am dismayed therefore at the lack of attention given this area in the proposed regulations. The 1976 GAO report showed that even the less stringent HEW sterilization regulations in effect at that time were simply not followed in many of the 3,406 sterilizations investigated. Without the inclusion of strict monitoring and enforcement mechanisms in these proposed regulations, such abuse can only continue.

For example, IHS recently provided me with information on the number of sterilizations performed on Indian women since the release of the GAO report in 1976.

CHART A

INDIAN HEALTH SERVICE REPORTED FEMALE STERILIZATION PROCEDURES AT INDIAN HEALTH SERVICE FACILITIES AND CONTRACT FACILITIES FOR 4 AREAS DURING FISCAL YEARS 1973–76 AND NOV. 5, 1976 TO SEPT. 1977

Area	1973	1974	1975	1976 [1]	Nov. 5, 1976 to Sept. 30, 1977 [2]
Aberdeen	213	188	180	159	110
Albuquerque	60	68	65	29	40
Oklahoma City	360	427	443	421	427
Phoenix	224	203	213	153	125
Total	857	886	901	762	702

[1] Contract data included in this total is for 1st 10 mo of fiscal year 1976.
[2] Contract data included in this total is for the period Nov. 5, 1976 to July 31, 1977.

While these figures do not provide conclusive proof that abuse continues, they do indicate that the overall number of surgical operations resulting in sterilization has generally remained at the same level, even after the adverse publicity raised by the GAO report and the subsequent IHS directive ordering more strict compliance with the old regulations. In view of the numerous personal testimonies given by individual victims of coerced sterilization during these same years, proper enforcement of even the less stringent regulations should have caused a substantial drop in the number of sterilization procedures performed in the less than eleven month period between November 5, 1976 and September 30, 1977. Unfortunately, it appears that the current HEW monitoring and enforcement efforts have had little, if any, effect on local level reality.

The establishment of effective monitoring and enforcement mechanisms is not only necessary, but also financially possible. As Allan Chase noted in his testimony during the January 17, 1978 HEW proposed regulation hearings, the proposed abolition of Federal funding for hysterectomies for the purpose of sterilization will save a great deal of money—money which can and should then be used to ensure that the local level realities of federally funded sterilization programs comply with the rules and regulations.

I will be assured of the effectiveness of the proposed regulations only when "mistakes" and other forms of non-compliance are clearly made to be grave and serious issues by HEW and IHS regulatory and administrative measures.

STERILIZATION COUNSELLING

While the proposed informed consent measures do much to remove many of the present barriers to informed consent, I strongly urge the Department and IHS to include sterilization counselling services as a mandatory element of the informed consent procedures with one important qualification. Such counselling should be of a non-directive nature, offered by selected individuals regardless of formal education and/or professional preparation. Because of the life-long consequences of sterilization, counselors should have special training that provides an adequate knowledge/skill base as a framework to assist clients in making a decision, without coercion or ambivalence, to have or not have a sterilization, and to provide accurate information about alternative methods of contraception, the sterilization surgical procedure, and its possible side effects and complications. This type of counselling must be carefully administrated to ensure that each counselor has a high regard for the worth of all people, and believes that the client has the capacity to decide what is best for him or her when fully informed. Not only do physicians and nurses have no training in quality counselling and person to person communication skills, but the demands on their professional time are such that few have time to devote to this important activity.

Further, much of the sterilization abuse against Indian people has come as a result of cultural insensitivity among the non-Indian medical professionals to the values and needs of Indian clients.

Thus, I propose that the IHS and HEW establish a special sterilization counselling program which involves specially trained Indian counselors from the local community. The main emphasis of such a program should be to ensure an informed choice that reflects the client's and the Indian community's prevailing values. Again, such a program is financially feasible through the use of funds formerly used to finance hysterectomies for the purpose of sterilization.

CONTRACTED CARE COMPLIANCE

The GAO report found that the IHS and HEW were neither monitoring nor enforcing the sterilization activities of contract care health programs. Many of the serious violations of existing regulations discovered by GAO were in non-IHS contract care programs. The proposed sterilization regulations should explicitly adopt the GAO recommendations that IHS and HEW include in all its contracts with non-IHS physicians and facilities, provisions to ensure that contractors comply with HEW sterilizations regulations, and establish effective monitoring procedures to ensure their compliance.

Finally, I want to urge the Department to give special consideration to the comments and testimony provided to the Department by Indian tribes and individuals, because of the Federal government's trust responsibility to Indian people and its often very direct involvement in the lives of Indians through the Indian Health Service. For Indian people and their tribal governments, sterilization abuse is not only a matter of individual human rights, but also one of political survival. As such, the right of Indian people to freely self-determine their reproductive lives, is a necessary pre-condition to all other rights they possess individually and as tribal members.●

HEW RESPONDS TO GAO REPORT ON SOCIAL SECURITY

● Mr. RIBICOFF. Mr. President, on Friday, March 3, 1978, I inserted in the RECORD a report of February 21, 1978, by the U.S. General Accounting Office regarding security procedures at the Social Security Administration's computer complex near Baltimore.

GAO found that security safeguards had been improved at the social security complex recently but that much more improvement was needed if the installa-

tion was to meet adequate security standards.

Specific weaknesses in the social security computer complex were cited by GAO.

Along with the GAO report, I inserted in the RECORD a letter from me to Joseph A. Califano, Jr., the Secretary of Health, Education, and Welfare.

In my letter, I stressed the importance of adequate security procedures at the Social Security Administration. The need to protect against computer compromise, theft, manipulation, and assault is great because so many millions of our citizens rely on social security computers to function properly and because so many billions of dollars are at stake.

Secretary Califano has replied. His letter, dated March 20, 1978, calls attention to rapidly increasing awareness at Social Security and HEW of computer security. Secretary Califano also points out that HEW criminal investigators are now being trained in computer fraud and are better equipped to investigate such crimes. Secretary Califano also questions the correctness of certain conclusions drawn by GAO in its report.

Mr. President, I submit Secretary Califano's March 20, 1978 letter to be printed in the RECORD.

The letter follows:

THE SECRETARY OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., March 20, 1978.

HON. ABRAHAM A. RIBICOFF,
U.S. SENATE,
Washington, D.C.

DEAR ABE: Thank you for calling my attention to the February 21, 1978, letter from Franklin A. Curtis of the General Accounting Office (GAO) to Donald I. Wortman, Acting Commissioner of the Social Security Administration, reporting on ADP systems security at SSA's central headquarters. We are in general agreement with the GAO findings. SSA is taking prompt action and has already implemented some of the recommendations.

It is unfortunate that this matter has been sensationalized in media reports. In his February 21 letter to Mr. Wortman, Mr. Curtis of GAO indicates that the recently installed security system for the central computer facility is a step in the right direction. With modifications, GAO feels the system should be an effective way to prevent unauthorized access to the central computer facility. GAO's primary finding, however, related to potential fraudulent and malicious acts of persons who work inside the computer facility; i.e., employees, not outsiders.

GAO's investigation took place from January 23 to February 3, 1978, during a period in which the new security system was being validated. This relatively short investigation period was not sufficient to test the new security system adequately against all possible threats. For that reason one of GAO's key recommendations was that SSA perform a complete and formal risk analysis. SSA is now performing a cost/benefit evaluation of such an analysis. As soon as it is completed, all safeguards that can be supported from a cost/benefit standpoint will be implemented.

Perhaps you are not aware that the GAO investigators requested, consistent with the charter given them by the Congress, essentially unlimited access to all information and facilities for which SSA has responsibility. We, of course, cooperated with them. They were allowed unescorted access into the secure area and were not denied access, information, or assistance in fulfilling their responsibilities. Because of the freedom they had under this arrangement, they succeeded in proving not that the new security system, appropriately modified, is ineffective, but that there is always a potential problem of fraudulent and malicious acts by persons who work inside computer centers.

Regarding the other issue raised in your letter—the adequacy of the Department's capacity to investigate allegations of computer crime—the Inspector General advises me that he has had in place for the past two years a program to train his investigative staff in this field. Over half the criminal investigators assigned to his office have attended the FBI's training course in detection of computer crime, and several have also attended the Department of Defense computer school. We intend to make such instruction a routine part of our training program for both auditors and investigators. We will continue to develop the technical and investigative expertise required to deal with sophisticated white collar crimes.

I believe Social Security has raised the level of employee awareness of ADP systems security far above what it was two years ago and has taken a number of important steps to upgrade physical security. Security will be greatly enhanced when SSA moves to their new computer building, which is presently under construction.

In a related area, earlier this year I asked that the General Counsel and the Inspector General undertake an analysis of the problem of computer security as it affects the privacy of individuals who are the subjects of our computer matching projects. The results of their inquiry should be available by late Spring. I will keep you informed as these reviews progress.

Sincerely,

JOSEPH A. CALIFANO, JR.●

CIVIL SERVICE REFORM

● Mr. MATHIAS. Mr. President, President Carter proposes to make major changes in the Federal personnel system through both a reorganization plan and specific legislation. Some of the changes will make the civil service more effective. But four of the changes would gravely threaten the effectiveness and impartiality of our civil service, while the benefits sought from these particular changes are vague and uncertain.

The President proposes that the Civil Service Commission be split into two agencies. One, called the Merit System Protection Board, would handle employee appeals from agency actions, investigate allegations of violations of merit principles, and protect "whistle blowers" against reprisals. It would be the watchdog to protect the merit system. The other agency would be an Office of Personnel Management to serve as the President's adviser and policy leader for personnel management in the executive agencies. It would also continue to perform all the regular operating functions of the Commission not assigned to the Merit System Protection Board.

There are, in my opinion, two very serious problems with this reorganization plan:

First, the possibilities for manipulating the civil service for personal or political favoritism would be greatly increased because personnel policy would be made solely by the Administrator of the new Office of Personnel Management, appointed by the President and serving at his pleasure, instead of by three Civil Service Commissioners appointed on a bipartisan basis with overlapping terms.

Daily operations of the central personnel agency do need to be the responsibility of a single individual, and this, in fact, is what happens now with the Chairman of the Civil Service Commission designated by law as the chief operating officer of the Agency. However, a single Administrator making personnel policy as well as directing operations of the central personnel agency would hold an unwarranted concentration of power and would pose a major threat to the merit system. For example, the power to make personnel policy includes the power to interpret the laws, to take positions out of the competitive service so they can be filled politically, to establish criteria by which applicants and political appointees can receive permanent appointments, et cetera. I believe all Americans would have far greater confidence in the wisdom and impartiality of such policies if they were made by a bipartisan commission.

Secondly, the Merit System Protection Board, with three members appointed by the President on a bipartisan basis and removable only for cause is intended to serve as the keystone to protect against merit abuses but, as proposed, it lacks the clear mandate, authority, and resources to fulfill this expectation.

The proposed Board could well serve a useful purpose for adjudicating employee appeals. However, it would be incapable of meeting the larger responsibilities of protecting the merit system because it would be too far removed from day-to-day operations. It is the administration's intention to give more flexibility in personnel matters to agency managers and to decentralize from the Commission to the agencies substantial authority to examine applicants for jobs. In view of this, the Board would require a large staff to conduct frequent and regular reviews in the agencies and in the Office of Personnel Management to assure that merit principles are being observed. A lesser staff that would merely investigate specific complaints and make special studies, as contemplated in the reorganization plan, would provide only the most superficial protection of merit principles.

Even if the Board had a broader mandate and a much larger staff than planned, it would still be incapable of fulfilling the stated objective of protecting the public's interest in merit because it is not sufficiently independent of the Office of Management and Budget and the White House. With a single Administrator responsible to the President making personnel policy and directing personnel operations, it would be vital that the Merit System Protection Board's accountability to Congress and the public be stronger and clearer. To this end the Merit System Protection Board should, at a minimum, be required to submit to the Congress, as well as the President, its budget requests and its reports from regular and frequent inspections of agency and Office of Personnel Management policies, programs, and practices that relate to merit.

The 95-year-old Civil Service Commission is not without its faults; it has gone through many changes to overcome weaknesses as they have been identified. Additional changes are needed. But the civil service of this Nation is widely recognized as being of exceptional competence, dedication, and honesty; and its professionalism and devotion have met the test often, particularly during the turbulent events of the last four decades. This is largely due to the Commission's emphasis on merit in its policymaking role and its effective action in preventing major political abuse of the merit system. Abolishing personnel policymaking by a bipartisan Commission will not improve the quality and performance of the civil service or increase the public's confidence in it. The contrary is more likely.

Promising that the Merit System Protection Board will be an effective watchdog of merit principles, guarding against political abuse and cronyism, raises expectations which can not be fulfilled since the watchdog has a patch over one eye caused by a lack of mandate to inspect agency and Office of Personnel Management operations regularly and frequently. In addition, the watchdog has few teeth and is on a short chain firmly fastened to the White House since it is not required to report the results of regular and frequent inspections to both the Congress and the President.

The improvements sought by the administration through the reorganization plan could be achieved with far less risk and at lower cost. This could be done by establishing an independent bipartisan Board to adjudicate employee appeals, and by making the Civil Service Commission even more effective so it can serve as the central personnel agency for the entire executive branch as the watchdog of merit principles, and as the principal adviser to the President and Congress on the whole civil service. In this way, the objectives of the administration would be met for making the appelate function independent, while the policymaking and merit oversight functions would be strengthened instead of weakened.

Complementing his reorganization plan, the President proposes a number of changes to be effected through legislation. Over time, two of these changes would seriously impair the quality and performance of the civil service.

First, the President's plan delegates significant authority to the agencies to examine applicants for many positions from the lowest to the highest levels instead of having all examinations conducted by the central personnel agency. Such decentralization would turn the calendar back to the pre-1965 era of civil service, seriously weaken the merit system, and cause a deterioration in the performance of the civil service.

Before 1965 a great deal of examining for civil service jobs was done by agency employees serving on boards of civil service examiners in almost 1,000 locations. There were many complaints from all over the country to Members of Congress and others that job applicants were not examined fairly, professionally, or promptly.

After the examining was centralized into 65 area offices of the Civil Service Commission in 1965, such complaints dropped off sharply. There are still some weaknesses in the present system. One is that it often takes too long to fill jobs; but 85 percent of the delay is in the agencies, not the Commission. Moving toward major decentralization in examining is the wrong way to go if we want to have a high-quality civil service based on open competition, if we want a citizen to be able to file an employment application in one place instead of many, and if we want professional evaluation of the qualifications of applicants without personal or political favoritism.

Secondly, to increase responsiveness in the agencies, the President proposes that Presidential appointees be given sweeping authority to transfer, promote, and demote many top career executives and replace them with political or other career appointees. With rare exception, career executives have reached the top, however, through repeatedly demonstrating on the job their capacity to perform well under difficult conditions. In times of political transition, they are the glue that keeps Government agencies functioning, thereby enhancing the confidence of the American people in the stability of our institutions. These career executives would now be subject to transfer and demotion simply because a Presidential appointee wanted to put someone else in the job. Once Presidential appointees have this authority they will be subjected to pressure from all sides to use it.

Career executives represent an important national resource which the Federal Government develops at considerable cost. There is no body of evidence to support the assumption that there is or has been a lack of responsiveness or competence by career executives in any Administration. The opposite is true. Presidential appointees in successive administrations have appointed them to these positions because they did exhibit a high order of competence and responsiveness.

The proposed drastic change in their conditions of employment would seriously impair one of the most important qualities of career executives—the capacity to provide, without fear, views and judgments which, based on their experience, may be critical of proposed policies and programs. The fear of being labeled "unresponsive" would understandably cause many career executives to temper their criticisms or even to hesitate to adequately question proposals of Presidential appointees.

Presidential appointees in the agencies occupy positions of power for relatively short periods, and in their eagerness to bring about changes, many are impatient and sometimes intolerant of views that identify weak or undesirable elements in their proposals. They have a tendency, particularly in the first year of a new administration, to characterize such disagreement, or even questions, as evidence of unresponsiveness. The proposed change would send a clear signal to many career executives that if they do not want to be shipped out, they should shut up. This system would serve the Nation badly by introducing elements of fear and uncertainty that could stifle debate at the crucial point where political and career appointees should debate proposed policies, programs, and procedures.

I believe that changes should be made in the Federal personnel system, but we should make them without incorporating the four major defects discussed above. I will work toward that end.●

POINT OF VIEW—DEBT RELIEF FOR THE POOREST COUNTRIES

● Mr. JAVITS. Mr. President, the Foreign Economic Policy Subcommittee recently held hearings on North-South economic issues, with particular attention to the question of debt. At that time I stated that the United States must be very careful in dealing with the debt issues so as not to do more harm than good. The developing countries must become accustomed to the international discipline involved in repaying financial obligations if they are to improve their access to private capital markets and if the international financial markets are to remain healthy.

A provision in the International Development Cooperation Act of 1978, of which I am a cosponsor, would, on a case-by-case basis, authorize permitting some of the world's poorest countries to repay principal to the United States on old foreign assistance loans into local currency accounts, from which funds could be expended on development projects approved by the United States. Interest payments would be waived in such instances. Such a provision would be in conformity with our current policy of extending grant-only assistance to those poorest countries.

This provision will certainly be debated, and I will, myself, want to be assured that such an authority should be used and could be used without any harmful effects on those developing countries which now use private capital markets or which hope to do so in the near future. A recent article in the highly respected Economist addresses this issue, which I would like to submit for printing in the RECORD:

The article follows:

RELIEF FOR THE POOREST

When bankers have nightmares, they are about bad debts. As commercial banks lent more than $50 billion to the less developed countries (Idcs) in 1973–76, it is not surprising that some of the chief general managers fall out of bed every time the Idcs mention debt relief. The subject will be raised again on March 6th, at the ministerial meeting of the United Nations Conference on Trade and Development (Unctad). But the bankers can sleep sound. The rich governments are thinking of writing off outstanding official loans to the poorest Idcs. Some governments not notoriously anti-banker (Switzerland, Canada, Holland and Sweden) have already done just that. If other countries follow suit, they will be confirming (quite cheaply) their own

aid priorities, not nudging the Idcs down a slippery slope to mass cancellation or default. On the contrary, some taxpayers of rich countries may suspect that their money is being donated to shore up debts that imprudent commercial bankers should never have allowed to mount. Happily, that suspicion is also incorrect.

Since 1972, the OECD's development assistance committee has recommended that official aid to the 29 least-developed countries—the poorest of the poor—should be in grants, not loans. Increasingly, that has happened. The special needs of the least developed have become more acute since 1972. To insist that earlier loans should be repaid is rather like making a patient continue with aspirin for a headache, even though you now know he has a brain tumour.

A clean slate for the official debts of the poorest countries would be relatively cheap for donors, but enormously valuable to recipients. The outstanding official debt of the 29 least-developed countries was less than $7 billion in 1975; this meant interest and capital payments of about $500m, just 3 percent of the $17 billion total official aid to all Idcs in that year. But $55m is the equivalent of a whole month's imports for the poorest 29 (Britain's well-publicised overseas debts last year cost less than a week's worth of its imports to service). And most of that $500m would be spend on goods and services from depressed rich countries.

The main effect of the proposed cancellation of debt would therefore be to transfer about $500m into expenditure on exports from the industries of rich countries, and away from debt interest paid to the governments of rich countries. Nearby 95 percent of the 29 poorest Idcs' external debt is official debt to other governments (compared with only about 65 percent for the debt of all Idcs). In 1976 these poorest 29 received only 1.1 percent of the private funds going from the rich countries to all Idcs. Relief to them would neither encourage them to ignore their private debt (as bankers fear) nor enable them to pay mountains of debt back to the banks and then start borrowing more (as taxpayers fear). The mountains don't exist.

THE 29 POOREST, 1975

THE NATIONAL HEALTH PLANNING AND RESOURCES DEVELOPMENT ACT

● Mr. ABOUREZK. Mr. President, I recently cosponsored S. 2487, Senator CLARK's bill to amend the National Health Planning and Resources Development Act of 1974. The bill is designed to increase rural input into the health planning process. Health planning must include and address the special needs of the medically underserved.

The South Dakota Health Systems Agency, Inc. has passed along a letter from Mr. Merle Lofgren of McLaughlin, S. Dak. Mr. Lofgren's comments are a graphic description of the serious plight of the rural communities in my State, and in the Nation, faced with attempting to obtain or preserve health care delivery services in the face of the many problems present today.

I submit for the RECORD Mr. Lofgren's letter.

The letter follows:

MCLAUGHLIN HOSPITAL DISTRICT,
McLaughlin, S. Dak.

DONALD G. BREKKE,
Executive Director, South Dakota Health Systems Agency, Vermillion, S. Dak.

DEAR MR. BREKKE: I am impressed by the slogan on your letterhead "Dedicated to increasing the accessibility, acceptability, continuity and quality of health care at a reasonable cost."

That is what we have been trying to do for many years and were successful in that effort up until mid-June when we ran out of doctors. The people of this community have through their tax dollars and donations provided a health care facility which has served the people of Corson and Dewey counties of South Dakota and Sioux County in North Dakota since 1948.

One must realize Corson County is 100 miles wide and there is no other health care facility in the county, and that there is no health care facility closer than Bismarck 90 miles north or Pierre several hundred miles away to the south to appreciate the "accessibility" of your slogan. Add to this there is no railroad or bus service in this area, roads are difficult to travel during some of the winter months, as this winter, and people who do not drive, such as the elderly, must prevail upon friends or relatives or hire cars to take them for medical care.

Up until shortly before we closed our hospital, we were charging $44 a day for private rooms. We finally went to $56 a day just before closing. This certainly is a reasonable cost.

I would like to impress upon your people the practicality of an experiment on which we embarked with the South Dakota Department of Social Services and Blue Cross along with the South Dakota Department of Health.

We were allowed to keep a certain number of intermediate care nursing home patients in our hospital facility. As you are aware, almost no hospital and certainly none of the rural hospitals operate to bed capacity most of the time. We kept up to 10 people in an intermediate care facility status. This left us enough beds for our pediatrics, mothers and babies and persons who needed hospitalization. It enabled us to use our facilities with greater efficiency and to keep our staff busy. It was a remarkably successful program and one that was beneficial to the intermediate care patients and the Hospital District alike.

The doctor who had been here for 28 years suffered a heart attack a couple of years ago. Another doctor came but after a year he decided he preferred work in the emergency ward more than the general practice alone and went to work at the Bismarck Hospital. The doctor who had been here for 28 years returned and worked for about 9 months but his health wouldn't allow him to continue.

We are currently in contact with several doctors, including some under commitment to the National Service Corps. One of these is a female doctor, Doctor Pagart, who is in practice in another site but whose husband is a hospital administrator and health planning technician. There is no use for his services where they are presently located and we are trying to find some way to employ him here which would mean Dr. Pagart would go into practice here. I enclose his references and perhaps you can give us some suggestions. We would be able to employ him and pay him as administrator of our hospital when we get it open again, which might take some time for licensing etc.

Our hospital and clinic were remodeled not long ago at considerable cost. We have the x-ray equipment, heart monitoring machines, emergency care facilities and everything that is needed. We still have the lab technicians and personnel it takes to support a health care facility.

We are of the opinion if we cannot get two doctors we should have a doctor and a physician's assistant or nurse practioner. In addition, the doctor who is working at Bismarck still lives here and would work two or three days a week when he is not on duty at Bismarck.

We stand ready to assist in any way we can with the fulfillment of your slogan.

Sincerely yours,

MERLE LOFGREN,
Board Chairman.●

JOHN MARSHALL BUTLER: AN EXAMPLE SET

● Mr. MATHIAS. Mr. President, yesterday at St. David's Church in Baltimore, Md., I attended a memorial service for our former colleague, John Marshall Butler. When I came to the Congress in the election of 1960, John Marshall Butler was the senior U.S. Senator from Maryland. He was elected to his first Senate term in 1950 at the same time that the late Theodore R. McKeldin was elected Governor of Maryland. That election signaled the revival of the Republican Party in Maryland after a long period of dormancy during the New Deal.

The fact that Senator Butler and Governor McKeldin represented opposing wings of the Republican Party and yet managed to live together and to work together made it easier for all other Republicans in Maryland to succeed. I am grateful for that. And I think we should all be grateful for the example Senator Butler and Governor McKeldin gave to us.

Throughout the years of his service not only was Senator Butler widely respected, but Mrs. Butler too was much admired for the quiet support she gave him. They were a devoted couple and an effective team. Mrs. Mathias joins me in expressing deepest sympathy to Mrs. Butler.

So that my colleagues may appreciate the measure of the man whose loss we mark, I ask that an account of Senator

Butler's life which appeared in the Baltimore Sun on Friday, March 17, 1978, be printed in the RECORD.

The article follows:

JOHN MARSHALL BUTLER DIES, FORMER U.S. SENATOR

A memorial service for John Marshall Butler, the first Maryland Republican elected to two terms in the United States Senate, will be held at 2 P.M. Monday at St. David's Episcopal Church, Roland avenue and Oakdale road.

Mr. Butler, who was 0 and lived at 2 Bouton Green in the Village of Cross Keys, died Tuesday after a heart attack at a hotel in Rocky Mount, N.C., while returning with his wife from a vacation trip to St. Simons Island, Ga.

A member of the Senate for 12 years, he was accused of being an old guard Republican—which he described as being "as American as baseball."

More seriously, he described his position in the Senate as follows: "I felt I represented the conservative constitutional element of the party. I'm a constitutionalist; I thought the liberal elements were straying pretty far from the concept of constitutional government that had been taught me. And I therefore resolved to expend every effort to bring the government back to government by the precepts of the Constitution as I understood them."

Before his election to the Senate, he had been a partner since 1937 in the law firm of Venable, Baetjer and Howard and had had one experience with public life. He had twice been appointed, first by a Republican and then by a Democratic mayor to a seat on the City Service Commission, now the Civil Service Commission.

He was elected in 1950 after first winning the Republican primary on the unit vote while losing the popular vote.

He then went on, in a controversial campaign, with the support of the late Senator Joseph R. McCarthy (R., Wis.), to unseat the late Senator Millard E. Tydings, who had held the seat for 24 years.

Though Senator Butler was widely known by the public for his anti-Communist positions, he also became known as a supporter of the maritime industry, particularly in the Baltimore area.

By the time of his retirement from the Senate in 1962, due to ill health, he was the ranking Republican member of the Foreign and Interstate Commerce Committee, one of a number of committee memberships he held.

The shipping correspondent of the London Times described him as "the foremost champion in the United States Senate of the American shipping and shipbuilding industries."

He was a strong opponent of the St. Lawrence Seaway.

Though he campaigned heavily with the late Theodore R. McKeldin, who was elected governor when Mr. Butler was first elected to the Senate, they later parted ways, Mr. Butler supporting the late Senator Robert A. Taft for the presidency while Mr. McKeldin supported Dwight D. Eisenhower.

The rift was later mended, and Mr. Butler supported President Eisenhower in the 1956 election when both gained second terms.

Born in Baltimore, Mr. Butler attended Poly but quit to take a job as an office boy, a step dictated by his family's financial situation.

He enlisted in the 110th Field Artillery of the 29th Division when the United States entered World War I and served in France.

After his demobilization in 1919, he attended The Johns Hopkins University for a time, and played on the football team, but again had to leave school to help his father, who was ill, in his real estate business.

He studied law at night and graduated from the University of Maryland Law School in 1926. The same year, he married the former Marie Louise Abell, great-granddaughter of A. S. Abell, founder of The Sun.

He was a member of a number of legal societies, a former commander of the Emory Post of the American Legion and a member of the Veterans of Foreign Wars and the 29th Division Association.

He was also a member of the Oriental Lodge of the Masons, Boumi Temple and the Royal Order of Jesters.

In addition to his wife, he is survived by two sons, John Marshall Butler, Jr., and Edwin F. Abell Butler, both of Towson; a daughter, Mrs. Maria Butler Harrington, of Towson; two sisters, Mrs. Lydia Hill, of Fort Dodge, Iowa, and Mrs. Sarah McKenney, of Bradenton, Fla., and five granddaughters.●

MSTISLAV ROSTROPOVICH

● Mr. JACKSON. Mr. President, I am impelled to speak out against the arbitrary and mindless cancellation by the Soviet Government of the Soviet citizenship of the great conductor and virtuoso cellist Mstislav Rostropovich and his famous soprano wife Galina Vishnevskaya.

I join with all the friends and admirers of the Rostropovich family throughout the world who are rallying to their side.

We remind the Soviet leaders that they have again flaunted international law. The governments of the world have established the right to leave and return to any country—in the Universal Declaration of Human Rights and in other international accords and conventions to which the Soviet Government is itself a party.

We remind the Soviet leaders that they only hurt themselves by denying the Russian affiliation of these two superb artists.

We want the Rostropovich family to know that we are proud of them, for their free spirits, for their humane and generous actions, and for their magnificent contributions to the artistic life of the world.

I submit the March 20, 1978, editorial from the New York Times entitled "Moscow Denies Only Itself" to be printed at this point in the RECORD.

The article follows:

MOSCOW DENIES ONLY ITSELF

Soviet art and thought are bleeding, hemorrhaging, in fact. The stream westward of distinguished artists and intellectuals in the past decade can be compared only with the flow from Nazi-occupied Europe 40 years ago. So if settling in freedom without losing interest in the affairs of the homeland is truly "unpatriotic activity," there is plenty more work for the Soviet bureaucrats who last week erased the traces of citizenship from Mstislav Rostropovich, the cellist; his wife, Galina Vishnevskaya, the soprano; and Pyotr Grigorenko, a former general.

It is a tribute, of sorts, to Soviet self-confidence that the Kremlin has been willing to accept the shame of the exodus just to rid itself of the nuisance of these free spirits. Stalin used to dog his famous émigrés around the world and play upon their attachment to the homeland to lure them back to mental anguish and repression. But Mr. Brezhnev's way is no less cruel, for the loss of citizenship carries the punishment of lifelong banishment; there is no returning, even for a visit with family.

Still, if they keep it up, the Soviet leaders will bring far greater injury to themselves. Imagine anyone wanting to deny the national affiliation of the likes of Andrei Amalrik, Vladimir Ashkenazi, Rudolf Barshai, Igor Barukshtis, Mikhail Baryshnikov, Herman Branover, Joseph Brodsky, Vladimir Bukovsky, Valery Chalidze, Yefim Etkind, Anatoly Fedoseyev, Kaleriya Fedicheva, Aleksandr Glezer, Victor Korchnoi, Naum Korzhavin, Anatoly Levitin-Krasnov, Pavel Litvinov, Natalya Makarova, Vladimir Maksimov, Zhores Medvedev, Boris Midney, Aleksandr Minz, Ernst Neizvestny, Viktor Nekrasov, Rudolph Nureyev, Galina and Valery Panov, Leonid Plyushch, Aleksandr Solzhenitsyn, Dmitri Segal, Andrei Sinyavsky, Vladimir Titov.

And for each of these better-known émigrés there are thousands more of achievement and promise, and their children. Like the precious vines once transplanted from Europe, many of them bear instant and splendid fruit in the United States and elsewhere. The world will not forget what is Russian in these exiles. It is the Soviet motherland that must hope it will not one day be denied by them.●

NUCLEAR SAFETY

● Mr. ABOUREZK. Mr. President, most of us are aware that the electric power industry has announced a brave new world of foolproof nuclear fuel cycles. The announcement got front-page coverage in the national newspapers, and the supposed "new" discovery was immediately hailed by nuclear proponents as a solution to all the problems of proliferation. But the so-called discovery was not new, and does not eliminate the risks of plutonium proliferation, as several public interest groups have pointed out since the announcement. Their responses did not get quite the coverage, however, and I am happy to be able to report that the New York Times itself has printed an editorial that puts its front-page coverage into context. As the Times' editorial says:

That solution should now be measured against other proposed nuclear systems—and non nuclear energy sources as well—to determine which are best in terms of economics, conservation of resources, and nonproliferation.

That is all that the advocates of renewable and benign resources have ever asked. I take it as a good sign that the Times has acknowledged the importance of making energy decisions in this context. I submit for the RECORD the Times' editorial, "Hard Sell on Nuclear Safety."

The editorial follows:

[From the New York Times, Mar. 2, 1978]

HARD SELL ON NUCLEAR SAFETY

American and British researchers this week unveiled a "dramatically new system" that will supposedly prevent nuclear fuel from being used to make bombs. The system was described as completely secure against efforts by terrorists or governments to extract weapons-grade plutonium from nuclear facilities. It would thus permit, its advocates claim, "worldwide expansion of nuclear power" without spreading the means to make weapons. If the claims hold up, the development would be a breakthrough in efforts to curb the proliferation of nuclear weapons. But the claims appear exaggerated—a hard sell on behalf of rapid development of the next generation of nuclear reactors.

There is irony in the new announcement, made jointly by scientists from the Electric

Power Research Institute, an arm of the American utility industry, and Britain's Atomic Energy Authority, for it underscores the dangers in the world's current nuclear course. In describing the need for the new system, the researchers give a frank appraisal of defects in the old systems. They argue that current nuclear reactors are producing vast quantities of material that could be fabricated into bombs.

This is a surprising admission. Even the Carter Administration, which is pushing hard to curb proliferation, has not considered current reactors a weapons hazard. These reactors run on uranium fuel that is not of weapons grade. But their used fuel rods contain plutonium that could be fashioned into bombs. This plutonium has generally been considered inaccessible because of lethal radioactivity. Now the British and American researchers point out that the radioactivity dies down over a period of years, making every spent fuel-storage facility in the world a "plutonium mine" that becomes steadily more accessible. No more eloquent plea could be made for bringing spent fuel rods under better international control.

This week's announcement also casts doubt on current efforts to develop the next generation of nuclear reactors—the "breeder reactors" that would operate on plutonium—and the "reprocessing plants" that would create it. President Carter has tried to slow the rush toward breeders and reprocessing because plutonium can be readily made into weapons. The nuclear industry initially poohpoohed his fears. But now the Electric Power Research Institute has acknowledged that these technologies are "directly applicable to weapons production" and would permit diversion of enough material "to produce several nuclear weapons in a short time . . . as short as a few weeks." That is long overdue acknowledgement that Mr. Carter is on the right track. It lends support to his efforts, thus far unsuccessful, to kill off the Clinch River breeder reactor project, as well as to delay development of reprocessing facilities in the country and elsewhere.

How far would the utility industry's "dramatically new system" go toward eliminating the acknowledged risks? The system unquestionably represents an advance over conventional technologies. Plutonium concentration would be kept below 25 percent, too low to make a weapon, and the fuel would contain radioactive fission products "hot" enough to kill anyone trying to steal it unshielded. Moreover, the design of the plants involved would make it "physically impossible" to siphon off plutonium without undertaking a major construction project. Still, Government experts in energy and arms control consider the plan a less-than-dramatic advance that embodies ideas long under consideration. They say it would still be possible to extract plutonium from the new system. And they fear that if plants embodying the new system were spread around the world, they would increase the dangers of weapons proliferation by spreading nuclear expertise.

The utility industry deserves credit for identifying the risks and proposing a solution. That solution should now be measured against other proposed nuclear systems—and non-nuclear energy sources as well—to determine which are best in terms of economics, conservation of resources, and non-proliferation. The proposal is not a panacea that justifies a headlong rush toward a supposedly safer nuclear future.●

BALTIMORE RECEIVES INTERNATIONAL RECOGNITION

● Mr. MATHIAS. Mr. President, the city of Baltimore is now in the forefront of American cities rebounding with vigor from the doldrums of the fifties and sixties. It is, as its gateway signs proclaim, a "working city." It is the home of working men and women and it "works" for them. It is well managed and ably led by its dedicated mayor, William Donald Schaefer, and a host of creative government and private leaders who have recognized the value and potential of Baltimore and have helped bring about the renaissance.

I urge my colleagues to visit Baltimore and see a working city in action. Everywhere physical renewal is underway; homes, shops, the downtown, and the inner harbor are being rejuvenated. It is a cooperative effort of both public and private organizations that has required a great deal of energy and confidence in the future of Baltimore.

This enthusiasm for their own neighborhoods, and the civic pride that unabashedly comes through when you talk with Baltimoreans, are now attracting international recognition.

The International Federation for Planning and Housing—a 60-year-old federation of eminent urban planners from 57 countries—recently chose Baltimore as the first American city to be recognized as a model city by the federation at its 1978 World Congress.

I ask that a Baltimore Sun article describing Baltimore's selection be printed at this point in the RECORD.

The article is as follows:

[From the Baltimore Sun, Mar. 5, 1978]

INTERNATIONAL BODY HONORS BALTIMORE RENEWAL EFFORTS

(By Tracie Rozhon)

Baltimore has been singled out as the American city with the best urban revitalization program by the International Federation for Housing and Planning, which has asked the city's top officials to explain their success in Hamburg, Germany, this September.

This is the first time the 60-year-old planning federation has so honored cities; besides Baltimore, a federation committee chose Hamburg itself and is now selecting an outstanding Asian or African city for presentations at the federation's 1978 World Congress.

Mary K. Nenno, the associate director of the National Association of Housing and Redevelopment Officials—a member of the federation—confirmed the designation late Friday.

She said NAHRO, along with the American Institute of Planners and the American Society of Planning Officials—the country's three most prestigious planning organizations—had "strongly supported" Baltimore as the American city that best exemplified urban revitalization.

Groups in Canada and Mexico also were represented on the North American committee that chose Baltimore.

Mrs. Nenno said that Baltimore was NAHRO's first choice, although American cities such as Boston, Atlanta and Philadelphia also were making significant progress.

"The thing that was most impressive about Baltimore's program was its comprehensiveness," Mrs. Nenno said. "It's not just downtown renewal, not just commercial or residential, not just new buildings or old buildings, or businesses or neighborhoods. It's all of them."

Each of the three cities will be given one-half day in which to make a presentation to the planners' 1978 World Congress which will take place September 11 to September 14.

Yesterday, M. Jay Brodie, the city's housing commissioner and a member of NAHRO's board of governors, confirmed that he and Mayor Schaefer had been informed of the honor and that the Mayor had asked him to recommend people for the city's delegation.

"Obviously the Mayor will be going," Mr. Brodie mused. "And a few technical people to talk about the nuts and bolts. . . . This is an involved business, with the different languages. We'd probably want to have stuff we could leave there, we should bring the best materials to tell the story."

Asked whether he would go himself, Mr. Brodie laughed and said he did not know, adding he had no idea how much the trip would cost and how many people the city could send. He said Robert C. Embry, Jr., the former commissioner and an assistant federal housing secretary, might be a logical person to ask to accompany the group.

Neither Mr. Embry nor Mayor Schaefer could be reached for comment yesterday.

As part of the congress, delegates will tour Warsaw and Dakar, Senegal.

The International Federation for Planning and Housing has 57 member countries and has headquarters in The Hague. The American delegate to the congress, William L. Rafsky of Philadelphia, was elected treasurer of the General Secretariat, or governing group. Mr. Rafsky is president of the Center for Philadelphia Area Development.

Friday night, Dorothy H. Gazzolo, chairman of the North American committee for the 1978 congress, explained how Baltimore was chosen.

"The federation decided the theme of this year's congress should be urban revitalization, and when Mr. Rafsky came back to the United States, he posed the question to NAHRO and the North American regional section of the federation how America could be best represented.

"There was a lot of conferring from coast to coast, checking back with The Hague as to possible cities—there were six or seven—and the consensus had been Baltimore."

Mrs. Gazzolo said that Baltimore "has always emphasized using what it has.

"It burgeoned under Embry and became even more significant under Mayor Schaefer when the emphasis was enlarged. He really threw a lot of political support behind the revitalization. . . . He made it part of his platform."

There are planning parallels between Baltimore and Hamburg, she continued. Both are port cities and both were devastated—in one way or another—in the years following World War II. Hamburg, too, she said, emphasizes "citizen participation." ●

FAITH BALDWIN

● Mr. RIBICOFF. Mr. President, Faith Baldwin, whose novels, short stories, poetry, and articles brought pleasure to millions of Americans for a half century, died Saturday, March 18, 1978 in Norwalk, Conn. She was 84.

With an incredible 60 novels to her credit—and countless other stories and articles behind her—Faith Baldwin was one of the most popular writers in American history and her passing will be mourned by her many readers.

Mr. President, I submit an article from the New York Times of March 20, 1978, about Miss Baldwin's career and ask that it be printed in the RECORD.

The article follows:

FAITH BALDWIN, AUTHOR OF 85 BOOKS AND MANY STORIES, IS DEAD AT 84

NORWALK, CONN., March 19.—Faith Baldwin, the doyenne of American light fiction writers, died at her home last night after a 17-month-long illness. She was 84 years old.

Miss Baldwin, who wrote more than 85

books in her long writing career, lived with her son, Stephen Cuthrell, in a 14-room house set on 8½ acres. It had been both her home and studio.

Miss Baldwin was the widow of Hugh H. Cuthrell, the former president of Brooklyn Union Gas Company. Mr. Cuthrell died in 1953.

In recent years, Miss Baldwin wrote two books a year and was working on one when she died. Her most recent novels were "Adam's Eden" and "Thursday's Child," published in 1977 and 1976 respectively.

A FLIGHT INTO FANCY

For almost 50 years, Faith Baldwin, with never a pretense at literary significance, was one of the most successful writers of light fiction on the American scene.

In rooms filled with books and family photographs, white lace doilies and china mementos, she wrote—from the early days of her marriage to the last months of her life—about 85 books, including more than 60 novels and two books of poetry, and countless short stories and magazine articles.

The key to her popularity was that she enabled lonely working people, young and old, to identify with her glamorous and wealthy characters. She told them that certain problems and preoccupations, about love and friendship, are shared by everybody.

Her books were meant not only to interest readers but also to encourage them. Women found in them solace as well as entertainment.

MOST SUCCESSFUL IN 1930'S

It was during the 1930's—the era of soap operas and frothy movies—that she reached the height of her success. In 1936, at the peak of the Depression, she made more than $315,000.

With jejune books such as "Office Wife," "District Nurse," "Honor Bound" and "Rich Girl, Poor Girl," she accumulated a readership so vast that most of the more than 30 novels she wrote in that period were serialized in national magazines. About a dozen were also made into films.

"People had to have some escape hatch, some way to get out of themselves, especially during the Depression," Miss Baldwin said in an interview in the late 1960's.

"When we got into the war," she continued, "nothing was more exciting than the headlines. After that I was still successful, but it was all different, because the world was different. Escape wasn't as important then."

MONEY AND HIGH MORALS

She always wrote about people who had money, good breeding and high morals. Some, with severe mustaches and tight lips, were bad, but in her pages and pages of short paragraphs, there was no hint of depravity or evil. Nor was there ever any attempt to show the Depression and hard times in the way that her contemporaries, John Steinbeck and James T. Farrell did.

Miss Baldwin's almost superhuman heroes and heroines intrigued her readers as they sat over milk shakes at lunch counters and rode in crowded buses. In novel after novel they read about ermine-collared bed jackets, private railway cars and vast, unbelievable inheritances. And always, at least by the last chapter, the good girl and the good man fall in love.

Although love was the major element in her stories, she only hinted at sexual relationships.

The important factor, Miss Baldwin explained, in allowing readers to identify with her characters was what she called "the fantasy element."

"The girl on the subway reads about the rich heroes and hopes she'll meet a man with $500,000," the author said. "But she also reads that the two young millionaires come together not through money but through love and personal honesty. And the girl understands that even if she doesn't marry a millionaire, she may have other rewards if she is true to herself."

This respect for goodness and honesty was a major theme throughout all her works.

Faith Baldwin, born Oct. 1, 1893, in New Rochelle, N.Y., was the daughter of Stephen and Edith Baldwin. Three years later they moved to Manhattan and then to a large brownstone house in Brooklyn Heights where the younger sister, Esther, was born. Mr. Baldwin was a well-known trial lawyer.

Faith's childhood in New York's upper-class world was a mixture of what she called "wild extravagance" and "protection." Her early exposure to sophistication explained not only her later choice of subject matter but also the casual, familiar way she handled it.

Life for her was finishing schools and gatherings at tea time. But it also was trips by herself to California and Kansas City to visit relatives and private luncheons with actresses to whom she had written fan letters.

Her parents were alternately alarmed and permissive. "I could read when I was 3 and that frightened them," Miss Baldwin recalled, "but later they let me smoke."

"I never wanted to be a writer," she said. "I wrote all the time, but I wanted to be an actress. I thought that was the only way I could be adventurous and independent."

She attended the Brooklyn Heights Academy and finishing schools in Brooklyn and Briarcliff Manor, N.Y.

In 1914, dark-haired, stylish Miss Baldwin went to Dresden, Germany, where she lived for two years with one of her mother's closest friends. "Life didn't change for us because of the war," she recalled, "I was sent to cooking school and learned German, but we continued to go to the opera."

In 1916 she returned home and when the United States entered the war, she worked for the War Camp Community Service.

In the winter of 1919 she met Hugh H. Cuthrell, a Navy pilot who later became president and chairman of the board of the Brooklyn Union Gas Company. They were married in Brooklyn the next winter when she was 27 years old.

They had four children, including Hugh Jr., who was killed in a car accident in 1960.

Miss Baldwin's first novel was published in 1921. In 1927 she sold her first serial, to Good Housekeeping, and knew that success had come. Afterward she sold the serialization rights to her books for as much as $55,000.

In one year, 1936, she wrote five novels for serialization in magazines such as Cosmopolitan and The Ladies' Home Journal. She published three novels, written and serialized the year before, and Hollywood made movies from four others, with stars such as Henry Fonda, Jean Harlow and Clark Gable. In addition she wrote columns for various New York newspapers and was invited almost daily to give speeches and interviews.

Evidence of her continuing popularity came as recently as the mid-60's. When her monthly column in Woman's Day drew 300 letters a month from readers, the magazine increased her salary from $250 to $850.

Miss Baldwin is survived by a son, Stephen Cuthrell of Norwalk; two daughters, Hervey Moores of Killingworth, Conn., and Ann Schubert of Shell, Wyoming; a sister, Mrs. Bruce Bromley of Manhattan; 11 grandchildren, and one great-grandchild.

Memorial services will be held Thursday at 11 A.M. in the United Methodist Church of Norwalk.●

FOREIGN POLICY DILEMMAS

● Mr. CLARK. Mr. President, events in the Horn of Africa and in Rhodesia are creating serious foreign policy dilemmas for the United States. The twin aims of resisting Communist expansionism and promoting majority rule in Southern Rhodesia may soon come into conflict if we are not careful. The dangers that lie ahead in the Rhodesian situation were thoughtfully explored in a recent column by Victor Zorza, a columnist for the Washington Post, who has strong anti-Communist credentials.

Two points that Zorza made in this piece deserve special attention: First, Zorza warns that—

The West would again find itself on the wrong side if it gave support to the Smith formula, because the "internal settlement" is a transparent device to ensure that the real decisions in Rhodesia will continue to be made by the whites.

This is Moscow's interpretation and Zorza, in his own judgment, tends to agree. Second, Zorza warns that the West should not exclude the Patriotic Front and its guerrillas from any settlement it recognizes, else we permit the Russians once again to claim that it is sending an expeditionary force to Africa to assist either the Patriotic Front or the front-line states which support them. This would allow Moscow to back a legitimate government and a popular movement against invaders—only this time the invaders—that is, the Rhodesian forces—would be white.

I urge everyone concerned with the issue of Soviet and Cuban activities in Africa to consider Zorza's comments seriously. I submit for the RECORD his column of March 16, 1978.

The column follows:

[From the Washington Post, Mar. 16, 1978]

IS RHODESIA NEXT IN LINE FOR SOVIET INTERVENTION?

(By Victor Zorza)

The new danger in Africa, just when the Russians and the Cubans should be beginning their withdrawal from Ethiopia, is that instead of going back home they will turn around and go to the aid of the Rhodesian guerrillas. What will the West do then? Its threats have done nothing to get them out of Ethiopia. It was only when the provocation that brought them there in the first place was removed, and the Somali regular forces that had invaded Ethiopia retired in disorder to their own borders, that the prospect of a Soviet-Cuban withdrawal became at all real. There is a lesson here for the West that we will ignore only at our peril.

Somalia was the aggressor in Ethiopia, and the West found itself on the wrong side. That gave the Kremlin the opportunity to introduce its expenditionary force into Ethiopia, with the approval of most African leaders. Now a similar chain of events may be beginning in Rhodesia.

The new Rhodesian settlement negotiated by Ian Smith and the three African leaders inside the country is rejected by the guerrilla leaders now outside Rhodesia, and by most of the black African countries. The West would again find itself on the wrong side if it gave support to the Smith formula, because the "internal settlement" is a transparent device to ensure that the real decisions in Rhodesia will continue to be made by the whites.

That is what Moscow Radio has been tell-

ing the Africans, and the analysis cannot be easily controverted. It has also said, more ominously, that the new situation creates "a serious threat to peace" that could be made an excuse for the introduction of Cuban and Soviet military forces. "The leaders of the Patriotic Front," Moscow said, "have stated that they will step up their armed struggle against the illegal Smith regime and its puppets, and will struggle to a victorious conclusion." That is one threat to peace.

The other, which is really the obverse of the first, is that Rhodesian security forces will seek to preempt the stepped-up attacks by Patriotic Front guerrillas based in neighboring Mozambique and Zambia. To do so, the Rhodesian forces would have to cross international borders, as they have done repeatedly in the past, and thus give both Zambia and Mozambique a reason for requesting Soviet-Cuban military aid.

Once again, as in the case of Ethiopia, the Kremlin would be in a position to say that a communist expeditionary force had gone to Africa at the request of a legitimate government to help it against invaders—though this time the invaders would be white.

Ian Smith thinks he knows what he is doing. He believes that the West in general, and the United States in particular, cannot easily afford to allow yet another communist military intrusion into Africa. The United States has tried to prevent the communist intrusion into Angola with little more than angry words, but when those failed it warned the Kremlin that any repeat performances would have grave consequences. But when the Kremlin did repeat the performance, in Somalia, the United States was not in a position to do anything about it—until it was too late. By the time the Somalis agreed to withdraw—partly under prompting from Washington, but also under blows from the communist expeditionary force—there were more than 10,000 Cubans in Ethiopia, a thousand Russians, two Soviet generals, and large stocks of Soviet arms.

The pattern that had so often been anticipated by students of Soviet policy in Africa was assuming an increasingly clear shape. First a testing of the waters by the Kremlin in Angola, and then a bolder venture into Ethiopia, which could become a stepping stone to Rhodesia, so that ultimately Soviet forces could intervene in South Africa when that unhappy land explodes.

The terms of the "internal settlement" and the world reaction to it would make it difficult to keep the Kremlin out if it decided to intervene again. Although the Foreign Office in London and the State Department in Washington have taken refuge in ambiguity, while they try to agree on the next step, the condemnation of the Salisbury deal by Andrew Young, the U.S. ambassador to the United Nations, makes one thing clear. The Western powers will not be able to support Ian Smith in imposing on the Rhodesian blacks a settlement that ignores the Patriotic Front and its guerrillas.

The pictures of happy blacks dancing and chanting their approval of the "internal settlement" do nothing to alter the realities of the situation. True, the camera does not lie—but it is not much help in determining where the political loyalities of the population lie. Those are measured by the ballot box.

Andrew Young takes a different view of Soviet adventures in Africa from that held by Zbigniew Brzezinski, President Carter's national security adviser. Young believes that the Kremlin will not be able to build a permanent Soviet presence in Africa, that sooner or later its own blunders, and African pride, will lead to the expulsion of Soviet influence, as has happened so frequently in the past. Brzezinski, who is more concerned with the global strategic picture than with what happens just in Africa, is sometimes accused of taking unthinkingly the alarmist view of Soviet actions, which is said to come automatically to a man with his Polish American background.

But there is one important element in that background that should put him on Young's side. Anyone steeped in Polish history as he is will remember the "internal settlements" imposed by Russia on Poland during an occupation that lasted more than 100 years—and the refusal of the great majority of the population to acquiesce in them, even though the Russians usually managed to find a few Polish leaders who were prepared to act as their puppets.

The parallels with the black leaders who accepted Ian Smith's "internal settlement" may not be exact, but they are sufficiently suggestive to give pause to a man with Brzezinski's background. He certainly wants to stop Soviet incursions into Africa once and for all—but he may find that the way to do it is to give greater U.S. support to those African leaders, in Rhodesia and elsewhere, who cannot be accused of being quislings by their compatriots.

If the West allows itself to be maneuvered once again into the position of supporting the wrong side, then it will also find itself on the losing side—and the Kremlin will have made another gain in the steady unfolding of its African strategy.●

THE AMAZING A–10

● Mr. MATHIAS. Mr. President, there is justified unease in this country concerning the buildup of Soviet conventional military capability in Eastern Europe. Secretary of Defense Harold Brown in his 1979 annual report speaks of "an increasingly precarious conventional balance between NATO and the Warsaw Pact in Europe." I am pleased that the administration sees this as a problem which must be addressed quickly and effectively.

I am also pleased that they have recognized the A–10 close air support aircraft, manufactured by Fairchild Industries, as one important part of an effective response to the pact threat on the ground. The administration has requested a fiscal year 1979 procurement of 162 of these planes. Secretary Brown's annual report justifies this request by saying that—

> The A–10 gives ground forces a level of flexible firepower that would be difficult to achieve in any other manner.

This is a plane that can prove invaluable in responding to enemy tanks in the European theater.

Mr. President, I submit for the RECORD a letter I received from the Department of the Air Force concerning the A–10.

The letter follows:

DEPARTMENT OF THE AIR FORCE,
Washington, D.C., March 13, 1978.

Hon. CHARLES MCC. MATHIAS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MATHIAS: Knowing of your continuing interest in our A–10 program and the employment of this aircraft in our tactical units, we are pleased to advise that the first operational readiness inspection (ORI) of an A–10 unit, the 354th Tactical Fighter Wing at Myrtle Beach AFB, South Carolina, was completed on January 31, 1978. The overall rating was Satisfactory, with an Excellent or Outstanding rating being awarded in several areas.

The ORI scenario, which incorporated deployment, readiness, and weapon systems capabilities, simulated an attempt to provide enhanced firepower in support of an allied nation. Mark–82 500 lb. general purpose bombs, the GAU–8 30mm cannon, and AGM–65 Maverick air-to-ground missiles were all employed in the exercise.

The average reaction time for sorties flown was ten minutes, and maintenance was awarded an Excellent rating based on only three sortie cancellations, a tribute to both the aircrews and support personnel. There was a 100 percent success rate on MK–82 deliveries, and a 99.6 percent effectiveness rate for the GAU–8 firing reliability.

In all, we are quite proud of our A–10 units and the accomplishments of this first ORI. Our goals for the future are to maintain our established proficiency levels and develop programs to enhance our training and further improve effectiveness.

We hope this information is useful to you, and look forward to your continued support of our program in the future.

Sincerely,

W. MULLINS,
Brigadier General, USAF, Deputy Director, Legislative Liaison.●

INFLATION AND FEDERAL ECONOMIC POLICY

● Mr. CHILES. Mr. President, Congress is currently in the midst of considering next year's budget and the Nation's economic policy. I believe we are at a critical point for reappraisal. We are two-thirds of the way through economic recovery in terms of reducing unemployment and increasing industrial output. We have reversed the momentum of recession and fostered a strong momentum for expansion. It is time to look ahead and see where this momentum will take us next year.

All too often, Federal economic policy reacts to old problems or comes into effect too late to achieve its goals. We have learned that the Government cannot fine tune the economy. It can act to moderate the boom-bust cycles that result from private actions. It can stimulate the private economy out of a recession, or slow the pressures for inflation. But these Government actions have to be large measures acting over a period of a year or two. They cannot track and adjust the economy quarter by quarter.

It seems to me that we have created the momentum for economic recovery, and that momentum will carry through the last phase unless we do something drastic to prevent it. Allowing the recovery to proceed means we need some form of tax reduction to offset increases built into the law. We need to offset the overly high social security tax increase, because that will hurt both employment and inflation. We need to offset the effects of inflation on income taxes, or that will impede recovery. But I do not think we need such a big tax cut as to constitute a new round of economic stimulation.

Inflation is now emerging as the No. 1 economic problem. To reduce inflationary pressures in 1979 and 1980, our policies have to be set in place now. It is critical that we reestablish a climate of predictability for Federal economic policy. The rapid shifts in policy and uncertainties regarding energy prices, payroll taxes and regulatory policies have hurt business investment and cost us jobs and productivity. We need to address these policies together in the framework of the

1979 budget resolution, and send out clear signals about where we are heading. It seems to me that by holding down inflation and creating confidence among businessmen, we could get a lot of the business investment that some people want to stimulate by tax reductions.

At my request, the Senate Budget Committee held a hearing devoted entirely to strategies of dealing with inflation. Professional economists from the business community, the administration and the private research world expressed consensus on several major points:

First. Learning to live with inflation over 6 percent a year is not possible—it will accelerate until it drives up interest rates and impedes investment, causing another recession.

Second. Inflation over the last 3 years has not been caused by Federal deficits. Rather, it is the result of the continued spin-through of oil price increases and the continued expectations of workers for higher salaries and businesses for higher profits.

Third. In the last year Congress and the President have taken a variety of actions that will add at least 1 percent to the inflation rate: Increased minimum wage, increased payroll taxes, measures to increase food prices and protect higher priced domestic products from import competition.

Fourth. Wage and price controls would produce great disruption and impede business growth; failure to take other effective measures will increase the pressure to adopt wage and price controls.

Fifth. A voluntary deceleration effort, as proposed by the President, will not have much effect unless the Government can show business and labor some concrete evidence that costs can be held down if they agree to participate. The administration is hoping that reduced food prices will provide this impetus; recent pressures by farmers and the reaction by Congress and the President make that an unlikely hope.

Sixth. Payroll taxes—which pay for social security and medicare—have worse economic effects than income taxes. They add to the price of hiring workers, and they are passed on by businesses as price increases. The overly large payroll tax increase adopted by Congress last year will add to inflation. A reduction of those taxes would be the single most important action the Government could take to reduce the inflationary spiral.

Seventh. Excessive Federal regulations have driven up prices more than is necessary to achieve goals of safety for workers and a clean environment. Federal regulations in some areas increase prices by reducing competition.

When the economy went into a deep recession, I supported strong measures to stimulate recovery. I think we need equally strong measures to restrain inflation. It took more than exhortations to private businesses to increase employment; it took tax cuts and deficit spending. It will take concrete actions to moderate the wage-price spiral that is beginning to accelerate inflation. If we do not come up with a definite strategy, then pressure will increase to adopt controls. I would not like to see us go that route again.

One very significant thing we can do is stop the trend toward greater reliance on payroll taxes. In 1967 payroll taxes provided less than one-quarter of Federal revenues; they now account for a third. If we adopt the President's tax proposal, they will account for even more in the future. I do not think businessmen are adequately aware that their biggest increase in tax burden has been in payroll taxes, not in corporate income taxes. Businesses tend to pass on payroll taxes as price increases and ignore their effects. Besides hurting cash flow, this pass-on of payroll taxes as higher prices comes back to haunt the businessman in the form of higher wage demands and higher interest rates.

I am one of the original cosponsors of a bill to reduce the payroll tax rate by 1.6 percent by shifting to general revenue financing of medicare hospital insurance. The council on Wage and Price Stability, the Congressional Budget Office and the Joint Economic Committee all calculate that just the shift from the President's proposed tax cut to this payroll tax cut would reduce inflation by one-half to 1 percent in 1979 and more in 1980. This would represent a major turnaround in the wage-price spiral. It could give the council on Wage and Price Stability a concrete starting point as they try to persuade business and labor to go along with the President's voluntary deceleration plan.

I want to emphasize that this plan does not call for general revenue financing of the old age and survivors insurance fund, which is what most of us think of as social security. I believe we should maintain the contributory basis of that retirement system and keep the direct link between the payments workers make and the benefits paid out.

However, medicare is not linked to contributions in the way the retirement system is. We do not have any dollar limit placed on the benefits to be paid. We have found that to control medicare's costs for hospitalization, we have to develop a whole new cost containment mechanism. Part B of medicare—which pays for out-of-hospital physicians' costs—is already financed 70 percent by general revenues. I therefore think we have no good reason to pay the economic costs of higher payroll taxes.

This big a reduction in payroll taxes, over $20 billion, would have to substitute for some or all the President's recommended tax cut, since we certainly do not want to increase the deficit above the $61 billion level he proposed. We therefore have to compare the effects of the two types of tax cut. The Congressional Budget Office calculates that they would each have about the same effect in stimulating economic recovery. The big economic difference would be a reduction of inflation by the payroll tax cut, as opposed to a slight increase of inflation by the President's proposal.

The other concerns are for the effects on business investment and tax reform. Greater productivity through investment in modern plant and equipment is necessary for both long-term economic growth and reduced inflation. I believe that a reduction in payroll taxes would stimulate that investment by improving cash flow and reducing inflation. Lower inflation means lower interest rates, and that will probably induce more investment for more types of business than an increase in the investment tax credit. Every business pays payroll taxes.

Some administration officials are concerned that shifting the tax cut to payroll taxes would reduce the pressure for reform. First let me say that there has been no great public or congressional enthusiasm for the major tax reform proposals the President has made. Limiting deductions for business lunches would save $700 million, eliminating the deduction for State and local sales and gasoline taxes would save $2.7 billion, reducing medical and casualty deductions would save $1.3 billion. But a lot of people would have to make up that extra $5 billion, and right now I feel a lot more concern in Congress about how to reduce taxes than how to raise them.

However, if some workable reform proposals can be worked out to generate $2 or $3 billion of revenues, then I am sure the American taxpayers will be glad to get either an additional income tax reduction or a lower Federal deficit.

In the long run, the way we will reduce the tax burden will be to hold down spending and reduce inflation. It is for that reason that I have devoted so much of my time and attention to reforming the congressional budget process. Through the Budget Committees and the budget resolution we now have a mechanism to put a lid on Federal spending and to point out the economic effects of various spending and tax proposals. We have a long way to go, but we are beginning to make progress.●

MASS TRANSIT

● Mr. BIDEN. Mr. President, I have been an advocate of mass transit, and I will continue to support Federal assistance for mass transit. Therefore, I welcome the opportunity the President has given us recently to reorder our mass transit and highway funding priorities.

While firmly supporting Federal aid to mass transit, I believe there is plenty of room for local initiatives and innovations supporting this vital element of urban transportation. I am particularly pleased when the private sector realizes that promoting transit can be good business, just as subsidizing parking has proven to be.

For that reason, I want to bring to my colleagues' attention an editorial published in the February 15 edition of the Washington Post. This editorial supported a Chicago retailer's offer of free transit rides to his customers. This marketing idea not only attracts potential customers, but also gives this businessman a way to combat our extravagant energy use.

Mr. President, I submit for the RECORD the Washington Post editorial.

The editorial follows:

RIDE AND SHOPS: A BRIGHT IDEA

A Chicago retailer has an idea that Washington businesses might well adopt. The re-

tailer, Sol Polk of Polk Bros. appliance stores, is offering Chicagoans free mass-transit rides to his stores. Under the system, which he calls a FARE Plan, the stores refund the equivalent of a round-trip transit fare to everyone who brings in a transfer no more than a few hours old. Riders don't have to buy a thing to get the refund. "As long as they come in and see what we've got we're happy," says Mr. Polk.

Mr. Polk obviously wants to sell more appliances— but he's trying to sell mass transit, too. He thinks the nation can't afford to burn more and more gasoline in private cars and let its vast investment in mass transit go to waste. Buses and subways should be marketed like any other product, he believes. So his company has invested $200,000 in rebates and promotion for a 90-day test of the FARE Plan. The results so far are good. Despite very bad weather last month, Mr. Polk reports, his stores' sales surpassed last January's by 12 percent. The plan has brought in "a lot of nice people," he says, including many "who haven't been on public transportation for years."

It's a splendid idea. Retailers routinely subsidize people who park and shop, why not encourage folks to ride and shop instead? Fare refunds should also draw potential customers such as elderly people who don't drive. And everybody benefits when public transit is used more, especially in off-peak hours. Washington retailers should try something like this; the ideal time might be when Metro starts running on Saturdays. It strikes us as the kind of private initiative that can produce profits for everyone.●

CHINA TRADE—PROBLEMS AND PROSPECTS

● Mr. MATHIAS. Mr. President, last January I was privileged to be part of a congressional delegation led by Senator CRANSTON of California to the Peoples Republic of China. One of the topics our delegation raised with Chinese leaders was the prospect for future PRC agricultural imports from the United States.

As we all know, the farm sector in the U.S. economy is in a state of depression. Our farmers are not getting an adequate return for their labor. Increasing exports abroad of our agricultural produce may provide a partial answer to this dilemma. At present, according to Secretary of State Cyprus Vance, "every third acre of U.S. farmland produces for export." Last year agricultural exports brought the United States $24 billion. Clearly additional opportunities exist to increase this figure. The Peoples Republic of China represents a potential market of great promise.

In 1973 the PRC imported 7.6 million tons of grain. Out of this, 4.2 million tons came from the United States, 2.5 million tons from Canada, and 1.4 million tons from Australia. Last year the PRC imported 7 million tons of grain but none of it came from the United States. The bulk of China's grain imports in 1977 came from Canada and Australia.

We explored the rationale for the PRC's import policies very carefully with China's leaders. We were told that the PRC wants very much to develop its foreign trade. However, the Chinese are frank to admit that trade is tied to good diplomatic relations. "Old friends," to quote one Chinese official, are favored.

Chinese leaders emphasize that they believe in self-sufficiency. They recognize however, that they must import. The availability of foreign exchange does limit their options. If their petroleum production can be increased, sale of oil should help their foreign currency problem. Moreover, the Chinese indicated some interest in deferred payment terms if not in outright credit for their import needs. They make a clear distinction between the two.

China's population is fast approaching a billion people or one-quarter of mankind. It is estimated to be growing at 1.6 to 1.8 percent per year. They have had disappointing harvests in recent years. They must import food. How much is hard to say. We were told that even they did not engage in very precise crop predictions. Clearly China does represent a tremendous potential market for American produce if we can get around the difficult political issues separating the two countries.

Mr. President, I submit for the RECORD an article on China's economy from the January–February 1978 China Business Review entitled, "China Economic Notes."

The article follows:

CHINA ECONOMIC NOTES

Briefly: After 14-percent industrial growth in 1977, Chinese planners set sights for 1985 with new 8-year plan.

Energy and electric power output increases, but slowdown reported in petroleum industry.

Shuffling in Chinese bureaucracy may weaken ministries, promote specialty agencies of State Council.

1977 harvest shows little growth, more grain purchases possible.

Details on agricultural mechanization programs revealed by Chinese leadership.

Outline given of new scientific and technological priorities.

China's cement production tops 50 million metric tons in 1977.

GENERAL

Following a year of stagnation and strife, China's industry reported the largest annual increase of the decade in 1977. With total industrial output up an estimated 14 percent in 1977, according to official reports, the country's total industrial production was probably nearly six times what it was twenty years ago in 1957, an average annual increase of 9.1 percent. Chemicals, construction, petroleum, and at least thirty-two of China's eighty major industrial products set new records in 1977. Steel, however, China's "key link" and the sector most seriously affected by the perfidy of the "gang of four" and the destruction of the 1976 earthquakes, improved 11.5 percent in 1977 but may still fall short of the 26 million metric tons China is thought to have smelted in 1975. Nevertheless, Minister of Metallurgy Tang Ko was optimistic over the development of China's iron and steel in 1978, according to a January interview held during the recent national conference on metallurgy. The most intriguing development in the year-end reports was the evolution of China's planning mechanism. In the past, the leadership had spoken only in terms of setting and fulfilling the Fifth Five-Year Plan (1976–1980). Now the hierarchy seems to have resigned itself to aborting the Fifth Five-Year Plan and keying on the successful completion of a Sixth Five-Year Plan which will last until 1985. In a December 31 interview with NCNA, a State Planning Commission official revealed that as a result of recent national conferences "practical short-range and long-range plans were mapped out to increase production in key enterprises in such industries as petroleum, coal, power, metallurgy, railways, and navigation.

"Accordingly, the State Planning Commission has made 3-year and 8-year plans which begin in 1978." Increasingly, 1985 has been hailed as the deadline for current industrial projects and the springboard for a national sprint towards industrialization by the end of the century. Reorganization. As part of the new drive to operate both government and bureaucracy efficiently, the Chinese leadership has apparently reshuffled the lines of command in Peking. For one thing, the People's Bank of China, in large part responsible for the fiscal integrity of China's industry, has been elevated out of the bailiwick of the Ministry of Finance into the role of direct subordinate to the ruling State Council. Additionally, officials from the Chinese Petroleum Corporation (CPC), responsible for China's petroleum industry from exploration through production to refining, have revealed that the corporation, established late in 1977, is administratively under the Ministry of Petroleum and Chemical Industries, but, as one of the only independent corporations in China, apparently has some separate relation with the State Planning Commissions and also has control over such organizations as the China Oil and Natural Gas Exploration and Development Corporation. In any event, the CPC has its own direct lines of communication with the Ministry of Foreign Trade and a large degree of influence over China's purchases of Western petroleum equipment. These recent signs of reorganization may signal a decline in the importance of the ministries and the ascension of individual specialized governmental units to guide and monitor key sectors of the nation's economy.

AGRICULTURE

Chinese press accounts at the end of December reported China's 1977 agricultural performance in the most reserved tones. Claiming "a fairly good harvest" with grain output equal to last year's, the Chinese press emphasized crop increases in cotton as well as such minor crops as jute, ambray hemp, tobacco and tea. Foreign analysts conclude that China's farmers were never able to recover from the devastating drought across China in early 1977 followed by scattered flooding later in the year on the North China Plain. While Western observers are inclined to accept PRC reports that cotton production increased over 1976's 2.35 million metric tons, there is some skepticism whether total grain output last year even equaled 1976's estimated 272 million tons. As of early January, only eight of the twenty key grain producing provinces in China were boasting grain increases in last season's harvest. Oilseeds, not mentioned in recent press reports, may also have faced production declines due to China's unfavorable weather conditions in 1977 although soybean production may have expanded.

Looking into 1978, China watchers are encouraged by the conditions in the first few months of the new season. Above average precipitation as well as normal to above normal temperatures bode well for this year's winter wheat and early spring wheat harvest. Nevertheless, China's international buyers may soon return to the world grain market. In the first six months of 1977, China imported 2.1 million metric tons of grain, followed by another 4.5 million tons in the second half of the year. Between January and June 1978, the PRC is committed to import over 4 million metric tons, but less than a million tons are scheduled for the final six months of the year. Consequently, the Chinese may have to buy as much as 2 million metric tons of grain in the next few months for delivery later in 1978. The outcome of the winter wheat harvest will be

crucial in determining the size of such purchases.

AGRICULTURAL MECHANIZATION

With only three years remaining before the target of "agricultural mechanization in the main by 1980," China's leadership and media have come squarely behind a national program to increase the production and use of farm machinery across the country. Highlighted by the Third National Conference on Agricultural Mechanization which opened in Peking on January 4, 1978, the drive is aimed at expanding production of fifteen key pieces of agricultural equipment. According to a January 4 NCNA interview with Chou Tsu-chien, Minister of the First Ministry of Machine Building, charged with the production of all farm equipment, these target products are tilling machines; machines for farmland capital construction; drainage and irrigation machines; machines for plant protection; transport machines; harvesting machines; machines for processing farm and sideline products; machines for manufacturing chemical fertilizers, insecticides, and twin plastic sheets; forestry machines; livestock machines; fishery machines; small rural power plants; and semi-mechanized farm implements. Noticeably absent from this proposed list are the new rice-transplant machines which have been publicized in the Chinese press during the last few years. Four-wheeled and hand tractors are also not mentioned, per se. This renewed commitment to agricultural mechanization comes after ten years of sustained growth in the farm machinery industry of China. Recent PRC reports have claimed an average annual increase of 20 percent in large- and medium-size tractor production from 1965 to 1976, an assertion only slightly higher than U.S. government estimates that tractor production grew from 9,600 units in 1965 to 53,600 units in 1976, up some 17 percent yearly. Year-end Chinese accounts place 1977's tractor production 39.8 percent over 1976's, or roughly at 74,826 units based on American statistics.

In production of hand tractors, the small multi-purpose farm machines popular across China, Chinese sources claim growth rates averaging 46.4 percent per annum between 1965 and 1976, topped by a 37-percent increase in 1977. The decline in growth of hand tractor production accompanied by a marked increase in the growth rate of standard tractors during the last year may signal a Chinese decision to move towards mechanization of larger-size fields in the future. Regardless of the direction of future development in the farm machinery industry, it does seem clear that central authorities will be playing a larger role than in the past. A State Council officer responsible for agricultural mechanization recently explained China's policy in this area: "In the manufacture of farm machinery, we pool the industrial forces under both central leading organs and localities with emphasis on local industries; in the classification of farm machinery, we produce big, medium and small-scale machinery with emphasis on medium and small; in sales of farm machinery, we emphasize selling to the collective economy of the communes and production brigades with the state giving aid when necessary." The introduction of the state into the production and purchasing of farm machinery is only the latest in a series of events scoring the seriousness with which China's leadership is approaching the problem of mechanizing its agriculture. New production and new production records have been reported throughout the nation. In Hopei, the Shihchiachuang Tractor Works, designed to produce 5,000 55-hp tractors annually, went into production in November, 1977, and was commissioned on December 18. By the middle of November, the Kiangsi Tractor Works had fulfilled its annual production target for 1977 with 5,620 Fengshou 27-hp tractors. In Kirin, the Provincial Farm Machinery Research Institute announced the development of three new farm machines: "A model 482 maize harvester to be used in combination with a Tungfanghung-28, Tungfanghung-54 or Tungfanghung-75 tractor capable of harvesting 10–12 mou (0.7–0.8 hectares) of maize an hour, with stalks cut and ears picked and stockpiled; a 6-ton self-unloading trailer to be used in combination with a rubber-tired Changchun-60 or Shuiniu-55 tractor, noted for its simple structure, light weight, safety and stability in operation, ease in negotiating slopes, and ability to unload to the left, right, or rear; and a Model 280.4 hydraulic wagon to be used in combination with a Tungfanghung-28 tractor capable of loading and carrying 5.4 cubic meters of earth, manure, sand, gravel or other bulk material and, with proper attachments, capable of lifting and hoisting items of up to 800 kg." Even some plans for the future have been revealed. The Yunnan Provincial Party Committee revealed that the province should strive to produce 5,000 "Kun" 40-hp tractors, 5,000 "Tung" 20-hp caterpillar tractors and 25,000 hand tractors annually by 1979 in addition to other farm implements.

ENERGY

New Year's report on China's energy were generally favorable, but the growth of petroleum production, once the star of Chinese development, was disappointing during the past year. The most precipitous increase came in natural gas production, jumping some 22.3 percent over 1976's estimated 1,222 billion cubic feet to 1,495 billion cubic feet. Coal output also increased substantially from approximately 479.1 million metric tons in 1976 to perhaps 528.0 million metric tons in 1977, a reported increase of 10.2 percent. Petroleum production, however, grew a meager 8 percent in 1977, less than the growth rate for China's industry as a whole and the smallest annual increase China's petroleum sector has experienced this decade. Computed from U.S. government estimates, China's 1977 petroleum output was 90.1 million metric tons. In related petrochemical developments, the Chinese chemical fertilizer industry announced a 31.9 percent increase over the previous record year of 1975. This boost, which pushed Chinese chemical fertilizer output to approximately 36.8 million metric tons, was largely due to foreign plants coming on-stream during the last year. And, in fact, China's press has become increasingly frank about the contribution imported equipment plays in their economy. A Szechwan news account heralded the successful completion of the first major overhaul of an imported chemical fertilizer plant at the Luchou Natural Gas Chemical Plant. Elsewhere, a European Chemical News story claimed China's synthetic rubber production to have grown 14.3 percent in 1977 to 80,000 tons. In general, China's energy industry is implementing a double-tiered planning program as 1978 begins. The coal industry minister, Hsiao Han, revealed through an NCNA interview, published January 3, that China's coal workers should implement a two-stage development program. "The first stage covers the period up to 1980, at which time general mechanization will be realized in the main in large and medium-sized coalfields.

At least one National Supply sub-contractor has been invited to Peking in 1978 to discuss selling China additional equipment for the stripped National Supply rig. More jack-up rig sales may be in the works as well. America's Marathon, a leading producer of such rigs, traveled to China late in 1977 to present a technical seminar, and, according to various industrial sources, Marathon and several of its U.S. competitors may find themselves in a fierce battle to fulfill remaining Chinese demand for offshore drilling rigs. Some U.S. executives fear that cut-rate Japanese prices may torpedo their efforts once contract negotiations get underway. In other areas, St. Louis-based Chromalloy officials returned from the Fall 1977 Canton Fair with reports that China was interested in buying special chemicals for mud drilling plus additional oil equipment. Rigs Sold. Baker Trading Company ended 1977 with the sale of two hydraulic workover rigs, manufactured by Texas-based Hydra-Rig.

The two rigs, models HRL–150, were sold by Hydra-Rig to Baker Tool who, in turn, sold them to MACHIMPEX. One of the rigs is a skid-mounted, long-stroke unit with a 150,000-pound capacity, and the other is a carrier-mounted, long-stroke model also with a 150,000-pound capacity. The two rigs, scheduled for completion in March and April, 1978, brought a selling price of roughly $2 million. Another rig in addition to the Baker/Hydra-Rig sales, Otis Engineering also sold the Chinese a hydraulic workover rig late in 1977. On December 17, 1977, Otis Engineering Corporation of Dallas, Texas, received two major contracts from MACHIMPEX. The sales included a total production testing unit package for performance evaluation for oil and gas wells drilled from offshore vessels or structures. Also sold was a hydraulic multi-cylinder workover unit capable of running or pulling pipe with or without pressure in wells. The unit was of 250,000-pound capacity. The value of the two Otis sales is approximately $2 million. More Seismic Equipment Sold. Houston's Digital Resources has completed its second contract with China for "Prospector" seismic exploration systems. Signed in August, 1977, and valued at $3.7 million, this second sale came less than a year after the company's initial business transaction with the PRC. With the four units included in the later sale, Digital Resources has now contracted to send China six "Prospector" lines, based on Digital Electronic's PDP 11/45 mini-on-line interactive seismic software and an AP 60 array processor. As part of technical assistance included in the contract, Digital Resources will send three technicians into China for six months followed by additional visits every four months for the next twelve months. Once export approval is received, Digital Resources will ship the six units to three Chinese sites: three to Nanking for the Chinese Geological Exploration Corporation, three to Peking for the Chinese Petroleum Corporation, and one to Hunan, also for the Chinese Petroleum Corporation. Company officials feel that one of the Nanking-bound units could be used for offshore exploration. Digital Resources is a subsidiary of Applied Devices of Hauppauge, New York, BJ-Hughes, a California oil equipment supplier that participated heavily in the National Supply rig sales of 1977, has now signed a contract of its own with the PRC. Having reached a tentative agreement with the Chinese last November, the company had the final contract ratified on its behalf by its agent, Baker Trading, in Peking early in 1978. The sale calls for slightly less than $100,000 of petroleum handling tools to go to China in 1978; the equipment can be used on or offshore. After more than four years of contract with the PRC, Ann Arbor, Michigan's Daedalus Enterprises contracted in November, 1977, with China's MACHIMPEX for more than $2 million of infra-red, multi-spectoral image sensing units to be used in airborne surveying. The units, which measure thermal levels, will be shipped to China during 1978 provided export approval procedures are completed.

Fishing equipment. Houston's Bowen Tool, a subsidiary of Big Three Industries, Inc., sent its President Dante Siracusa into Peking in early fall, 1977, to introduce the company's line of oil well fishing equipment. After five weeks in China, Mr. Siracusa, with

the assistance of his agent, Stan Mills of Baker Trading, signed a contract with MACHIMPEX for $500,000 of oil well fishing tools. Bowen is the world's largest producer of such equipment which is used to recover lost strings of drilling pipe. The equipment is scheduled to be sent to China in two shipments: first, a small package in early 1978, and second, the balance of the order in March–April, 1978. Bowen's president is planning to return to China for further discussions in June, 1978, and a company technician will travel to the PRC in mid-summer to help service the tools. Another American supplier of petroleum equipment signed a contract on November 26, 1977, with the Chinese for 16 servo-hydraulic vibrators for the VIBROSEIS surface method of exploration. These units together compose four geophysical parties and are mounted on heavy-duty buggies designed for rough terrain. The vehicles have replaceable tires to adapt to various land conditions. The contract calls for complete shipment by mid-August, 1978. To master the operation and maintenance of the equipment, the Chinese will send 8 to 10 technicians to the United States, and an American team of three mechanical, hydraulic, and electrical experts will travel to Peking to oversee start-up of the units.

AGRICULTURAL MACHINERY PURCHASES BEGIN

As 1978 arrived in China, high-ranking Chinese officials announced plans for the third national conference on agricultural mechanization since 1966. With only thirty-six months remaining before the end of the decade—the target date for "mechanization of agriculture in the main"—China's leadership is clearly anxious to increase farm machinery production as rapidly as possible; for the first time in the 1970's, major purchases of agricultural equipment from the West and even the United States seem possible. Irrigation Equipment to China. In one of the initial reported American agricultural machinery sales to the PRC, Nebraska's Valmont Industries completed a contract in October for 15 center-pivot irrigation units. The sale, valued at roughtly $1 million, will include power units and pumps. The world's largest producer of center-pivot irrigation systems, Valmont regards this initial contract as a trial balloon.

Apparently, the units will be put to use on five state farms in northern China this year; shipment is scheduled for January–February, 1978, and Valmont is planning to send two technicians into China to train the Chinese end-users and help install the systems which will be used in Chinese wheat, corn, potato, and cotton fields. The contract was signed after Valmont executives traveled into Peking to present a 10-day technical seminar to Chinese end-users on irrigation technology; the company was initially contacted by East Asiatic, a Danish trading firm that had learned of the Chinese interest in advanced center-pivot machinery. At the end of January, Deere & Company announced the conclusion of a October, 1977, contract with China's MACHIMPEX for farm machinery including large tractors, combines, and related farm implements. The equipment, which will be shipped to China in January and February, 1978, will be used on several Chinese sites for a variety of crops. As of the end of January, several Chinese technicians and an interpreter were being trained at Deere's headquarters in Moline, and two teams of company technicians are planning to travel to China for additional training and support after delivery of the equipment. The value of the deal is slightly over $1 million. Both Deere and Valmont officials peg their chances for additional sales on the success Chinese farmers have with these trial orders. At least one American delegation to China, the Illinois governor's team scheduled to enter the PRC in April, 1978, will include a representative of a major American farm machinery producer (Deere & Co., as well as representatives for Dekalb), and preliminary indications are that the Chinese will invite a broadly representative group of American farm equipment producers for a major technical seminar in China sometime during 1978. U.S. air support for China? One area of American agricultural equipment production that has attracted Chinese attention appears to be agricultural aircraft. Press reports in the past two months have revealed Chinese interest in both Cessna and Grumann crop dusting planes although neither company has announced sales or even serious PRC interest.●

SHADOW OPEN MARKET COMMITTEE

● Mr. HATCH. Mr. President, I would like to call the attention of my colleagues to the latest policy statement of the Shadow Open Market Committee. The committee is comprised of a distinguished group of academic and business economists who meet semiannually to encourage discussion of alternative economic policies and to recommend policies that promote economic stability. The committee points out that the rate of monetary expansion in 1977 was too high and recommends that the rate be held to 6 percent during 1978. The committee also recommends a reduction in personal and corporate income tax rates in order to encourage investment and output. I submit the committee's statement to be printed in the RECORD.

The policy statement follows:

A declining dollar, a falling stock market, and rising long-term interest rates describe the reaction by financial markets, at home and abroad, to our government's actions. Currently the Nation does not have an economic policy to reduce inflation, balance the budget, and encourage investment growth and high employment.

The stock market, the bond markets, and the foreign exchange market shout their disbelief at our government's statements about increasing investment, reducing inflation, balancing the budget, or supporting the dollar. They fear a drift of controls, a reliance on stopgaps, and increased inflation.

The Shadow Open Market Committee repeatedly has urged the Federal Reserve and the Administration to recognize that the Nation's problems are long-term problems that cannot be solved by fine-tuning and by stopgap approaches. A policy that looks ahead years, not weeks or quarters, is what is required. Last year this Committee warned that the policies then proposed and subsequently adopted would have the inflationary consequences now apparent to all. This year we urge again that a long-term program be adopted and adhered to.

The problems the Nation faces are not intractable. They seems intractable only because the government continues to seek short-term solutions to long-term problems and acts on the false presumption that inflation will not increase as long as resources are counted as unemployed. Such presumptions lead the Administration to solve every problem by pumping up short-term spending and to understate the role of incentives to output and capital formation—not only tax incentives, but also reduction of business uncertainty caused by accelerating inflation.

Promises to defend the dollar, increase investment, balance the budget, and lower inflation cannot be met if the primary aim of policy is to stimulate short-term spending. Current policy will produce higher inflation, but not the high level of investment the Administration seeks to restore growth of income to the long-term potential of the U.S. economy.

WHAT HAS BEEN DONE?

Last year the Carter Administration gave up the commitment to balance the budget by 1981. The Federal Reserve failed to carry out its announced policy of reducing the growth of money. The budget deficit remained high in 1977 and continues high in 1978.

The growth of money stock—currency and demand deposits—exceeded 7%, a rate last seen in 1972 and 1973, just before the major inflation began. There is cause for alarm in the continuation of so high a growth rate. No less alarming would be an abrupt reduction of this growth rate. The policy of reducing unemployment first and reducing inflation later has created the expected dilemma.

We cannot expect real investment to reach the growth rates of the 1960's if large budget deficits, highly variable monetary policies, growing restrictions on trade, and misguided policies on energy continue. We cannot expect a more stable exchange rate for the dollar until policies become stabilizing. We cannot expect inflation to slow following a period of sustained increase in money growth from 4.4% in 1975, to 5.6% in 1976, and to 7.4% in 1977. We cannot expect to avoid recession in 1979 if monetary policy shifts suddenly to combating inflation.

Because of the excessive monetary growth that was permited in 1977, anticipations of future inflation are hightened, and interest rates are rising. To minimize the adverse effects on savings flows to thrift institutions, Federal ceilings on interest rates on consumer deposits should be abolished or raised. These price controls have never served a useful purpose and have done far too much damage. We commend Chairman Miller's recent initiative in this regard.

Last year this Committee warned the Federal Reserve that monetary growth in excess of the announced targets would be detrimental to the durability of this economic expansion. The members of the House Banking Committee cautioned the Federal Reserve to maintain monetary growth within its own announced target ranges. The Federal Reserve did not heed the advice that was given. A mistake in economic policy was made, and now a price must be paid to correct it.

WHAT SHOULD BE DONE?

The policy of gradualism brought the increase in consumer prices down from the very high rates of 1973 and 1974 to an average of 4.5 percent in the last six months of 1977. The economy recovered. The dollar exchange rate remained stable. If we had avoided the burst of government spending and excessive money growth last year, we would have continued to receive the sustained benefits that can only be achieved if government policies are stabilizing. Excessive stimulus last year has continued too long to be abruptly halted.

We propose four steps:

One, the rate of monetary expansion in the past year was between 7 percent and 7.5 percent. We urge that the rate be maintained at 6 percent in 1978.

Two, we recommend reductions of 1 percent a year in the average rate of monetary expansion until a noninflationary rate of monetary expansion is achieved. The Federal Reserve should commit monetary policy to this stabilizing long-term monetary course in order to fulfill its legal responsibilities under the Federal Reserve Reform Act of 1977.

Three, the Congress should implement the Administration's pledge to reduce the growth of government spending below the growth of

private spending during the next three fiscal years.

Four, to encourage investment and output, the Administration and the Congress should reduce all tax rates, individual and corporate, to offset the full effect of inflation on taxpayers. Real taxes in future years should be no higher than they would have been if there were no inflation.

SHADOW OPEN MARKET COMMITTEE

The Committee met from 3:00 p.m. to 10:00 p.m. on Sunday, March 12, 1978.

Members

Prof. Karl Brunner, Director of the Center for Research in Government Policy and Business, Graduate School of Management, University of Rochester, Rochester, New York.

Prof. Allan H. Meltzer, Graduate School of Industrial Administration, Carnegie-Mellon University, Pittsburgh, Pennsylvania.

Mr. H. Erich Heinemann, Vice President, Morgan Stanley & Company, Inc. New York, New York.

Dr. Homer Jones, Retired Senior Vice President and Director of Research, Federal Reserve Bank of St. Louis, St. Louis, Missouri.

Dr. Jerry Jordan, Senior Vice President and Chief Economist, Pittsburgh National Bank, Pittsburgh, Pennsylvania.

Dr. Rudolph Penner, American Enterprise Institute, Washington, D.C.

Prof. Robert Rasche, Department of Economics, Michigan State University, East Lansing, Mich.

Prof. Wilson Schmidt, Department of Economics, Virginia Polytechnic Institute, Blacksburg, Virginia.

Dr. Beryl Sprinkel, Senior Vice President and Economist, Harris Trust and Savings Bank, Chicago, Illinois.

Dr. Anna Schwartz, National Bureau of Economic Research, New York, New York.●

LEAVE OF ABSENCE

Mr. GOLDWATER. Mr. President, I ask unanimous consent that I may be absent from the Senate for the next 2 days for committee work which will take me out of the country.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETING

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Transportation Subcommittee of the Committee on Environment and Public Works be authorized to meet during the session of the Senate today to consider the 1978 authorization of the Federal Highway Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATORS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the prayer, Mr. BAKER be recognized for not to exceed 15 minutes; that Mr. DANFORTH then be recognized for not to exceed 15 minutes; and that Mr. BENTSEN then be recognized for not to exceed 5 minutes, after which the Senate resume its consideration of the treaty; and, further, that the recognition of Senators on the special orders be as in legislative session.

The PRESIDING OFFICER. Without objection. it is so ordered.

NATIONAL RAILROAD PASSENGER CORPORATION

Mr. ROBERT C. BYRD. Mr. President, I ask that the Senate proceed to the consideration of House Concurrent Resolution 494, which I understand has been cleared.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 494) expressing the sense of Congress regarding the operation of certain rail passenger service by the National Railroad Passenger Corporation.

The concurrent resolution is as follows:

H. CON. RES 494

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that, for the purpose of maintaining the present service over the basic system routes, National Railroad Passenger Corporation may, notwithstanding the pendency of the route reexamination study presently being conducted by the Secretary of Transportation and without regard to the Criteria and Procedures adopted pursuant to section 404(c) of the Rail Passenger Service Act, undertake the provision of any basic system intercity rail passenger service pursuant to section 404(a) by contracting with a railroad filing for the discontinuance of such service.

Passed the House of Representatives March 20, 1978.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the concurrent resolution.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD, a statement by Mr. CANNON, together with an excerpt from the House Report 95–983.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY MR. CANNON

House Concurrent Resolution 494 was unanimously reported out of the Committee on Interstate and Foreign Commerce, and passed the House of Representatives by voice vote without objection on March 20, 1978. It expresses the sense of the Congress that the National Railroad Passenger Corporation (Amtrak) may contract to provide intercity rail passenger service with a railroad filing with the Interstate Commerce Commission (ICC) for discontinuance of such service. The resolution does not mandate Amtrak to undertake to provide the service but leaves the decision whether to do so to Amtrak.

In 1971, when virtually all of the Nation's railroads elected to join Amtrak and discontinue passenger trains under the Rail Passenger Service Act, Southern Railway Co. (Southern) elected to continue to provide intercity passenger service at its own expense. Subsequently, in accordance with the law, Southern, faced with mounting losses on such service, discontinued its passenger trains, with the exception of the Southern Crescent (Crescent), which operates daily between Washington and Atlanta and tri-weekly between Atlanta and New Orleans. On March 6, 1978, having incurred substantial additional losses, Southern filed with the ICC for discontinuance of the Crescent.

House Concurrent Resolution 494 is designed to permit the proposed assumption by Amtrak of passenger service operations on the Southern Crescent, in light of Southern's discontinuation notice, filed with the ICC on March 6, 1978; and in light of the pending Amtrak route reexamination study being conducted by the Secretary of Transportation.

The Concurrent Resolution does not require Amtrak to take over the service, nor does it prohibit Amtrak from taking over the service. Similarly, it does not express an opinion as to whether Southern Railway should operate the service. Rather, it merely states that we have no objection if Amtrak and Southern Railway can come to an amicable agreement for the operation of this service.

Also, it should be understood that Congress is in no way attempting to influence ICC's decision as to whether it should accept or reject Southern Railway's petition to discontinue the service.

In conclusion, under no circumstances should this resolution be interpreted to require Congressional action in all future instances involving additions or deletions to the route network.

This resolution was discussed at a meeting of the Senate Committee on Commerce, Science, and Transportation on March 21, 1978, at which time it authorized me, as Chairman, to request the Senate's immediate consideration of this matter without referral to the Committee.

BACKGROUND AND PURPOSE

In 1971, when virtually all of the Nation's railroads elected to join the National Railroad Passenger Corporation (Amtrak) and discontinue passenger trains under the Rail Passenger Service Act, Southern Railway Co. (Southern) elected to continue to provide intercity passenger service at its own expense. Subsequently, in accordance with the law, Southern, faced with mounting losses on such service, discontinued its passenger trains, with the exception of the Southern Crescent (Crescent), which operates daily between Washington and Atlanta and tri-weekly between Atlanta and New Orleans. On March 6, 1978, having incurred substantial additional losses, Southern filed with the Interstate Commerce Commission (Commission) for discontinuance of the Crescent.

Southern and Amtrak have explored in negotiations the possibility of an agreement under which, in consideration of appropriate compensation by Southern and contingent upon Commission approval of Southern's discontinuance of the Crescent, Amtrak would undertake to provide service between Washington and New Orleans. Such an agreement may assist Southern in obtaining early Commission approval of the proposed service discontinuance and permit uninterrupted continuation of service.

Amtrak has interpreted congressional action with respect to Public Law 95–340, providing for supplemental appropriations for fiscal year 1978, as a mandate that the present route structure not be modified in any way until the Congress has acted upon the recommendations on an optimal National railroad passenger system. Pursuant to a directive in the Conference Report (H. Rept. 95–829) accompanying H.R. 9375, the bill which became law, the Secretary of Transportation, in cooperation with Amtrak, is currently conducting a comprehensive reexamination of Amtrak's route structure and intends to submit such recommendations to the Congress by May 1, 1978.

Washington-New Orleans service is a significant component of the present national pattern of intercity railroad passenger service. As such, the impact of its addition to the Amtrak system may be ascertained without the necessity of adhering to the criteria and procedures established under section 404(c) of the Rail Passenger Service Act, which Amtrak must follow in determining whether to add or discontinue routes and services.

In view of these circumstances, House Concurrent Resolution 494 merely expresses the sense of the Congress that Amtrak, in its discretion and in accordance with section 404 (a) of the Rail Passenger Service Act, may undertake to provide the service sought to be discontinued by Southern, notwithstanding the pendency of the route reexamination presently being conducted by the Secretary of Transportation and without regard to the route and service criteria and procedures established under section 404(c) of the act. The resolution does not mandate Amtrak to take any action with respect to Washington-New Orleans service and is not legally binding on Amtrak. As Mr. Rooney stated at the hearings on the resolution:

"I believe that it should be clearly understood that Congress is not taking sides in this matter. That is, it is not requesting Amtrak to take over the service, nor is it prohibiting Amtrak from taking over the service. Similarly, it is not expressing an opinion as to whether Southern Railway should operate the service. Rather, Congress is merely stating that it has no objection if Amtrak and Southern Railway can come to some amiable agreement for the operation of the service. On the other hand, if they cannot reach an agreement, Congress would not intervene to assure continuation of the service. Thus, it should also be clearly understood that Congress is in no way attempting to influence the ICC's decision regarding Southern Railway's petition to discontinue the service."

Committee consideration

The committee's Subcommittee on Transportation and Commerce held hearings on House Concurrent Resolution 494, introduced by Mr. Staggers, Mr. Devine, Mr. Rooney, and Mr. Skubitz, on March 14, 1978. Testimony was received from the Department of Transportation, the National Railroad Passenger Corporation, the Railway Labor Executives Association, Southern Railway Co., and the National Association of Railroad Passengers.

The subcommittee met in open markup session on March 14, 1978, and, by voice vote, ordered the resolution reported to the full Committee on Interstate and Foreign Commerce. The full committee met in open markup session in March 15, 1978, and, with a quorum present, by voice vote, ordered House Concurrent Resolution 494 reported to the House of Representatives.

Oversight findings

Pursuant to clause 2(l)(3)(A) of rule XI of the Rules of the House of Representatives, no oversight findings or recommendations have been made by the committee.

Pursuant to clause 2(l)(3)(D) of rule XI of the Rules of the House of Representatives, no oversight findings have been submitted to the committee by the Committee on Government Operations.

Inflationary impact statement

Pursuant to clause 2(l)(4) of rule XI of the Rules of the House of Representatives, the committee makes the following statement with regard to the inflationary impact of the reported bill:

The committee believes that the enactment of this resolution will have no inflationary impact on prices and costs in the operation of national economy.

Cost estimate

In compliance with clause 7(a) of rule XIII of the Rules of the House of Representatives, the following statement is made regarding the cost of this legislation:

The committee estimates that no costs to the Government will be incurred if this resolution is enacted.

Congressional budget cost estimate

In accordance with clause 2(l)(3)(C) of rule XI of the Rules of the House of Representatives, the committee includes the following cost estimate submitted by the Congressional Budget Office relative to the provision of House Concurrent Resolution 494:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., March 16, 1978.

Hon. HARLEY O. STAGGERS,
Chairman, Committee on Interstate and Foreign Commerce, U.S. House of Representatives, Rayburn House Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed House Concurrent Resolution 494, to express the sense of Congress regarding the operation of urban rail passenger service by the National Railroad Passenger Corporation, as ordered reported by the House Committee on Interstate and Foreign Commerce, March 15, 1978.

Based on this review, it appears that no additional cost to the Government would be incurred as a result of enactment of this resolution.

Sincerely,

ALICE M. RIVLIN, *Director.*

The PRESIDING OFFICER. Without objection, the concurrent resolution is agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which House Concurrent Resolution 494 was agreed to.

Mr. ALLEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there is one nomination on the Executive Calendar which has been cleared on both sides. I ask unanimous consent that the Senate proceed to consideration of Calendar No. 100 on the Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. As in executive session, the nomination will be stated.

OFFICE OF MANAGEMENT AND BUDGET

The second assistant legislative clerk read the nomination of James T. McIntyre, Jr., of Georgia, to be Director of the Office of Management and Budget.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. LAXALT. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. I ask unanimous consent that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

U.S. METRIC BOARD

Mr. ROBERT C. BYRD. Mr. President, there are three nominations which were reported earlier today by the Committee on Commerce, Science, and Transportation. I understand they have been cleared for action on both sides of the aisle. Therefore, I ask unanimous consent, as in executive session, that the Senate proceed to the consideration of those nominations at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations will be stated.

The second assistant legislative clerk read the nomination of Carl A. Beck, of Pennsylvania, to be a member of the U.S. Metric Board for a term of 2 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Francis R. Dugan, of Ohio, to be a member of the U.S. Metric Board for a term of 2 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Henry Kroeze, of Wisconsin, to be a member of the U.S. Metric Board for a term of 2 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Louis Polk, of Ohio, to be Chairman of the U.S. Metric Board for a term of 6 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Thomas A. Hannigan, of Maryland, to be a member of the U.S. Metric Board for a term of 4 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Frank Hartman, of Michigan, to be a member of the U.S. Metric Board for a term of 4 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Sandra R. Kenney, of Maryland, to be a member of the U.S. Metric Board for a term of 4 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Roger Ellis Travis, of Massachusetts, to be a member of the U.S. Metric Board for a term of 4 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Sydne D. An-

drews, of Florida, to be a member of the U.S. Metric Board for a term of 6 years.

The PRESIDING OFFICER. Without objection, nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Joyce D. Miller, of New York, to be a member of the U.S. Metric Board for a term of 6 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Glenn Nishimura, of Arkansas, to be a member of the U.S. Metric Board for a term of 6 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Satenig S. St. Marie, of Connecticut, to be a member of the U.S. Metric Board for a term of 6 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The second assistant legislative clerk read the nomination of Adrian G. Weaver, of Connecticut, to be a member of the U.S. Metric Board for a term of 6 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, my earlier statement was premature, and I beg the pardon of the Chair and the clerk.

I will not move to reconsider the vote on these nominees tonight because of the fact that their names did not appear on the executive calendar.

NEW YORK CITY PENSION FUNDS MUST HONOR FINANCING COMMITMENTS

Mr. PROXMIRE. Mr. President, I am disturbed about certain statements made recently by Harrison J. Goldin, comptroller of the city of New York, which are intended to pressure Congress to act percipitously and, in my view, unwisely to extend more financial aid to New York City. Mr. Goldin should be put on notice that such statements could well have the opposite effect.

My main concern is with the veiled threat that the city's pension and sinking funds may not make the $700 million in purchases of city bonds they are scheduled to make by May and June of this year unless they have assurances that Federal aid will be continued beyond June 30, when the present seasonal loan program is due to expire. In testimony before the House Economic Stabilization Subcommittee and in a subsequent press release, Mr. Goldin pointed out that:

> The ability of New York City to meet day-to-day operating expenses in the final quarter of this fiscal year hinges on the pension funds' making these purchases of $700 million in bonds.

He then went on to state that—

> Although the trustees of these funds have committed themselves under the present Financial Plan to make these purchases, there is every reason to doubt whether they can proceed without knowing that Federal mechanisms will be established to ensure protection of their investments after the expiration of this fiscal year on June 30.

Mr. President, the pension and sinking fund bond purchases which Mr. Goldin is referring to are binding legal commitments made by these parties in 1975 as a condition for enactment of the Federal loan program. My understanding, and the understanding of other Members of Congress when we passed the New York City Seasonal Financing Act in December 1975, was that Federal aid was strictly contingent on signed commitments already obtained from certain local parties, including various New York banks as well as the pension and sinking funds, to provide other necessary parts of the city's financing needs over the life of the loan program; that is, through June 30, 1978. These signed commitments, contained in a document known as the amended and restated agreement of November 26, 1975, were printed in the CONGRESSIONAL RECORD, at the time of the debate on the seasonal loan legislation and that legislation was passed only after these local commitments were made available to the Congress.

Obviously, these commitments made in 1975 were in no way contingent on the subsequent passage of Federal aid legislation for the period after June 30, 1978. Indeed, New York City and State officials were saying explicitly and loudly at that time that they would not be back, that the one-time assistance in the form of the 3-year seasonal loan program would be enough to get the city back on its feet and back in the credit markets.

As a matter of fact, the Governor of New York, Governor Carey, appeared on Meet the Press in December 1975, and said New York City would not be back.

The regrettable fact that they are back and they are asking for more aid in no way alters these prior legal commitments.

Mr. President, I am not disturbed that Mr. Goldin, who is a trustee of the pension and sinking funds, is in effect threatening noncompliance with a binding legal commitment of vital importance to the city's welfare, for the purpose of putting pressure on Congress to act with undue expediency on the complicated and vital question of whether to provide more Federal financial aid to New York City.

I believe this is inappropriate behavior for someone who is New York City's chief fiscal officer, as well as a trustee of these funds. Furthermore, I think this is behavior which could easily backfire and have the opposite effect. If Members of Congress perceive that the city's chief fiscal officer, and perhaps other local parties involved in this $700 million bond purchase, take their responsibilities and their financing commitments to insure the city's current solvency so lightly, then why in the world should they act to entrust the city with the $2 billion in Federal guarantees being requested for the next 4 years? As conceived by the administration, those guarantees would be contingent on additional, "up-front" commitments from the pension funds and from banks and other local parties to insure that all of the city's financing needs can be met over the 4 years after June 30, 1978. If the city does not even carry through on its pre-June 30 financing commitments, then I see no way that Congress is going to be willing to risk $2 billion in Federal guarantees for the period after June 30.

Mr. President, I believe that this is a most important matter, and that is unfortunate that doubts have been cast as to whether these financing commitments will actually be fulfilled. I sincerely hope that Members of Congress will soon receive assurances from Mr. Goldin and from other trustees of the pension and sinking funds that the $700 million in bond purchases will be made this year, so that further debate on the larger questions involved in the New York City financing issue can take place in an atmosphere conducive to serious deliberation.

I have written a letter to Mr. Goldin expressing my concern about this matter. Mr. President, I ask unanimous consent that the text of the letter be printed in the RECORD at the conclusion of my remarks, together with a copy of Mr. Goldin's letter to me and accompanying press release.

My letter also addresses the other issue raised by Mr. Goldin, which involves a study done by his staff showing that New York City currently owes $418 million on contracts with firms outside New York State worth a total of $1.26 billion. In his letter to me, Mr. Goldin states that payment of this $418 million in currently due obligations "would be extremely difficult, if not impossible, to meet were the city forced into default." He goes on to say that "prevention of such a calamity"—that is default—hinges on "congressional action respecting Federal guarantees of city securities."

Mr. President, I can agree that a New York City default would have some impact beyond the city itself, although I very seriously doubt that default would occur in the absence of Federal guarantees, given the large resources available in the New York banks and pension funds to meet the city's post-June 30 financing needs.

However, I can in no way support the political blackmail implied in this listing of New York City's out-of-State contractual commitments, coupled with the suggestion that the $418 million currently due will not be paid unless Federal guarantees are forthcoming. I object to these tactics on several grounds.

First, a very obvious response is that if these amounts are in fact presently due to the companies listed, then payments should be made promptly by the city out of funds budgeted for this purpose, and not held hostage to the passage of Federal legislation. The city knows that it has to make those payments, so it should make them. Second, of course, even if the city were to go into bankruptcy, it is highly unlikely that the contractors would receive none of the money owed them, although the payments might be delayed by court proceedings. The companies involved must have had ample knowledge of the city's actual and

potential financial problems when they entered into or continued their contracts with the city.

Finally, and most importantly, I think it serves no constructive purpose to threaten nonpayment of contract obligations due to refusal of local parties to meet their investment commitments. This is the last way to help New York City get back in the credit markets. And it certainly is not likely to improve the prospects for passage of Federal legislation.

Mr. President, Comptroller Goldin has appeared before the Committee on Banking, Housing, and Urban Affairs on a number of occasions. In general, I respect his views and appreciate the competence with which he carries out his duties as comptroller. For instance, just yesterday I called attention to the scandal involved in the ripoff lease of Yankee Stadium which nets the city almost no money. I know that Mr. Goldin is investigating the lease issue, and I applaud his efforts.

But on these other issues, I think Mr. Goldin is dead wrong, and I have felt obliged to make my thoughts known here on the Senate floor as well as in my letter to him.

Mr. President, the decision on whether to extend further financial aid to New York City involves a number of broad policy concerns, ranging far beyond the question of the impact of default on city contractors. The committee and the Congress will have to weigh with care the the questions involved in providing long-term Federal guarantees to New York City and the potential impact of such a precedent on the fiscal prudence of other cities across the country. At the present time, I am extremely skeptical of wisdom of providing such guarantees, and I certainly do not intend to act immediately and under pressure on such an important issue.

I have stated publicly on a number of occasions that the Committee on Banking, Housing, and Urban Affairs will hold hearings and give full consideration to proposals for additional financial aid to New York City at an appropriate time. That time is not now. It will not be until certain matters at the city and State level have been resolved, such as the labor contract negotiations which are presently underway.

I should point out, however, that the committee is unanimously on record as urging New York City and New York State to obtain firm commitments from local parties on meeting the city's financing needs for the period after June 30, 1978. Given this fact, I think it highly unlikely that the committee would be persuaded to act expeditiously if confronted with either the threat or the actuality of the city's pension and sinking funds refusing even to meet their present financing commitments.

Mr. President, I ask unanimous consent that a letter that I wrote to Mr. Goldin and Mr. Goldin's letter to me and his press release be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON BANKING, HOUSING, AND UBRAN AFFAIRS,
Washington, D.C., March 21, 1978.

Mr. HARRISON J. GOLDIN,
Comptroller, City of New York,
New York, N.Y.

DEAR MR. GOLDIN: I am disturbed about various aspects of your letter of March 15, 1978, with attached press release and report.

My main concern involves the question you raise about the likelihood of the City's pension and sinking funds making scheduled purchases of some $700 million in City bonds, as anticipated in the current Financial Plan, no later than May or June. You quote from your testimony before the House Banking Subcommittee, where you stated that "although the trustees of these funds have committed themselves under the present Financial Plan to make these purchases, there is every reason to doubt whether they can proceed without knowing that Federal mechanisms will be established to ensure protection of their investments after the expiration of this fiscal year on June 30."

My understanding, and the understanding of other Members of Congress when we passed the New York City Seasonal Financing Act in December 1975, was that the Federal loans were contingent on signed commitments already obtained from certain parties, including banks and pension and sinking funds, to provide other necessary parts of the City's financing needs over the life of the loan program, that is, through June 30, 1978. Obviously these signed commitments (contained in the Amended and Restated Agreement of November 26, 1975), which were printed in the Congressional Record at the time of the debate on the seasonal loan legislation, were in no way contingent on subsequent passage of Federal financial aid legislation for the period following June 30, 1978. Indeed, at that time in 1975, New York City and State officials were insisting that there would be no need for any further Federal involvement in the City's financing.

Therefore, I can only conclude that you are now, in your capacity as a trustee of these funds, suggesting non-compliance with a binding legal commitment of vital importance to the City's welfare, for the purpose of putting pressure on Congress to act with undue expediency on a complicated issue of great national concern. If this is the case, then I believe it is inappropriate behavior for New York City's chief fiscal officer. Furthermore, if Members of Congress perceive that the City's chief fiscal officer and other local parties involved take a financing commitment of this magnitude so lightly, then they may seriously question the advisability of the Federal government's making a commitment to provide $2 billion in long-term guarantees to New York City after June 30, 1978.

I am also concerned about the political blackmail implied in your listing of New York City's contractual commitments, on which you state that $418 million is currently due. If these amounts are in fact presently due to the companies listed, then the payments should be made promptly out of funds budgeted for this purpose and not held hostage to the passage of Federal legislation. While I can understand your desire to point up the financial stake which other parts of the country have in New York City's continued solvency, warnings of possible nonpayment due to refusal of local parties to meet their investment commitments are not, in my view, the best way either to improve the prospects for passage of Federal legislation or to restore market confidence.

The decision on whether to extend further financial aid to New York City involves a number of broad policy concerns, ranging far beyond the question of the impact of default on City contractors, most of whom must have had ample knowledge of the City's financial problems when they entered into or continued their contracts. Congress will have to weigh with care the questions involved in providing long-term Federal guarantees to New York City and the potential impact of such a precedent on the fiscal practices of other cities across the country.

I have stated publicly on a number of occasions that the Committee on Banking, Housing and Urban Affairs will hold hearings and give full consideration to proposals for additional financial aid to New York City at an appropriate time, after certain matters such as the City's labor contract negotiations have been resolved. However, the Committee is unanimously on record as urging New York City and New York State to obtain firm commitments from local parties to meet the City's future financing needs. Thus, in my view, the Committee is unlikely to be persuaded to act expeditiously if confronted with either the threat or the actuality of the City's pension and sinking funds refusing even to meet their present financing commitments.

Sincerely,

WILLIAM PROXMIRE,
Chairman.

OFFICE OF THE COMPTROLLER,
CITY OF NEW YORK,
March 15, 1978.

Hon. WILLIAM PROXMIRE,
Chairman, Senate Committee on Banking, Housing and Urban Affairs, Washington, D.C.

DEAR SENATOR PROXMIRE: The enclosed document is a study prepared by my staff showing the outstanding contractual commitments of New York City to firms outside New York State and the amounts currently owed on those contracts. As the accompanying press release explains, these commitments, totaling $418 million in currently due obligations on active contracts worth $1.26 billion, would be extremely difficult, if not impossible, to meet were the City forced into a default.

With the prevention of such a calamity hinging on Congressional action respecting Federal guarantees of City securities, it is essential that everyone who has a role to play in this momentous decision understand that without a firm, positive expression of Congressional intent in the very near future, serious disruptions could affect communities across the nation even before the expiration of the current fiscal year of June 30. This is because the City, in order to replenish cash transferred from its General Fund to pay certain capital expenses must be able to effect a scheduled sale of $700 million in bonds to City pension and sinking funds, as anticipated in the current Financial Plan, no later than May and June. Without knowing that Federal mechanisms will be in place to assure the City's continuing solvency beyond June 30, the trustees of these funds will be forced to reconsider their commitment to such purchases.

With the administration endorsing the concept of long-term Federal guarantees and others publicly stating their support for both guarantees and a continuation of the seasonal loan program on a diminishing scale, there now appears to be a strong chance for a timely resolution of this issue. I hope that you will find it in the best interests of your own constituency, as well as of the nation as a whole, to join in this effort to forestall a local and national tragedy.

Sincerely,

HARRISON J. GOLDIN.

PRESS RELEASE

Comptroller Harrison J. Goldin said today that a study of the City's outstanding contractual obligations reveals that vendors in

40 states, excluding New York, would stand to lose some $418 million in payments due on $1.26 billion in active contracts in the event of a City bankruptcy.

Mr. Goldin said he had ordered the study in order to document the extent to which a City default on its obligations would directly affect local economies throughout the country. "Without Federal guarantees to ensure that there will be sufficient revenues in the coming fiscal year and beyond to compensate for the City's inability to borrow in the public credit markets, there will be immediate shortfalls that could imperil the City's ability to pay its vendors," Mr. Goldin stated.

The economies of New Jersey, Pennsylvania, Illinois, Louisiana and Texas, with firms there awaiting payments totaling over $303 million on active contracts worth $930 million, would be particularly hard hit by a City default, Mr. Goldin said.

"In New Jersey, where $172 million is currently due and presumably would be due at any point in the near future as new obligations replace the old, the effect of a New York City default would be on the scale of a major financial disaster," Mr. Goldin stated. "In terms of gross revenue losses, the failure to collect money currently due from New York City would deprive the state economy of an amount roughly equivalent to the sales income that would be lost if every machinery manufacturer or every primary metal producer in the state closed down for a full month. The income loss to farmers and fishermen in New Jersey if all the farms and fisheries were knocked out for several months would be substantially less than the sum that New York City currently owes New Jersey vendors."

In Pennsylvania, where $52.7 million is currently due on outstanding contracts totaling $175.5 million, the failure to collect just the sum presently due would deprive the state of income equal to 20 percent of the losses in coal sales occasioned by the miners' strike, Mr. Goldin said.

Among the other states with large amounts due from New York City, the Comptroller's report indicates that Illinois vendors are owed $26.1 million on outstanding contracts of $230.9 million; Texas firms are awaiting payments of $26.5 million on contracts worth a total of $150.9 million, and Louisiana contractors are owed $26.3 million on $30.6 million.

Mr. Goldin said the possibility of losses of this magnitude underscores the need for rapid Congressional action. "I wan to reiterate a point I made in comments before the House Subcommittee on Economic Stabilization last week with respect to the urgency of the situation," Mr. Goldin stated. "The ability of New York City to meet day-to-day operating expenses in the final quarter of this fiscal year hinges on the purchase of $700 million in bonds by the City's pension and sinking funds. Although the trustees of these funds have committed themselves under the present Financial Plan to make these purchases, there is every reason to doubt whether they can proceed without knowing that Federal mechanisms will be established to ensure protection of their investments after the expiration of this fiscal year on June 30."

Funds raised by means of these bond sales are necessary to replace cash which has been transferred from the General Fund to cover capital expenditures. If such sales do not take place, the City may be short of cash to meet expenses in the quarter beginning April 1.

Mr. Goldin stated: "With so many parties, including the Administration and some key members of Congress, agreeing that Federal action is essential, it would be especially tragic if the reluctance of others to state publicly their concurrence delayed action just long enough to push the city over the brink."

According to the Comptroller's report, other states with large contractual commitments from New York City are Massachusetts with $6.8 million due on a total $232.9 million outstanding; Ohio with $8.5 million due on $42.7 million outstanding; Indiana with $386,000 due on $16.3 million; Wisconsin with $68,493 due on $13.7 million; Michigan with $3.4 million due on $11.2 million; Virginia with $9 million due on $9.6 million; California with $2.4 million due on $9.2 million; Kentucky with $4.1 million due on $8.1 million; and Connecticut with $2.9 million due on $7.8 million.

Mr. Goldin pointed out that, when considered in terms of municipalities, the impact of default would be even more significant in some areas than the state-by-state tabulation might imply. For example, the Comptroller's report shows that firms in Philadelphia are owed $34 million on total outstanding contracts of $35 million. In the event of a complete default, Houston would stand to lose some $25.3 million currently owed on $144 million in outstanding obligations. Equitable Shipyards in New Orleans is owed $26.3 million on $30 million for ferry boats.

Mr. Goldin said that copies of the report, which is similar to one issued prior to Congressional approval of the seasonal loan program in 1975, were being sent to Secretary of the Treasury W. Michael Blumenthal, key members of Congress, including Senators Proxmire, Brooke, Byrd, Cranston, Baker, Bentsen, Moynihan and Javits and Representatives Moorhead, O'Neill, Wright, Brademas and Rhodes and the governors of New Jersey, Pennsylvania, Illinois, Texas, Louisiana, Massachusetts and Ohio.

The study of contractual obligations was directed by Jeffrey Barrett and Margery O'Connor of the Comptroller's executive staff and involved the cooperation of a number of bureaus in the Comptroller's Office as well as the Office of Management and Budget.

NOMINATION OF H. K. ALLEN, OF TEXAS, TO BE FIRST VICE PRESIDENT OF THE EXPORT-IMPORT BANK

Mr. PROXMIRE. Mr. President, today the Banking Committee voted to report the nomination of Mr. H. K. Allen to be First Vice President of the Export-Import Bank of the United States.

Mr. Allen is a good man. He has been a successful banker. But he has no experience whatsoever in international finance or in trade. He has no background.

And it was the view of both the chairman of the subcommittee, Senator STEVENSON, and the ranking minority member, Senator HEINZ, that this nomination should not be approved. But a majority of the committee overruled that, and Mr. Allen's nomination is being sent to the floor.

I agree with Senator STEVENSON and Senator HEINZ. We should have a qualified man for this job, and this is a tremendously big agency. They are asking for $40 billion in authorizations. They make loans all over the world.

We questioned this man for 2 days. He knew nothing about foreign countries, nothing about foreign country operations. He had no experience in lending any of the nine principle categories in which the Bank makes their loans.

This particular job for which he is being appointed is one that has been occupied for 30 years by people who are professionals in the field who deal on a day-to-day basis with the Japanese, the Germans, and others.

Mr. Allen, as I say, is a good man. There is no way. He could deal for years to learn this job of handling this enormously complicated Export-Import Bank operation.

So this is going to be a nomination that I expect will be debated, and I am asking to be notified at the time that the nomination is called up by the leader so that I can be on the floor, and I am sure Senator STEVENSON, Senator HEINZ—and Senator TOWER, who is a strong supporter of Mr. Allen—and others, wish to be here at the time.

THOMAS J. DOWNEY

Mr. PROXMIRE. Mr. President, a fine young Congressman named THOMAS J. DOWNEY, of New York, has been assigned to the Armed Services Committee of the House of Representatives.

He entered Congress at the age of 25, as young as he could be, of course, and still be eligible for a Congressman's membership.

He has done a superlative job on that committee. He is a lonely voice fighting for holding down unnecessary expenditures and fighting for arms control.

A fine article appeared in the New York Times recently on Mr. DOWNEY, and I wish to call the Senate's attention to that article, because there are so few people who have the courage to make this kind of fight under those circumstances.

I might point out that Mr. DOWNEY is joined on the Armed Services Committee by one of the finest Congressmen we have, Congressman LES ASPIN, of the First District of Wisconsin, who has been making the same kind of fight for years.

LES ASPIN was a Rhodes scholar. He was a summa cum laude at Yale University. He has a Ph. D. from MIT.

When President Carter wanted to be briefed before his debate with President Ford on arms policy, he asked for two people. He asked for former Secretary of Defense Schlesinger and LES ASPIN.

This is the kind of quality we have there from Wisconsin, and Mr. DOWNEY is joining Mr. ASPIN in this kind of fight. I am happy to call the attention of the Senate to it.

Mr. President, I ask unanimous consent that the article in the New York Times entitled "Downey Is Shaping a Role in Arms Control" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DOWNEY IS SHAPING A ROLE IN ARMS CONTROL

(By Bernard Weinraub)

WASHINGTON, March 15.—Three years ago, Thomas J. Downey nervously took his seat in the House of Representatives. At 25, he was the youngest member of the new Congress and eagerly sought an assignment on one of the influential committees.

"I wanted Ways and Means or Appropriations or the Rules Committee," said the Congressman from New York's Second District. "I couldn't get on them because I had no seniority. So I was named to a vacant

Democratic seat on the Armed Services Committee.

"I had no military experience, no military background. I knew very little about the military. But I thought it would be interesting to learn. I've learned a lot."

Within the last few years Mr. Downey has emerged as the most articulate liberal voice on the powerful committee, as an arms control specialist and as a controversial, if somewhat iconoclastic, figure among his colleagues.

"My life," says the dapper Congressman, "is a little schizophrenic. I turn it off and on. I deal with SALT and arms control and the B–1 all week, and then I fly home to Long Island on Friday nights with my laundry and my law books and it's back to reality. I go out to the Great South Bay on Saturday, and if someone ever asked me what are the chances for a SALT accord, I'd probably fall in and drown."

DIFFICULT FOR A LIBERAL

With defense policy and legislation often shaped in the Armed Services Committees of the House and Senate, Mr. Downey speaks candidly, and sometimes angrily, about his colleagues. He makes it plain that it is difficult to be a liberal on the committee, which traditionally has a heavy conservative tilt.

"The committee is tremendously frustrating," said the Suffolk County Congressman, as he ate a luncheon salad in the House dining room. "The committee will listen to facts and opinions that would lead reasonable men to conclude that we need to end the arms race, yet the committee comes to the reverse conclusion and says we need to spend more on arms.

"The frustrating thing is to have the D.I.A.," he said, referring to the Defense Intelligence Agency, "or Air Force intelligence give a security briefing and explain how the Russians are ahead of us, and the committee chorties with delight. But when they hear a briefing, as they did the other day from Stansfield Turner, who gave a realistic assessment of where we were ahead and where we were behind, these people who would have us spend infinite amounts on arms seem almost depressed. They're depressed when they find out that there are areas in which we surpass the Russians. It's an amazing situation."

Adm. Stansfield Turner is Director of Central Intelligence.

LIKE MISCHIEVOUS CHOIR BOY

At hearings, Mr. Downey, who is the youngest member of the Armed Services Committee, chews gum intensively, toy with pencils and bounces restlessly in his chair. He speaks rapidly and confers in whispers with colleagues. With his youthful appearance, he resembles a slightly mischievous choir boy.

"If you're too aggresive or too ambitious, you get nothing done in this place," he says. "I'm trying to be reasonably aggressive."

Mr. Downey, a native of Ozone Park, Queens, has strongly supported the Administration's proposals to limit strategic arms—he is one of five members of the House who is an official observer at the Geneva talks—and was a vocal supporter of the Administration's plan to develop the neutron bomb, a decision that upset his liberal colleagues.

He supported the White House decision to end production of the B–1 bomber, although component parts of the plane are built in his district. However, he opposes plans to reduce sharply production of the F–14 Tomcat fighter, which is made by a constituent, the Grumman Aerospace Corporation.

He concedes the irony of being a vocal liberal on defense matters but representing constituents whose jobs are dependent on bigger defense budgets.

DOESN'T SUPPORT ALL PROJECTS

"I realized when I got on the committee there were going to be problems," he says. "There are projects which directly help my district which I may not be for. But there are others, like the F–14, that I fully support."

Mr. Downey, a bachelor who lives in a basement apartment near the Capitol, attends American University Law School at night. (Speaker of the House Thomas P. O'Neill Jr. was one of his sponsors.) His knowledge of military matters has grown over the last three years as a result of weekly Pentagon briefings, private sessions with ranking Pentagon officials, as well as former Defense Secretary James R. Schlesinger, and a flow of reports and documents.

"If you spend the time and ask the questions, the military is delighted to educate you, even if they know that you won't agree with them," he says. "You can receive a briefing on anything—how to destroy a dam, how the terrain guidance of the cruise missile works, how a nuclear weapon is made."

Perhaps his most frustrating moment on the committee, he says, took place during the West Point cheating scandal when he offered a compromise that was designed to keep cadets threatened with suspension in the military academy until a full report was issued. Despite Mr. Downey's plea, most of the Congressmen voted to suspend the cadets immediately.

"It was pure emotion on the part of some of my colleagues," he says evenly. "I felt like strangling them."

ARGUMENTS FOR THE GENOCIDE TREATY

Mr. PROXMIRE. Mr. President, for years I have spoken out in favor of the Genocide Treaty. My support for the treaty is largely based on moral grounds. I do not understand how we, as human beings, can refuse to condemn an act which so threatens human life and degrades the meaning of life for those who witness such atrocities.

I would like to point out, however, that my support for the treaty is rational as well as moral. The treaty has been defended on logical and legal grounds.

The treaty specifically declares "acts committed with intent to destroy, in whole or in part, a national, ethnical, racial, or religious group as such" to be crimes under international law. It also spells out in careful detail how genocidal acts are to be punished. Proponents of the treaty have been happy to discuss every aspect of the treaty, explaining the implications of every article. The treaty has been demonstrated to be constitutional, logically sound, and necessary for the implementation of an effective international human rights policy.

I now ask you to consider the arguments against the treaty. Frankly, they are embarrassingly trivial and erroneous. The treaty has been attacked on the grounds that it does too much and that it also does not do enough. Words used in the treaty have been attacked for their ambiguity; yet the meanings of these words have been fully explained many times.

It is clear that such random opposition betrays a certain blind and irrational fear of the unknown. This is why I speak out on the treaty. It is also why I urge a full consideration of the testimony from past hearings of the Foreign Relations Committee; reports from the American Bar Association, which now supports the treaty; and arguments made in the United Nations at the time of the treaty's drafting. I am convinced that the evidence is very strong. The Genocide Convention must be ratified immediately.

Mr. President, I yield the floor.

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield to the Senator from New York.

THE JOB LOSS IN NEW YORK CITY

Mr. MOYNIHAN. Mr. President, the distinguished chairman of the Committee on Banking, Housing, and Urban Affairs and I have commenced the pleasant practice of speaking a bit about the affairs of the city of New York at the end of the day here in the Senate, and once again I find myself rising to agree with what the chairman has said, as yesterday I found myself agreeing with his views of a contract the city had entered into which was contained in his views and recorded in the New York Times this morning.

Tonight I would have to say that the case he makes is a persuasive one.

Let me go beyond this, and like an Iroquois warrior, the Iroquois used to have the habit when captured by inferior tribes such as the Algonquin, who would proceed to torture them so inexpertly and, in disgust, the Iroquois would proceed to ask to allow to torture themselves to show that it was done properly.

You have to be a New Yorker properly to know how to be outraged with the management of our own affairs.

But Mr. Goldin last week again issued a report in which, it seemed to me, he curiously listed all the moneys, bills outstanding to purveyors of service, mostly goods, around the country, which would not be paid if New York went bankrupt. It started out with a pipe foundry in Anniston, Ala., I believe.

Well, that seems to me not the most gracious way to say, "Won't you give us a hand here?"

But on the other hand I would like to draw the attention of the Senator to one point which I keep coming back to that our whimsies and peccadilloes and curiosities do not overwhelm, the central fact that this is the most important city in the world and the financial capital of the world, and it is a symbol of the soundness of our commitments of money.

It seems to me it is of enormous international and national importance that it be maintained. The difficulties we face are so great that the other day on March 16, Mr. President, the chairman and I entered into a colloquy in which I spoke of the great loss of jobs in New York City in the last few years.

New York City is alone among cities, and the State itself, that have not recovered the employment levels of 1969, two recessions ago.

I stated some of those numbers. The Senator asked if I would yield, and I did to the distinguished Senator, and he said there were four or five cities, some of the biggest cities, which have lost more than New York. Detroit has lost more, Baltimore has lost more, Philadelphia has lost more. I said then, I did not think that was the case. I used to be an Assist-

ant Secretary of Labor under President Kennedy, and President Johnson, and the BLS was my small domain over which I exercised an ineffective governance, may I say. The BLS runs itself, as the chairman knows, and a good thing, too.

But I have here a table of the facts, and let me just summarize them.

I will ask, Mr. President, unanimous consent that I be enabled to put this in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NEW YORK, N.Y.,
March 21, 1978.

Hon. DANIEL PATRICK MOYNIHAN,
U.S. Senate, Dirksen Office Building, Washington, D.C.
Attention: Tim Russert.

DEAR SENATOR MOYNIHAN: In response to your inquiry of March 21st, I am providing below Payroll Employment Statistics which are not seasonally adjusted:

Area	June 1969	October 1977	Change
New York SMSA	4,221,300	3,587,000	−634,300
New York City	3,844,100	3,180,700	−663,400
Philadelphia SMSA	1,828,400	1,805,100	−23,300
Philadelphia City	944,200	798,300	−345,900
Baltimore SMSA	808,000	877,800	+69,800
Detroit SMSA	1,565,900	1,721,100	+155,200
Houston SMSA	738,400	1,176,500	+438,100

The data for June 1969 are not exactly comparable with the data for October 1977 due to a revision in the Standard Industrial Classification system which has not as yet been carried back that far, but the differences are probably slight.

In addition, the job loss in New York City, 663,400, is greater than the preliminary total nonagricultural employment for December 1977 in seventeen states; and it is also greater than the preliminary December, 1977 labor force levels in the same seventeen states. These states are: Alaska, Delaware, Hawaii, Idaho, Maine, Montana, Nebraska, Nevada, New Hampshire, New Mexico, North Dakota, Rhode Island, South Dakota, Utah, Vermont, West Virginia, and Wyoming.

I hope this data provides you with the information you need.

If I can be of further assistance, please do not hesitate to contact me.

With warmest personal regards.

Sincerely,

HERBERT BIENSTOCK,
Regional Commissioner of Labor Statistics.

Mr. MOYNIHAN. In sum, the New York metropolitan statistical area has lost 634,000 jobs since June of 1969. New York City itself has accounted for more than that loss, 663,000 jobs. That loss is greater than the preliminary total nonagricultural employment for December 1977 in 17 States. The 17 States do not have as many jobs as New York has lost.

Philadelphia, I will say to the chairman, he is right about Philadelphia. It has not lost as many jobs, but the SMSA has lost 23,000, and the city has lost 145,000.

Mr. PROXMIRE. The Senator from Wisconsin was talking about percentage losses, and I was basing my statement on a Bienstock group of figures, an eminent New York economist who is a top authority in the Bureau of Labor Statistics, and these were his figures, and they reflected percentage losses in Baltimore, Philadelphia, and Detroit.

Mr. MOYNIHAN. A rough calculation says that New York and Philadelphia are about the same. But Baltimore SMSA has gained jobs; Detroit SMSA has gained jobs, 155,000 jobs.

Mr. PROXMIRE. It depends on what period we are talking about.

Mr. MOYNIHAN. June 1969 to 1977.

Mr. PROXMIRE. That was not the period Bienstock had. That is not the period he referred to.

Mr. MOYNIHAN. I see. Houston SMSA in that period has gained 438,000 jobs compared to the loss——

Mr. PROXMIRE. Houston, of course, I did not mention.

Mr. MOYNIHAN. The Senator did not mention it.

Mr. PROXMIRE. Houston is the outstanding example of a city that has gained in employment.

Mr. MOYNIHAN. It most certainly is.

I do suggest in magnitude New York is clearly singular, and happily no city can claim a greater proportion of loss.

We must face a fact, which is—and I will stop right here—but I would ask the chairman and anyone who would read these remarks or those listening to them to recognize that in the history of economic change there has never been as large a loss of jobs in as short a period of time from one city. Just as in the history of urban settlement, there has never been anything to equal the South Bronx. We are in the presence of something we do not understand, have not been able to control and, therefore, it seems to me all the more important that the Federal Government do the one thing it can do. It cannot keep those jobs there, it cannot keep that neighborhood there, that borough there. It can, however, provide a little support for the credit of the city, reeling under these unexplained, perhaps inexplicable, unprecedented difficulties.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. MOYNIHAN. I would be happy to yield.

Mr. PROXMIRE. Everything New York City does is likely to be the biggest because it is the biggest city by far. It is in a class by itself in size. When you have a city that was 7 or 8 million in population, and they lose jobs, of course if they lose a proportion which is less than some other city they lose far more in numbers.

The figures I had are based on a period chosen to be a neutral period by Mr. Bienstock who, as you know, is an eminent and very fair——

Mr. MOYNIHAN. He certainly is.

Mr. PROXMIRE. And very capable economist, and his figures were—he listed, as I remember off the top of my head, I can remember four, but I will be happy to bring the data in so I can give the Senator the exact data Bienstock shows and that may be the explanation why New York had a greater proportion of loss during the 1969 to 1977 period.

But he picked another period, and he showed that over, perhaps, a long period that New York's loss has been less proportionately than, as I say, a number of other very large cities—proportionately.

Mr. MOYNIHAN. That may very, very well be. You have your Bienstock figures; I have my Bienstock figures which is ultimately the source we all turn to.

Mr. PROXMIRE. Very good.

Mr. MOYNIHAN. But I wanted to make the point that there is a reality in just plain quantity here.

Mr. PROXMIRE. Yes. Of course, the fact is all of our cities, with the exception of Houston, with the exception of one or two others, have lost population. It has just been one of the things that has happened, one of the phenomena. Chicago is smaller, Milwaukee is smaller, you name it, except for Houston and two or three others. They are all smaller than they were because New York is the biggest city, and it has lost more.

Mr. President, I yield the floor.

WARNINGS OF A FOREST PRODUCTS SHORTAGE

Mr. STEVENS. Mr. President, one of the most important issues to face the Congress this year will be the so-called "d-2 lands" decision. As you know, this decision deals with the review of certain withdrawn land in Alaska for potential designation as new parks, forests, wildlife refuges, and wild and scenic rivers. I have long advocated that Congress be cautious in its approach to this important issue. Alaska is a great State with a variety of resources which can be of use to the United States. Congress must assure that its d-2 decision provides flexibility for future generations to make decisions as to the uses of Alaskan land. We must trust future generations to deal with their own problems rather than making all decisions for all time this year.

An example for the need for flexibility are the warnings that are being received regarding a shortage in the forest products industry, commonly known as the approaching "forestry crunch." Recently, the Seattle Times featured an editorial regarding this upcoming forestry crunch. I commend this editorial to my colleagues and ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

"FORESTRY CRUNCH" PREDICTED

Most Americans are familiar with the "energy crunch." Comparatively few are aware of an approaching "forestry crunch."

That is a term used by the American Foresty Association to describe a looming shortage of accessible, marketable timber.

Association leaders want Congress to take further steps to avoid the "crunch." They speak against a background of steeply rising housing costs caused in part by inadequate timber supplies.

Signs and warnings multiply, both as regards an insufficient federal-government response to the problem and the threat of government actions that can only make the problem worse.

This month the General Accounting Office issued a report that blistered the Forest Service for "questionable" and "unreliable" timber-management policies.

The report recommended that the Forest Service "reduce uncertainties in determining sustainable timber-harvest levels," adopt better management policies "needed to sustain and increase the timber-harvest level," and attempt "to reduce conflicts between timber harvesting and other forest-resource uses."

The report charged the agency with not paying adequate attention to either scenic or economic considerations.

Concern about underfunded and inefficient management of those federal forest lands open to commercial use is matched by that over the continuing drive to "lock up" more of those lands.

A case in point is the potential effect of "D–2" legislation on the economy of Southeast Alaska. (The "D–2" issue involves the withdrawal of federal lands under the Alaska native-lands settlement.)

The Louisiana-Pacific Corp. informed Alaska Senator Ted Stevens the other day that it is considering closing its huge pulp mill at Ketchikan because of the threat posed by the "D–2" bill recently approved by the House Interior Committee.

According to Harry A. Merlo, president and general manager of Louisiana-Pacific, that legislation probably would not leave enough timber to supply both the company's Ketchikan mill and the Japanese-owned mill at Sitka.

If Louisiana-Pacific shut down in Alaska, 2,500 jobs would be lost, and Ketchikan itself would virtually shut down.

To avert the "forestry crunch" in this country, the federal government should be moving in two directions. It should act on the need for long-range, well-funded forestry programs, and it should slow down the stampede to "lock up" still more federal forest lands.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will convene tomorrow morning at 9:30 a.m. and after the prayer Messrs. BAKER and DANFORTH will speak each for not to exceed 15 minutes; after which Mr. BENTSEN will be recognized for not to exceed 5 minutes, all as in legislative session; after which the Senate will resume its consideration of the treaty at which time the question will be on the amendment by Mr. ALLEN. There will be a division of that amendment. The first rollcall vote in relation thereto will occur at 1 p.m. tomorrow. The second rollcall vote will occur at 3:30 p.m. tomorrow.

It is hoped that after the disposition of the amendment by Mr. ALLEN Senators will be prepared to call up other amendments, and I think that the Senate should be prepared to stay in fairly late tomorrow evening so as to make as much progress as possible on the treaty.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate, in executive session, stand in recess until the hour of 9:30 a.m. tomorrow.

The motion was agreed to; and at 7:10 p.m. the Senate, in executive session, recessed until Wednesday, March 22, 1978, at 9:30 a.m.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 21, 1978:

OFFICE OF MANAGEMENT AND BUDGET

James T. McIntyre, Jr., of Georgia, to be Director of the Office of Management and Budget.

U.S. METRIC BOARD

Louis Polk, of Ohio, to be Chairman of the U.S. Metric Board for a term of 6 years.

The following-named persons to be members of the U.S. Metric Board for the terms indicated:

For a term of 2 years:
Carl A. Beck, of Pennsylvania.
Francis R. Dugan, of Ohio.
Henry Kroeze, of Wisconsin.

For a term of 4 years:
Thomas A. Hannigan, of Maryland.
Frank Hartman, of Michigan.
Sandra R. Kenney, of Maryland.
Roger Ellis Travis, of Massachusetts.

For a term of 6 years:
Sydney D. Andrews, of Florida.
Joyce D. Miller, of New York.
Glenn Nishimura, of Arkansas.
Satenig S. St. Marie, of Connecticut.
Adrian G. Weaver, of Connecticut.

The above nominations were approved subject to the nominees' commitments to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Tuesday, March 21, 1978*

The House met at 12 o'clock noon.

The Reverend Russell Wojtenko, pastor, Byelorussian Autocephalic Orthodox Church, St. Cyril's of Turov, Brooklyn, N.Y., offered the following prayer:

In the name of the Father, and the Son, and the Holy Spirit. Amen.

Almighty Father, Thou art our Creator, Teacher, and Judge. Free us of all human weakness and guide us in every step of our life on a rightful path.

Eternal God, bless this House of Representatives of the United States of America. Strengthen the minds of its Members with wisdom, fortify their hearts with love, and their deeds with courage and justice.

Merciful God, we pray to Thee on this 60th anniversary of the Proclamation of Independence of Byelorussia, have mercy upon the Byelorussian people. Strengthen their faith in Thy infinite goodness, support them in their sufferings, and restore their freedom.

O God, accept this humble prayer, bless the United States of America, bless Byelorussia and her oppressed people. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed joint resolutions of the following titles, in which the concurrence of the House is requested:

S.J. Res. 101. Joint resolution to authorize and request the President to issue a proclamation designating the third Sunday in May 1979, as "National Fallen Heroes Memorial Sunday" for firefighters and law enforcement officers who have been disabled or killed in the line of duty; and

S.J. Res. 124. Joint resolution to authorize the President to issue a proclamation designating the week beginning on April 16 through April 22, 1978, as "National Oceans Week."

REV. RUSSELL WOJTENKO

(Mrs. FENWICK asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. FENWICK. Mr. Speaker and Members of the House, I am happy to join with the Speaker and with my colleagues in honoring the pastor, Rev. Russell Wojtenko, whom we have just heard, and in remembering that day which he has brought to our attention here.

Mr. Speaker, it was on March 25, 1918, that Byelorussia declared its independence. We stand by this religious and hopeful people, trusting in Almighty God, and hoping that in the future Byelorussia may be restored to its original state. Indeed, the distinguished clergyman, Reverend Wojtenko, has reminded us of that hope today, and all of us here should join the distinguished pastor in that hope.

I thank the Speaker.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

KWONG LAM YUEN

The Clerk called the bill (H.R. 1798) for the relief of Kwong Lam Yuen.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

MORRIS AND LENKE GELB

The Clerk called the bill (H.R. 3084) for the relief of Morris and Lenke Gelb.

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

MRS. SUN POK WINER

The Clerk called the bill (H.R. 1396) for the relief of Mrs. Sun Pok Winer.

There being no objection, the Clerk read the bill, as follows:

H.R. 1396

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provision of section 212(a)(23) of the Immigration and Nationality Act, Mrs. Sun Pok Winer may be issued a visa and admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that Act: *Provided,* That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GILBERTO TANEO GILBERSTADT

The Clerk called the bill (H.R. 1779) for the relief of Gilberto Taneo Gilberstadt.

There being no objection, the Clerk read the bill, as follows:

H.R. 1779

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Gilberto Taneo Gilberstadt may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Mr. and Mrs. Samuel Gilberstadt, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SANTOS MARQUEZ ARELLANO

The Clerk called the bill (H.R. 1938) for the relief of Santos Marquez Arellano.

There being no objection, the Clerk read the bill, as follows:

H.R. 1938

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in administration of the Immigration and Nationality Act, Santos Marquez Arellano, may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Archie A. Swindle, citizen of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

With the following committee amendment:

On page 1, line 7, before the word "citizen" insert the word "a".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CARMEN CECILIA BLANQUICETT

The Clerk called the bill (H.R. 2291) for the relief of Carmen Cecilia Blanquicett.

There being no objection, the Clerk read the bill, as follows:

H.R. 2291

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provisions of section 212(a)(14) of the Immigration and Nationality Act, Carmen Cecilia Blanquicett may be issued a visa and admitted to the United States for permanent residence if she is found to be otherwise admissible under the provisions of that Act: *Provided,* That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

That, for the purposes of section 101(b)(1) of the Immigration and Nationality Act, Carmen Cecilia Blanquicett shall be held and considered to be the natural-born alien daughter of Cecilia De Miguel, a citizen of the United States: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MICHELLE LAGROSA SESE

The Clerk called the bill (H.R. 2555) for the relief of Michelle Lagrosa Sese.

There being no objection, the Clerk read the bill, as follows:

H.R. 2555

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Michelle Lagrosa Sese may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Rosauro Edrosa and Nieves Lagrosa Sese, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act: *Provided further,* That any fee received by any agent or attorney on account of services rendered relating to the introduction of this bill shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

On page 1, line 12, strike out the word "Act:" and substitute "*Act.*"

Beginning on page 1, line 12, strike out "*Provided further,* and the remainder of the bill through line 6 on page 2.

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

WILLIAM MOK

The Clerk called the bill (H.R. 4607) for the relief of William Mok.

There being no objection, the Clerk read the bill, as follows:

H.R. 4607

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, William Mok may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Drs. Ying B. Mok and Lynn C. Mok, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JUNG IN BANG

The Clerk called the bill (H.R. 5230) for the relief of Jung In Bang.

There being no objection, the Clerk read the bill, as follows:

H.R. 5230

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Jung In Bang may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Mr. and Mrs. Dale D. Hurst, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

SEC. 2. Section 204(c) of the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JONATHAN WINSTON MAX

The Clerk called the bill (H.R. 5933) for the relief of Jonathan Winston Max.

There being no objection, the Clerk read the bill, as follows:

H.R. 5933

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Jonathan Winston Max may be classified as a child within the meaning of section 101(b)(1)(F) of such Act, upon approval of a petition filed in his behalf by Mr. and Mrs. John W. Max, citizens of the United States, pursuant to section 204 of that Act, except that section 204(c) of that Act, relating to the number of petitions

which may be approved on behalf of children, shall not apply and the provisions of section 245(c) of the Act shall be inapplicable in this case. The brothers and sisters of the said Jonathan Winston Max shall not, by virtue of that relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

With the following committee amendment:

Beginning on page 1, line 8, after the language "204 of that" strike out the remainder of the bill and insert in lieu thereof the following: "Act: *Provided*, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act, Section 204(c) of the Immigration and Nationality Act, relating to the number of positions which may be approved, shall be inapplicable in this case.".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HYE JIN WILDER

The Clerk called the bill (H.R. 6801) for the relief of Hye Jin Wilder.

There being no objection, the Clerk read the bill, as follows:

H.R. 6801

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Hye Jin Wilder may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Frank Wilder and Bosley Wilder, citizens of the United States, pursuant to section 204 of the Act: *Provided*, That the natural parents or brothers or sister of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act. Section 204(c) of the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

With the following committee amendment:

On page 1, line 7, strike out the name "Bosley Wilder" and substitute the name "Dorothy Bosley Wilder".

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

DONNA MARAINNE BENNEY

The Clerk called the bill (H.R. 6934) for the relief of Donna Marainne Benney.

There being no objection, the Clerk read the bill, as follows:

H.R. 6934

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Donna Marainne Benney shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act, or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

That, in the administration of the Immigration and Nationality Act, Donna Marainne Benney may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Mr. and Mrs. Charles E. Benney, citizens of the United States, pursuant to section 204 of the Act: *Provided*, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

YOUNG-SOON CHOI

The Clerk called the bill (H.R. 7033) for the relief of Young-soon Choi.

There being no objection, the Clerk read the bill, as follows:

H.R. 7033

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Young-soon Choi may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Mr. and Mrs. Douglas L. R. Neeley, citizens of the United States, pursuant to section 204 of the Act: *Provided*, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the Senate bill (S. 1135) for the relief of Young-soon Choi, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I wonder if the gentleman from Massachusetts could explain his request?

Mr. BOLAND. If the gentleman will yield, my understanding is that the Senate bill is identical to this House bill.

Mr. BAUMAN. I see. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1135

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Young-soon Choi may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Mr. and Mrs. Douglas L. R. Neeley, citizens of the United States, pursuant to section 204 of the Act: *Provided*, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill (H.R. 7033) was laid on the table.

VERONICA JUDITH HUDSON

The Clerk called the bill (H.R. 7795) for the relief of Veronica Judith Hudson.

There being no objection, the Clerk read the bill, as follows:

H.R. 7795

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of section 101(a)(27)(A) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(27)(A)), Veronica Judith Hudson shall be held and considered to be a returning resident alien.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JAE KEUN CHRISTIANSON

The Clerk called the bill (H.R. 8308) for the relief of Jae Keun Christianson.

There being no objection, the Clerk read the bill, as follows:

H.R. 8308

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Jae Keun Christianson may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in his behalf by Mr. and Mrs. Robert C. Christianson, Junior, a citizen and lawful resident alien, respectively, of the United States, pursuant to section 204 of the Act: *Provided*, That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

LUCY DAVAO JARA GRAHAM

The Clerk called the bill (H.R. 1751) for the relief of Lucy Davao Jara Graham.

There being no objection, the Clerk read the bill, as follows:

H.R. 1751

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act (8 U.S.C. 1101–1503), Lucy Davao Jara Graham shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under paragraph (1) through paragraph (8) of section 203(a) of the Immigration and Nationality Act (8 U.S.C. 1153(a)(1)–1153(a)(8)).

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANDRÉE McGIFFIN AND JEAN-MANUEL HENRY

The Clerk called the bill (H.R. 8192) for the relief of Andrée McGiffin and Jean-Manuel Henry.

There being no objection, the Clerk read the bill, as follows:

H.R. 8192

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for purposes of the Immigration and Nationality Act, Andrée McGiffin and Jean Manuel Henry shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such aliens as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct the required number from the total number of immigrant visas and conditional entries which are made available to natives of the country of the aliens' births under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of natives under section 202(e) of such Act.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

That, for the purposes of section 101(a)(27)(A) of the Immigration and Nationality Act, Andrée Marie Helene McGiffin shall be held and considered to be a returning resident alien.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "For the relief of Andrée Marie Helene McGiffin."

A motion to reconsider was laid on the table.

AH YOUNG CHO KWAK

The Clerk called the Senate bill (S. 833) for the relief of Ah Young Cho Kwak.

There being no objection, the Clerk read the Senate bill, as follows:

S. 833

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Ah Young Cho Kwak may be classified as a child within the meaning of section 101(b)(1)(F) of such Act upon approval of a petition filed on her behalf by Mr. and Mrs. John Kwak, citizens of the United States, pursuant to section 204 of such Act. The natural parents, brothers, and sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. WYLIE. Mr. Speaker, I ask unanimous consent that further reading of the Private Calendar be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PERMISSION FOR SUBCOMMITTEE ON SURFACE TRANSPORTATION OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that the Subcommittee on Surface Transportation of the Committee on Public Works and Transportation may be permitted to sit on tomorrow, Wednesday, March 22, 1978, during the 5-minute rule.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, will the gentleman please explain the purpose of his request?

Mr. HOWARD. Mr. Speaker, if the gentleman will yield, this meeting will be to conduct hearings and take testimony on the pipeline slurry bill which has been referred to our Subcommittee on Surface Transportation from the Committee on Interior and Insular Affairs.

Mr. ROUSSELOT. Is this for today and tomorrow?

Mr. HOWARD. Only for tomorrow and only for taking testimony.

Mr. ROUSSELOT. Only for testimony?

Mr. HOWARD. Yes.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

REPORT OF JOINT ECONOMIC COMMITTEE ON ECONOMIC REPORT OF THE PRESIDENT

(Mr. BOLLING asked and was given permission to address the House for 1 minute.)

Mr. BOLLING. Mr. Speaker, today I am pleased to file with the House of Representatives the Joint Economic Committee's 1978 annual report on the economic report of the President. The report, which was approved unanimously by the Democratic members of the committee, is filed with minority and additional views.

Mr. Speaker, this report generally commends the Carter administration for addressing "in a responsible manner" most of the problems the Nation faces on its road to recovery from the economic recession that started in 1975.

Nevertheless, we conclude that with proper policies economic performance can be better than the administration has forecast.

A major thrust of the report is on monetary policy. It notes that fiscal policy has borne the brunt of the recovery in the last 3 years while monetary policy has remained preoccupied with the problems of slowing inflation and more recently with the international condition of the dollar.

One of the consequences of this one-sided monetary-fiscal policy mix has been that consumption and Government spending have expanded while growth of investment and net exports have been retarded.

This report states clearly that economic stimulus, in addition to that proposed in the budget, is needed in 1978 and 1979. This stimulus should be implemented through an expansionary monetary policy. To achieve this stimulus, the growth of the money supply should be such that the rise in short-term interest rates is reversed. Policy in 1978 should tend to move short-term rates toward their 1977 levels. Interest rates should be maintained at these lower levels in 1979.

The report contains many additional recommendations. It calls for a complete review of the social security financing system. It recommends a coordinated approach to fiscal and monetary policy formation. And it discusses many policies to address our serious structural problems of inflation and unemployment.

Rather than go into further detail, Mr. Speaker, I commend this report to your attention.

ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 10 o'clock tomorrow morning.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, can the gentleman, the distinguished majority leader, assure us that we will not be whipsawed back and forth between all kinds of committee meetings and legislative action on the House floor? There are some committee meetings scheduled at 10 o'clock.

Mr. WRIGHT. Mr. Speaker, the gentleman is aware of the rules. A committee can meet only under the privileges granted in the rules. It occurred to some of us that it would be useful to come in at 10 o'clock tomorrow and finish whatever business may remain for us.

Mr. ROUSSELOT. Further reserving the right to object, I do not disagree with that objective of coming in at 10 o'clock so that we can appropriately recess by 3 or 4, but the great difficulty is always

caused by some chairmen who feel constrained to call committee meetings at 10 o'clock. Can we be assured that there will be an attempt not to put Members under the tremendous strain of trying to be in several places at once? There are all kinds of unanimous-consent requests to have all kinds of committees sit. Maybe some of those hearings can be postponed until some other time.

Mr. WRIGHT. If the gentleman will permit me, I cannot speak for all the committee chairmen, and I am not aware of all the committee meetings tomorrow, but the gentleman knows the rules and the committee meetings will not be permitted save as allowed under the rules.

Mr. ROUSSELOT. So the gentleman will make an attempt to make sure that committees are not in conflict with our legislative activities here on the floor?

Mr. WRIGHT. To the extent consonant with appropriate practices.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

Mr. RHODES. Mr. Speaker, further reserving the right to object, is it my understanding the majority leadership has no intention of adding to the program which had been previously announced for this week? Is that correct?

Mr. WRIGHT. The answer is, there is no plan to add anything to the program previously announced. The problem would be completing that entire program. I doubt very much that it would be completed.

Mr. RHODES. It would be the intention of the majority leader to continue with H.R. 7700 if time allows?

Mr. WRIGHT. Yes, time permitting.

Mr. RHODES. Is there any particular agreement, or what may be established as an agreement as to the time on Wednesday, which is tomorrow, that we might expect adjournment of the House?

Mr. WRIGHT. I think that is a little too hypothetical. I think we simply must understand that we would finish earlier if we came in at 10 a.m. than if we came in at 3 p.m. tomorrow.

Mr. RHODES. I think the reasoning of the majority leader is good.

I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, can the gentleman from Texas (Mr. WRIGHT) tell us which portions of the legislative schedule he thinks we might take up?

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield, if the gentleman now speaking were clairvoyant perhaps I could but I make no such claim. It would depend upon certain things, how long certain bills take, as well as certain rules and other imponderables at this moment.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, would it be a fair guess on the part of the gentleman from Texas (Mr. WRIGHT) to believe that the bills farthest down the list are the most likely ones to be put over until we get back?

Mr. WRIGHT. That would be a reasonable assumption.

Mr. ROUSSELOT. Is that your guess, too?

Mr. WRIGHT. That is just about the way I would likely guess.

Mr. ROUSSELOT. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

FEDERAL ELECTION CAMPAIGN ACT AMENDMENTS OF 1978, IF PROPOSED AMENDMENTS ARE ADOPTED, WILL NOT DISCRIMINATE

(Mr. MIKVA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MIKVA. Mr. Speaker, during the last few weeks intense controversy has surrounded the portion of H.R. 11315 that reduced the amounts that political party committees could contribute to or spend on behalf of their congressional candidates. Arguments over this single issue have been so heated as to obscure the strong case that exists for taking favorable actions on many of the important features of the bill as well as the Foley-Conable amendment to establish a system of partial public financing of House general elections.

This situation has been changed, however, by the fact that yesterday House Administration Committee chairman, FRANK THOMPSON, placed in the RECORD an amendment he intends to offer in order to restore the political party giving and spending levels to those contained in the current Federal campaign laws. To deal with another point of contention, I placed in the RECORD an amendment that I plan to offer to strike the provision in H.R. 11315 that would prevent national and State political party committees from transferring funds among themselves for the purpose of making candidate contributions or expenditures.

These two amendments make it clear that the political party issues that have led to such a high level of partisan polarizations and controversy can be resolved. As a result, the stage is now set for the House to consider the other important issues in the committee bill and the Foley-Conable amendment. There is no longer any room to argue that the legislation is designed to discriminate in an unfair or partisan manner. All Representatives who find it unacceptable to continue the current system of campaign financing should join together in helping to enact this legislation. For these reasons, I strongly urge my colleagues to lend their support to the rule, to the amendments Chairman THOMPSON and I will be offering, and most important, to the Foley-Conable amendment.

TO DIRECT U.S. AMBASSADOR AT U.N. TO OFFER RESOLUTION REMOVING OBSERVER STATUS OF PLO AT THE U.N.

(Mr. FISH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FISH. Mr. Speaker, today, I am reintroducing with 25 cosponsors my House concurrent resolution calling on the President to direct the U.S. Ambassador to the United Nations to offer a resolution at the upcoming General Assembly session to remove the observer status of the PLO at the United Nations.

The March 11 raid in Israel by Al Fatah, the military arm of the PLO, which resulted in the death of many innocent men, women, and children, who at the time were returning from a holiday weekend, was the final straw that prompted me to offer this resolution for consideration by the Congress.

Participation in the United Nations by the PLO as observers, legitimizes an organization which promotes the destruction of legitimate democratic nations who are members of the United Nations. PLO representation at the U.N. sets a dangerous precedent as the logic used to permit this nonnation's participation can also be applied to other groups such as the kurds of Iraq, the separatists of Quebec, and groups which claim sovereignty over various territories.

Mr. Speaker, this House concurrent resolution, which is receiving bipartisan support, will demonstrate the strong feelings in the Congress that terrorist organizations like the PLO should not be afforded a U.N. forum since recognition, inadvertently legitimizes the acts of terrorists who often choose civilians as their victims.

THE ATTORNEY GENERAL'S ARROGANCE

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, as I have stated on several previous occasions, Attorney General Griffin Bell has refused to personally acknowledge or discuss serious concerns I raised in correspondence to him 8 months ago concerning the Justice Department's questionable prosecution of former FBI special agent John Kearney.

My concerns center around the department's own intelligence-gathering policies that required investigation of radical left terrorist organizations by Kearney's squad 47 during riot-torn years of the 1960's.

I believe the Attorney General owes an explanation of what appears to be a selective, vindictive prosecution of a loyal public servant who was investigating known criminal elements under policies and orders laid down by Justice Department superiors.

Since when does the Attorney General of the United States assume such a posture of arrogance and unresponsiveness when asked by Members of Congress and the public to explain and discuss his actions?

AMERICAN TAXPAYERS, THROUGH CONTRIBUTION TO INTERNATIONAL DEVELOPMENT ASSOCIATION OF WORLD BANK, WILL BE REBUILDING VIETNAM INDIRECTLY

(Mr. YOUNG of Florida asked and was given permission to address the

House for 1 minute and to revise and extend his remarks.)

Mr. YOUNG of Florida. Mr. Speaker, for sometime now I have been presenting the details of how our foreign aid program is providing indirect assistance to Communist Vietnam. I have told you about the three soft loans totaling $105 million which are being considered by the International Development Association (IDA), the soft loan window of the World Bank.

Today, I thought you would be interested to learn that IDA is now considering two more soft loans for Vietnam. These new loans would be for industrial rehabilitation and for power development. This means that IDA is now considering a total of five soft loans totaling $160 million in aid to Vietnam. You may also be interested to know that the administration's request of $1.5 billion for our contribution to IDA in fiscal year 1979 is a 93-percent increase over last year's appropriation for IDA. No matter how you add up the figures, the bottom line is that the American taxpayers, through their contribution to the International Development Association of the World Bank, will be rebuilding Vietnam indirectly, just like the Vietnamese said we would do.

Mr. ASHBROOK. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I thank the gentleman for yielding.

I think the gentleman will point out that last year this happened because of the House and Senate capitulating from an amendment which would have prevented indirect aid to those Communist nations. Under White House pressure they took out the word "indirect."

Mr. YOUNG of Florida. The gentleman is correct. That is part of the reason.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from California.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

I hope the gentleman will reintroduce his amendment banning indirect foreign aid. I will be interested to see what the reaction will be of the Members of this House to that amendment when they know exactly what happens when we do not have that language in the bill.

Mr. YOUNG of Florida. I thank the gentleman for his suggestion.

CONDEMNATION OF RECENT TERRORIST KIDNAPING OF ALDO MORO

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that the Committee on International Relations be discharged from further consideration of the resolution (H. Res. 1082) expressing condemnation of the recent terrorist kidnaping of former Italian Premier Aldo Moro, and ask for its immediate consideration in the House.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 1082

Whereas the growing threat of international terrorism has manifested itself again in the kidnaping of Aldo Moro, former Prime Minister of Italy and head of the Christian Democratic Party, by the Red Brigade in Italy;

Whereas the Red Brigade in Italy has been responsible for a campaign of terror over the last year in which it has inflicted widespread loss of life and injury on dozens of prominent Italian citizens—officials, Members of Parliament, judges, journalists, educators, and others;

Whereas such acts of terrorism continue to threaten the safety and well-being of citizens of not only Italy but of all nations and cause a direct threat to the very foundations of democratic government; and

Whereas the Government of Italy deserves our support in the difficult position in which it finds itself as a result of this kidnaping: Now, therefore, be it

Resolved, That the House of Representatives voices its shock and condemnation of this new abhorrent act of terrorism by the Red Brigade in Italy.

SEC. 2. It is the sense of the House of Representatives that the Government of Italy deserves the solid support of the United States and of all democratic and freedom-loving peoples in its efforts to deal with this tragic crisis and to preserve the democratic society and institutions in Italy which are so important to Italy's role in the western alliance.

SEC. 3. It is further the sense of the House of Representatives that the President should instruct the Permanent United States Representative to the United Nations to press for consideration of the subject of terrorism in all appropriate forums and to sponsor proposals aimed at finding solutions to this very urgent problem.

SEC. 4. The Speaker of the House of Representatives is directed to forward a copy of this resolution to the President and the Ambassador of the Government of Italy to the United States.

The SPEAKER. The gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 1 hour.

Mr. ZABLOCKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Resolution 1082, expressing condemnation of the recent terrorist kidnaping of former Italian Premier Aldo Moro.

Last Thursday, a clandestine group of terrorists, who call themselves the Red Brigades, kidnaped the former Premier of Italy and, in the process, murdered five of his aides. This despicable act is a stunning and bleak reminder of the growing threat of terrorism to democratic and freedom-loving societies everywhere. Whether such murderous events occur in Italy, the Middle East, or elsewhere, there can be no justification for such extreme and brutal actions no matter what the cause of the perpetrators.

The terrorist acts of the so-called Red Brigades in Italy are particularly alarming. This violent organization has already claimed responsibility for 44 assassinations, 30 kidnapings, and countless armed attacks and acts of sabotage directed against prominent Italian Government officials, journalists, and other Italian citizens. Now, by kidnaping the country's former Premier, the terrorists have shown that the very foundations of Italian Government and society may be endangered if such actions continue with impunity.

Mr. Speaker, in addition to voicing condemnation of the terrorist actions in Rome last Thursday, the resolution also calls upon the President to instruct the permanent U.S. Representative to the United Nations to press for the consideration of the subject of terrorism in that world body and to sponsor proposals aimed at finding solutions to this extremely urgent problem.

I would like to take this opportunity to commend our colleague, the Honorable PETER W. RODINO for his sponsorship of the resolution as well as the nine identical resolutions and the 195 cosponsors of the resolutions.

Mr. Speaker, I urge the adoption of this resolution.

Mr. Speaker, I yield such time as he may consume to the gentleman from New Jersey (Mr. RODINO), the chairman of the Committee on the Judiciary.

Mr. RODINO. Mr. Speaker, if democratic societies are to survive, governments must be allowed to operate in an atmosphere of open debate. Terrorism and the mere threat of terrorism deprive society of vital discourse on public affairs, and lead to the destruction of all political freedoms.

Mr. Speaker, the most recent terrorist act—the kidnaping of former Italian Prime Minister Aldo Moro—is one of the most serious attacks we have witnessed on democratic government.

The Red Brigades, the group claiming responsibility for the abduction of Aldo Moro, have a long record of halting the free political process. The Red Brigades claim responsibility for 44 killings, 30 kidnapings, and countless armed attacks and acts of sabotage. With the recent acts of violence and terror, the Red Brigades go beyond their so-called Marxist ideology, and they now can claim no identifiable political philosophy except anarchism. Even this is no excuse for the type of cold-blooded, calculated acts of terror in which the Red Brigades victimize innocent citizens.

Mr. Speaker, as representatives of a free government, it is our utmost responsibility to be vigilant in speaking out against acts of terrorism wherever and whenever they arise.

I also wish to remind this House that the United States does not stand immune to terrorism. The Terrorist New World Liberation Front recently claimed its 58th bombing in northern California in the past 3½ years. These bombings have caused more than $1 million worth of damage.

What is most dismaying about these outrages is how difficult it seems to prevent them. Along with prevention, we must address the issue of creating the atmosphere which would alleviate the tension that cultivates terrorist activities.

It is most important that our Government do all that is possible to press for consideration of the subject of terrorism in all appropriate forums and to come up with proposals aimed at finding solutions to this urgent problem.

The resolution which I sponsored along with 195 of my colleagues is now before us—its words speak for themselves. We must express our unequivocal condemnation of this latest outrage, for to do less could be interpreted as condoning these senseless acts of barbarism.

I urge your support.

Mr. BROOMFIELD. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. Mr. Speaker, I yield to the gentleman from Michigan, the ranking member of the Committee on International Relations.

Mr. BROOMFIELD. Mr. Speaker, I rise in strong support of this resolution and also to commend the gentleman from New Jersey for sponsoring it.

Mr. Speaker, I rise in support of House Resolution 1082, which expresses the shock and condemnation of the House of Representatives over the kidnaping by terrorists of Aldo Moro, former Italian Premier.

This act of terrorism, which included the murder of five of Premier Moro's aides, must be condemned by all who love freedom and democracy. The Government of Italy—our friend and NATO ally—deserves our support in this time of grave danger to its democratic institutions.

Terrorism is a growing and alarming threat throughout the world, and the violence of the "Red Brigades" in Italy is especially despicable. Such violence cannot be allowed to continue for it jeopardizes the Italian Government and the democratic institutions of that great nation.

Mr. Speaker, this resolution in addition to condemning terrorism in Italy, calls upon President Carter to instruct our permanent representative to the United Nations to press for consideration of terrorism in all appropriate forums and to sponsor proposals aimed at finding solutions to what has become an urgent problem.

I believe that this world body, of which the United States was a founding member, should promptly mobilize its sources to find ways of coping with the growing threat of violence and terrorism that endangers world order.

I commend the sponsors of this resolution and I urge its adoption.

Mr. ZABLOCKI. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. LAGOMARSINO).

Mr. LAGOMARSINO. Mr. Speaker, I thank the gentleman for yielding this time to me.

I want to commend the chairman of the Committee on International Relations and the chairman of the Committee on the Judiciary for bringing this piece of legislation before us.

Mr. Speaker, a recent Herblock cartoon in the Washington Post likened the worldwide proliferation of terrorism to the plague of the middle ages. I think that is a very apt description of what is going on. The recent bloody kidnaping of Aldo Moro in Italy reveals just how widespread the problem has become.

Of the literally thousands of acts of terrorism committed in Italy, the kidnaping of Aldo Moro is the most shocking and brutal. To put it in perspective, it would be the equivalent of the weathermen kidnaping Henry Kissinger or Gerald Ford.

The problem of international terrorism must be stopped now.

I join the vast majority of the world in strongly condemning the abduction of Aldo Moro.

Mr. ZABLOCKI. Mr. Speaker, I yield 1 minute to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Speaker, I thank the distinguished chairman of the committee for yielding this time to me, and I would like to associate myself with his remarks. I wish also to compliment the distinguished chairman of the Committee on the Judiciary for introducing this excellent resolution which I joined in supporting and signing.

I would like to make one comment, however, with regard to the consistency of this body, because I think it is important that we try to be as consistent as possible, and that comment is this: This resolution came up under unanimous consent, and there was no objection. I am very pleased with that. I think it is right that we consider it without any objection.

But when a person is blown up in Sheridan Square in downtown Washington and we try to bring up a resolution, with no politics or ideology attached to it but simply to express our despair and our concern over that kind of act, and there are objections in this body, that is inconsistent. That is the kind of inconsistency we saw a couple of years ago when the former Ambassador to the United States from Chile was killed.

So, Mr. Speaker, let us condemn terrorism wherever it occurs. I think all of us want to do that, and this gentleman is going to be one who wants to continue supporting resolutions of this kind.

● Mr. McCLORY. Mr. Speaker, I rise in support of this resolution sponsored by our distinguished colleague from New Jersey (Mr. RODINO) and I fervently hope the House will adopt it.

I am pleased to be a cosponsor of this resolution which among other provisions asks the President to seek through the U.S. Permanent Representative to the United Nations consideration by the U.N. of the subject of terrorism with a view toward restoring order and tranquility in public affairs throughout the world.

Mr. Speaker, terrorism in any form is frightening because it poses the threat of anarchy. But what is even more fearful about the Red Brigades who boast of kidnaping former Italian Premier Aldo Moro is that they apparently have no goal but that of anarchy.

I read a chilling sentence in a news account out of Rome in the Washington Post this morning. It quoted a young woman who among thousands attended Saturday's funeral for Mr. Moro's five slain bodyguards. She is quoted as saying:

> If it so easy to get Moro, then none of us is safe.

These are words for all of us to remember.

Mr. Speaker, I urge that we adopt this resolution so that the U.S. House of Representatives may send a strong message to the Moro family, the leadership of Italy, the world, and, yes, to this young woman that the United States will do all within its vast power to stamp out this disease of terrorism that imperils us all.●

Mr. ANNUNZIO. Mr. Speaker, on March 16, the Italian terrorist Red Brigades kidnaped the Christian Democratic Party leader, Aldo Moro. Their objective, they claimed, was to strike at the heart of the state and create a revolutionary situation. If their goal was to throw the country into a state of turmoil, the Brigades picked their man well. Aldo Moro has been a stabilizing force in the Italian Government for over a decade. As Premier, he has headed five governments. Currently president of the powerful Christian Democratic Party, he is considered a front-running candidate in the 1978 presidential elections.

Moro's influence has not been contained within Christian Democratic Party limits. Largely as a result of Moro's efforts, the 2-month-old crisis in the Italian Government was finally resolved. He succeeded in reconciling the Christian Democrats and the Communists in a compromise that brought the Communists into the parliamentary majority for the first time in 30 years. It was Moro who finally persuaded his own party's right wing to accept the agreement, and Moro who persuaded the Communists to accept a parliamentary, rather than full governmental, majority.

The new government was sworn in the day before Moro was kidnaped. Embarking upon a tenuous course in a country fraught with economic and social unrest, the regime was in need of all the support it could muster. Instead, terrorists struck at its steadying arm.

Moro is not the first victim of Italian terrorism. In fact, he is the 73d person to be kidnaped in Italy in a little more than a year. His dead bodyguards are but five among dozens of Italians who have been killed or maimed by the Red Brigades in recent years. Seeking badly needed change within society, but unwilling to accept a collaborative effort of traditional left (Communist), center, and rightist forces within the government, the terrorist group has resorted to senseless violence that can be nothing but counterproductive. While Italy's government is tied up in the search for Aldo Moro, the country's ills go unattended. The 15-percent inflation rate continues to mount, the 1.8 million jobless continue to be unemployed, and the economy stagnates.

As a cosponsor of House Resolution 1082, I join in the condemnation of the Moro kidnaping and deplore the terrorism that is so destructive to human progress. In this tragic crisis, the Government of Italy has, I know, the staunch support of our country, and indeed, of all freedom-loving peoples, in its efforts to effect the safe release of Aldo Moro and to preserve the democratic society and institutions of Italy.

● Mr. FASCELL. Mr. Speaker, I strongly support House Resolution 1082, and urge its adoption by the House.

This resolution deals with terrorism—a most abhorrent political act. It expresses condemnation of the recent terrorist kidnaping of former Italian Premier Aldo Moro.

Terrorism is a classic tactic of Communists and others who would destroy duly elected democratic governments in order to succeed to power. Their goal is to tear apart the fabric of lawful institutions, thereby laying the groundwork for a takeover.

In Italy, the clandestine group of terrists, who call themselves the "Red Brigade," have by their own claims assassinated 44 persons, kidnaped 30 others, and staged countless armed attacks and acts of sabotage directed against prominent Italian Government officials, journalists, and other citizens.

No freedom loving country can ignore the threat to world peace posed by this terrorist action. The kidnaping of Aldo Moro and the murder of five of his aides serves as a reminder that we must actively support the institutions of democracy in all countries.

I commend my colleague, Congressman PETER RODINO, for introducing the resolution, and urge its adoption.●

● Mr. GILMAN. Mr. Speaker, I was pleased to rise in support of the resolution (H.R. 1082) offered by my esteemed colleague, the gentleman from New Jersey, Mr. RODINO, expressing the sense of indignation and disapproval that the Congress has vocalized concerning the kidnaping of the prominent and respected former Prime Minister of Italy, Aldo Moro, a man who has given his life to public service and to world peace.

The sad fact of life that the world is facing is that terrorism has virtually become a way of life. The most frightening aspect of terrorism is its arbitrary nature: innocent people are gripped by the consequences of terrorist activities, often being slaughtered for no apparent reason. The cause of such fear is inhuman. Such fear must be abolished. Let us seek guarantees against further occurrences of terrorism. But in doing so we should recognize that wherever there is political strife and the accessibility of weapons that terrorism is most likely to occur.

Terrorism has little, if anything, to do with democracy. A democracy can come under siege by terrorists as readily as any tyranny; and no government is strong enough to thwart terrorist activities. Powerful men and leaders of governments have been the targets for terrorists, as have innocent bystanders and other civilians. The recent kidnaping of Aldo Moro, and the murder of his bodyguards sadly demonstrates that no amount of protection is enough.

Recently, the consciousness of the American public has been struck by the numerous terrorist attacks which have filled news reports. It is becoming increasingly clear that terrorism begets other acts of terrorisms and violence, and that living in a climate filled with a fear of arbitrary attack is unhealthy and inhuman. Within the last few weeks, there have been reports of attacks in Ireland, Israel, and now Italy, and other isolated terrorist activities taking place all over the world.

Italy, in order to survive this tragedy, must have the support of the United States and other democratic nations. At stake here is the basic question of human rights, and a basic threat to the dignity of all citizens. To use the kidnaping of Aldo Moro as a symbol of terrorist powers is ill conceived—certainly everyone is aware of the frightening realities inherent in terrorist demands and tactics. Kidnaping and murder will not resolve political differences, and will placate no one into acceding to terrorist demands. Certainly, the Red Brigade of Italy cannot hope that the rest of the world will look favorably or sympathetically upon their wanton acts and demands; terrorism only alienates the masses of peace-loving people and calls to mind the horror scenes from past wars.

We vividly recall the seige that the city of Washington underwent at the hands of the Hanafis last March. The Nation's Capital was gripped by fears, and many of the victims have not yet regained the confidence which is necessary to perform the simplest and most basic human functions. We are still very aware of the possibility of other such sieges and preparawhat a sad, sad commentary on our way of life that makes this necessary—and how much longer will civilized people be forced to live with the fear of terror haunting them?

Let us join together as a body which respects democracy and which is, in reality, democracy in action; and let us show the entire world that we condemn the reprehensible acts of these terrorists in Italy, and that we hold the principles of democracy far above the activities which have become the hallmark of political disagreement and strife around the world.●

GENERAL LEAVE

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution under consideration.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. ZABLOCKI. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 398, nays 0, answered "present" 1, not voting 35, as follows:

The Clerk announced the following pairs:

Mr. Annunzio with Mr. Erlenborn.
Mr. Akaka with Mr. Anderson of Illinois.
Mr. Fary with Mr. Frey.
Mr. Flood with Mr. Sarasin.
Mr. Mineta with Mr. Butler.
Mr. Mitchell of Maryland with Mr. Quayle.
Mr. Shipley with Mr. O'Brien.
Mr. Ryan with Mr. Crane.
Mr. Charles Wilson of Texas with Mr. Thone.
Mr. Thornton with Mr. Tucker.
Mr. Teague with Mr. Murphy of Illinois.
Mr. Lederer with Mr. Metcalfe.
Mr. Dellums with Mrs. Collins of Illinois.
Mr. Diggs with Mr. Findley.
Mr. Risenhoover with Mr. Michael O. Myers.
Mr. Traxler with Mr. Whitley.
Mr. Mathis with Mr. Madigan.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. BUTLER. Mr. Speaker, on the vote on House Resolution 1082, I was present and intended to vote in the affirmative. I thought I had voted in the affirmative, but the record indicates that I did not vote.

PERSONAL EXPLANATION

Mr. WAGGONNER. Mr. Speaker, on the vote earlier today on the adoption of House Resolution 1082, I am recorded as having voted "present." That was in error, and my vote should have been "yea."

REQUEST FOR PERMISSION TO VACATE PROCEEDINGS

Mr. SHUSTER. Mr. Speaker, I ask unanimous consent that the proceedings be vacated under which the Subcommittee on Surface Transportation of the Committee on Public Works and Transportation was granted permission to meet under the 5-minute rule tomorrow.

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). Is there objection to the request of the gentleman from Pennsylvania?

Mr. ROE. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

PROVIDING FOR CONSIDERATION ON H.R. 11518, DEBT LIMITATION EXTENSION

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1092 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1092

Resolved, That upon the adoption of this resolution it shall be in order to move, clause 2(1)(6) of rule XI to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11518) to extend the existing temporary debt limit, and all points of order against said bill for failure to comply with the provisions of clause 5 of rule XXI are hereby waived. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment under the five-minute rule. No amendments to the bill shall be in order except amendments recommended by the Committee on Ways and Means and said amendments shall not be subject to amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from California (Mr. SISK) is recognized for 1 hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1092 provides for the consideration of H.R. 11518, extending the temporary debt limit.

This is a closed rule providing 1 hour of general debate with time equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means.

The bill is to be read for amendment under the 5-minute rule. Only amendments offered by direction of the Committee on Ways and Means shall be in order, and these shall not be subject to amendment. The rule also provides for one motion to recommit.

The rule grants two waivers of points of order. The first is a waiver of clause 2(L)(6) of rule XI, the 3 day rule. This is necessary for the bill to be considered today since the report on the bill was filed on Friday, March 17, 1978, and copies of the report were not available until yesterday.

The rule also waives all points of order against the bill for failure to comply with the provisions of clause 5, rule XXI, prohibiting appropriations in a legislative matter. This waiver is necessary because the original Second Liberty Bond Act which the bill amends contained an appropriation, thereby subjecting any further amendment to the act to a technical point of order.

Mr. Speaker, H.R. 11518 extends the present debt limitation of $752 billion, without increase, from its current expiration date of March 31, 1978, through July 31, 1978.

As my colleagues know, it is extremely important that we pass this bill prior to the recess. Failure to pass the bill would leave the Federal Government without the authority to meet its financial obligations. I urge my colleagues to adopt House Resolution 1092 so that we may proceed to the consideration of H.R. 11518 to extend the public debt limit.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule provides 1 hour of general debate for the consideration of H.R. 11518, a bill to extend the temporary debt limit. Under the rule no amendments will be allowed, except for amendments offered by direction of the Committee on Ways and Means, and those amendments, if any, will not be subject to amendment.

The rule also includes two waivers of points of order. First, the rule requiring that the report be available for 3 days is waived, because the report was not available until yesterday.

Second, the rule prohibiting appropriations on a legislative bill is waived. This is necessary because extending the debt limit, in effect, appropriates the money to pay the interest on that debt.

Mr. Speaker, the current debt ceiling legislation expires at the end of this month. This bill extends the existing temporary public debt ceiling of $752 billion through July 31, 1978. The debt limit is not increased, just extended for 4 months.

Unlike the proposal to increase the debt limit to $824 billion which was defeated on March 7, this bill makes no changes in the procedure for setting the debt limit, and makes no changes in long-term bond issuing authority or in the interest rate on savings bonds.

There is, however, one thing I would like to point out today. Two weeks ago the House rejected the Carter administration's request to extend the limit to $824 billion. Now, 2 weeks later, we are told they can get along with the $752 billion limit for 4 more months.

Mr. Speaker, this tells us one thing. They can get along on fewer billions downtown if they really want to. We should give them many more such opportunities. The taxpayers would welcome them.

Mr. Speaker, I have no request for time and reserve the balance of my time.

Mr. SISK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. THONE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 314, nays 80, not voting 40, as follows:

Anderson, Ill.	Hansen	Scheuer
Annunzio	Lederer	Shipley
Ashley	Madigan	Teague
Bonker	Metcalfe	Thompson
Brown, Calif.	Mitchell, Md.	Thornton
Collins, Ill.	Mollohan	Traxler
Dellums	Myers, Michael	Tucker
Diggs	Nix	Waxman
Erlenborn	O'Brien	Whitley
Fary	Poage	Wilson, Tex.
Findley	Risenhoover	
Flood	Ruppe	

The Clerk announced the following pairs:

Mr. Annunzio with Mr. Anderson of Illinois.

Mr. Akaka with Mr. Erlenborn.

Mr. Shipley with Mr. Frey.

Mr. Teague with Mr. Sarasin.

Mr. Flood with Mr. Hansen.

Mr. Mitchell of Maryland with Mr. Madigan.

Mr. Dellums with Mr. Michael O. Myers.

Mr. Diggs with Mr. O'Brien.

Mr. Risenhoover with Mr. Ruppe.

Mr. Traxler with Mr. Ashley.

Mr. Fary with Mr. Bonker.

Mrs. Collins of Illinois with Mr. Garcia.

Mr. Metcalfe with Mr. Lederer.

Mr. Ambro with Mr. Mollohan.

Mr. Nix with Mr. Tucker.

Mr. Brown of California with Mr. Whitley.

Mr. Thompson with Mr. Charles Wilson of Texas.

Mr. Ryan with Mr. Thornton.

Mr. Waxman with Mr. Scheuer.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR SUBCOMMITTEE ON ANTITRUST, CONSUMERS AND EMPLOYMENT OF COMMITTEE ON SMALL BUSINESS TO MEET TODAY NOTWITHSTANDING PROCEEDINGS UNDER 5-MINUTE RULE

Mr. BRECKINRIDGE. Mr. Speaker, I ask unanimous consent that the Subcommittee on Antitrust, Consumers and Employment of the Committee on Small Business may be permitted to sit today, beginning at 1:30 o'clock p.m., during any proceedings under the 5-minute rule, in order that the subcommittee may take testimony during the course of a study and investigation on the future of small business.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, does the minority feel that this is acceptable, and that this would not keep the Members away from the floor during the debate on the terribly important Federal Election Campaign Act legislation?

Mr. BRECKINRIDGE. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Kentucky.

Mr. BRECKINRIDGE. Mr. Speaker, I would point out that the minority is present in the person of the gentleman from Virginia, Mr. CALDWELL BUTLER. He has been given notice, and he has participated in our meetings in preparation for these proceedings. I would defer to the gentleman from Virginia, if the gentleman from California (Mr. ROUSSELOT) desires to yield to him.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, can the gentleman assure us that there will be absolutely no markup of any legislation, and that the request is made for the purpose of holding hearings only?

Mr. BRECKINRIDGE. That is correct.

Mr. ROUSSELOT. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

DEBT LIMITATION EXTENSION

Mr. ULLMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11518) to extend the existing temporary debt limit.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oregon (Mr. ULLMAN).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11518), with Mr. DELANEY in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Oregon (Mr. ULLMAN) will be recognized for 30 minutes, and the gentleman from New York (Mr. CONABLE) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Oregon (Mr. ULLMAN).

Mr. ULLMAN. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, in this public debt limit bill, the Committee on Ways and Means provides for a simple extension for 4 additional months of the present legal limit on Federal debt; that is, $752 billion through July 31, 1978.

Under present law, the debt limit is $752 billion which consists of a $400 billion limit and a $352 billion temporary additional limit which expires on March 31, 1978.

Revised estimates of budget outlays were made available Monday afternoon, March 13, 1978. These revisions indicate it will be possible for the administration to carry on for an additional 4 months without an increase in the present debt ceiling because actual outlays continue to fall short of budget estimates. Legislation is necessary, however, to continue the present debt limit for the additional period.

The budget revisions attribute the shortfall to: First, a review of the fiscal year 1978 total outlays in view of the overestimate of actual spending in the first months of the year; second, policy changes enacted by Congress or proposed by the administration since the budget was submitted; and third, technical changes in several of the estimates.

As a result, the estimate of outlays was reduced by $8.7 billion from $462.2 billion to $453.5 billion, and estimated receipts were increased by $100 million. The new calculations reduce the budget deficit estimated for fiscal year 1978 from $61.8 to $53 billion.

A simple extension of the present limit for the additional 4 months appeared to be the most desirable choice among those available to the committee. By July, Congress will have adopted the first budget resolution for fiscal year 1979 and most of the appropriations bills for that year will have been passed by the House. There will be available to the committee then some congressional guidance with respect to the targets for budget totals and debt limit, and the committee will be able to report out a bill that reflects the guidance of the budget resolution.

Any bill that would cover a longer period of time also would involve an increase in the size of the debt limit. That would be true even if the limit would be extended only through September 30, the remainder of fiscal year 1978. However, if the limit would be extended for that period, Congress would have to act on the next adjustment on the debt limit in the 1-week period remaining in this session between adoption of the second budget resolution and adjournment of this session. The committee believed it would be preferable to give Congress a chance in July to use the first budget resolution as a guide to make an extension into 1979 and avoid the crowded legislative calendars in the last week of the session.

Any extension of the debt limit for a period longer than the remainder of fiscal year 1978 would take us into fiscal year 1979. That choice cannot be considered as a viable alternative at this time. Rejection by the House of a debt limit bill 2 weeks ago appeared to be directed at the length of time involved in the extension as well as the size of the debt limit increase. Since no action has been taken as yet on the first budget resolution for fiscal year 1979, there is no expression of congressional will on the budget, its components or the debt limit to guide the Committee on Ways and Means or the House floor. Prudent legislative policy requires delay of any action relating to the debt limit for fiscal year 1979 until after the first budget resolution.

The administration requested two amendments to debt management policies, but the committee deferred action on them because both amendments would make available authority that is not needed before fiscal year 1979.

The CHAIRMAN. The time of the gentleman from Oregon (Mr. ULLMAN) has expired.

Mr. ULLMAN. Mr. Chairman, I yield myself 1 additional minute.

Mr. FORD of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. ULLMAN. I yield to the gentleman from Tennessee, a member of the committee.

Mr. FORD of Tennessee. I thank the distinguished chairman for yielding.

Mr. Chairman, I have 2 or 3 questions. This bill, of course, extends the maintenance of the $752-billion figure through July; is that correct?

Mr. ULLMAN. That is correct.

Mr. FORD of Tennessee. It would give Congress more time to consider what the deficit will be?

Mr. ULLMAN. That is correct.

Mr. FORD of Tennessee. And in July, the enlarged ceiling would be considered; is that correct?

Mr. ULLMAN. That is right. We would have to face up to the issue of what kind of extension and what kind of increase would be necessary at that time.

Mr. FORD of Tennessee. Is it not also true that the debt limit does not control the deficit?

Mr. ULLMAN. That is absolutely correct. This debt limit has nothing to do with the deficit. The deficit is created by the whole series of authorizations and appropriations and also by the size of the revenues coming in, which are totally apart from this matter before us.

Mr. FORD of Tennessee. Mr. Chairman, I thank the distinguished chairman of the Committee on Ways and Means.

Mr. Chairman, I want the record to show that the Representative from the Eighth Congressional District of Tennessee supports a temporary extension of the debt ceiling at $752 billion. I am concerned that the ceiling will revert to $400 billion if we do not take some action on this measure by March 31. While Congress must act on the debt at some time in the immediate future, it is our responsibility to vote in favor of the debt limitation extension today. Otherwise the Government would be unable to manage the public debt.

When we set the fiscal year budget for 1978 last year, our decision to enlarge expenditures, hence the debt, was already made. If we rescind our agreement, we will cripple the Government in that the United States would not be able to sell bonds, which are a considerable source of revenue; would not be able to borrow; would not be able to pay social security and medicare, among other bills for social service programs.

Mr. Chairman, I furthermore do not believe we would be serving the best interest of our country if we are not able to meet the payroll of our Federal employees which would indeed happen if we take no positive action. The whole United States and the world economies would be devastated, and I do not honestly think we can afford the price of this negligence.

The message, in other words, is this: A vote against the temporary, and I emphasize temporary, extension is an act tantamount to cutting off one's nose to spite one's face, and surely we will not be serving any reasonable purpose in so doing.

Let the record also show that I firmly believe and will work toward achieving a balanced budget. But to try to clear the deficit at this time would only yield a "balance due" statement with compounded interest which would result on the congressional ledger sheet and this balance due would not pay our constituency any dividends in the long run.

Mr. CONABLE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I support the bill H.R. 11518 to extend the temporary debt limit for 4 months.

The permanent and temporary debt ceilings presently stand at $752 billion. This bill does not change that amount. It merely extends the time limit on the temporary ceiling from March 31 to July 31 of this year. Presumably, by then, we will know our fiscal situation in a detail already legislatively accomplished.

Mr. Chairman, this graceful escape from a rather sticky dilemma was engineered by the fiscal magicians of the Office of Management and Budget, who, before our very eyes, made $8.8 billion disappear from this year's budget deficit. It achieved this primarily by rediscovering a shortfall in current spending which was heretofore alleged no longer to be with us.

Although the already thin credibility of the administration's grasp of economic affairs was strained by this fortunate

coincidence of timing, the coincidence is nevertheless gratefully acknowledged. It extricates us from a legislative tangle of our own making which, if left unresolved, could bring the Government to a complete standstill.

Mr. Chairman, we understand, though we prefer not to admit it publicly, that the debt limit does not impede the steady expansion of indebtedness; it ratifies it. Nevertheless, 2 weeks ago we refused to change the debt level mechanism so that it would automatically reflect congressional decisions on spending and taxing. We also refused to allow enough debt increase to carry the Government for another year of deficit spending. In short, we had reached an impasse.

Mr. Chairman, we were lucky this time; but it is unlikely that we will be bailed out again in July or at any other time. We must agree on some fundamental changes in the way we legislate the public debt limit.

What I propose now is a simple change in timing rather than a change in method in May, immediately after we have completed action on the first concurrent resolution on the budget. At that time we should reexamine the debt limit and make whatever prospective changes are required to bring it into line with the resolution's revenue and outlay figures. This should be done promptly, before conservative impulses erase all memory of the spending decisions the majority has made which necessitate debt increases. This timing has the added advantage of making clear what already should be obvious, that the only way to keep the debt level down is to achieve a better balance between outlays and revenues.

Mr. Chairman, I hope that we can try this in May; and I urge the chairman to use his influence to bring it about so that we can escape from the ridiculous ritual of refusing to approve the public debt several times a year.

In the meantime, we should take advantage of the reprieve contained in the bill before us today.

Mr. Chairman, I hope this extension of the time limit with no increase in the dollar amount of the temporary debt ceiling will be passed.

Mr. Chairman, I yield 3 minutes to the gentleman from California (Mr. KETCHUM).

Mr. KETCHUM. Mr. Chairman, it is nice to be back here again with another bill on the debt ceiling.

As most of the Members know, if they have ever attended a meeting of the Committee on Ways and Means, they can be rather dull and stodgy, most important, of course, but dull and stuffy.

But, now we have had something new added. Call it, for lack of a better term, administrative legerdemain, a magic show. Fourteen days ago, we brought the debt ceiling bill to this floor, and you in your wisdom defeated it. Just a few days later, the administration came back to us and, presto, when they lifted the cloth off the bowl they found out that they had overestimated their needs by a trifling $8 billion.

So, you have achieved something. It would be interesting if we were to turn this one down, although I doubt that that will happen, to see if we could shake loose Treasury's cookie jar and find out how many more billions could be saved. You have done your constituents an amazing service by turning down the last debt ceiling increase. Just think, you have saved them $8 billion, and in addition to that the administration found that their revenues were going to be $100 million more than they expected.

Now, either they have got some new computers down there that they are not sharing with us, or they have information that they never share with us, but it is an interesting experience and an interesting exercise.

Now, I rather suspect that since this does not represent an increase in the debt ceiling that presently exists, that the debt ceiling bill will pass today; a most reasonable request—only extend it to July. I would submit to the Members that in July they will have an opportunity to again vote for the debt ceiling. We will see some more magic, and they can go home and tell their people why they had to increase the debt ceiling just before they go home on the August recess. I will vote no on this debt ceiling increase because I voted no when we increased it the last time, and I hope those who joined me then will join me again.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. CONABLE. Mr. Chairman, I yield one additional minute to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. KETCHUM. I yield to my colleague from California.

Mr. ROUSSELOT. I appreciate the position my colleague, a member of the Ways and Means Committee, has expressed. Is it not true also that—the gentleman from the other body, Senator PROXMIRE—a member of the Joint Economic Committee, announced this week when the Joint Economic Committee report was being announced, that the Congress was not doing a good enough job in holding down the expenditure levels of the Federal Government, and that if we did a better job, said the gentleman from the other body, we would not have to constantly be supporting all these debt increases?

So, as the gentleman has pointed out, the combination of two actions that is the administration suddenly finding that there is $8.8 billion that they could not even spend, even though Congress had appropriated much more, and the other potential action of not allowing expenditures to go up so far, we would not have to be here at all today. We would not have to raise the debt ceiling at all.

Mr. KETCHUM. There is absolutely no question that the gentleman is correct, and when one says that the debt ceiling is not tied to the deficit, that is in error. The gentleman is absolutely right.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from California (Mr. ROUSSELOT).

Mr. ROUSSELOT. Mr. Chairman, I would like to ask the chairman of the Ways and Means Committee if his committee is now in close touch with the administration so that if we come up close to July and we really do not need this debt-ceiling increase, maybe we could exist on the present temporary debt level until September 30. The administration may find a few billion dollars that they are not going to spend, and we could live on this current debt ceiling. Is that not true?

Mr. ULLMAN. Mr. Chairman, if the gentleman will yield, I will respond.

Mr. ROUSSELOT. I yield to the gentleman from Oregon.

Mr. ULLMAN. Mr. Chairman, we are in constant touch with the OMB and the administration on this matter, but let me say to the gentleman that there is absolutely no chance whatsoever that we could go beyond July 31. We have extended it to the maximum. There is a flow of revenues that reach a peak and at that time we are getting into a period where the revenue inflow stops and our expenditures continue, and so there would be no opportunity at that time. But we are in touch and if something very unforeseen would happen we would bring the Members the exact situation in our resolution.

Mr. ROUSSELOT. So it is entirely possible that when we come to July we again would not need to raise the temporary debt ceiling because there are adequate funds in the Treasury to cover all the expenditures under that debt ceiling?

Mr. ULLMAN. If the gentleman will yield, it is highly improbable that will happen.

Mr. ROUSSELOT. That is what we were told the last time, and when we had the debt ceiling bill here just a few weeks ago we were told it was critical and crucial and all those kinds of things.

The CHAIRMAN. The time of the gentleman from California (Mr. ROUSSELOT) has expired.

Mr. CONABLE. Mr. Chairman, I yield 2 additional minutes to the gentleman from California (Mr. ROUSSELOT).

Mr. ULLMAN. Mr. Chairman, if the gentleman will yield further, the interaction between the temporary ceiling and the permanent is where the difficulty arises.

Mr. ROUSSELOT. I understand that.

Mr. ULLMAN. And as the gentleman knows, if we fail to act now we drop back to our permanent level of $400 billion which absolutely stops all financing, and that is the reason we have to pass this.

Mr. ROUSSELOT. I understood the point when the gentleman originally made it. I understood the reason for the temporary debt ceiling increase, and whether or not we could go to October 1 when the new fiscal year starts is a question.

Mr. ULLMAN. All I can say to the gentleman is that we will have carefully assessed the situation at that time and if it is possible to do that we will certainly do it. We will have to make the judgment however as to whether it is wise to just bring it up to the final closing minutes of this Congress or whether we should try to go over to next year at that time, but we will make that decision when the time comes.

Mr. ROUSSELOT. Mr. Chairman, I am not convinced that we even need to

extend it just to July 1. On the basis of my experience on the Budget Committee and trying to follow this whole debt management situation, I am convinced this Congress could exist with a temporary debt ceiling to September 30. It is my belief that the administration is constantly finding money that they are not spending. The OMB admits to the Budget Committee that they still have to put a total handle on where money is or is not being spent. In the committee report for this bill, we note that the deficit estimate for fiscal year 1978 was reduced by $8.8 billion, from $61.8 billion to $53.0 billion. This kind of reassessment seems to happen more and more frequently. We do not know what money is or is not being spent.

It is my conviction, along with the gentleman from California (Mr. KETCHUM), that we could in fact live with this squeezed-down temporary debt increase through the rest of the fiscal year of 1978. So I would urge my colleagues to vote against the extending of this temporary debt ceiling to July. I believe it could be done if we had an open rule to extend it just to September 30.

Mr. CONABLE. Mr. Chairman, I have no further request for time.

Mr. ULLMAN. Mr. Chairman, I have no further request for time.

The CHAIRMAN. Pursuant to the rule, no amendments to the bill shall be in order except amendments recommended by the Committee on Ways and Means and said amendments shall not be subject to amendment.

Mr. ULLMAN. Mr. Chairman, we have no amendments.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. DELANEY, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 11518) to extend the existing temporary debt limit, pursuant to House Resolution 1092, he reported the bill back to the House.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. KETCHUM. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 233, nays 172, not voting 29, as follows:

Findley	Ryan	

The Clerk announced the following pairs:

On this vote:

Mr. Annunzio for, with Mr. Frey against.
Mr. Findley for, with Mr. Madigan against.
Mr. Teague for, with Mr. O'Brien against.

Until further notice:

Mr. Akaka with Mrs. Collins of Illinois.
Mr. Shipley with Mr. Anderson of Illinois.
Mr. Risenhoover with Mr. Dellums.
Mr. Waxman with Mr. Diggs.
Mr. Flood with Mr. Erlenborn.
Mr. Fary with Mr. Evans of Colorado.
Mr. Thornton with Mr. Whitley.
Mr. Charles Wilson of Texas with Mr. Scheuer.
Mr. Hawkins with Mr. Sarasin.
Mr. Lederer with Mr. Michael O. Myers.
Mr. Ryan with Mr. Metcalfe.

Mr. LEGGETT changed his vote from "nay" to "yea."

Mr. THONE and Mr. RUSSO changed their vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 11315, FEDERAL ELECTION CAMPAIGN ACT AMENDMENTS OF 1978

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1093 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1093

Resolved, That upon the adoption of this resolution it shall be in order to move, clause 2(1)(6) of rule XI to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 11315) to amend the Federal Election Campaign Act of 1971 to make certain changes in the reporting and disclosure requirements of such Act, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman, and ranking minority member of the Committee on House Administration, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on House Administration now printed in the bill as an original bill for the purpose of amendment under the five-minute rule and said substitute shall be read for amendment by titles instead of by sections. It shall be in order to consider an amendment to the committee amendment in the nature of a substitute printed in the Congressional Record of March 20, 1978, by Representative Foley of Washington, and all points of order against said amendment for failure to comply with the provisions of clause 7, rule XVI and clause 5, rule XXI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions. After the passage of H.R. 11315, it shall be in order in the House to take from the Speaker's table the bill S. 926 and to strike out all after the enacting clause of said Senate bill and insert in lieu thereof the provisions of H.R. 11315 as passed by the House.

The SPEAKER. The gentleman from Missouri (Mr. BOLLING) is recognized for 1 hour.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Tennessee (Mr. QUILLLEN), pending which I yield myself 5 minutes.

Mr. Speaker, this is an open rule, open as to the committee amendment in the nature of a substitute, open as to the so-called Foley amendment. It is an open rule and it waives a few minor technical matters. The thing that it does that is unusual is that it makes in order the Foley amendment, and the Foley amendment is a version of public financing of elections.

I listened with care to the discussion yesterday before the Committee on Rules, and I have read with no pleasure at all over the last several weeks the way in which this bill became bitterly partisan. Frankly, I gave some very serious consideration to not voting for a rule in the Committee on Rules, the partisanship had become so bitter. And I think the atmosphere has been poisoned.

When I thought about the very able arguments made by my friend, the gentleman from California (Mr. WIGGINS), that we should not consider the Foley amendment, we should not make it in order because the committee of jurisdiction had not come out with it, I came to the conclusion that if we were going to deal again with this very complicated problem in three or four different ways, that if we had a completely open rule, it would be fair.

I understand—and I hope it is not so—that our friends on my left in this respect have indicated that they are going to have a near unanimous, if not a unanimous, party vote against the consideration of this matter or these matters.

If that is the case, the whole decision is going to rest on this side. If every Republican is going to vote against the rule, the only hope of the American people's finding out where the Members of the House of Representatives stand on a whole series of questions lies in adopting the rule.

The series of questions include those on which both sides agree that action should be taken on amendments to the act which affect the Federal Election Commission.

There is bitter disagreement over some of the limitations which have caused the bill to become so partisan, and there is bitter disagreement over whether or not we should have any form of public financing.

If the American people, Republicans, Democrats, Independents, are to have a real opportunity to find out where their Representatives stand on the question of whether there should be amendments, on the question of whether there should be limitations on the total funds that are allowable with respect to taxes, with respect to the parties, and on transfers, and whether there should be public financing, the only opportunity that they will be able to have is if this rule is adopted.

Mr. Speaker, I urge my friends on the left to support the rule, and I hope there are some of them; and I urge my friends on the right to recognize that this is a straight up-and-down issue of consideration. Are all of these matters important enough to be considered? I am convinced that each and every one of them is important enough, and I urge the Members to support the rule.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we have heard the eloquent plea of the gentleman from Missouri (Mr. BOLLING) about an open rule. We have heard some remarks that would make us believe that this is a nonpartisan bill.

Mr. Speaker, we know that this measure which comes before this House today has had no adequate committee hearings, nor has the subject matter of the amendment which is made in order.

We know that the committee has brought to this House by the Democrat votes on the Committee on Rules a measure which stinks to high heaven of partisanship.

Mr. Speaker, if there was ever a time to defeat a rule, that time is now. The rule must be defeated because this election campaign bill is a direct assault on the Members of this House and a shameful disgrace to the Democratic Party. Its provisions will also severely restrict and change campaign financing for Members of the House. I plead with all the Democratic Members who are committed to fair play in our political process to join us in defeating this rule.

Mr. Speaker, we members of the minority can accept defeat on the House floor on issues because we lack the votes of the majority. We do not like these defeats, but we accept them. If the majority is disciplined and if it can count votes, its will is going to prevail. But that is not the case here.

What we have a case of here is an attempt on the part of some Members of the majority to alter the political process in such a way as to deny the minority a fair chance of becoming the majority. The manner in which this bill has moved forward through the committee and the rule under which we are being asked to consider these issues demonstrate that.

I urge Members to pull back from this path, if not out of concern for the legitimate rights of the minority, then out of concern for democratic tradition and the integrity of the majority. Newspapers across the country have already issued editorial warnings about the political quicksand that lies at the end of the path that some would lead you down. I am asking that you think again of what you are doing, and who you are following.

If it is reform we are after, why reduce the ability of the political parties to support its candidates? How can the Republican Party unduly influence a Republican candidate? How can the Democratic Party unduly influence a Democratic candidate? On what basis should the ability of the two political parties to support their candidates be prevented? And what is improper about a national party committee transferring funds to a State committee for use in Federal campaigns. This bill will prevent that too.

Mr. Speaker, I urge the defeat of the rule. I plead with Members of both sides of the aisle to vote no on the rule, because our whole political process is at stake. If the minority were in the majority today, and they ramrodded a rule through the Rules Committee and brought a measure—a partisan measure—before the House, I would be up here saying the same things, because this measure truly demonstrates that great harm will be done to Democrat Members of this body as well as to Republican Members, and to our whole political process and to our two-party system.

Mr. Speaker, these election campaign

amendments and the public financing proposal this rule makes in order should not be considered today by the House because their substance and their effects on the political process have not been sufficiently studied.

I say to those who are responsible for this outrageous attack on our party and on the legitimate campaign practices of many Democratic Members of the House that we Republicans are not going to fall on our own swords and let you get away with it. We accept the challenge that has been delivered by some Members and call on all fair-minded Democratic Members to join us in defeating this rule.

Mr. Speaker, today let us do what is necessary to be done. Let us vote down the rule.

Mr. MEEDS. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. SISK).

Mr. SISK. Mr. Speaker, let me say that I am very much opposed to the granting of this rule. I think that we can save a lot of time if Members will cast their votes against the rule.

This proposition was conceived in controversy of the worst possible kind, apparently. It has been promoted in controversy. It comes here in controversy. In fact, if what I understand to be true about some of the various amendments that are going to be offered today is true, there is a real question of what kind of a birth this proposal is going to bring about. I do not wish to go too far in a discussion of just what kind of a creature it might ultimately resolve itself into, but let me assure the Members that it is a proposition that, in my opinion, is detrimental to the American political process.

It was unfortunate that the situation developed as it did, and I would hope and trust that we might lay this turkey to rest in the quickest, quietest possible way. That would be to vote down this rule.

There are, and there may be, a few good things in this piece of legislation, but they are so contaminated with the bad that it is impossible to revive them and, so, I would urge my colleagues to vote no on this rule.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. WIGGINS).

Mr. WIGGINS. Mr. Speaker, the rule should be defeated.

No fair-minded Member of this House—Republican or Democrat—should ratify by his vote the process by which the bill made in order by the rule comes before the House.

We all know what has transpired prior to today.

A bill proposing major and destructive changes in the Campaign Act surfaced for the first time on Friday together with the announcement that markup would commence on Monday. On Monday morning, a request by the Republican members of the committee, supported by every single Republican Member of the House, for hearings was defeated. Hearings were denied, notwithstanding the fact that important groups were affected by the bill.

A vote for the rule ratifies that extraordinary and irresponsible process.

I am told that some wish to support the rule because public financing of congressional races is made in order. To those Members, I ask you to reconsider your position—not on the substance of public financing, but on the process by which that issue is to be considered.

We do not vote on concepts in this House. We vote on specific legislation. The text of the public financing amendment only became known yesterday. The House is asked to mark it up today and pass it. Have you read it? Do you have the benefit of hearings? Do you have a committee report specifying the purpose, need and cost of the legislation? Have you read and considered minority or additional views? Of course you have not.

Even if you support public financing in principle, how could you possibly ratify the process by which that issue is considered by voting for this rule? Responsible Members could not do so.

There is a better way which I commend to my colleagues for your earnest consideration.

If the rule is defeated, a bill containing the needed and noncontroversial amendments to the act could be considered under suspension of the rules. And it would pass and become law, appliable to the pending election.

A separate bill altering contribution and expenditure limits could be considered fully and fairly by the House Administration Committee. It would not apply, if passed, to the elections this year—but no one seriously contends that the present bill will apply to this election either.

Public financing could be a part of the separate bill. You would have had an opportunity to vote on public financing months ago, if the leadership were willing to let the House work its will on the narrow issue of primary coverage.

And so, let us do the right thing—defeat the rule and let our committees do the job which we created them to do.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield, if the gentleman has time?

Mr. WIGGINS. I will yield briefly to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Speaker, I appreciate the gentleman yielding.

I am concerned here, and let me state the case. I have voted twice for public financing. I have twice walked that plank. At the same time, I believe public financing is inevitable and important. I support my party, and I hope the party of the gentleman from Kentucky remains the majority during the time I am in Congress.

Mr. WIGGINS. May the gentleman's tenure be limited.

Mr. MAZZOLI. I am concerned for the fairness of this legislation. Am I correct in what I heard, that the gentleman and his colleagues on the committee requested hearings and those hearings were denied?

Mr. WIGGINS. That is absolutely correct.

Mr. MAZZOLI. Were those hearings denied, in the gentleman's opinion, because of party or was there some other reason? Was the gentleman being capricious in his request for hearings?

Mr. WIGGINS. Not at all. This was a brand new proposal which surfaced on Friday and we made the request for hearings and it was denied and the matter was brought up Monday for a vote.

Mr. MEEDS. Mr. Speaker, I yield 4 minutes to the gentleman from New Jersey (Mr. THOMPSON).

Mr. THOMPSON. Mr. Speaker, may I begin by reminding my highly respected friend, the gentleman from California (Mr. WIGGINS), that first of all as far as his recitation of the proceedings on the bill, that many, many conferences were held with the minority staff all through the process. The final version was delivered on a Friday. The markup began not on the following Monday, but on Tuesday.

I say to my friend from Kentucky (Mr. MAZZOLI) that public hearings relating to public financing were eight in number and were held on May 18 and 19, on June 23 and 28 and 29, and on July 10, 11, and 12.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman from New Jersey for yielding.

I appreciate his leadership in the Congress but I am concerned about the public hearings question. Were there public hearings on changes in the public election laws other than public financing?

Mr. THOMPSON. Yes.

Mr. WIGGINS. Mr. Speaker, if the gentleman will yield, surely he will acknowledge there were no hearings on the major changes in expenditures that came right out of the blue.

Mr. THOMPSON. Hearings were held on October 13, I say to the gentleman from California (Mr. WIGGINS). We had the Federal election officials before us that day for oversight purposes. He might be right on the specific nature of them, but we did hold such oversight hearings. If I may finish my statement then I will be glad to yield further.

Mr. Speaker, I ask my colleagues to join in voting for the adoption of this rule.

This bill is an effort to reform the Federal election law. The rule before us is controversial for just two reasons:

First, in our attempt to restore the influence of the individual citizen in electing his representative, the committee reduced the amount of money a political party could contribute to or expend on behalf of a House candidate.

Second, the rule provides the House with the opportunity to vote on the question of partial public financing of House elections.

On the question of party money, current law provides that a political party may contribute $30,000 and expend $20,000 on behalf of a House candidate, for a total of $50,000 in party money in a House race. When you realize that the

average 1976 House race cost approximately $69,000, one can see the need for some reduction.

The committee reduced the party contribution and expenditure total from $50,000 to $15,000. This reduction was perceived by our colleagues on the minority side as being too great, and they expressed their intention to vote against this rule as well as the bill.

However, it is my belief, Mr. Speaker, that our colleagues in the House should have the opportunity to adopt or reject partial public financing. Thus, in order that partial public financing not be held hostage to the party money reductions, I issued a public statement last Saturday in which I declared my intention to offer an amendment, following the consideration of public financing, to restore the party money cuts in the bill to the full $50,000 permitted under present law. And I want to inform my colleagues that I reiterated that commitment before the Committee on Rules yesterday. Further, the amendment was published in yesterday's RECORD and is supported by more than 100 Democrats, including myself.

Consequently, Mr. Speaker, any debate at this time on the reductions in party spending limits in the legislation is moot. But, Mr. Speaker, I cannot see any justification to the position that the House should not even have the opportunity to debate and vote on this issue.

The SPEAKER. The time of the gentleman has expired.

Mr. MEEDS. I yield 1 additional minute to the gentleman from New Jersey (Mr. THOMPSON).

Mr. THOMPSON. Mr. Speaker, the question of political money and how we are elected is vital to the country and 90 percent of this bill is not controversial. It contains needed changes in the election law. Surely we should have an opportunity to work our will under an open rule.

The issues are clearly drawn. The party spending cuts will be eliminated from the bill. To vote against this bill now would be to perpetuate the influence of special interest money at the expense of the individual citizen and, second, it would be to deny the House its right to debate the question of partial public financing.

I respectfully urge support of the rule.

Mr. WIGGINS. Mr. Speaker, will the gentleman yield?

Mr. THOMPSON. I yield to the gentleman from California.

Mr. WIGGINS. Mr. Speaker, I would inquire of the gentleman from New Jersey (Mr. THOMPSON) is it not a fact that this House could have worked its will with regard to public financing not less than 3 months ago had you and the leadership been willing to bring a full public financing bill to the floor, including the primaries? You are the one who took it off the calendar, I did not.

Mr. THOMPSON. Mr. Speaker, I would say to the gentleman from California (Mr. WIGGINS) that the gentleman from New Jersey is indeed flattered by the comments of the gentleman from California (Mr. WIGGINS) with regard to his influence on the leadership which the gentleman from New Jersey does not command.

Mr. WIGGINS. Most of us know the answer to that question.

Mr. THOMPSON. It is rhetorical in nature and you can answer it any way you want.

The SPEAKER. The time of the gentleman has again expired.

Mr. COHEN. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, few bills have caused as much excitement as this election legislation, H.R. 11315. To say that the political environment has been poisoned by partisanship is to be guilty of understatement.

The Los Angeles Times in its editorial compared the bill to "mugging the opposition in broad daylight." There seems to be no disagreement that its principal intent is to penalize the Republican Party.

Despite serious negotiations between a variety of groups and individuals, potential compromises have not been achieved. The amendments printed in the RECORD by the distinguished chairman of the House Administration Committee (Mr. THOMPSON), do not restore what has come to be called the antebellum status quo.

They ignore transferability between party committees, and would seem not to uncouple the authorities of national and congressional committees which have been combined in H.R. 11315.

The amendment of the gentleman from Illinois (Mr. MIKVA) does restore transferability between party committees, but lacks the guarantee of the majority leadership. The minority would be foolhardy, indeed, to trust to agreements between ad hoc groups.

The history of this bill indicates a majority attempt to disadvantage the minority at every turn. The olive branch has been used only to conceal the naked sword. The minority's first line of defense for its own survival, and perhaps its only defense is to defeat the rule.

The rule itself is worthy of defeat, even if the bill had some essential merit. Since only germane amendments are allowed to a nongermane amendment, there are great questions about the ability of Members to make responsible amendments.

Worse, Members are not protected for 5-minute debate time for their amendments to the Foley amendment. The Foley amendment has only been available to the House for 4 hours. The Members have not had enough time to prepare amendments, much less to file them in the record so others can, in turn see them. There has been no time for "Dear Colleague" letters to explain our amendments on taxpayer financing of Federal elections.

Hearings have not been conducted on this matter since for nearly a year. None have been held concerning the Foley amendment. In short, the procedures have been short circuited at every point in the process. I personally feel the House should note on the important question of public financing, but I think we should do so under regular procedures.

We all know that H.R. 11315 is a punitive antiparty bill. What is not well understood is that the Foley amendment is a poorly drafted piece of work which is loaded with controversy, quite apart from its main concept.

The Foley amendment gives sweeping audit authority which the committee bill had repealed. Its drafting seem to fit neither the current enforcement procedures, nor the changes in the committee bill. It does not repeal the principle of personal liability which was so dramatically demonstrated in the Shapp case. It contains gross limitations which in States like New York could steer taxpayers' funds to minor party candidates, and deny them to late-filing major party candidates. It offers no protection against write-ins.

The Foley amendment, is in brief, all concept, with little attention to legislative detail. It is as rough, legislatively, as might be expected of a bill and with no hearing and no committee work.

There are many, many reasons to be voting against this rule. The majority leadership could have saved us some distress by pulling this question off the schedule until the polluted political environment has been cleansed. Absent that practical leadership, there seems to be no alternative to a "no" on the rule.

Mr. QUILLEN. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Speaker, I strongly oppose this scheme to force taxpayers to finance the political aspirations and views of any congressional candidate—whether it be me, my colleagues in the Congress, or any other candidate for election to this body.

The power to tax can be classified as a police power of the State.

There can be absolutely no justification for imposing that police power to take the people's money to support candidates who the people may not support, to support the promotion of political views with which the people may disagree or oppose, in fact to support candidates the people may not even know.

The use of the people's tax money to finance congressional elections would be a gross abuse of the legislative function, just as it was an abuse of power to use public funds to finance the campaigns of Presidential candidates in the last election.

There were 15 candidates in the 1976 Presidential race.

Many of them were not serious contenders, and many had absolutely no real public support.

Yet one of these candidates, who dropped out of the race very early in the primary season received $633,000 in Federal funds.

Another received $615,000. In all, Democratic Presidential contenders received more than $16 million in public funds—which Republican taxpayers as well as Democrats were forced to give under the law.

The two Republican candidates received about $10 million, which Democratic taxpayers were forced to pay as well as Republicans.

No one can demonstrate that this improved the political process. Quite the contrary, it is a known fact that many of the candidates would never have dreamed of running for President if taxpayer funds were not available.

I disagree with my colleagues who say that public financing of congressional elections would encourage more and better candidates to run who otherwise would not or could not.

Any person who wants to run for public office, and has the qualifications to get votes, can also obtain sufficient contributions to put a campaign together—without taxpayer funds.

This is the genius of the American political process. Private contributions from individual citizens, business and labor organizations, political parties and other groups, can be obtained by any qualified person. This encourages good candidates to run, and most often discourages bad or ineffective candidates from jumping into the race.

Since when did running for public office become a right that anyone is entitled to at the taxpayers' expense?

Taxes are already too high.

The proposal gives us only two bad choices.

Congress will either have to increase taxes even higher to raise the $100 million or more that public financing of congressional campaigns would cost every election year.

Or the same amount of money will have to be diverted from other programs—whether it be the defense budget, the farm program, assistance programs for the needy, or whatever.

We know from past experience that neither choice will be acceptable to a lot of people.

And I am here to tell any Member of this body who has not yet perceived the public attitude on this proposal that it is highly unpopular with the people.

This proposal to finance congressional elections with the people's tax money will inevitably be an issue in the elections this year.

The only merit that I can see in a vote for this proposal is that it might contribute to the defeat of the incumbent who cast such a "yes" vote for another taxpayer "rip-off."

Mr. Speaker, there is absolutely no justification to invoke the police power of the state—the taxing power—to finance the election campaigns of congressional candidates.

It borders on being an immoral abuse of legislative power.

And I urge the defeat of the rule.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. STOCKMAN).

Mr. STOCKMAN. Mr. Speaker, I rise in opposition to the rule, but I want to say that if the rule is defeated—and I hope it is—there will be undoubtedly some who will interpret it as a defeat for public financing—a no vote on this as a vote against public financing. I would like to suggest that nothing could be more inaccurate or inappropriate, and I say that as a supporter of public financing and a cosponsor of the bill. I say it as one who helped draft the original matching payment public finance bill a number of years ago, and as one who strongly believes it can help improve our elective process.

But I would like also to suggest to the House today that if there is anything more important, more fundamental to the very integrity of our political system and our government process, it is the continued viability of our political parties. It is only the political parties, in my view, that can help overcome this enormous welter of special interest pressures, government by pressure groups, that we see rising in this country today.

The fact is in the last 2 weeks we have been faced with a fundamental assault on the very integrity, the continued viability, the continued meaningful role of our political parties in the electoral process. So I would urge that the rule be defeated and that it be defeated so that we can, once and for all, send a very firm message to the Committee on House Administration to improve the campaign and the election process, yes; but leave the political parties alone, and design the reforms and the changes in a manner that will strengthen them and not weaken them.

I think public financing is a viable idea. I think it will withstand the test of time. It will have another day. But I would certainly hope that we would never again see another day in this House of Representatives when we are faced with a bill that would have such an unworthy intent and such a destructive effect as the provisions in this bill affecting the political parties.

Mr. Speaker, I yield back the remainder of my time.

Mr. BOLLING. Mr. Speaker, I yield 1 minute to the gentleman from Ohio (Mr. LUKEN).

Mr. LUKEN. Mr. Speaker, I rise in support of the rule on this bill, principally, because this is the only way we can put the lid on campaign spending. We have been witnessing an escalation of spending in congressional elections in recent years that is alarming, to say the least. It is time that elections for Congress are taken off the auction block and reasonable limitations on spending imposed.

The amendments intended to be offered would propose reasonable rules that all could live with with reference to the provisions for matching funds, and particularly for penalties for those who spend excessively. The requirement that candidates raise initial funds, in contributions of $100 or less insures that all candidates be legitimate before matching funds are available.

The opponents of this legislation are principally from safe seats, and from one party districts, and they are frankly opposed to encouraging competition in the congressional field. This is precisely the reason why most Americans should be in favor of this legislation; namely, to encourage competition. It is only through competitive races at election time that we, as people, secure responsive representatives in the Halls of Congress.

It is time that this Congress became more responsive, and there are encouraging signs that this is occurring. The 94th and 95th class are working changes, changes which are being accepted by the veteran Members of this Congress. Campaign financing for congressional elections will be an important element of the continuing push for reform and responsiveness in this body.

Therefore, I strongly support the rule.

Mr. BOLLING. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, this legislation that is before the House deals with election law reforms. It is important for Republicans. It is important for Democrats. That is essentially what we are dealing with here is revising election laws.

The legislation that has been reported here to the House dealing with the changes in the FEC law deals with that. It eliminates the burdensome reports from 24 to 9 that we have had to file in campaigns. It does away with random audits. It changes the definitions that have burdened the process. It improves the enforcement mechanism of the FEC.

This legislation deals with essential reforms so that substantively it is important.

Secondly, on the issue of public financing, there are legitimate reasons to consider that issue. The fact is that campaign expenditures have grown excessive; $61 million was spent in House races in 1976. Races have gone beyond control. Almost $1 million was spent in one congressional race, $829,000 in another, and $804,000 in another and the figures go on.

Sixty-three districts had costs in excess of a quarter of a million dollars. We need some control on expenditures and, constitutionally, the only control is through public financing.

The Supreme Court says that we need some form of partial public financing to establish a limit. It seems to me we set a double standard when we talk about the need to control Government spending on one hand and then argue for uncontrolled campaign spending on the other hand.

This bill on public financing is voluntary. You can opt in or you can opt out. It is totally voluntary, depending on what you as a candidate want to do. Should not the people have an opportunity to make the judgment in the end?

The last point is that I think it is in the public interest not to have candidates based on the amount of money they can raise, but based on the issues and how they address themselves to the issues.

I would urge you both procedurally, because this is an open rule and you can deal with these issues on an open and free basis on this floor, and substantively to vote for the rule and a chance to deal with reform of the election laws, both for the parties as well as the people.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Delaware (Mr. EVANS).

Mr. EVANS of Delaware. Mr. Speaker, there are legitimate reasons to consider partial public financing of congressional

elections. But this is not the time to consider them. It is an important step and should be considered separate and distinct from this particular bill.

It may come as a shock to some that I, as the former deputy chairman of the Republican National Finance Committee and cochairman of the Republican National Committee, support partial public financing for congressional campaigns. I do so because I think public financing is an important step in restoring the public's confidence in Government.

I respect the chairman of the House Committee on Administration, my friend Mr. THOMPSON of New Jersey, very much but the procedure under which this legislation is being rammed through this House is improper.

I believe it is critically important that we do everything possible to encourage participation in our Nation's political parties. We need to encourage more small contributors. We need participatory democracy. And we need to encourage far more participation by all our citizens in the American political process.

This bill, instead of encouraging participation, discourages that participation and I hope my colleagues will join me in voting against the rule.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. BADHAM).

Mr. BADHAM. Mr. Speaker, as a member of the committee I would like now to address myself to the members of the majority party.

Proposals for public financing have been heard time and time again in public hearings during the first session of this Congress in the Committee on House Administration. The majority party members of that committee could have brought such a bill out if they had wanted it on the floor at any time. But this language before us in the rule does not fit the bill. As it presently stands, the bill was conceived in stealth and is not properly before us. The bill was not heard in committee, and the public financing amendment was never even proposed in the committee.

What is at stake here is the democratic process and the political process of this Nation. This process in which we are now engaged totally circumvents the committee system, which was created by the majority.

Mr. Speaker, I urge my colleagues on the other side of the aisle to take this to heart and consider whether this should be the way public financing should be brought up. If this rule without due process and without hearing is adopted, I believe this should be somewhere between embarrassing and sickening to my Democratic colleagues.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, I support public financing, not just for philosophical reasons, or because I feel it is in my party's interests for reasons of personal practice and preference in my own campaign, but also because I believe it is one of the devices that can insure the continued credibility of this institution, given the potential for scandal which develops during the course of recent election campaigns. I support the concept strongly, and if the rule is passed, I will work to see that it remains as part of this bill.

However, I deeply regret the environment in which public financing is being considered. It has been considered in an environment which can be described best as a mixed bag of motives, and uncertainties about the motivations have led me to believe that a vote against the rule is preferable to going ahead with public financing at this time.

Assurances have not been forthcoming from the leadership on the other side that the Republican Party will be put back in the status quo it enjoyed before this whole unfortunate affair came up, the issue of transferability specifically being an issue on which assurances have not been given by any Member except the gentleman from Illinois (Mr. MIKVA) and his associates who in good faith have been trying to assure a suitable environment for the proper consideration of public financing.

I hope, Mr. Speaker, that the issue will come up again, because I think it is the wave of the future. By itself, it would have my enthusiastic support, free I hope from the corrosion of this partisan flux which the majority of the House Administration Committee have started with the other provisions of the bill. I urge my colleagues on both sides of the aisle to vote against the rule.

Mr. BOLLING. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois (Mr. MIKVA).

Mr. MIKVA. Mr. Speaker, the gentleman from New York (Mr. CONABLE) said that this is an unfortunate environment in which to consider public financing. I doubt that there is ever a proper environment in which to consider public financing. Somehow we always want to get it considered in the right position, but certain Members seem to think it is in the wrong position. Sometimes we start consideration of it in the wrong position; we consider it in one vein here and they consider it in another vein over there.

But this is an open rule, one which would allow an open consideration of public financing. The rule would allow every Member to offer amendments to the bill, it would allow the House to pass the bill the way it saw fit and it would give the majority of this House the decisional power as to whether or not public financing should be a part of the law.

Mr. Speaker, election reform law and changes in the election laws are never easy to come by; that is true partly because we have so many different constituencies we must answer to. We have party constituencies to answer to, for instance. I understand the concern of my colleagues on the other side about the impact of the changes that have been made in this bill by the committee as far as their party is concerned.

We also have our own selves to answer to as a constituency, and no incumbent views the election laws in the same way as a nonincumbent. There is no way we can fashion an election law that takes into account all those constituencies. I have yet to know of an election law that does not get the juices flowing faster, particularly if it makes any changes beyond dotting an "i" or crossing a "t" in a different way.

But for all of that, the best atmosphere in which those changes could be considered is one in which the House could work its will. There is not one semblance of a restriction on this rule. We are not talking about public financing in this rule. We are talking about an opportunity to consider it. We are not talking about whether the party should be restored in this rule or not. We are talking about an opportunity to consider it.

The gentleman from New York suggested many of us would like to see the party restored. I deeply regret that the committee in its wisdom saw fit to change the party financing. I can assure my colleagues on the Republican side that I and my colleagues will do all we can—and it represents a lot of votes—to restore the Republican Party financing to what it was before the change in the law. But just as that can be changed if the rule is adopted, so can public financing be adopted only if a rule is adopted. An open rule is the only way to get at these questions. This is not an effort by the rule to try to ram something down the minority's throat or the majority's throat.

Someone suggested we did not have the opportunity to have hearings on public financing. My goodness, we have had so many hearings and so much debate in this Chamber on public financing that I cannot believe there is anybody on either side of the House who has not had an opportunity to prepare speeches they want to make for or against.

It would be wrong to vote down this rule on the assumption that it does anything other than to make sure that this Congress will not consider public financing. I do not care what the Members are thinking they are voting for, the way it will be read and the plain fact will be that if this rule is voted down, there will not be another opportunity to decide whether the majority of this House wants public financing. If this rule is voted down, efforts to achieve some measures of bipartisanship will suffer a blow. I thing voting down this rule will show that bipartisanship has gone out the window. I would regret this. I do not expect the changes made in this bill will please everybody in the Chamber. I would hope that, before we finally vote, everybody would agree that there has been a reasonable effort made to see that neither party is disadvantaged.

Mr. MAZZOLI. Mr. Speaker, will the gentleman yield?

Mr. MIKVA. I yield to the gentleman from Kentucky.

Mr. MAZZOLI. I thank the gentleman for yielding, and I first want to commend the gentleman for his efforts in regard to public financing.

Let me ask the gentleman if he shares my queasiness that maybe public financ-

ing is at the root of this thing and that is why we have gone through this kind of fire drill, and if people on my side of the aisle really wanted public financing we could have gotten it much easier than this?

Mr. MIKVA. If it was easy, then I suggest it would have been achieved in the last session of Congress or before. It is a very controversial subject, I have to candidly say. I do not know whether the majority of my colleagues favor it or not, but I am sure I share his views that tht best way to find out is to have an up or down vote on what is finally agreed upon as to which public financing scheme is the best, and what most people can associate with. The only way we can get it on is to have a rule that will allow that to be in order. If we do not get this rule, the gentleman and I both know there will be no further debate in this session of Congress on public financing.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from South Carolina (Mr. DAVIS).

Mr. DAVIS. Mr. Speaker, I take this time because I am a Democrat and I am on the Committee on House Administration and I am opposed to this rule and I am opposed to the bill.

When we talk about public financing, let us get the record straight. That bill was in the Committee on House Administration and was going through the amendment process and was jerked. It was just taken flat off of the agenda. We have never seen it again. But when we get back to this other turkey that we have—and this is really a bad bill—what is it but a pure and simple indictment of the Democratic Party?

It says that our party has not done its job in fulfilling its obligation to raise money. So what do we do? We come in and we try to place limitations on it.

We passed a bill in 1972 creating the Federal Election Commission, and we came forward with amendments in 1974 and 1976.

They have worked. What has been the matter with them? Nothing. The problem is that our party did not do the job, so we changed the rules in the middle of the ball game.

Is that equity? I would say not. If it is not broke, why fix it? Is it bad just to shape something that will be in the future a limit on special interests? I say no.

Maybe if we do not limit special interests we then create a club, my friends, for the rich where an individual can put all of his money in a race, and his family can put all of their money in a race, with no limitations.

Mr. Speaker, the seats are not on the auction block; they are up for sale.

If the Members want to participate in this sort of thing, they should go ahead and pass this rule and go forward. However, if they want to continue with good government in which people are involved, let us defeat the rule and keep a system that works and not change it in the middle of the ballgame.

Mr. JOHN L. BURTON. Mr. Speaker, will the gentleman yield?

Mr. DAVIS. I yield to the gentleman from California, the former State party chairman.

Mr. JOHN L. BURTON. Mr. Speaker, I was just going to say, as a former State party chairman, that what we have done in this bill is to strengthen States parties. The gentleman's own amendment would really have the State parties' work go down the tube with the bill.

Mr. DAVIS. That is why I say the Committee on House Administration can go back and in 2 days bring forth the good parts of this bill.

Mr. JOHN L. BURTON. That is something which the gentleman and I support.

Mr. QUILLEN. Mr. Speaker, I yield 4 minutes to the distinguished minority leader, the gentleman from Arizona (Mr. RHODES).

Mr. RHODES. Mr. Speaker, this is a bill that never should have been born.

It comes out of the Committee on House Administration, and I think that everybody who looked at it fairly realized that it had one intent, and that was to give some advantage to the Democratic Party over the Republican Party.

Mr. Speaker, as I said to my friend, the gentleman from New Jersey (Mr. THOMPSON), on that famous confrontation of ours, "How many do you want? You have two-thirds. Will you be satisfied with 90 percent or 87 percent?" The gentleman said, "87 percent."

Mr. THOMPSON. If the gentleman will yield, Mr. Speaker, I said 87.5 percent.

Mr. RHODES. I thank the gentleman.

Mr. Speaker, if this bill is adopted as it came out of the Committee on House Administration, I think the gentleman would have to work mightily to find many Republicans to kick around. There would not be many.

Mr. Speaker, I just do not like to hear anyone saying that this is what the country needs or wants. As a matter of fact, the people of this country have become well aware of the nature of this bill. They know that it was brought out of the Committee on House Administration, and that almost immediately the chairman, my good friend, the gentleman from New Jersey (Mr. THOMPSON), sought ways and means of finding some amendments to water down the parts that the Republicans did not like.

I am perfectly pleased to accept any largesse I get from my good friend, the gentleman from New Jersey, except that whenever he brings out a bill which obviously is a gun pointed at my back and says, "I will give you the gun back," I immediately wonder if, perhaps, he does not have a knife hidden somewhere which I am going to get in the back some time if I continue to deal with him.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. RHODES. Of course, I yield to the gentleman from New Jersey.

Mr. THOMPSON. Mr. Speaker, I do not have a knife, but I always notice you kept the bullets. One of your Republican colleagues told the press that I am a snake. After all, snakes do not have room to carry knives.

Mr. RHODES. Mr. Speaker, I do not think the gentleman is a snake. I think he is a very clever operator, and I think he knows exactly what he is was doing.

The reason I have to oppose this rule is that I am worried about what else is in the bill, and I think there are lots of things in the bill, lots of problems, if Members do not mind my saying so.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I prefer not to yield at the present time.

Mr. Speaker, I think the only fair thing that can be done is to send this bill back to the committee. The committee needs to do some work. It needs to have some hearings. Perhaps this bill cannot stand the light of day, but I cannot imagine the gentleman from New Jersey bringing out a bill that would not stand the light of day.

If it will stand the light of day, however, then there should be hearings; and people should understand exactly what this bill is all about.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Speaker, I thank the gentleman for yielding.

I just want to say that we are doing something important here. I have worked in so many elections for public financing in the past.

What gives us pause is that splendid speech we heard from the other side of the aisle, from the gentleman from Illinois, which directs our attention to another concept of what our duty is.

We know what cynical things are behind us. Every newspaper in the country has been telling us.

If you continue like this you make it impossible, with the power you have got and the exercise of that power—and that is what we are seeing, and it is not pretty—it would make it impossible for those who believe we can clean up this terrible work of special interest groups through some kind of voluntary effect on our campaigns. Are you going to make it impossible for us? Are we not going to be able to find some equitable way of correcting this bill according to Mr. MIKVA's excellent suggestion?

Mr. RHODES. The gentlewoman has said it better than I could.

Actually, when we passed that bill in 1972 which created the Federal Election Commission, a lot of people thought that the Republican Party's ability to raise money had been done in. Actually, we took that law and did a better job of it than the Democrats did. The gentleman from South Carolina is absolutely right. We did not rely on fat cats, as some people do, when they hold $1,000-a-plate dinners.

We went out and started mailing appeals to people, very frankly, and we were able to get 1,300,000 people to contribute to the Republican Party an average of $25 or less.

Now, what the House Administration Committee has done here is to try to keep those people—and they are little people—from having their money, which

they contributed freely, spent to elect Congressmen to represent them. This is not, in my opinion, the way the American system ought to operate. I, most strongly urge that the Members of this House vote down this rule. As for public financing, we can bring out another bill and I hope it will receive due consideration.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. Mr. Speaker, notwithstanding the two major controversial areas of the debate over this rule, I think those in the House who honestly believe in real election reform, and those organizations such as Common Cause and other organizations that have tried to bring about election reform, ought to pay close attention to another section of this bill.

We believed for a long time that reporting of all financial contributions and expenditures was important if our voters were going to have an opportunity to see who really supports us. We finally got a real reporting system required in the law. Over a 2-year period, a candidate and his committee will file reports 24 times.

This bill would reduce that 24 reports to 9. This reduced reporting requirement may be more convenient for us as candidates—but the people who want to know who our financial supporters are, are going to have 15 less opportunities to find out who is contributing to our campaigns. We ought to pay close attention to that. I do not think we ought to be reducing the number of campaign finance reports we make to the people of our districts.

Mr. QUILLEN. Mr. Speaker, I yield the remaining time to the gentleman from Michigan (Mr. VANDER JAGT).

Mr. VANDER JAGT. Mr. Speaker and Members of the House, 1 year ago this month, this Chamber resounded and rocked with cheers and applause. That was when the new Member from the Seventh District of Minnesota stood in this well and was sworn into office by you, Mr. Speaker. I know that it is not surprising that Republicans cheered. We had not had anything to cheer about since the dark days of 1975, but what was interesting to me was the enthusiastic cheers from the majority side of the aisle.

Of course, part of that was common courtesy, decency, good sportsmanship, as we were swearing into this distinguished parliamentary body a new Member. But, I like to think that maybe the enthusiasm went just a little bit—not too far—but a little bit beyond the requirements of common courtesy.

I think that perhaps some Members on that side had begun to wonder, as some of us on this side had begun to wonder and most political commentators had begun to wonder: Is the Republican Party still alive? And when we saw ARLAN STANGELAND'S victory, maybe some thought: "Ah-hah, maybe there is a breath of life in the Republican Party." And you were glad that your old buddy, the GOP had a flicker of life and might live to do battle with you again. After all it was not too hard to be charitable to your old adversary. You have whipped us in 18 out of the last 20 elections. I do hope part of the motivation for the enthusiasm was that you believed in fair play and in good sportsmanship and in the two-party system and that it has indeed served America well.

Now this bill before us tries to get a partisan advantage in the 1978 congressional elections by limiting to 75 percent what the parties can give. The so-called compromise amendment, which is billed as 100 percent restoration, to be offered by the chairman of the committee actually limits by a little more than half what the parties can give to their candidates. This legislation arises out of the fact that the Democrat coffers are empty and the Republican coffers are full.

And yet does anybody in this Chamber believe that this bill will not be filibustered forever by the Republican Members of the other body? It is a simple matter to send out the checks while the filibuster is going on, so the challengers will have the contributions under the current law. The real impact is in the 1980 elections, and that is when the body blow is delivered to both political parties.

That is why in the debate on this bill a week ago with John White the new Democrat chairman he did not offer one word of defense on behalf of this legislation, because he knows it hurts his party as well as mine. Who knows what the situation will be in 1980? I think it is possible the administration can get its act together and that the Democrats can raise money. I know from painful experience that it is a whale of a lot easier to raise money when one's party is in the White House than when it is outside the White House.

Any bill, which diminishes the role of the political parties automatically magnifies the role of special interests and fat-cat giving. Of all money contributed to the Democrat Party last year, 66 percent came from special interest pacts and fat cats. That is not going to get into the political process in 1978 because there is no surplus. The funds of our committee, at which this bill is really aimed, 99-plus percent came from small contributors. Ninety-seven percent of all contributions were under $100. Ninety-two percent came from contributors who gave under $50 and 72 percent of the contributors gave under $20. The average contribution of the whole shebang is $18.21. This bill restricts the right of that little giver who has already given to participate in the political process thru the political party of his choice.

Members know it is perceived that way by the media. In editorials from the Los Angeles Times to the Washington Star, from Oliphant cartoons to the Dave Broder columns, it is perceived that way.

I do not know why the leadership would want Members to vote on a rule when in voting for that rule they will be forced to vote for fat cat giving and against the little guy giving to the political process, when the bill is not going to get through the other body anyway.

It seems to me a vote for the rule is handing one's opponent a far more significant issue than any contribution we would be able to hand him.

So the right vote is "no" in terms of partisan reelection, the right vote is "no" in terms of fair play, the right vote is "no" in terms of the Democrat Party, and certainly the right vote is "no" on behalf of our two-party system and love for America. A defeat of the rule means a victory for the little guy and his right to participate in the political process through his political party.

CALL OF THE HOUSE

Mr. BOLLING. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 173]

Akaka	Flood	Runnels
Alexander	Frey	Ryan
Anderson, Ill.	Heckler	Santini
Annunzio	Hefner	Sarasin
Archer	Lederer	Scheuer
Armstrong	Madigan	Seiberling
Bellenson	Mann	Shipley
Collins, Ill.	Metcalfe	Shuster
Cornwell	Miller, Calif.	Solarz
Dellums	Myers, Michael	Teague
Dent	Nix	Thornton
Diggs	O'Brien	Tucker
Drinan	Pepper	Whitley
Erlenborn	Pike	Wilson, Tex.
Fary	Risenhoover	Wolff
Findley	Rostenkowski	

The SPEAKER. On this rollcall 387 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PROVIDING FOR CONSIDERATION OF H.R. 11315, FEDERAL ELECTION CAMPAIGN ACT AMENDMENTS OF 1978

The SPEAKER. The Chair recognizes the gentleman from Missouri (Mr. BOLLING).

Mr. BOLLING. Mr. Speaker, I yield the balance of my time to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, this has been an intriguing debate.

The gentlemen on my left have asserted that they oppose this open rule because they see it as a partisan maneuver, and, of course, the gentlemen on my left disparage partisan maneuvers.

And then I hear the vicious rumor that the gentlemen on my left have caucused today and have been bound to a man and to a woman to vote against this rule. I do not for a moment believe that to be true, because I have faith in the gentlemen on my left who despise partisan maneuvers and who have said eloquently here today that they believe in freedom of choice for the little man.

Let me not disparage our Republican friends. This is a two-party system, as my friend, the minority leader, has asserted, and we are interdependent one upon the other.

I used to wonder what makes Republicans. But then I thought, and I realized the truth that Democrats make Republicans.

Then, given a little while, they return the favor. Things tighten up, and that

fellow who thought, once he got that second car and that power-driven lawnmower, that he had to put a Republican sign in his yard to show that he had arrived, begins to discover that if he is going to keep on living like a Republican he better darn well start voting like a Democrat. So we are interdependent.

I have been intrigued by the logic that has been presented against this open rule. One of the spokesmen said, in effect, "Oh, I am for public financing, but not today. This isn't the way to do it. We ought to do it some other time or some other way."

One of the gentlemen says, "Oh, there is good in this bill and there is reform that needs to be made in the election laws of our country, but not under this open rule, not today—some other time."

And then with disarming candor my dear friend, the gentleman from Arizona (Mr. RHODES), the minority leader, says, "Vote down this rule and let's put an end to this for all time."

Well, this is an open rule. Do you wish to deny your colleagues the privilege of voting, however you may feel, upon the various issues at stake?

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Oh, of course, I yield to my friend, the gentleman from Arizona (Mr. JOHN RHODES). I could not deny him.

Mr. RHODES. Mr. Speaker, I think the key word was this: that I wanted to put an end to. And the thing I wanted to put an end to was this apparent penchant on the part of the gentleman and some of the members of the Committee on House Administration to do us in. I do not think I should be condemned for wanting to do away with the practice of people drawing guns on me and who have concealed knives, which would end up with my political death. I plead guilty to the fact that I do not like that.

Mr. WRIGHT. Mr. Speaker, I will assure the gentleman that I would disarm in public.

The gentleman from New Jersey (Mr. THOMPSON) has already surrendered his firearms. He has agreed—and I think this is important—to drop that provision from the bill which is most distasteful to the gentleman from Arizona. Really and truly, we ought not craft a bill deliberately in a way that would predetermine the outcome of an election as between one party and the other. I will join this pledge and my colleagues will join this pledge: We will follow the gentleman from New Jersey (Mr. THOMPSON). We will continue to allow the Republican Party to give just as much money as it has been giving directly to its candidates under existing law. We will make no change that denies them that right, just so nobody can say this is a partisan maneuver.

But let me say what this bill does that needs doing and will not get done unless we have a chance to vote on it. It does what the gentlemen on my left plainly want to do, and that is to give the little fellow an opportunity.

If it is true that the gentlemen and the ladies and the Republican Party have raised a lot of money with small contributions, I salute them for that. I think that is very healthy for the democratic process. There is nothing in this bill, however, that will inhibit anybody from giving in small denominations—not one thing—and we will permit the Republican Party, with however much money it has, to continue to give as much as it desires to give legally and openly and directly to its individual candidates.

But what we should not permit is the proliferation of booster clubs, A, B, C, and D as separate funnels so that they wind up giving indirectly to a candidate $50,000 to $100,000 that has been raised from the big and little man who never heard of the candidates who are the recipients of the party's largesse.

There is another thing this bill will prevent and which needs to be prevented. I think we made a serious mistake in election-law reform with the creation of the Election Commission which was given the almost wholly unbridled authority to write rules wholly out of conformity with congressional intent.

They have written some rules that are bad. I do not think any person in this House would agree to this one recent thing: The FEC made a ruling a few days ago to the effect that a corporation, ITT, can send out to all its stockholders with its periodic dividends a card with a negative checkoff containing instructions that, unless you check this box, find an envelope, put a stamp on it, return it to us and tell us we cannot, then we assume you have given us the right to deduct 10 cents per share to give to whatever candidate we decide we want to give it to.

Unless something is done to stop it, that is presumed to be the law because it has been so decreed by the Presidentially appointed, unelected officials of the Federal Election Commission.

Mr. Speaker, there is another thing that I think has been abused; and I think most of us agree it has been abused. That is the manner in which some who raise funds have made a racket of raising funds. There was a study printed in one of the Washington journals only a couple of days ago which indicated that the practice of professional fundraisers of sending out correspondence to widespread mailing lists has resulted in only about 27 percent of the funds innocently given by these so-called little people actually reaching a candidate for public office.

Mr. Speaker, I think that is something we want to stop.

I think if we trust the House and its Members, in their good judgment, to make wise decisions, whether we like public financing or not, we should vote for the rule. The Members who are against public financing should vote against the amendment that would install it. However, my good friend, the gentleman from Michigan, speaks of the fat cats being for this rule. I have never seen any fat cat yet who was for public financing, not one; and it is the only means, according to the Supreme Court, by which we can legally establish a binding and enforceable limitation on the amount of money that can be spent in an election campaign.

Mr. Speaker, there is one question: Do we want the seats in Congress to be put up for bid to the highest bidder like a seat on the New York Stock Exchange? If you think that is wrong, if you think there ought to be some way to control it, then vote for the rule. If you do not like some of the amendments, vote against the amendments. If you want an amendment, introduce it and vote for it. Nothing in this rule inhibits you.

Mr. Speaker, this is an open rule; and the question is, Do we want to allow the House to work its will on campaign reform?

Mr. BOLLING. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 198, nays 209, not voting 27, as follows:

[Roll No. 174]

YEAS—198

Addabbo	Fowler	Nowak

NOT VOTING—27

Akaka	Flood	Ryan
Anderson, Ill.	Frey	Sarasin
Annunzio	Lederer	Scheuer
Collins, Ill.	Madigan	Shipley
Dellums	Metcalfe	Teague
Diggs	Myers, Michael	Thornton
Erlenborn	O'Brien	Tucker
Fary	Risenhoover	Whitley
Findley	Rostenkowski	Wilson, Tex.

The Clerk announced the following pairs:

On this vote:

Mr. Akaka for, with Mr. Charles Wilson of Texas against.

Mr. Flood for, with Mr. Whitley against.

Mr. Metcalfe for, with Mr. Diggs against.

Mrs. Collins of Illinois for, with Mr. Shipley against.

Mr. Teague for, with Mr. Risenhoover against.

Mr. Dellums for, with Mr. Anderson of Illinois against.

Mr. Scheuer for, with Mr. Madigan against.

Until further notice:

Mr. Lederer with Mr. Frey.

Mr. Ryan with Mr. Michael O. Myers.

Mr. Thornton with Mr. O'Brien.

Mr. Tucker with Mr. Sarasin.

Mr. Erlenborn with Mr. Findley.

So the resolution was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON S. 9, OUTER CONTINENTAL SHELF LANDS ACT AMENDMENTS OF 1977

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 9) to establish a policy for the management of oil and natural gas in the Outer Continental Shelf; to protect the marine and coastal environment; to amend the Outer Continental Shelf Lands Act; and for other purposes, with House amendments thereto, insist on the House amendments, and agree to the conference asked for by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from New York? The Chair hears none, and appoints the following conferees: Messrs. MURPHY of New York, UDALL, EILBERG, BREAUX, STUDDS, HUGHES, MILLER of California, DODD, SEIBERLING, FISH, FORSYTHE, YOUNG of Alaska, and TREEN.

And as an additional conferee, Mr. DINGELL, of Michigan, solely for consideration of the provisions contained on page 8, lines 1–8; page 20, lines 12–14; page 30, lines 5–11; page 156, line 24 through page 158, line 18; and on page 167, lines 10–17 of the House engrossed amendment to the bill S. 9 and modifications thereof committed to conference.

CONFERENCE REPORT ON H.R. 5383, AGE DISCRIMINATION IN EMPLOYMENT ACT AMENDMENTS OF 1978

Mr. HAWKINS. Mr. Speaker, I call up the conference report on the bill (H.R. 5383) to amend the Age Discrimination in Employment Act of 1967 to extend the age group of employees who are protected by the provisions of such act, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. BAUMAN. Reserving the right to object, I do so only to ask someone as to what the program might be for the balance of the afternoon. Are we to take up any other legislation after the age discrimination conference report? Can the Speaker give us any enlightenment?

The SPEAKER. The Chair will report to the gentleman that in the event this will take less than an hour, we will go to the postal legislation.

Mr. BAUMAN. I thank the Speaker and withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of March 14, 1978.)

Mr. HAWKINS (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the statement be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER. The gentleman from California (Mr. HAWKINS) and the gentleman from Minnesota (Mr. QUIE) will be recognized for 30 minutes each.

The Chair recognizes the gentleman from California (Mr. HAWKINS).

Mr. HAWKINS. I yield myself such time as I may consume.

Mr. Speaker, on March 2, the House and Senate conferees reached a compromise agreement on this vital piece of legislation. Today, my colleagues in the House will have the opportunity to support the conference report agreed upon by the House and Senate conferees. While the bill is not a perfect piece of legislation, we believe that it represents the first step in our long struggle to abolish the practice of mandatory retirement based solely on age.

Let me point out that in striving to achieve this goal in no way implies that we are opposed to retirement. Instead, we want to reaffirm our intent to protect the employment opportunities of older Americans and afford them the opportunity to make their own choice between employment and retirement. The legislation that we are considering today will provide older working citizens with that choice which has been denied them thus far. As we in the Congress strive to eliminate all forms of discrimination, it is imperative that we act to end age discrimination in employment as well.

Mr. Speaker, I would like to briefly describe the action which the conferees took in approving this bill.

RAISING THE UPPER AGE LIMIT

First, both House and Senate bills raised the upper age limit for coverage under the Age Discrimination in Employment Act for non-Federal employees from the current level of 65 years of age to 70 years of age. The House provision delayed this action until 6 months after enactment while the Senate bill specified January 1, 1979, as the effective date for raising the upper age limit. The House receded from its position and agreed to extend the effective date of this provision as a means of providing employers with the maximum leadtime in order to bring their plans into compliance with the new law. Moreover, the administration had requested that the effective date be extended to January 1, 1979, in order to evaluate the potential impact of the new law and make appropriate recommendations to the Congress if necessary.

BONA FIDE EXECUTIVE EXEMPTIONS

During Senate consideration of amendments to the ADEA, an amendment offered by Senator PELL to exempt highly compensated executives was adopted. The House-passed bill did not contain a similar provision. In explaining his

amendment, Senator PELL made the following statement on the floor of the Senate:

. . . When this bill was considered by the full Human Resources Committee, the committee accepted a provision I offered to exempt a very small and very well defined group of high level executives from coverage under this bill after age 65. Today I ask for the support of my colleagues in retaining that exemption.

. . . This executive exception touches only a very small fraction of any company's work force, and even a small fraction of its executive personnel per se.

The Senate bill permitted compulsory retirement of highly compensated employees between the ages of 65 through 69 if they receive an employer-provided annual retirement income of at least $20,000, exclusive of social security benefits.

The conferees agreed to retain this provision with certain modifications. The conference bill provides that the exemption apply only to those employees who for the 2 years prior to retirement serve in a bona fide executive or high policymaking capacity. The conferees also agreed to raise the retirement income from $20,000 to $27,000 annually excluding social security, employee contributions and contributions of prior employers.

The conference amendment also clarifies that an employee will not be eligible for mandatory retirement solely because he or she meets the retirement income test of $27,000. The employee must meet the definition of bona fide executive or high policymaking employee. The conferees agreed that to fall within the test employees must be a bona fide executive as defined in regulations under the Fair Labor Standards Act (29 CFR 541.1), in addition to meeting the other requirements.

In addition, the conferees added the term "high policymaking" employee. This group of employees is limited to those individuals who have little or no line authority but whose position and responsibilities are such that they play a significant role in the development of a corporate policy and effectively recommend the implementation thereof. For example, the chief economist of a corporation typically has little line authority. The responsibilities of a chief economist would be to evaluate significant economic trends and to develop and recommend policy direction to the top executives. Such an employee would meet the definition of a "high policymaking" employee.

The conferees further agreed that this exemption is not applicable to Federal employees covered by section 15 of the act.

TENURED COLLEGE FACULTY EXEMPTION

The Senate bill also contained a provision, offered by Senator CHAFEE, which permits colleges and universities to maintain compulsory retirement policies for faculty at 65 or above who are serving under a contract of unlimited tenure. The House bill did not include such a provision. However, the House conferees agreed to a limited exemption which expires on July 1, 1982.

REMOVING THE UPPER AGE LIMITATION FOR FEDERAL EMPLOYMENT

An additional important provision contained in the conference agreement is the House amendment which entirely uncaps the upper age limitation for most civilian Federal employees. This amendment does not affect certain Federal employees whose retirement is required or otherwise authorized by statute. The Senate legislation did not affect the upper age limit with respect to Federal employees. However, the Senate conferees receded on this provision with an amendment that the effective date be delayed until September 30, 1978. The inclusion of Federal employees is largely the result of Senator PEPPER's tireless efforts to allow the Federal Government to serve as the model for private industry by abolishing mandatory retirement solely on the basis of age.

CLARIFICATION OF SECTION 4(f)(2)

Another significant provision contained in both House and Senate bills is the clarification of section 4(f)(2) of the act which prohibits mandatory retirement of an employee within the protected age group pursuant to a bona fide employee benefit plan or seniority system which requires or permits such retirement. The conferees agree that the purpose of this amendment is to make absolutely clear that this exception does not authorize an employer to require or permit involuntary retirement of an employee within the protected age group on account of age. This provision takes effect upon enactment with one exception. The conference agreement contains a provision which defers the effective date prohibiting mandatory retirement policies of persons aged 65 through 69 if such retirement is required or permitted by an employee benefit plan contained in a collective bargaining agreement in effect prior to September 1, 1977. The effective date of the prohibitions in these situations is the termination date of the collective bargaining agreement or January 1, 1980, whichever comes first.

In *McMann* v. *United Airlines, Inc.*, 98 S. Ct. 244 (1977), the Supreme Court ruled on the mandatory early retirement provisions in section 4(f)(2) for the first time, reversing a decision reached by the fourth circuit court of appeals (542 F. 2d 217 (1976)). Specifically, the Supreme Court upheld a plan which was established before the ADEA was enacted and which required retirement of all participants at age 60. Participation in the plan was voluntary, not compulsory. By virtue of this amendment, such a plan no longer falls within the section 4(f)(2) exception. Contrary to the Supreme Court's rationale, this amendment makes clear that regardless of when an involuntary retirement provision in a plan became effective—before or after the enactment of the ADEA or of these amendments—it is unlawful if it is triggered by the fact that an employee reaches an age within the protected age group. The conferees specifically disagree with the Supreme Court's holding and reasoning in that case, particularly its conclusion that an employee benefit plan which discriminates on the basis of age is protected by section 4(f)(2) because it predates the enactment of the ADEA.

WELFARE BENEFITS

Concerns have been expressed that these amendments will increase the costs of employee welfare benefit plans, such as those that provide disability, health, life and other forms of insurance for employees.

Benefits would not have to be equal where there is a legitimate economic or business purpose other than age which justifies the differential in benefits. The purpose of section 4(f)(2) is to encourage the employment of older workers by permitting age-based variations in benefits where the cost of providing the benefits to older workers is substantially higher. Any age-based differences in benefits would have to be evaluated under the standard in section 4(f)(2).

In view of the widespread interest in this subject, we would expect the Department of Labor to issue guidelines in the near future.

Mr. Speaker, I would like to take this opportunity to express appreciation to my colleagues in the House who have worked so long and so hard to bring us to this rewarding moment. Representatives PEPPER and FINDLEY, who authored this legislation and who sincerely represent the interests of this Nation's elderly, are to be congratulated for their outstanding leadership on H.R. 5383. In addition, Mr. WEISS and Mr. WAXMAN should be justly proud of this moment for their tireless efforts to end age discrimination in employment. I am also grateful for the support of my colleagues on the Subcommittee on Employment Opportunities as well as those members of the Select Committee on Aging who contributed significantly to the development of this legislation. I want to also acknowledge the 169 Members who cosponsored legislation to terminate age discrimination in employment. Finally, I want to express my appreciation to the 358 of my colleagues who joined with me in voting to pass this legislation last September 23.

I would be remiss if I did not thank our Senate colleagues, especially Senators WILLIAMS and JAVITS, who contributed so much to this final bill. I am well aware that there are countless others who have worked selflessly to help us reach this moment. We are also grateful to each and every one of you for your support.

Mr. Speaker, in closing, I urge the immediate adoption of this conference report.

Mr. DENT. Mr. Speaker, will the gentleman yield?

Mr. HAWKINS. I yield to the gentleman from Pennsylvania.

Mr. DENT. Mr. Speaker, in order that there be no question about the committee handling of pension legislation, I have arranged with the gentleman from California to make the record very clear. I would like to put this question to the gentleman:

Is it the intention of the conferees that an employer will be permitted, under the Age Discrimination in Employment Act

of 1967 as amended, to maintain a defined contribution plan—other than a plan which is merely supplemental to a defined benefit or defined contribution plan maintained by the employer—which precludes employer and, if applicable, employee contributions to such a plan subsequent to an employee's attainment of the normal retirement age contained in the plan?

Mr. HAWKINS. Yes. The answer to the gentleman's question is "Yes."

The conferees intend that an employer will not violate the Age Discrimination in Employment Act by maintaining such a defined contribution plan. This position is in keeping with the general view of the House and the Department of Labor with regard to prohibited age discrimination in the context of pension plans covering employees who continue employment beyond the normal retirement age, as expressed in a letter of September 8, 1977, from Assistant Secretary Elisburg to me which appears in the CONGRESSIONAL RECORD of September 23, 1977, at page 30564.

Mr. DENT. Mr. Speaker, I thank the gentleman from California, and I want to assure the gentleman that we approve this action and support the legislation.

Mr. HAWKINS. At this point, Mr. Speaker, I yield such time as he may consume to the chairman of the full committee, the gentleman from Kentucky, Mr. CARL PERKINS, who has contributed such a great deal to the advance of this legislation, bringing the bill to the point that we are now voting on the conference report. I certainly wish to commend the gentleman for his leadership on the Committee on Education and Labor, and he is to be congratulated for the fine result we have obtained.

Mr. PERKINS. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, the conference report before us is a much needed measure which will go a long way in protecting older American workers.

I strongly supported H.R. 5383—which passed the House overwhelmingly on September 23—as a sound piece of legislation, and I believe that the conference report which we have before us today reflects a satisfactory compromise between the House and Senate versions of the bill.

At the outset, Mr. Speaker, I want to commend the distinguished chairman of the Subcommittee on Employment Opportunities, the Honorable AUGUSTUS HAWKINS, for the expeditious manner in which he guided the bill through committee, onto the floor, and through difficult conference proceedings. I want to compliment the ranking minority member of the committee, Mr. QUIE, and members of the committee from both sides of the aisle for their efforts on this legislation.

I would be remiss if I did not make special mention of the contribution made by a freshman member of our committee—Mr. WEISS of New York. He is the author of a very significant portion of this report and he is to be commended.

H.R. 5383 was originally introduced by our able colleagues, the gentleman from Florida (Mr. PEPPER) and the gentleman from Illinois (Mr. FINDLEY), respectively the chairman and ranking minority member of the Select Committee on Aging.

Congressman PEPPER in particular has long been a recognized and leading advocate of legislation which will benefit older Americans, and he is to be commended for his unwaivering dedication to them.

Turning to the report, the upper age limit protected under the act for non-Federal employees is extended from the current level of age 65 to 70, effective January 1, 1979. The upper age protection for Federal employees is lifted entirely as of September 30, 1978.

The principal issues in the conference were the two exemptions in the Senate bill relating to tenured faculty and executives.

The Senate amendment provided that certain high-level executives may be mandatorily retired between the ages of 65 and 70. There was also a Senate amendment which would permit mandatory retirement of college and university faculty members between 65 and 70 years of age who are serving under a contract or similar arrangement which provides for unlimited tenure.

The House bill contained no such provisions, and we tried mightly to resist both of these exemptions in conference. However, the Senate was adamant. We were successful, however, in limiting both exemptions. In the case of the college and university faculty exemption, a House amendment was adopted which provides that the exemption will be repealed on July 1, 1982. We were successful, also, in restricting the scope of the executive exemption by more precisely defining in a limiting way the type of positions which would qualify for the exemption and by increasing the pension income that an executive must receive in order to qualify.

Mr. Speaker, this is both a practical and far-reaching piece of legislation. It is a bill which will not only aid a large and deserving segment of our population, but one which will benefit the Nation in terms of the special contributions that older workers can make to our society because of their wealth of knowledge and experience. I urge my colleagues to support this conference report.

Mr. QUIE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join the gentleman from California (Mr. HAWKINS) in urging the adoption of the conference report.

The House was nearly unanimous in passing H.R. 5383 last September, reflecting our strong commitment to protecting and promoting the individual worth of our older citizens. Our hearings amply demonstrated that the traditional mandatory retirement age of 65 has become a relic of the past. Advancements in medicine have enabled our citizens to live longer and to be healthier. Moreover, we realize from our greater understanding of the aging process how being able to work during the senior years vitally contributes to the well-being of the individual.

In short, these 1978 amendments continue to pave the way for our senior citizens to make valuable contributions to our society and our economy and, above all, to their own welfare.

As the gentleman from California (Mr. HAWKINS) has explained, the conference report continues to reflect our commitment to the policies that were embodied in the bill as originally passed.

We did accept amendments specifically which exempt tenured college professors, thus permitting them to be mandatorily retired when they reach 65 years of age. However, this exemption expires on July 1, 1982, and after which tenured professors will be protected through age 69.

It also permits the mandatory retirement of those individuals between 65 and 70 who for 2 years before retirement were employed as a bona fide executive or high policymaking position. That individual must be entitled to a pension from the employer of at least $27,000 a year in order to trigger this exemption.

I would only add a few comments regarding three important procedural amendments which were included in the Senate amendments to the bill.

Upon closer examination of these amendments and of their impact upon the enforcement scheme under the act, the conferees concluded that they should be accepted in modified form. The conferees believe that the compromise adequately rectifies the problems that gave rise to original Senate amendments. At the same time, the compromise does not upset the balance of interests struck by the original act.

Thus, the Senate amendment discarded the 180-day notice-of-intent-to-sue requirement in order to prevent unjustified dismissals of lawsuits on procedural grounds. Yet, in so doing, the amendment would have created a disparity with the 180-day charge requirement under title VII of the Civil Rights Act, which prohibits the other forms of employment discrimination—namely race, sex, national origin, color, religion. Further, elimination of the 180-day notice requirement would have sacrificed the benefits that accrue from early involvement of the Secretary of Labor in attempting to settle the dispute by conciliation. The provisions of the conference report avoids these problems while securing the goal of the Senate amendment:

One. Aggrieved parties must still file within 180 days of the violation;

Two. However, he need only file a charge rather than indicating an intention to file suit—which may very well have discouraged workers in the past from giving prompt notice to the Secretary of Labor; and

Three. Most importantly, the new charge requirement is subject to equitable modification. This means that where a plaintiff fails to give notice within the 180-day period, the court may examine the reasons for such failure. If it concludes, based upon equitable considerations, that the plaintiff had a legitimate excuse, then the lawsuit need not be dismissed.

The Senate adopted a second pro-

cedural amendment which provided that the statute of limitations, with respect to actions filed by the Secretary, could be tolled for a period of up to 2 years during the Secretary's efforts to resolve a dispute through conciliation. The conferees concluded that this extension of time unnecessarily prolonged the period in which suit should be brought.

Allowing the statute to be tolled for a period of up to 1 year achieves a more equitable accommodation of interests inherent in the conciliation and the limitations provisions of the statute. The combined effect of conciliation requirement and the limitations statute is to require the Secretary to fulfill his responsibility to achieve conciliation before legal action is begun.

However, there may be cases—large complex class actions—where it is simply not possible to fulfill this duty within the statutory time limit. The Secretary thus may be forced into court prematurely simply to protect his right of action. The tolling provision helps to alleviate this problem by allowing the Secretary up to an additional year before having to file suit.

The third, Senate amendment made explicit provisions for trial by jury in actions for monetary relief under the act. Subsequent to passage of the Senate amendment the Supreme Court in Lorillard against Pons held that the act as originally enacted did afford a right to trial by jury for claims for recovery of lost wages under the act. However, the court expressed no view on whether the act implicitly authorized a jury trial for claims for liquidated damages under the act. In adopting a revision of the Senate amendment, the conferees make clear that a jury trial is available for deciding those factual issues underlying claims for amounts owing as a result of a violation of the act. Liquidated damages are explicitly authorized as an amount owing under section 7(b) of the act.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding.

Mr. Speaker, I just want to indicate my support for this conference report and express, however, my disappointment in the exemption that is granted to high-salaried executives. I think it is a most unfortunate exemption.

I am aware of the fact that a number of big businessmen have seen fit to urge this exemption. I think they are doing a disservice to the entire business community and to the private enterprise system. Proponents of this exemption make more enemies for private enterprise through the mandatory retirement of executives, who have devoted their lives to the businesses in which they have been engaged. I think it is a very shortsighted position on their part. I think it is unfortunate that the Senate felt compelled to accept this exemption, but I realize the position of the Members of the House. Notwithstanding this bad feature of the conference report, it is a good report and it is an excellent change which we are making in the law.

Mr. QUIE. Mr. Speaker, I appreciate that the gentleman realizes that we did not have those exemptions in the House-passed bill. But we felt this legislation was so important that we ought to accept a scaled down version of the Senate amendments.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Speaker, I rise in support of this conference report to prevent age discrimination in employment. I compliment my distinguished colleague, the gentleman from California (Mr. HAWKINS), and also my distinguished colleagues, the gentleman from Florida (Mr. PEPPER), the gentleman from Minnesota (Mr. QUIE), and the gentleman from Illinois (Mr. DERWINSKI). I know all four of my distinguished colleagues have been in the forefront in making sure that this legislation was enacted this year.

These amendments to the Age Discrimination in Employment Act of 1967 increase the maximum age for protection under the act from 65 to 70 for most private employees, and remove completely the mandatory retirement age of 70 for most federal employees. The bill also clarifies a section of the 1967 act so that an employer may not require or permit involuntary retirement of an employee within the protected age group on account of age.

Many of us oppose mandatory retirement of individuals who are willing and able to work. This bill changes that. In some cases, financial reasons make continued employment necessary in order to maintain one's standard of living. In other cases, individuals simply enjoy their work and wish to continue at their chosen profession. There is no economic, sociological, or biological reason for denying those aged 65 and above the right to earn a living. On the contrary, all the evidence that we have shows that protecting older Americans' right to work is good for all our citizens—young and old alike. Older Americans typically are highly skilled from their years of experience. Their skills are often unique and irreplaceable. They are not only productive, they are often among the most productive members of society. The American standard of living goes down when such highly skilled and productive workers are forced out of the labor force. Furthermore, the right to work help many individuals remain active—the key to a long and healthy life.

I urge my colleagues to pass this needed legislation. We need to end age discrimination in employment.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Speaker, I rise in support of the conference report, and I especially wish to commend my good friend and associate in many legislative activities, the gentleman from Florida (Mr. PEPPER), for his untiring devotion to the principles covered in this measure. I am pleased to support the report.

As a conferee and signer of the conference report on H.R. 5383, I rise in support of its enactment.

I originally cosponsored legislation to end age discrimination in employment because I have long felt mandatory retirement based solely on age is arbitrary since chronological age alone is a poor indicator of ability to perform a job. Forced retirement at age 65 does not take into account people's differing personal abilities, energies, and capacities. Many people want to continue working after age 65 and are able to make a contribution to our economy, and in turn, earn their own way and continue to have the dignity their working brings them.

National public opinion polls show an overwhelming majority of Americans are opposed to mandatory retirement because of age.

This compromise measure eliminates mandatory retirement for most Federal employees, and raises the mandatory retirement age limit in the private sector from 65 to 70.

The bill also provides for the Civil Service Commission to prepare a study on the effect of amendments on Federal employees. This study is required to be sent to the President and the Congress by January 1, 1980.

Mr. Speaker, I urge prompt approval of this conference report.

Mr. MARTIN. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from North Carolina.

Mr. MARTIN. I thank the gentleman for yielding.

Mr. Speaker, I, too, want to commend the members of the conference committee representing the House for the work they have done in bringing before us this conference report, because we do want to move forward with this protection for older workers against discrimination that has been practiced in the past.

I want to say that I do still have some reservation with the exemption that is continued temporarily for older faculty members. As a former chemistry professor in real life, before I came to the Congress, I knew from experience that some of the best minds of the faculty could be found in all age groups of the faculty.

The best teachers were not limited to the younger members, nor were they limited to the older members. I personally see no reason to allow specific discrimination to continue against older faculty members.

Nevertheless, I appreciate the problem that faced the conferees. I think it is a substantial achievement that they have made in the interest of equity and fair treatment and appreciate the fact that they were able to include in this conference report a provision that discrimination against older teachers will expire in 1982. I would have liked them to have it expire tomorrow, but I appreciate the problem that the conferees had, and I commend the commit-

tee of conference for that achievement, at least.

Mr. QUIE. Mr. Speaker, let me say to the gentleman from North Carolina (Mr. MARTIN) that it is also a requirement of the bill that the Secretary of Labor conduct a study on the effect of this provision for executive employees to continue teaching personnel, so that when it comes up, the Congress may want, based on the findings of the study, to have it terminated sooner than that.

Mr. MARTIN. I would hope that my colleagues can be active and instrumental in getting this conference report agreed to and that they can personally keep attention focused on that question so that if it does appear that there may be earlier action to enable that discriminatory provision to be phased out, they can initiate it.

Mr. QUIE. I will leave that to those Members who will be here at that time.

Mr. MARTIN. Mr. Speaker, I thank the gentleman.

Mr. QUIE. Mr. Speaker, the material to which I referred earlier follows:

CONFERENCE REPORT ON THE AGE DISCRIMINATION IN EMPLOYMENT ACT AMENDMENTS OF 1978 (H.R. 5383)

The conference report amends the Age Discrimination in Employment Act of 1967, to raise the maximum age for protection under the Act from 65 to 70 for most private employees, and to abolish the age limit completely for most federal employees.

ACTION BY THE 95TH CONGRESS

Passed House September 23, 1977 (359–4) (H. Rpt. 95–527, Part I).

Passed Senate October 18, 1977 (88–7) (S. Rpt. 95–493).

Conference reported March 14, 1978 (H. Conf. Rpt. 95–950).

CONFERENCE REPORT SUMMARY

The bill amends and strengthens the Age Discrimination in Employment Act of 1967 (ADEA) by increasing the maximum age for protection under the Act from 65 to 70 for most private employees, and by removing completely the mandatory retirement age of 70 for most federal employees. The bill also clarifies Section 4(f)(2) (bona fide retirement plans) under the ADEA so that the exception does not authorize an employer to require or permit involuntary retirement of an employee within the protected age group on account of age.

PRIVATE EMPLOYEES

Under ADEA, most employers, employment agencies and labor unions are prohibited from discriminating because of age against persons aged 40–65 in such matters as hiring, job retention, promotions and compensation. State and local governments are also covered under the Act. The bill would increase the maximum age for protection from 65 to 70, effective January 1, 1979, except for delays in effective dates and exemptions noted below.

Collective Bargaining Agreements: If a collective bargaining agreement in effect on September 1, 1977, provides for the involuntary retirement of individuals over 65 years of age but less than 70, the effective date for prohibiting such involuntary retirement is delayed until the collective bargaining agreement expires, or until January 1, 1980, whichever comes *first*.

Tenured Professors: The bill permits the mandatory retirement of tenured college professors who are 65 years of age but less than 70 until July 1, 1982. At which time, the exemption expires automatically.

Executives and High Policymakers: The bill permits mandatory retirement between the ages of 65 and 70 of an individual who, for the two years before retirement, is employed in a bona fide executive or high policy-making position, if the individual is entitled to a pension from the employer of at least $27,000 a year. Conferees agreed that this exemption is meant to cover high-level employees with important executive duties.

Labor Department Study: The bill directs the Secretary of Labor to study and report to Congress and the President with recommendations on the impact of raising the upper age limit under ADEA to 70, the feasibility of increasing the limit further or abolishing it completely, and the effects of the tenured professor and executive employee exemption of this bill. This Secretary is to transmit an interim report by January 1, 1981, and a final report by January 1, 1982.

FEDERAL EMPLOYEES

The bill abolishes the present mandatory retirement age (70) for most federal employees, effective September 30, 1978, and establishes a minimum age of 40 for protection of federal employees under the Act. (Federal employees subject to another statutory retirement age would not be affected by the bill. This would include such groups as law enforcement and firefighting personnel, air traffic controllers, and Foreign Service personnel.)

The Civil Service Commission would be required to study and report to Congress and the President on the effect of these changes by January 1, 1980.

Mr. HAMMERSCHMIDT. Mr. Speaker, will the gentleman yield?

Mr. QUIE. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Speaker, I support this conference report which gives final approval to legislation which marks an important step in affirming and protecting the rights of older Americans. The compromise we have reached seeks to end mandatory retirement for most Federal employees and to add 5 years to the working lives of most employees in the private sector. I believe, however, that our vote today goes far beyond the specific mandates contained in the legislation. In a broader sense, we are revising a national policy that does violence to our sense of dignity, the rejection of capable men and women from the work force based on an arbitrary factor—age.

Though the concept of protecting elderly workers against involuntary retirement has been overwhelmingly approved by Members of the House and Senate, it has met with skepticism from various segments of the public who would have us believe that we are opening Pandora's box. It is true that we are lacking a solidly based analysis of the legislation's prospective economic impact. However, we do have some data which allows us to predict what the impact of this initiative will be.

One fear frequently expressed is that this change will have a chaotic effect on the ability of companies to plan for future trends in employment and retirement. I would like to point out that major firms which have abandoned mandatory retirement and continued to operate successfully testified before the Select Committee on Aging, of which I am a member. While I am aware that each company has unique features and requirements which dictate certain personnel practices, the successful experiences of these major firms cast doubt on the belief that putting an end to mandatory retirement will automatically disrupt a company's efforts to plan for the future. In fact, representatives of several firms which favor mandatory retirement testified that the impact of the proposed change on their companies could well be negligible.

Another concern which has been expressed is that our current high level of unemployment will be exacerbated by Federal efforts to curb mandatory retirement. Testimony presented before the Select Committee on Aging indicated that no study has evidenced on a case by case basis that the retirement of an elderly person was the direct cause of the employment of a younger person. In addition, economists agree that there is no revolving door in the labor force which insures the employment of a younger person when an older person is forced to retire. Further, statistical records indicate that mandatory retirement not only renders old people themselves unemployed, but, particularly in periods of economic contraction, it also suppresses employment opportunities both for the general population and even more for youth. According to Dr. Robert D. Gordon, each person's job actually creates jobs for other people.

These two issues of company planning and unemployment deserve more consideration. The truths and myths about mandatory retirement will be proved or refuted with empirical data. Thus, I am pleased that this legislation before us directs the Secretary of Labor to study the impact of the changes to be made in the age limit, the feasibility of raising or abolishing the limit completely, and the effects of the exemptions which are included.

Regardless of the still unanswered questions which we may have, any compelling arguments or fears which may be expressed against mandatory retirement must be balanced against the cost of this policy to the self-confidence, personal dignity, and productivity of elderly persons. The decision we make today will solidly affirm our belief in the importance of these basic human needs to the lives of older Americans.

Mr. QUIE. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. WAMPLER).

Mr. WAMPLER. Mr. Speaker, I thank the gentleman for yielding. I am pleased to rise in support of the conference report to accompany H.R. 5383, to extend the age of protection under the Age Discrimination In Emloyment Act of 1965. The outstanding performance of the conferees in representing the views of the House, resulted in the strongest possible legislation to reduce the incidence of mandatory retirement and age discrimination in employment.

Mr. Speaker, mandatory retirement policies in non-Federal employment will certainly be reduced by the provision which extends the age of protection from ages 40–65 to ages 40–70, for most em-

ployees in the private sector. This amendment to section 12 of the act will become effective on January 1, 1979.

Additional protection from age discrimination for workers up to the age of 70 is provided by clarifying section (4)(f)(2) to prevent seniority systems and employee benefit plans from requiring involuntary retirement. This provision is effective immediately upon enactment, except for employees covered by collective bargaining agreements, in effect on September 1, 1977. Collective bargaining agreements which mandate retirement, will be granted an extension until the termination of the agreement or on January 1, 1980, whichever occurs first. However, nonunion employee benefit plans are not granted this extension and must comply with the amendment to section (4)(f)(2) on the date of enactment.

The conference report allows compulsory retirement between the ages of 65 and 70 of an employee that holds a bona fide executive or high policymaking position for 2 years immediately prior to retirement, if the employee is entitled to an immediate nonforfeitable annual retirement benefit from pensions, profit-sharing, savings, or deferred compensation plans which equals, in aggregate, at least $27,000. In calculating the retirement income, the conference agreement excludes social security, employer contributions, and contributions of prior employers. In addition to this exception, the bill permits compulsory retirement of college and university faculty members between the ages of 65 and 70, who are serving under a contract or unlimited tenure. However, the conferees agreed to accept a House amendment that will repeal this exemption on July 1, 1982.

With regard to Federal employment, section 12 of the act will be amended to eliminate the present mandatory retirement age of 70 for most Federal employees and establish a minimum age of 40 for protection from age discrimination. This amendment to the act will become effective on September 30, 1978. Federal employees whose retirement is authorized by other statutes, such as law enforcement personnel, air traffic controllers and Foreign Service personnel, will not be affected by this amendment.

Mr. Speaker, I urge passage of the conference report on H.R. 5383, as a measure of equality of opportunity for those who wish to remain in the productive segment of our society, regardless of age. The arbitrary retirement of persons, solely on the basis of age, is no longer morally justifiable nor economically sound. The elimination of mandatory retirement policies, will, in my opinion, have only a negligible adverse effect upon present labor and management practices, as a limited number of persons are presently subjected to mandatory retirement policies and the growing trend within this group is toward early retirement.

Revisions in our present mandatory retirement policies are certainly warranted by demographic factors such as increased life expectancy and the growing proportion of persons 65 and over within the population.

In addition to the economic tragedy of mandatory retirement, the human and social consequences of ageism are immeasurable. Compulsory retirement may impair the physical and emotional health of those whose job represents a major source of status, creative satisfaction, social relationships and self-respect.

Mr. Speaker, adoption of the conference report to accompany H.R. 5383, will open the door of equality of opportunity and freedom of choice in employment for countless productive older citizens. The long awaited legislative reforms, embodied in H.R. 5383, will provide dignity, productivity, and security through continued employment opportunity for our present and future elderly populations.

Mr. QUIE. Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. GRASSLEY).

Mr. GRASSLEY. Mr. Speaker, I thank the gentleman for yielding.

I rise in support of the conference report.

Many people have spoken of certain aspects of this conference report that they felt were compromised that shouldn't have been compromised, but I think it is a practical conference report, perhaps a lot more than we could have expected when we first passed this bill last year.

Therefore, Mr. Speaker, I want to compliment the conferees on that score, because I think it is a great advancement in our continued effort to eliminate discrimination based on age.

I think it is the dawn of a new day when I hope two things will eventually happen: one, that there will not be any legal difference between public-sector employment and private-sector employment affecting age discrimination; and two, that it will usher in the day when there will not be any discrimination based on age and, hence, no laws needed.

I think that these laws are a step in the direction of mainstreaming senior citizens. Unless we do that, then, of course, no law is any good because the end result has to be to keep senior citizens in the mainstream of society until their days on Earth are brought to an end.

Age discrimination with the result of segregating senior citizens from the mainstream of society is unjustifiable and must end; this report is a step in the direction of keeping senior citizens in the mainstream of society.

Mr. QUIE. Mr. Speaker, I thank the gentleman for his comments because some of the senior citizen programs that this Congress has established and that have been in operation have been probably some of the most outstanding in order to enable those individuals to live useful lives and continue their health, which can only occur when they have the rewards of doing something of value for their community. Certainly, being employed is one of the most valuable things for a community that there is.

Mr. HAWKINS. Mr. Speaker, I yield myself such time as a I may consume.

I would be remiss if I did not indicate that the conference report is actually the united work of four Members, two members of the committee and also two others, including the gentleman from Illinois (Mr. FINDLEY), the gentleman from New York (Mr. WEISS), and the gentleman from California (Mr. WAXMAN).

Obviously, Mr. Speaker, we should point out that the leadership over the years in this field belongs to that veteran colleague of ours, Senator PEPPER, and at this time I am very pleased to yield 5 minutes to the gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Speaker, as chairman of the House Select Committee on Aging and as one of the principal authors of H.R. 5383, I call upon my colleagues in the House to approve this important conference report.

Mr. Speaker, I would like to pay the highest tribute that I possibly can to the distinguished gentleman from California (Mr. HAWKINS), and to the distinguished chairman of the Education and Labor Committee, the gentleman from Kentucky (Mr. PERKINS) for the magnificent leadership they have given to this cause since it came to the House of Representatives. In the Committee on Education and Labor and in the conference committee, both gave magnificent leadership to the cause and brought forth to a large extent the conference report that we have today. Mr. HAWKINS has already commended our distinguished colleague from New York (Mr. WEISS), and I want to pay the highest compliment to my coauthor, the gentleman from Illinois, Mr. PAUL FINDLEY. In addition, I would like to thank the entire Membership of our Aging Committee, particularly the committee's ranking Democrat, Mr. ROYBAL, and its ranking minority member, Mr. WAMPLER, who worked so hard toward enactment of this legislation.

Mr. Speaker, next to the sentiments of patriotism and to the instincts of honor, I know of no sentiment more deeply embedded in the American heart than the sentiment of fairness; fairness in every aspect of our national life. Today, we are implementing in a great way that principle of fairness to the older people of this country. We are stripping them of what has heretofore been the onerous burden of obsolete experience, or of unjustified prejudice in displacing them from their work in life because they happened to achieve a certain day on the calendar of time.

We know, Mr. Speaker, that time is not the criteria of competence, of an individual's ability to do creditably a job with which he and she has long been associated. And so today, by the passage of the conference report, and when the Senate shall adopt it, as they at an early date will, and when the President will have signed it, as we are sure he will be delighted to do, there will be lifted from the hearts of the elderly people of this country the fear, the unhappy knowledge, that if they are healthy and they survive to 65 years of age, no matter how qualified they are, they will be discharged from the performance of their jobs and be left to wander in the labor market, where there are no jobs ordinarily for people of that age. Now, they can aid the social security system under the law by staying on in their accustomed employment. They

can contribute to the growth and the productivity of our country. They can enjoy a new satisfaction in life, because they will feel that they have something to do in this world. They have not come to the end of their illustrious ways.

Mr. Speaker, in many an elderly heart all over America, when this bill becomes law, there will come back a new spirit of youth, a new vitality, because their Congress, with the strong approval of their fellow countrymen, has adjudged that they have work to do; that they are needed; that their experience is valuable; their competence is required, and that they too have a right to enjoy all the blessings of this wonderful land of ours.

We wish the other body had not insisted upon their exemptions, but we tempered those exemptions with modifications. For example, they wanted to exempt the tenured professors permanently. We limited that to July 1, 1982.

Similarly, they wanted all people whose annual pensions (minus social security) exceeded $20,000 to be exempt. We were able to raise that amount to $27,000 and otherwise narrow the class of employees exempted by the original Senate amendment. I would like to make absolutely clear, as the manager's report states that—

> An employee will not be eligible for compulsory retirement solely because he or she meets the retirement income test. The employee must also meet the definition of bona fide executive or high policymaker contained in the manager's report. This limitation will become especially important in the coming years, as inflation would otherwise bring more and more employees into the exempted group if the test were based solely on their pension incomes.

These restrictive definitions are consistent with the description given by Senator PELL in offering his original amendment. On the Senate floor, Mr. PELL repeatedly described this provision as "a very narrow amendment," applying only to "the topmost levels of corporate decisionmaking" affecting "a very small fraction of any company's work force, and even a very small fraction of its executive personnel * * *."

The conference report also addresses a recent Supreme Court decision in the case of McMann against United Airlines. That decision, issued December 12, 1978, permitted early forced retirement under a pension plan predating 1967. H.R. 5383 reaffirms that this was not the intent of Congress or the statute and that pension plan provisions requiring mandatory retirement that were in effect prior to the date of enactment are not exempt by virtue of the fact that they antedate the act or these amendments to it. This provision will insure that millions of competent workers are not exposed to the threat of forced retirement before age 65.

The exception under section 4(f)(2) of the act is just that—an exception—and as such must be viewed in the narrowest sense. The stated purpose of the act is "to promote employment of older persons passed on their ability rather than age (and) to prohibit arbitrary age discrimination in employment."

For example, employers may offer health and life insurance benefits to older workers that are different from those for other employees. The original reason for this exception was to promote the hiring of older persons. Passage of this act should not be construed by any employer, or any court, to permit the sudden, total and unilateral termination of a capable and healthy worker from a health, insurance or other welfare benefit plan solely on the basis of age and without full economic justification.

The ending of mandatory retirement for all but a few Federal workers is one of the most significant aspects of this legislation. Beginning with those employees turning 70 in September 1978, the Federal Government will be established as a model employer which will use competence, not age, to determine whether a person should retain a job. I am confident that this experiment will demonstrate the desirability of a complete ban on mandatory retirement in the private sector.

As one who looks forward to the day when there will be no discrimination at any age, I will continue to fight toward that end. The day after the President signs this bill into law, I will introduce new legislation to abolish all exemptions and end all age-based compulsory retirement.

Ending mandatory retirement is a bipartisan issue as is evident from the positions of both President Carter and the Republican National Platform on this issue. President Carter has said:

> We need to change the laws and policies that force retirement on older people who are willing and able to work.

The 1976 Republican National Platform declared:

> We favor the abolition of arbitrary age levels for mandatory retirement.

Our own House Select Committee on Aging has unanimously recommended that—

> Legislation to eliminate the upper age limit in the Age Discrimination in Employment Act of 1967 and to end mandatory retirement solely because of age should be enacted as soon as possible.

In fact, a committee report documenting this recommendation shows that outlawing involuntary age-based retirement would not stigmatize older workers, would not demoralize younger workers, would not traumatize supervisors or clog promotional channels with doddering incompetents, would not reduce productivity or jeopardize the financial security of retirees. Our Aging Committee has examined the arguments for and against mandatory retirement and concluded that many of the arguments for mandatory retirement are based on "myth not fact." Mandatory retirement is simply a euphemism which masks the cruelty of age discrimination and forced unemployment.

In addition to our study, studies by the Department of Labor, the Harvard School of Public Health, the National Council on Aging and the New York State Division of Human Rights, sustain the conclusion that in the areas of punctuality, on the job safety, attendance, and work performance, workers over 65, in general are equal to or better than younger workers. The Labor Department, in fact, notes that overall there is a greater discrepancy in work productivity within age groups than between age groups.

We all know the gallant instances in history of those who have achieved great distinction although of an advanced age: Sophocles of the distant past and Winston Churchill and Eisenhower of the recent past. We know also in our hearings a little bit ago that we had an illustrious roster of outstanding Americans over 70 years of age: Averell Harriman, Tom Corcoran, Ruth Gordon, Will Geer, Colonel Sanders of Kentucky Fried Chicken fame, John Wayne, and Bob Hope to mention only a few.

All we are asking, Mr. Speaker, is that an elderly person has the option either to retire at an early age when it is permissible or to continue to work, not being arbitrarily shunted off into the sidelines to be forgotten, neglected, and to die.

Now, Mr. Speaker, this bill will not only benefit the elderly, it will be constructive for American enterprise and business. It will help our social security system by relieving it of a drain of $600 to $700 million a year, it is estimated.

This bill marks a great day forward for America in the recognition of human rights around the world. Now we are beginning to practice that principle more completely at home, in this proposed legislation.

Mr. HAWKINS. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. WEISS), the author of one of the bills which is consolidated as part of this report.

Mr. WEISS. Mr. Speaker, I want to pay my deepest compliments to the chairman of the Subcommittee on Economic Opportunities for his patience and perseverance and wisdom which allowed us to arrive at a conference report of which for the most part we can be proud.

Also I want to pay my deepest respects to our colleague, the gentleman from California (Mr. WAXMAN), who coauthored with me the provisions of this legislation which correct one of the most blatant distortions which crept into the law over the last 10 years with respect to section 4(f)(2).

Mr. Speaker, since 1967, the Age Discrimination in Employment Act (ADEA) has served to protect the employment rights of Americans age 40 to 65. The amendments to this act, to which we give final legislative approval today, both expand coverage under the ADEA as well as clarify a major loophole in the existing law. It is the second function of this legislation to which I would like to address my remarks.

The original ADEA provides for three exceptions for coverage under its provisions. Section 4(f)(1) of the ADEA exempts situations in which age is a "bona fide occupation exception reasonably necessary to the normal operation of the particular business"; this is generally meant to exclude so-called hazardous occupations from the provisions of the act.

Section 4(f)(3) states that older workers can be discharged for good cause. While there is universal acceptance of these two provisions, the third exception, section 4(f)(2), has been subject to a variety of interpretations including, most recently, that of the Supreme Court in the case of *McMann* v. *United Airlines*, (98 S. Ct. 244 (1977). It is the purpose of this legislation to clarify any misinterpretation of section 4(f)(2).

Section 4(f)(2) in its original form states the following:

It shall not be unlawful for an employer, employment agency, or labor organization—

To observe the terms of a bona fide seniority system or any bona fide employee benefit plan such as retirement, pension, or insurance plan which is not a subterfuge to evade the purposes of this act, except that no such employee benefit plan shall excuse the failure to hire any individual.

The original purpose of this exception was to facilitate the hiring of older workers without necessarily having to incorporate them fully into seniority or pension benefit plans.

Unfortunately, some employees have interpreted section 4(f)(2) as permitting mandated early retirement as long as such a requirement is included in the terms of a seniority or pension plan; under this interpretation an employer could mandate forced early retirement prior to the permissible age of this act by simply including such a provision in the employee's benefit package.

To remedy this situation, during subcommittee consideration of H.R. 5383, I introduced an amendment—based on legislation which Representative HENRY WAXMAN and I introduced in April, 1977—which closes the loophole in the existing section 4(f)(2). The amendment clarifies this section by adding the following clause to it:

* * * and except that the involuntary retirement of any employee shall not be required or permitted by any such seniority system or any such employee benefit plan because of the age of such employee.

The net effect of this amendment is to prohibit mandated early retirement provisions prior to the age of coverage of the ADEA in the terms of retirement, pension, or insurance plans.

It should be noted that it is not the intention of this amendment to have older workers cut off from their health and benefit plans the day they reach age 65. While employers, under this section, may not be required to fully integrate older workers into their seniority and pension benefit plans, they should not interpret the 1977 amendments to the ADEA as a license to cease to provide reasonable benefits to their older employees.

A second amendment which I proposed and which is part of this legislation permits seniority systems and pension plans under existing collectively bargained contracts to retain a mandatory retirement provision for workers age 65 and older for the duration of the contract or 2 years which ever first occurs. It will not be permissible for labor and management, however, to enter into new contracts which would force early retirement.

There has been increased attention focused on section 4(f)(2) in light of the Supreme Court ruling in the McMann case. Again, my amendment to section 4(f)(2) makes clear that the section does not allow an employer to require or permit the involuntary retirement of an employee within the protected age group. In reversing a decision reached by the fourth circuit court of appeals (542 f.2d 217 (1976)), the Supreme Court upheld a plan which was established before the enactment of the ADEA and which required the retirement of all participants at age 60; participation in that plan was voluntary, not compulsory.

As a result of the amendment to section 4(f)(2), the plan in the McMann case would no longer qualify as an exception to the ADEA. Under this amendment—contrary to the Supreme Court's rationale—a provision in a pension or seniority plan which would mandate early retirement would be unlawful regardless of whether the plan came into effect before or after the enactment of the ADEA or these amendments.

It is important to note that the plan in the McMann case did not leave the employer the option of deciding to force participants to retire; the employer was required to retire every plan participant at age 60, where the employer has an option, the plan is clearly unlawful even under the McMann decision rationale, since the decision to force an employee to retire would have to be made after the enactment of the ADEA.

The effect of these amendments will be both immediate and widespread, according to an analysis of forced retirement provision in pension plans made available by the Department of Labor, some 2 million Americans are currently subject to pension plans which give the employer the complete option to retire qualified workers prior to age 65. These workers will be protected upon enactment of this legislation. Workers over 65 will be protected by this clarification of section 4(f)(2) upon the effective date of this legislation, January 1, 1979.

I am pleased that my amendments are a major component of this legislation.

Although this legislation represents a significant advance in the way in which Americans will view older workers in the labor market, I must take exception to the two exemptions concerning tenured professors and highly compensated executives which were proposed in the Senate amendment to H.R. 5383 and which in a modified version were accepted by the conferees.

I am vigorously opposed to exemptions based on occupation and I voiced this opposition when the House conferees initially confronted this issue. In fact, the entire conference was stalled for a period of 5 months in an attempt to arrive at a compromise between the House position of no exemptions and the Senate position which called for permanent exemptions for tenured faculty members and for highly compensated executives with pension incomes of $20,000 per year. While the compromise agreed upon by the majority of the conferees is somewhat less onerous—it calls for a phaseout of the tenured professors exemption on June 30, 1982, and for a permanent exemption for executives with pension incomes of $27,000—it is no more logical than the original Senate proposal; the legislation as amended by these exemptions advocates an advance in the way in which society views the contributions of all workers age 65 to 70 as long as they are not tenured faculty members or are entitled to receive pension benefits of $27,000 a year or greater.

While my opinion of the exemptions ultimately was not shared by a majority of my colleagues on the conference committee, I am hopeful that this legislation, H.R. 5383, will provide the impetus to the elimination of all mandatory retirement provisions in our laws and that in the future the Congress will not burden what is essentially progressive and needed legislation with exemptions which are based upon occupational status or any other consideration.

Mr. HAWKINS. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. WAXMAN).

Mr. WAXMAN. Mr. Speaker, I rise in support of the Conference Report on the Age Discrimination in Employment Act amendments. Final passage of the conference report will strike a major blow against age discrimination and for the rights of older Americans.

The ADEA amendments abolish compulsory retirement for most Federal workers and raise the mandatory retirement age for non-Federal workers from 65 to 70. My only regret is that the legislation is not stronger. As a strong supporter of the House bill passed last September, I was disappointed at the Senate's insistence on exempting tenured college professors and certain high level executives from the bill's protections.

The conference agreement provides that persons between the ages of 65 and 70, who for 2 years prior to retirement are employed as executives or in high-level profession capacities, and who have an annual retirement income exceeding $27,000, will remain subject to compulsory retirement. Similarly, college professors between the age of 65 and 70 will remain subject to mandatory retirement requirements until July 1, 1982. Both concessions are unjustified and regretable but I am pleased House conferees were successful in narrowing the scope of the Senate's exceptions.

LEGISLATIVE INTENT OF 4(f)(2)

As an original cosponsor of H.R. 6798, I am particularly pleased to see section 4(f)(2) of the Age Discrimination in Employment Act clarified. The confusion surrounding the original intent of Congress has lead to the involuntary retirement of workers prior to age 65. H.R. 6798, provisions of which were incorporated in H.R. 5383, sought to correct the misuse of this exception.

The purpose of the Age Discrimination in Employment Act was to "promote em-

ployment of older persons based on their ability rather than age; to prohibit arbitary age discrimination in employment; to help employers and workers find ways of meeting problems arising from the impact of age on employment."

A study of the legislative history surrounding the 4(f)(2) exception reflects the intention that it further and encourage the employment of older workers. Congress feared that requiring participation of older workers in benefit plans would discourage employment of newly hired older workers.

The conference report clarifies any doubt surrounding the intent of the exception and specifically disagrees with the finding of the Supreme Court in *McMann* v. *United States* (98 S. Ct. 244 1977). The agreement prohibits mandatory retirement for persons under age 70 enrolled in a bona fide retirement or pension plan. Plan provisions in effect prior to the date of enactment are not exempt under section 4(f)(2) by virtue of the fact that they antedate the act. One exception to this prohibition would be persons between 65 and 70 subject to a collective bargaining agreement in effect prior to September 1, 1977.

Such persons would be exempt from the bill's protections until the collective bargaining agreement expires or until January 1, 1980—whichever comes first. It has come to my attention that there is some concern that employers may seek to evade the restrictions of 4(f)(2) by reducing or eliminating welfare benefits to employees over 65. It is argued that this practice may be justified, as health insurance and other benefits are sufficiently more costly for workers between 65 and 70.

I am hopeful, however, that employers do not terminate capable and healthy older workers from benefit plans solely on the basis of age. In the absence of actuarial data which clearly demonstrates that the costs of this service are uniquely burdensome to the employer, such a policy constitutes discrimination and a conscious effort to evade the purposes of the act.

While the conference committee did not specifically address the status of health benefits to older workers protected under this act, it is the intent of this Congress to prevent both open and subtle forms of age discrimination. Exceptions should only be applied in the strictest sense and only with full justification and cause.

PRAISE TO CONGRESSIONAL LEADERS

While enactment of this legislation was the combined work of many, I would like to take a moment to recognize three of our colleagues who deserve special praise.

Passage of the ADEA amendments will stand as a testimonial not only to the capabilities of older Americans but as a badge of distinction to one Member who has labored tirelessly against the pervasive practice of age discrimination. Our colleague from Florida, CLAUDE PEPPER, has throughout his distinguished career served as a workhorse and champion of older Americans.

As chairman of the House Select Committee on Aging, CLAUDE PEPPER has provided the impetus and inspiration for a more enlightened attitude toward aging. In every sense, Senator PEPPER is the dean-emeritus of the struggle of older Americans for human rights.

It certainly should not come as a surprise that the force behind the swift consideration of this legislation is my good friend and fellow Californian AUGUSTUS HAWKINS. The distinguished chairman of the Employment Opportunities Subcommittee is always at the forefront of employment legislation and his masterful handling of this issue is a credit to his compassion and sensitivity to the concerns of older Americans.

TED WEISS, a primary cosponsor of H.R. 6788 and a member of both the Employment Opportunities Subcommittee and Select Committee on Aging deserves praise for his yeomen job in advocating so effectively the need for clarifying 4(f)(2) as well as his support for this needed legislation. Although only in his first term, our colleague from New York has distinguished himself as a most capable champion of the elderly and the disadvantaged.

Congressmen PEPPER, HAWKINS, and WEISS deserve special praise for the vigor and enthusiasm they marshalled in support of this legislation. The enactment of the ADEA amendments into law represent a most deserved change in public attitudes toward aging.

Mr. Chairman, I applaud the passage of the conference report and urge its swift adoption.

Mr. HAWKINS. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. ROYBAL).

Mr. ROYBAL. Mr. Speaker, as a member of the Committee on Aging and coauthor of the bill, I would like to pay the highest compliment to the gentleman from Florida (Mr. PEPPER) not only for the way he insisted that members of the committee provide for the investigation necessary but also made it mandatory in this bill.

But I compliment the gentleman for the very excellent job that he did in seeing to it that it was actually "greased" through the House of Representatives. I use the words "greased through the House of Representatives" because it is a term that I feel should sometimes be used when expertise is applied. I think the gentleman from Florida (Mr. PEPPER) demonstrates the fact that he has vast experience in the field of legislation. He had it in the Senate of the United States and he has it in the House of Representatives. He demonstrated that vast experience when this bill finally reached the stage in which it is today.

May I also compliment the members of the Conference Committee for they have done a tremendous job. This bill is the result of a great deal of effort on the part of every member of the Select Committee on Aging. I also can say that it is the culmination of the combined efforts of Members of the House of Representatives where there was only one vote cast against it at the time it was passed. This means that every Member of this House, in a united manner, is in favor of this legislation.

This is a piece of legislation that I believe to be historic. I believe that this is the day when history will be made in making available opportunity to everyone regardless of their age. This should have come about a long time ago. I am glad that my colleague, the gentleman from Florida (Mr. PEPPER) is the one that started it, is the one that has advanced it and is the one today who has witnessed the day when the legislation has been passed.

Ms. OAKAR. Mr. Speaker, I rise in support of the conference report on the Age Discrimination in Employment Act Amendments of 1978. The Select Committee on Aging, of which I am a member, held numerous hearings including those in my district on the effects of mandatory retirement on those who wanted to work, and yet had to leave their job at the age of 65.

The trend today is to mandate retirement at age 65, and in some cases much earlier. While many people do want to retire, a number of people do not. For instance, in a 1974 survey of 8.8 million male workers of which 4.2 million were subject to termination of their jobs solely on the basis of age, over a quarter of these 4.2 million wanted to work past the retirement age. Another survey which sampled the views and experiences of 224,000 working women revealed that about 50 percent of the married women in this survey wanted to remain employed beyond the compulsory retirement age, and 75 percent of the unmarried women expressed the same desire. All of these people were able to work.

We are all well aware that age is no longer an accurate measure of a person's ability to be a productive worker. In addition, there is no evidence that a person's skills suddenly decline. In addition there is no proof that 65 is the "magical age" for retirement, because people do not decline in skills at the same rate.

The American Medical Association has given us specific evidence that arbitrary retirement and denial of opportunity to work is a prime factor in the health deterioration of many retired persons. Also a large number of older workers who are forced to retire lose their self-confidence, personal dignity, and ability to be productive.

Supporters of mandatory retirement argue that it is necessary in order to give younger workers an opportunity for employment and upward mobility. Statistical records, however, indicate that this is quite to the contrary. Mandatory retirement not only renders older people themselves unemployed, it also suppresses employment opportunity for the general population and even more for the youth. Advancement by "stepping up the ladder" destroys crossover opportunities in the job market. We hear that workers are retiring earlier and in greater numbers than ever before, yet we have an unemployment rate hovering at 7 percent or higher. Women and minorities are among those who suffer the most at a time of high unemployment and they do not benefit from forced retirements.

The public believes that "nobody should be forced to retire, because of age if he or she wants to continue working and is still able to do a good job." This was revealed in the Harris survey con-

ducted in 1975 for the National Council on Aging. The survey also revealed that only 37 percent of the hiring and firing decisionmakers feel a fixed retirement age for everyone makes sense.

Mr. Speaker, this is landmark legislation that we are voting on here today. We are finally coming to grips with one of the last vestiges of discrimination—discrimination because of age. We have a long way to go before we eliminate this insidious kind of discrimination, but these Amendments to the Age Discrimination in Employment Act that we are considering today are an excellent beginning.

Mr. HAWKINS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore (Mr. MEEDS). The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ALLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 391, nays 6, not voting 37, as follows:

The Clerk announced the following pairs:

Mr. Annunzio with Mr. Anderson of Illinois.

Mr. Akaka with Mr. Tucker.

Mr. Shipley with Mr. Martin.

Mr. Metcalfe with Mr. Goodling.

Mrs. Collins of Illinois with Mr. Fraser.

Mr. Staggers with Mr. Erlenborn.

Mr. Teague with Mr. O'Brien.

Mr. Lederer with Mr. Ryan.

Mr. Diggs with Mr. Holland.

Mr. Dellums with Mr. Findley.

Mr. Fary with Mr. Madigan.

Mr. Flood with Mr. Hammerschmidt.

Mr. Rostenkowski with Mr. Murphy of New York.

Mr. Risenhoover with Mr. McKinney.

Mr. Whitley with Mr. Sarasin.

Mr. Zeferetti with Mr. Michael O. Myers.

Mr. Scheuer with Mr. Thornton.

Mr. Charles Wilson of Texas with Mr. Udall.

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore (Mr. MOAKLEY). Is there objection to the request of the gentleman from California?

There was no objection.

PERSONAL EXPLANATION

Mr. MARTIN. Mr. Speaker, during consideration of the conference report on the bill H.R. 5383, the Age Discrimination in Employment Act, I took part in the debate and waited to vote and intended to vote and thought that I had voted. The electronic recording device thought otherwise and recorded me as not voting.

I take this opportunity to make a compensating statement that I support this bill and, except for some inadvertent unexplainable discrepancy either within or beyond my control, fully intended to vote for the bill, and am pleased that it passed by an overwhelming margin.

PERMISSION FOR SUBCOMMITTEE ON COMPENSATION, HEALTH, AND SAFETY OF COMMITTEE ON EDUCATION AND LABOR TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that the Subcommittee on Compensation, Health, and Safety of the Committee on Education and Labor may be permitted to sit tomorrow during the 5-minute rule.

Mr. Speaker, I checked this out with the highest ranking minority member on the subcommittee, the gentleman from Pennsylvania (Mr. SHUSTER).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

POSTAL SERVICE ACT OF 1977

Mr. CHARLES H. WILSON of California. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 7700) to amend title 39, United States Code, to establish congressional review of postal rate decisions, to increase congressional oversight of the U.S. Postal Service, to abolish the Board of Governors of the U.S. Postal Service, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. CHARLES H. WILSON).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ASHBROOK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 364, nays 2, answered "present" 1, not voting 67, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H.R. 7700, with Mr. PATTISON of New York in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on Monday, March 20, 1978, all time for general debate had expired and pending was the amendment in the nature of a substitute offered by the gentleman from New York (Mr. HANLEY), which was being read by sections as an original bill for the purpose of amendment. The Clerk had begun reading section 2 and had read down to line 5 on page 4.

The Clerk will continue the reading of section 2.

The Clerk read as follows:

"(3) The remaining costs not attributed under paragraph (2) of this subsection shall be apportioned, after deducting an estimated amount for public service appropriations, among each class or subclass of mail or type of service as a revenue burden on the basis of—

"(A) the quality and character of the mail service provided to both the sender and the recipient, including collection, speed of transmission, privacy, and priority of handling and delivery;

"(B) the effect of the proposed rates on the general public, business mail users, and enterprises in the private sector of the economy engaged in the delivery of mail matter other than letters;

"(C) the available alternative means of sending and receiving letters and other mail matter at reasonable costs;

"(D) the educational, cultural, scientific, and informational benefit of the mail matter to the Nation; and

"(E) the relative demand for each class or subclass of mail or type of mail service.".

(c) Section 3626(a)(1) of title 39, United States Code, is amended by inserting before the semicolon a comma and the following: "as may be reduced under section 3622(b)(2) of this title".

(d) Section 3626(a)(2) of title 39, United States Code, is amended to read as follows:

"(2) the rates for mail matter under former sections 4359, 4421, 4422, and 4554(a) shall be equal, on and after the first day of the eighth year following the effective date of the first rate decision applicable to that class or kind, to the rates which would have been in effect for such mail if this subsection had not been enacted; except that revenues received from rates for not more than 250,000 pieces of each issue of a publication under former sections 4359, 4421, and 4422 which do not qualify to be mailed at a reduced per piece rate based on a 5-digit ZIP code sortation established pursuant to the proceedings in Postal Rate Commission Docket Numbered R77-1 shall not, on and after the first day of the eighth year following the effective date of the first rate decision applicable to that class or kind, exceed the postal costs attributable to mail of such class or kind (excluding all other costs of the Postal Service); the reduction authorized by this paragraph shall be applied by reducing the per piece charge otherwise applicable to not to exceed 250,000 pieces; and".

(e) Section 3683(a) of title 39, United States Code, is amended by inserting after "postage established" the following: "for the nonadvertising portions of mail matter described in former sections 4358, 4359, 4421, and 4422 of this title and".

Mr. HANLEY (during the reading). Mr. Chairman, I ask unanimous consent

that the amendment in the nature of a substitute be considered as read, printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. BAUMAN. Mr. Chairman, reserving the right to object, if the gentleman from New York (Mr. HANLEY) would confine his request to section 2, I would not object. I think it would be more orderly to consider the bill by sections.

Mr. HANLEY. The gentleman from New York is quite willing to do so.

Mr. BAUMAN. The request, then, is that section 2 be considered as read, printed in the RECORD and open to amendment at any point, is that correct?

The CHAIRMAN. That is correct.

Mr. BAUMAN. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DODD. Mr. Chairman, I move to strike the requisite number of words.

The CHAIRMAN. The gentleman from Connecticut is recognized for 5 minutes.

Mr. DODD. Mr. Chairman, yesterday the House of Representatives began consideration of a major piece of legislation, the Postal Service Act of 1977, H.R. 7700.

The major thrust of this legislation is that it will give both the President and Congress a greater role in the development of postal policy. I am very hopeful that this legislation will go a long way toward improving the efficiency of postal operations.

I would briefly like to discuss the importance of an amendment to be offered by Representative PAUL SIMON, which would keep the status quo for parcel post with respect to ratemaking. The current language under H.R. 7700 does not specify that parcel post rates should cover the costs of the service. Upon close examination this language could have the effect of allowing the Postal Service to underbid private delivery services.

I am very concerned over the adverse effect which a failure to provide statutory assurance for parcel post to compete fairly with private enterprise would have upon our economy. I am particularly concerned that the existing language could result in a loss of jobs in the private sector.

The amendment to be offered by Representative SIMON would require the Postal Rate Commission to set rates as at present, requiring the parcel post rates to reflect close to the real cost. It will continue a long stated principle of fair competition between parcel post and the private sector.

I therefore urge my colleagues to join me in supporting the Simon amendment.

AMENDMENT OFFERED BY MR. SIMON

Mr. SIMON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SIMON: Page 4, line 2 insert "direct and indirect costs which are a consequence of providing services for zone-rated parcels, including" after "recover".

Mr. SIMON. Mr. Chairman and Members of the House, I rise with some reluctance to differ with my colleague the gentleman from New York (Mr. HANLEY) and my colleague the gentleman from California (Mr. CHARLES H. WILSON) for both of whom I have a high regard. I know we use those words easily here, but both men have shown themselves to be independent, courageous, and with great ability, and I have had the honor of serving on a subcommittee under both of the gentlemen. But I disagree with them in one part of the bill that is now before us.

My belief is that the Postal Service ought to be encouraging the free flow of ideas which is fundamental to our system of government. That really is what we call "the melting pot strength" of this Nation. It is not a breeding process, it is this free flow of ideas. The rates we establish on our Postal Service on all our first-class mail, our magazines, our newspapers, ought to encourage that process. Those rates, in my belief, should not rise faster than the Consumer Price Index.

But when we come to parcel post we are not getting messages spread, we are not delivering ideas. And because of that distinction it seems to me that in general parcel post ought to carry its own weight financially.

But instead of having that kind of an operation the Postal Service today is operated like the American Can Co., it is operated under a principle of setting rates at what they call—and this is important—"elasticity of demand."

What do they mean by "elasticity of demand"? They mean this, that if you cannot impose enough in revenue on parcel post, you impose that additional revenue on first class or second class or somewhere else. Their aim clearly is to have rates that put their competitors out of business, just like American Can Co. would do. There is no fundamental philosophical framework for the Postal Service leadership which distinguishes it from American Can Co.

Let me give the Members the figures to back that up. From 1970 to 1977, since the Postal Service has been in operation, the Consumer Price Index has risen 54 percent. Parcel post rates have risen 28 percent; third-class rates, 95 percent; second-class rates, 129 percent; first-class rates, 117 percent. Those rates clearly say that there is no fundamental philosophy to the Postal Service as run today. It is a business, and when they see a competitor, they try to keep the rates down low to try to freeze out that competitor. Those are the facts of life.

The requested rates that are going to be ruled on in May by the Postal Rate Commission ask that the first-class rates go up from 13 cents to 16 cents and that parcel post rates be reduced in 11 of 14 categories.

I do not believe the people in your districts and in my district want this. I do not believe they want us to use tax money to put a tax-paying business out of business. I do not think they want us to use tax money to put tax-paying jobholders out of work and that is what we are faced with here.

What does my amendment do? It restores the status quo, and here I would direct the Members' attention particularly to the words of the present law. It says that each class of mail shall bear "the direct and indirect costs," and that is precisely what my amendment does. The Hanley substitute knocks out the word "indirect," and that is a very, very simple but very important distinction.

A second thing the Hanley substitute does is to say that attributable costs "shall be those costs which vary with the volume of class or subclass of mail, or the type of postal service over a period of not more than 3 years," so that buildings, vehicles, bulk mailing machines—those things are not counted as part of the cost of parcel post.

The Hanley substitute without my amendment does one other very important thing. It knocks out two U.S. court of appeals decisions.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. SIMON was allowed to proceed for 5 additional minutes.)

Mr. SIMON. The court decisions are very clear. Let me just read—and I have both of them here, and I would be happy to answer any questions about them—the court decision here. I am quoting the U.S. court of appeals which says:

The Postal Service's response to this requirement—

Of the law about "direct" and "indirect"—

was questionable at best. It proposed that the Commission "attribute" only 49 percent of the 10 billion dollars at issue. The remainder it said, should be "reasonably assigned." It presented a schedule of such assignments that, it said, had been derived by two of its employees through the use of a formula. The formula, in turn, was purportedly composed of three factors:—

And listen to these three factors the Postal Service wants to defend itself with—

(1) the hypothesized elasticity of demand for each class of mail; (2) the "value" of each class; and (3) the competitive stance of the Postal Service in those cases in which it lacked a legal monopoly.

I could go into the other court decision, but I am not going to take the time to do that right now.

What will it cost if my amendment is not agreed to? Let us go by what they have tried to do before the appellate court knocked it out, going to the 45-percent or 49-percent figure. Let us be conservative and go to a 50-percent figure. In fiscal year 1978, $159 million more either has to come out of first class mail or second class mail or there has to be an increased deficit for the Federal Government.

That is what we are talking about. I suggest the wise course is to not move in that direction.

I would point out that in the letter of Mr. Eizenstat to the chairman, the gen-

tleman from Pennsylvania (Mr. NIX) on March 15, he said—and let me just read two sentences:

The logical effect of this section is to increase the postage burdens of first-class mail users to cover the costs.

I am taking these two sentences separately and a little out of context—

The Administration believes that the creation of these hidden subsidies are not in the national interest and that it would be more equitable to directly subsidize those classes of mail that Congress determines are deserving of revenue foregone subsidies.

There are charges that Greyhound and UPS—the two largest private distributors—are getting rich. Greyhound has a loss in its operations.

The figures for UPS are: 3.5 percent profit in 1974; 5.6 percent profit in 1975; 1.4 percent profit in 1976; and 3.8 percent profit in 1977.

We are not talking about a huge company that can afford massive competition from a huge Government agency.

There are figures being circulated about the decline in the number of packages by the U.S. Post Office. In fact, in 1977 there was an increase. They did not count priority mail, third-class packages, and a number of others. In 1976, 1.3 billion packages went through the Postal Service.

I am a strong believer that the Postal Service must continue its parcel post service. There is no question that they have a healthy operation, and I want it to continue.

Mr. Chairman, I will yield to the gentleman from California (Mr. CHARLES H. WILSON) in just a moment, but my time is limited.

Mr. Chairman, I would point out that UPS has a total capitalization, counting buildings, automobiles, everything, of $800 million.

The Postal Service in bulk mailing centers alone has over a billion dollars.

But investing money is not enough.

We ought to be improving the service. My colleague, the gentleman from California (Mr. CHARLES H. WILSON) pointed out that in one bulk mailing center alone we had 3,700,000 packages that were destroyed and undeliverable. What the Postal Service ought to be doing is improving its service, not putting private companies out of business.

The parcel post system was started in 1912 in a move by Senator Jonathan Bourne of Oregon.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

(By unanimous consent, Mr. SIMON was allowed to proceed for 2 additional minutes.)

Mr. SIMON. Senator Bourne said in 1912:

Mr. President, it is the desire of the committee and myself to establish a system of Parcel Post that we are satisfied will be completely self-supporting.

In 1950 Congress mandated that it pay its own way.

We now face the decision of how we can best invest the public's money. I think when we look at the facts, it clearly shows we ought to be saying to the Postal Service to let parcel post, insofar as possible, do as we mandate under the law right now, pay direct and indirect costs. Let us not put private people out of business, and put those who work for them out of jobs.

Mr. Speaker, now I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. Mr. Chairman, two brief points, because there will be considerable argument against what the gentleman has stated.

The gentleman continues to use the year 1976. I would remind the gentleman, and I am sure the gentleman is aware, that is the year that UPS had a strike right at Christmas time, so people had no choice but to go to the U.S. Postal Service and this did reflect upon the number of parcels carried between the two systems at that time.

I think the gentleman must also be embarrassed by the figures used by the gentleman from Illinois when the gentleman said there would be hundreds of thousands of people put out of work if this amendment did not pass.

There is nothing like that here; I think the gentleman is aware of that. If anything, the people who might lose jobs as a result of the amendment the gentleman is introducing are the 40,000 who work for the Postal Service in parcel post. The UPS is not going to lose any jobs. That is just a scare tactic the UPS is trying to foster in their mail campaign and their phone campaign. They have been sending information to every Members of Congress, and it is a dishonest thing.

I have the greatest respect for the gentlemen in UPS, but I think the people who have been giving information to the gentleman from Illinois (Mr. SIMON) have been totally dishonest with him about what the effect of the amendment really is.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. SIMON) has expired.

(By unanimous consent, Mr. SIMON was allowed to proceed for 2 additional minutes.)

Mr. SIMON. Mr. Chairman, I would like to respond to the gentleman from California (Mr. CHARLES H. WILSON).

I do not know precisely how many people might be put out of business, but having looked into the court decisions and the language of the court decisions and how the language of the substitute affects those court decisions, I think UPS and the other private carriers have legitimate fears.

How many jobs might be at stake, I frankly do not know. As to the gentleman's statement that I am using 1976 figures rather than 1977 figures, I would point out—and I am quoting from the figures supplied by the gentleman from New York (Mr. HANLEY) in his letter, which I believe was cosigned by the gentleman from California (Mr. CHARLES H. WILSON)—that there were 338 million packages under the category of parcel post in 1976 and 192 million pieces of priority mail, for a total of 530 million. Yet in 1977 there were 387 million packages and 205 million pieces of priority mail, for a total of 592 million. So the figures in fact escalated for parcel post in 1977.

Mr. Chairman, I would hope that my colleagues in the House will give serious consideration to the legitimate needs of the employees in these businesses.

Mr. MURPHY of Illinois. Mr. Chairman, I rise in support of the gentleman's amendment, and I commend him for his remarks here today. This amendment is similar to current law and requires that rates for parcel post recover any direct or indirect cost of the service.

I am afraid that unless the section of the bill concerning parcel post ratemaking is amended the private delivery services will be adversely affected. Those hundreds of firms that daily compete with parcel post will be undercut since parcel post would only be required to recover some of its costs and not all of its costs. This means that thousands of private sector jobs will be in jeopardy, including many jobs in my district.

I feel that a viable parcel post service must be maintained as a service to the public. This amendment will allow users to continue to have a meaningful choice in selecting a carrier for their goods. By keeping the package carrier industry competitive, we not only guarantee a higher quality of service to the public, but we preserve jobs.

It is my hope that this amendment is adopted on the floor to protect the private sector delivery services from having to compete with increasing Government subsidies.

Mr. HANLEY. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I find myself in a very difficult position at this point. It is a position of being in opposition to a Member for whom I have great regard, one with whom I work very closely in this body.

I also find myself in opposition to the United Parcel Service, a representative of American industry for which I have great regard.

I believe that anybody who has followed the history of postal legislation in this Congress could only agree that I probably have been one of the greatest friends the United Parcel Service has ever had, and I will defend that record in this regard with anybody in the Congress or outside the Congress.

The original language of this bill unfortunately went just a little bit overboard in favor of UPS. Once that was noted, in fairness to the other people on the other side of this issue—and when I talk about the people on the other side of this issue, I am talking about the segment in America that wants to assure that there is an alternative parcel delivery service that would include rural areas in America—and once that was called to our attention, we sent the language back to the drawing board and asked that the experts hammer out a decent compromise. In due time they came back with what we thought was a very fair compromise.

At one point during the course of this deliberation, in my effort to be com-

pletely fair to private enterprise and with my absolute determination that the U.S. Government or the Postal Service should do nothing that might have the effect of undermining the ability of competition from the private sector, I said to the UPS people that—

I will call upon four or five rate experts who will not be at all self-serving and who will not have an axe to grind, and I will ask them to volunteer their services to interpret the language of this legislation and tell me whether or not we are treating United Parcel Service unfairly.

I also suggested that in that meeting be someone from the Office of Management and Budget. The men, who are recognized as rate experts, reported back, in this sense:

Look, my friend, you are not hurting the United Parcel Service.

Rates, for what it is worth, are highly complicated matters. I could get up here and I could reel off an awful lot of stuff about rates. I have great respect for the intelligence of the Members, but I do not believe the Members could absorb and understand. I do not have that good of an understanding of rates, and I have been dealing with it for a long, long time. I depend highly upon people who are objective, who spend their career in the matter of rates, appearing before public service commissions, and what have you.

So I can only assure the Members that we have tried hard to be absolutely fair. We have the utmost respect for United Parcel Service, recognizing the tremendous input that it provides into the coffers of the United States Treasury by virtue of tax money.

The CHAIRMAN. The time of the gentleman from New York (Mr. HANLEY) has expired.

(By unanimous consent, Mr. HANLEY was allowed to proceed for 5 additional minutes.)

Mr. HANLEY. Mr. Chairman, I have the utmost respect for that industry, and I assured the people in the leadership of that industry that I did not want to do the first thing that would put them in a less competitive position. We have accomplished that in the language of this bill.

If the Members want to impose upon Parcel Post a situation which will have the effect of washing it out completely within a relatively short period of time, then support the Simon amendment; and in so doing, the Members will deprive a segment of America the ability to enjoy an alternative delivery service. I do not think that at this point in time we want to do this.

I have said to people, including the President of the United States, that there might come a time in the near future that we ought to get out of the parcel business altogether, that if private enterprise can do it—and it is doing it quite well, with 70 percent of the clients in America—there may well come a day that, a regulated industry, when we are assured that every citizen in this country, regardless of where they would reside, would get a quality of service, then maybe at that point in time the U.S. Postal Service ought to get out of it completely.

I have called upon the President, in recognition of the changes that have happened in this system over the last decade and the changes that I perceive happening over the next decade, "Please, Mr. President, consider the establishment of a national policy on Postal Service to determine exactly what the role of the Federal Government should be in providing this service."

I hope very much that the President will respond to my recommendation. And perhaps at a point in time in the not too distance future we can agree that as a regulated industry, assuring that all America will be served at a reasonable rate, then let us turn parcel delivery all over to private enterprise. But I think that by doing it at this point in time we would be shirking our responsibility to the American citizens who are still highly dependent upon the U.S. Postal Service for parcel delivery.

Mr. Chairman, let me say this: An amendment will be offered by the chairman of the full committee, the gentleman from Pennsylvania (Mr. NIX). I cannot see anybody disputing the fairness of the language of the amendment that he will offer, because we are going to write into this language that the Postal Service may not use the postal rate structure to discriminate unfairly against private parcel delivery services. I urge that when the gentleman from Pennsylvania (Mr. NIX) comes to the well that the Members pay a great deal of attention to what he has to say; because, essentially, what he is going to say is exactly what my good friend, the gentleman from Illinois (Mr. SIMON), intends, and that is that the Federal Government do nothing that is going to undercut the ability of private enterprise to succeed and progress.

I urge that the Members listen to the chairman of the full committee when he presents his amendment.

The CHAIRMAN. The time of the gentleman from New York (Mr. HANLEY) has expired.

(On request of Mr. ROUSSELOT and by unanimous consent, Mr. HANLEY was allowed to proceed for 5 additional minutes.)

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I yield to my friend, the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I appreciate the gentleman's yielding.

The gentleman from New York (Mr. HANLEY) mentioned getting four experts together. I appreciate his doing that.

I called one of the gentlemen, the gentleman from the Department of Justice, and explained my amendment and told him that it included these words that bear the direct and indirect cost. I asked him whether he believed it was in the best public interest to reinsert that language in the law, and he said, "By all means, it ought to be reinserted."

Mr. HANLEY. Mr. Chairman, I do respect what the gentleman from the Justice Department said, but he did agree that the language in H.R. 7700 would not be detrimental to United Parcel Service's competitive position.

Mr. SIMON. But he was present for the presentation; was he not?

Mr. HANLEY. Yes.

Mr. SIMON. I thank the gentleman from New York.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield just for a clarification of intent?

Mr. HANLEY. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, is it the gentleman's intent that we at this point continue debating directly to the point of the so-called Simon amendment or that we at this point look to the gentleman from Pennsylvania for his substitute?

Mr. HANLEY. It would be my intent that we address the Simon amendment; and then upon the conclusion of that, we would, hopefully, move to the consideration of the next amendment.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. HANLEY. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate the gentleman's yielding.

I was a little bit mystified by the gentleman's argument that somehow the parcel post operation of the U.S. Post Office is greatly damaged if the Simon amendment passes.

As I understand the Simon amendment, it is only to try to give equity to the private sector; and the gentleman clearly, I know, is not opposed to that.

Mr. HANLEY. That has been my purpose, I say to my friend, the gentleman from California, from the very beginning, to assure equity for the private sector.

When the gentleman talks about parcel post being damaged, it would be damaged by virtue of the fact that it would not enjoy appropriation considerations to the extent that other classes of mail would.

Mr. ROUSSELOT. I have never known the Committee on Appropriations to deny the Post Office the add-on deficit financing that it needs. As a matter of fact, I think they have been too generous many times.

I cannot understand why the Post Office cannot operate on $16 billion this year. When the Committee on Appropriations asks to give added money to the Post Office, that does not come out of first-class mail funding. Consequently, I do not understand the gentleman's argument.

Mr. HANLEY. We are talking about the effect of the Simon amendment on parcel post. The gentleman is now expanding his remarks to include the budget of the Postal Service.

Mr. ROUSSELOT. As the gentleman brought out, he thought the parcel post would not survive if the gentleman's position somehow did not prevail over the Simon position. The gentleman stated that the Simon amendment would have the "effect of washing it—parcel post—out completely within a relatively short period of time."

Mr. HANLEY. Essentially, that is correct.

Mr. ROUSSELOT. He indicated that that was because they could not be com-

petitive. They now have all those bulk mail services out there. They have all of that extra equipment for which we paid.

I do not understand why they cannot be competitive with the private sector. Can the gentleman explain that to me?

Mr. HANLEY. I have explained to the gentleman many times, but unfortunately he is not responsive or receptive to the explanation.

Mr. ROUSSELOT. I am trying to be responsive to the gentleman. He made the argument that if the Simon amendment passes, parcel post will not be competitive with the private sector. Surely the gentleman is aware that there will be a parcel post as long as it is so generously supported by the excess revenues created through the exorbitant rates charged for first-class mail. I would also like to point out that no one in the U.S. Postal Service will lose a job—you are aware of the no-layoff clause in the postal employees' contracts?

Mr. HANLEY. By virtue of the Simon amendment. The argument there is that if that does not pass, United Parcel is going to collapse.

Mr. ROUSSELOT. He did not say that.

Mr. HANLEY. Essentially.

Mr. ROUSSELOT. I ask Mr. SIMON if he said that.

Mr. SIMON. If the gentleman will yield, no, I did not say that. It would put it in jeopardy.

Mr. HANLEY. Just to respond again to Mr. ROUSSELOT, hopefully he has some respect for the Postal Rate Commission.

Mr. ROUSSELOT. Some. Not much, but some.

Mr. HANLEY. Actually, they are charged with the responsibility.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. ROUSSELOT. Mr. Chairman, I ask unanimous consent that the gentleman from New York be allowed to proceed for 3 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. NIX. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. NIX. Mr. Chairman, I offer an amendment.

Mr. ASHBROOK. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

Mr. NIX. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. GEPHARDT) having assumed the chair, Mr. PATTISON of New York, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7700) to amend title 39, United States Code, to establish congressional review of postal rate decisions, to increase congressional oversight of the U.S. Postal Service, to abolish the Board of Governors of the U.S. Postal Service, and for other purposes, had come to no resolution thereon.

PERMISSION FOR SUBCOMMITTEE ON HOUSING OF COMMITTEE ON VETERANS' AFFAIRS TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. BRINKLEY. Mr. Speaker, I ask unanimous consent that the Subcommittee on Housing of the Committee on Veterans' Affairs may sit tomorrow, March 22, 1978, while the House is proceeding under the 5-minute rule.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

A 4-YEAR TERM FOR MEMBERS OF THE HOUSE OF REPRESENTATIVES

(Mr. DEL CLAWSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DEL CLAWSON. Mr. Speaker, credibility is defined by the Living Webster Encyclopedic Dictionary of the English language as "capability of being believed, such as one may believe worthy of credit, reliance, or confidence as to truth and correctness: Applied to persons and things." A quality essential to effectiveness in government, more often than not credibility is supposed to derive from demonstrable lack of personal gain arising from an activity or a position on an issue. It therefore follows, although not necessarily with pure logic, that effectiveness and credibility combine when from a stance of almost complete personal disinterest one is advocating action on "an idea whose time has come."

In the Extension of Remarks today I have inserted a column by Mr. Dick West which was reprinted in my hometown newspaper in February. Entitled "Over the Capitol Hill" it describes with tongue in cheek some of the problems associated with the approaching record of announced congressional retirees, a situation with a certain seriousness, especially since our number has since increased to 47. The article also serves to illustrate, in my opinion, the new timeliness of a proposal first debated in the Constitutional Convention of 1787 and which received considerable attention in the 89th Congress, the first Congress to which I was reelected. I refer to the proposal that the term for Members of the House of Representatives be 4 years.

We are told that the 2-year term originally was a compromise; that there were those who advocated a 4-year term and those who supported a 3-year term. We are all aware of the advantages of the 2-year term, but also conscious of the drawbacks which have mounted over the years. Improved travel and instant communication, nationwide, with lessened isolation and insularity of congressional districts are among the national changes which to some extent invalidate the assumption that a 2-year term is necessary to keep Members of the House close to the people. On the other hand, dramatic growth of our population has taken place and national issues have increased in complexity. The 4-year term would give a House Member more time to learn and function in the job of Congressman.

More adequate appraisal of the Representative's voting record by the people at home would be possible since it would be harder to shift sensitive decisions from one Congress to another. The 4-year term would build influence and prestige, encouraging more Members to remain in the House rather than using it as a stepping stone to a seat in the "other body." Members would be freer to focus on legislative responsibilities if they did not feel the need to plan the next campaign as soon as the election is won. Candidates representing a broader spectrum of vocational and economic backgrounds might be encouraged to participate in government through election to the House if the politics of election and survival were less insistent as a requirement for continued service in the House.

The amendment which I am introducing today would establish a 4-year term for Members of the House of Representatives commencing the second year after the year of the regular term of the President. I believe this arrangement will have certain advantages, especially in view of the growing strength of the Presidency and the executive branch bureaucracy. There would be more opportunity for feedback by the people, whether in opposition to or support of the incumbent administration. Members of the majority party could, if they chose, be more independent of the obvious tools of the Executive which make it easier to "go along to get along."

Our form of government needs as much diversity of input as possible both within and without the Government framework. The interplay of opposing factions should be encouraged to assure the best legislative product and also as a crucible for decisions at all levels. House elections in the Presidential midterm would place the Chief Executive on notice that his leadership would be more frequently evaluated by the people at the polls, but on the other hand Representatives would be encouraged to attend more to their own judgment, less to party doctrine, in the certainty that voting patterns would be studied. It is also my belief that under these circumstances House Members would consult more with the people and be more open to all the various legitimate groups affected by legislation, rather than to organized pressure groups.

Last, and not least, and I emphasize this point strongly in view of the prospect of costly public financing of congressional campaigns, a prospect I deplore, there is an advantage of economy. Obviously a 4-year term for the House would cut the bill to the taxpayers for public financing in half.

For the aforementioned reasons, and seizing the opportunity for credible action offered by my own coming retirement, I am today introducing a joint resolution, the text of which follows:

H.J. RES. 807

Joint resolution proposing an amendment to the Constitution of the United States to

provide for four-year terms for Members of the House of Representatives

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years after the date of final passage of this joint resolution:

"Article —

"SECTION 1. The terms of Representatives shall be four years and shall begin at noon on the 3rd day of January of the second year after each year in which a term of the President begins.

"SEC. 2. Section 1 shall apply with respect to terms of Representatives which begin after the end of the term of the President during which this article is ratified.

VIGIL FOR FREEDOM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. HOLLENBECK) is recognized for 5 minutes.

● Mr. HOLLENBECK. Mr. Speaker, I am pleased to participate today in the "vigil for freedom" which is being coordinated by the Union of Councils for Soviet Jewry and Congressman BRODHEAD.

It has been almost 3 years since the signing of the Helsinki Final Act, by which 35 nations committed themselves to the observance of basic human rights in their policies. Among those rights considered basic by the signatories to this agreement were the reunification of divided families, freedom of religion, and greater freedom of movement and emigration.

The pledges made by the Soviet Government in 1975 stand today as nothing more than empty promises. This is especially evident in the case of Meita Liebovna Leikina of Leningrad.

Three years ago last week, Mrs. Leikina was arrested on the charge of smuggling a violin to her daughter, who had recently emigrated to Israel. After being held incommunicado in solitary confinement for 6 months, she was transferred to a prison hospital. There, officials claimed that experts had diagnosed an involuntary psychosis and recommended her transfer to a closed psychiatric institution in Kazan under the supervision of the KGB. This action was particularly cruel to Mrs. Leikina, whose father lost his sanity under torture during the Stalin years.

The charges against Mrs. Leikina were so clearly falsified that she has never been granted the right to a trial. Her arrest, her lengthy confinement, and the denial of her wishes to emigrate all clearly violate basic human rights as well as the freedoms supposedly granted by the Soviet Constitution.

However, those concerned about her welfare are beginning to see a ray of hope. Last fall, I wrote the Soviet officials involved—Chairman Brezhnev, Ambassador Dobrynin, the Procurator General, and the Minister of Interior—requesting Mrs. Leikina's release in observance of the 60th anniversary of the Soviet Revolution. Although that request was neither granted nor acknowledged, her case did come up before a commission of physicians for review.

That commission was to decide whether to continue the confinement of Mrs. Leikina in the dreaded psychiatric hospital for women, or permit her to return home in the custody of her daughter and under the supervision of a local psychiatrist. The commission, which completed its work in January, reached the proper conclusion that Mrs. Leikina is sane. She is to be transferred to a hospital in Moscow, where her case will be processed in the city court.

Mrs. Leikina, who is 66, has suffered from a weak heart and poor health since being held in such inhuman conditions. She now weighs less than 80 pounds.

Mrs. Leikina and her family have suffered a great deal solely because of their desire to exercise those basic human rights which were supposedly guaranteed by the Soviet Government when it signed the Helsinki Agreement. By continuing our vigil for their freedom, we are saying that this Accord is more than the empty, unfulfilled promises of the Soviet Union.●

PRIVATE HIGHER EDUCATION AND THE FEDERAL GOVERNMENT: A POSITION STATEMENT BY THE EAST CENTRAL COLLEGE CONSORTIUM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. MILLER) is recognized for 10 minutes.

● Mr. MILLER of Ohio. Mr. Speaker, last month I met with the East Central College Consortium (ECCC), which is composed of seven private liberal arts colleges in Ohio, Pennsylvania, and West Virginia. The member colleges are: Bethany College, Bethany, W. Va.; Heidelberg College, Tiffin, Ohio; Hiram College, Hiram, Ohio; Marietta College, Marietta, Ohio; Mount Union College, Alliance, Ohio; Muskingum College, New Concord, Ohio; and Westminster College, New Wilmington, Pa. In 1968 these seven institutions established the ECCC for the purpose of promoting interinstitutional cooperation among seven colleges of similar size, similar educational mission, similar resources, and similar heritage.

In light of the current debate over tuition tax credits and the entire issue of rising educational costs, I thought my colleagues in the House would benefit from this excellent statement by the ECCC which grew out of a discussion on February 6 among the seven college presidents, deans, and several Members of Congress who serve districts in which the colleges are located:

PRIVATE HIGHER EDUCATION AND THE FEDERAL GOVERNMENT: A POSITION STATEMENT BY THE EAST CENTRAL COLLEGE CONSORTIUM

The ECCC expresses deep concern about the widening tuition gap between public and private higher education and the increasing difficulty which middle income families face with regard to financing college education at a private college. The Consortium urges the Congress to give close consideration to the impact upon small private colleges of any tuition-tax credit program that it considers. There is the serious danger that a tax credit in the range of $250–$500 will have the effect of making public higher education more affordable while not significantly helping to support young people to attend private colleges. This could contribute to further widening the gap between public and private colleges. We believe that the public interest is served best by the presence of both healthy public and healthy private higher educational institutions. Any program of federal assistance to relieve the tutition burden upon middle income families must be compatible with the health and well-being of private colleges.

A second area of growing concern to the member colleges of the ECCC is the increasing cost of compliance with federal regulations. Of particular concern in this context are the recent regulations from HEW with regard to meeting the needs of the handicapped. Strict compliance with these regulations will cost tens of thousands of dollars to our colleges. This is especially true of older, private colleges which have retained classroom buildings from the 19th century. In many instances the costs of equipping such buildings with elevators and ramps is prohibitive or is incompatible with the architectural integrity of a historical facility. The consequence is that many small colleges are simply not able to comply and therefore face the long-term possibility of loss of federal funds for student loans and other purposes. The irony of the situation is that traditionally small private colleges such as those in the Consortium have done an outstanding job of meeting the needs of students with handicaps such as blindness, deafness and other disabilities. Such persons traditionally have been aided out of the sense of commitment to students as individuals which is characteristic of the small college.

A third area of vital concern to our colleges is continued Congressional support for federal programs that are very beneficial to small colleges. These programs include work-study, direct student loans and cooperative education. As the costs of private higher education continue to mount, increasing numbers of students are able to attend private colleges only if they have access to loans, work-study or cooperative education programs which enable them to combine academic pursuits and income producing jobs. The federal programs under the auspices of the Office of Education have enabled many small colleges including several members of the ECCC, to initiate new programs of work-study and cooperative education which are enabling them to attract and to retain students who otherwise could not afford to attend a private college.●

UMW STRIKE SHOWS UNION POWER AND CREATES CRISIS OF GOVERNMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. ASHBROOK) is recognized for 15 minutes.

Mr. ASHBROOK. Mr. Speaker, some liberal political leaders are amazingly quiet when it comes to the subject of violence, threats, intimidation, and destruction of property by striking union mine workers. Newspapers have carried headings, "Rocks, Fire Shut More Ohio Mines" and "Violence Hits Ohio Mines," and even in the maze of slanted news we get on television each night, we have see it there before our eyes—the raw,

brazen, even criminally abusive power of members of the United Mine Workers of America.

As ranking minority member on the House Labor Committee, I have participated in the many conferences and briefings on the coal mine strike. Liberals have continually based their policies or lack of policies on the alleged conclusion that miners will violate the law and not abide by Taft-Hartley's injunctive provisions. Many wanted seizure immediately. Of course, George Meany very bluntly said:

Seize the coal mines, give the mine workers what they want and then give the mines back to the owners.

At our White House briefing last week I specifically asked the President about the apparent lack of leadership in his administration regarding lawlessness and criminal conduct on the part of all too many of the striking mine workers. I pointed out that just the night before Arnold Miller had been quoted on national TV as saying, "Taft-Hartley will bring violence." How many times have we heard that?

To his credit, the President included a brief reference to violence and respect for law in his statement on Monday. That reference stands small, however, against the towering inaction which allowed the situation to get out of hand.

We cannot tolerate lawlessness and those who criminally conspire to destroy property or engage in acts of violence must be prosecuted to the fullest extent of the law.

A few weeks ago during the debate on the Consumer Protection Agency proposal, I noted that unions were to be exempted from its provisions despite the fact that unions have a considerable impact on the consumer. As I pointed out at the time, this exemption could easily be understood in the light of two circumstances. First, liberals in Congress are beholden to the unions and their vast political power and contributions which helps elect a virtual majority in the Congress. Second, unions have always operated on the assumption that they are a government and, unfortunately, the Government tends to treat unions like they are a government. These unions basically believe nonunion mines do not have a right to operate under their "forum" of government.

Unchecked power is antithical to American freedom. It is time to remind union leaders that they are not above the law, they are not a government and they must adhere to laws just as much as the rest of us.

Most Americans are sick and tired of laws which give draft dodgers amnesty, allow 10 million illegal aliens to stay in the country, give away our Panama Canal and order the forced busing of our children to schools out of their neighborhood. All of these are done under the rule of law. The Taft-Hartley is one of the many laws which regulate some part of our private, economic, or social lives. Coal miners are not above the law and Presidents, Governors, and law enforcement officials should not hesitate to apply the law to strikers as firmly as the law is applied to other Americans in all of our 50 States.

CAPITULATION TO THE UNIONS

From the beginning, the Carter administration capitulated to the power of the unions. The President in our sessions openly admitted that the owners had been pressured, not the unions. His economic advisers were on record warning of the inflationary effects of the 37-percent increase package. These warning were shunted aside.

In fact, the President's recommendations called for what was classically termed a "modified Taft-Hartley injunction." What was this? Give the unions what they wanted in increased benefits package and go back to work on that basis rather than the old contract. You do not have to be too smart to understand that would be a one-sided settlement.

What we are confronted with is not a coal mine crisis but a crisis of Government. When a small band of people, be they union members, radicals or militant terrorists, can thumb their noses at the Government and the people of the United States, you have a serious matter. The coal miners are in that position and the cause of law and order was seriously damaged by the administration's caving in to their illegal conduct.

The same public which is being hurt by this willful band of defiant union members is forced to pay for food stamps for those who act illegally. Here again the Democrat majority in the Congress shows its true nature. By using their legislative power, food stamps were extended to strikers. Welfare is also paid under some circumstances. A strike is economic in nature. That is the thrust of the union's strike weapon. To put the Government on their side is totally wrong but my Democrat colleagues do just that, the same Democrats who receive millions of dollars in campaign contributions from the unions.

One other union argument is negated by the coal mine controversy. Unions, acting like the Government they think they are, insist that all workers belong to the union, like it or not. Workers are forced to join. One of their arguments is that if they have a contract, they must be able to discipline all of the workers to uphold the union's end of the contract. Sounds good but whenever there is a wildcat strike, the union throws up their hands and proclaims they cannot do anything about it. Wildcat strikes in violation of contract have been a consistent problem with the UMW.

All in all, the coal mine strike gives a glaring example of the power of unions, the arrogance some have in violating the law with impunity, and the timidity of liberal Democrats when it comes to dealing with these excesses. It is like the riot situation in the big cities. As I have often pointed out, it is literally impossible for the mayor of New York or Detroit to protect the public from the looters and rioters. These big city Democrats pander to these same people for their votes at election time. Rather hard to then throw the book at them and uphold the public's right to safety. Those who pander to the union leaders are equally hard pressed to protect the public interest when it is challenged by these same union leaders.

H.R. 5383—REDUCING AGE DISCRIMINATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRENZEL) is recognized for 10 minutes.

● Mr. FRENZEL. Mr. Speaker, I was one of a very exclusive group of six in the House who voted against the conference report on H.R. 5383, a bill to reduce age discrimination.

I voted in favor of the bill when it passed the House. But, it had moved swiftly through committee, and was brought to the floor amid a flurry of speeches on good intentions with little discussion of its economic impact. Like many of my colleagues, I voted against age discrimination, but without thinking of what other effects might follow.

After the discussion in the Senate, I have concluded that, while the bill is basically a good idea, the present form of the bill is a blunt instrument which will keep some employees on the job, but in non-growth industries, will kill any new hiring for 5 years.

The Senate had the right idea with its deferral of the effect of the bill on tenured professors. That category is a perfect example of the problem that concerns me. Any industry in which there is little or no growth, or where the growth is less than inflation, will have to declare a living moratorium.

My preference would be a bill with a delay on the effective date, or a phased-in effective date so the economic impact will be reduced. I think we should have taken more time and more care on this matter. Then we could have passed a bill with a similar, but less disruptive, effect.●

CIGARETTE SMUGGLING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. COTTER) is recognized for 5 minutes.

● Mr. COTTER. Mr. Speaker, I would like to present my testimony on the cigarette smuggling issue, spoken today before the Subcommittee on Miscellaneous Revenues of the House Ways and Means Committee.

TESTIMONY IN FAVOR OF H.R. 11152 FOR PUBLIC HEARINGS ON CIGARETTE SMUGGLING: CONDUCTED BY THE SUBCOMMITTEE ON MISCELLANEOUS REVENUES

Mr. Waggonner, Members of the Subcommittee, Ladies and Gentlemen, I am gratified for this opportunity to testify before you today in favor of H.R. 11152, which proposes to combat cigarette smuggling with an increased uniform, federal tax. And, as you know, the bill specifies that this new tax be rebated to states which do not levy more than a three cent additional tax. The cigarette smuggling issue is of great concern to me because Connecticut, along with other Northeastern states, has been seriously victimized by bootleggers in three primary ways. First, there is the obvious loss in uncollected revenues—an estimated $15 million in my state and $390 million nationwide each year.

Then, there are the violent crimes which invariably go hand in hand with illegal interstate traffic—the robberies, muggings, hijackings and homicides. Finally, there is the inevitable result that legitimate businessmen, who can't begin to compete with black market prices on cigarettes, are being forced out of the tobacco business, leaving all the spoils to organized crime.

Ideally, the problem should be solved by finding the criminals and prosecuting them. But cigarette smuggling is most often conducted by sophisticated crime syndicates. It's a well known fact-of-life that these men are professionals at evading the law and law officers. To understand and attack this crime, we must look at its source, which lies in the disparity among tax rates from state to state. Traveling up I–95 along the East coast, one can document the evidence. The tax rates increase almost systematically the farther one travels from the tobacco-producing states: 2 cents in North Carolina, 2½ cents in Virginia, 10 cents in Maryland, 14 cents in Delaware, 18 cents in Pennsylvania, 19 cents in New Jersey and 21 cents in both Connecticut and Massachusetts. It doesn't take a mathematician to see the obvious opportunity for making a fast few million bucks when the only overhead is a rented truck.

Similarly, it follows that cigarette smuggling, unlike other forms of illegal, interstate commerce, could be eliminated by destroying its impetus. And the uniform tax proposals seek to accomplish just that. Mr. Jones' bill, which I have cosponsored, suggests an equitable formula for redistribution and provides a positive incentive for states to cooperate with the program. In brief, the bill would impose a 14 cent federal tax in addition to the existing eight cent tax. The 14 cents would be rebated to states which do not levy their own tax in excess of three cents. The beauty of this bill is that the states would receive rebates equal to their existing tax revenues, plus the money they are now losing through uncollected taxes on bootleg cigarettes. Thus, in many states, such as my own, the state coffers would expand while the bootleggers' booty contracts.

In closing, I am pleased to say this is one tax bill for which new revenues would not come from the consumer's pocket or payroll check, but rather from the criminal's cache whose destruction is long overdue.

Thank you.●

REINTRODUCTION OF THE CONCURRENT RESOLUTION TO DISAPPROVE THE PRESIDENT'S REJECTION OF IMPORT RELIEF FOR THE METAL FASTENER PRODUCERS OF AMERICA

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. OAKAR) is recognized for 5 minutes.

● Ms. OAKAR. Mr. Speaker, as you know, I have been engaged in efforts to bring import relief to the domestic producers of nuts, bolts, and large screws. These metal fasteners manufacturers have been battered by the onslaught of foreign competitors over the last 8 years. My views on this matter are shared by many in the administration as well as scores of my colleagues in the Congress.

Today, I reintroduce the concurrent resolution that would override the President's action to deny tariff relief for this industry. The concurrent resolution now has over 50 cosponsors. As we await the action of the full committee, it is imperative that supporters of this legislation stand up and be counted. Recently, the members of the blue collar caucus have done just that. With the support of the blue collar caucus and the other proponents of this legislation, I am convinced that we will demonstrate to the administration that the American people want their Government to provide prudent protection from foreign penetration into domestic markets. The provisions of the Trade Act of 1974 provide for this process of congressional review, we must accept our responsibility to forge an effective and balanced trade and tariff policy.

Mr. Speaker, I urge my colleagues to give careful consideration to this issue as it has implications for every domestic industry and impacts on each and every congressional district. We have reached a critical impasse in international trade, and we must respond to this challenge in prudent and positive manner.

H. CON. RES. 542

Whereas the domestic producers of iron and steel industrial fasteners are facing serious injury from import competition; and

Whereas present rates of duty are inadequate for thousands of American workers in the metal fastener industry; and

Whereas the President of the United States has rejected the recommendations of the United States International Trade Commission for import relief of the metal fasteners industry: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Congress does not approve the action taken by, or the determination of, the President under section 203 of the Trade Act of 1974 transmitted to the Congress on February 10, 1978.●

IRISH REUNIFICATION URGED BY CHAIRMAN ZABLOCKI

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

● Mr. FASCELL. Mr. Speaker, as you personally know so well, Irish people everywhere have for too long endured the agony of a separated Ireland. The conflict in Northern Ireland has produced a tragic loss of life, bitterness, and misery for thousands.

The basic message my good friend and colleague, the Honorable CLEMENT J. ZABLOCKI, presented to the Milwaukee Press Club on St. Patrick's Day was that the eventual reunification of Ireland would help to heal those scars and bring Ireland the harmonious and peaceful future it so much deserves and wants.

As chairman of the House International Relations Committee, Mr. ZABLOCKI led a study mission on which I had the privilege of serving to Ireland last January. At that time we met with Prime Minister Jack Lynch and other officials of the Irish Republic, all of whom were firm and united in supporting the goal of eventual reunification. At the same time, the Irish leaders opposed a sudden withdrawal of British troops and applauded U.S. appeals to curb the flow of private aid to terrorists in Northern Ireland.

Because Mr. ZABLOCKI's remarks bear directly on matters of deep concern both to Congress and to all Americans interested in Ireland's future, I am pleased to place them in the RECORD at this point, together with the March 18 Milwaukee Journal report on the address. I commend the statement to the full and careful attention of my colleagues:

REMARKS BY HON. CLEMENT J. ZABLOCKI

It is a privilege for me to address the members and friends of the Milwaukee Press Club at this annual St. Patrick's Day meeting.

While I have no doubt that St. Casimer is of equal rank among the Seraphim with St. Patrick, I think we should be grateful that Providence has given us one genuine national American holiday: St. Patrick's Day. This is the day for national rejoicing—for the true "wearing of the grin" by young and old, male and female, black and white. It is the day on which all Americans—regardless of their race, creed, color or national origin—are convinced that they are Irish.

This is surely a remarkable tribute to one of mankind's most ancient yet most modern civilizations and cultures. As we Americans celebrate this holiday we should not overlook the profound contribution made by Ireland to the origins of Western civilization. The distinguished English historian, the late Sir Arnold Toynbee, reminded us that fifteen centuries ago Europe went through a long period of cultural darkness. At that point the light from Ireland rekindled faith and learning in Western culture. As Professor Toynbee observed, from the fifth to the tenth century A.D., "it was the Irish who imparted culture and the English and the continentals who received it."

This year and next we Americans are privileged to witness the depth and scope of this Irish contribution to world civilization in the Exhibition of Treasures of Irish Art, 1500 B.C. to 1500 A.D., which is visiting five of our major cities. This exhibition assembles such invaluable treasures as the Book of Kells, the Tara Broach and the Ardagh Chalice and has brought them to the United States as Ireland's tribute "to the American people for the generous help she has received for the past 200 years." The exhibition enables us, I believe, to look beyond Ireland's temporary troubles to the riches of its past and the potential glories of its united future.

As the son of Polish parents I have always had a deep affinity for the Irish. The Poles and the Irish share many virtues—and perhaps even a few vices—in common. Both possess:

A strong faith in God, in themselves and in their fellow human beings.

A deep love of family and of country, linked to an abiding passion for promoting human freedom and social justice not only for their own peoples but for men and women in every part of the world.

A history marked by suffering and sorrow as other nations crossed and re-crossed their homeland and as famine and hardship forced millions of Poles and Irish to move to other lands and nations.

A folk tradition, music and literature that maintained a sense of optimism about the future—a "smiling through the tears." What Chesterton said about the Irish could equally be said of the Polish: "Oh, the merry Gael whom God made mad, for all his wars are merry and all his songs are sad."

We all admire several gifts that we like to associate with the Irish: a swift wit, a keen intelligence, and—at least among Democrats—a great ability to organize politics. Will Rogers once said that he didn't belong to any organized political party—he

was just a Democrat! But we all know that this saying was only partly true—for the Irish in America helped the Democratic party to become a unity despite its great diversity. In the Congress of the United States we still see this Irish genius for politics at work in the former Speaker of the House, John McCormack, and his fellow Boston heir, Thomas "Tip" O'Neill.

An important feature of the Irish is their humor. I have never forgotten the story of St. Patrick. The Angel of the Lord promised him three great things for his special day: that some day no outlander would rule in Ireland; that there would be no rain in Dublin on his feast day—a major miracle of the first order; and that the flames of hell would release the souls of 12 Irishmen on St. Patrick's Day. I have not seen the weather report so I cannot vouch whether all parts of this promise are being fulfilled today. But when I walked in here today your President told me that the Milwaukee Press Club had suddenly had 12 new applicants for membership and he advised me to look carefully around the room!

The contribution of the Irish to American life and liberty is readily apparent. As a young boy I was drilled at home with the idea that Pulaski and Kosciusko were the mainstays of the American revolution. But one cannot long serve in the U.S. House of Representatives without learning each year that the Irish served so conspicuously in Washington's army that the backbone of the revolution—the Pennsylvania line—was renamed by General "Light Horse" Harry Lee as "the line to Ireland."

It is easy to overlook that in 1776 the "shot heard round the world" echoed in an Ireland that was also subject to England. George Washington saw independence as essential for both Ireland and America. In a famous letter he wrote:

"Patriots of Ireland! Champions of liberty in all lands—be strong in hope! Your cause is identical with mine!"

The Irish who came to America—and today some 20 million persons claim Irish descent—did not find their road an easy one. They worked hard and helped build a strong and vibrant United States—from the Erie Canal to the Golden Gate. They were abused and derided—and one hostile critic said in 1919 that their immigration should be restricted, arguing that even a 3% quota for Irishmen was "too damned much."

But against the slurs, against the obstacles, their faith, hard work, optimism and humor won out. Several years ago the Chicago-based National Opinion Research Center indicated the extent of their progress by noting that more than most other American groups the Irish today "are more likely to have Ph.D's or advanced professional degrees."

What has best served the Irish, I believe, is their feeling that life is not meant just for hard work but also for purposes of play and culture. Long ago the Irish learned to take human pretensions with a grain of salt. This is the core of their humor.

I remember a story of the young Irish girl who left Cork for New York. Before she left she visited her pastor to get a certificate of good character for a job reference. But when she arrived in New York she discovered that she had lost the paper.

Her friend, Seamus, was from the same village and said—don't worry, I know and I'll write another reference. His began—"To whom it may concern, Mary Haggerty had a good character when she left, but she lost it coming over on the boat!"

We need a sense of humor in our lives, in our culture, at all times. And St. Patrick's Day reminds Americans what we have gained from the Irish among us.

Ireland has a glorious past, a difficult present but a hopeful future. This is the message I suggest we should keep before us today. As we celebrate what being Irish means to all Americans today, we cannot avoid looking at the continuing difficulties facing contemporary Ireland.

On an occasion like this, it is important, beyond celebrating the past, that we recognize the troubles afflicting all of Ireland and the destiny of its inhabitants, both in the North and the South. These are matters of deep and continuing concern not only to Irish-Americans but to the House Committee on International Relations, on which I serve. In fact, I recently led a delegation of 12 committee members on a study mission to seven countries of the Middle East and Ireland. Our last stop was in Dublin. This, as we anticipated, was an important visit.

During our stay there, we met with Prime Minister Jack Lynch, Minister of Foreign Affairs Michael O'Kennedy, and the Honorable Garret Fitzgerald, former Foreign Minister and current leader of the main opposition party—the Fine Gael—and other government officials. All received us with traditional Irish warmth and the utmost cordiality.

The main purpose of these meetings was to ascertain the attitude and position of the Republic of Ireland toward the situation in Northern Ireland and the role that the U.S. should play in that area of the world. And instead of talking, as members of Congress are prone to do, we listened—and, I assure you, we listened intently.

I can briefly summarize some of the points which emerged from those discussions: all of the leaders with whom the study mission met agreed that the eventual goal should and must be reunification of Ireland. The Irish Times recently supported Prime Minister Lynch's avowal of reunification by editorially stating: "Proud as we may be of the achievement of this State, there is no such thing as 26-county patriotism. The patria is the whole island." While this common Irish view is seldom seen in the U.S. press, it clearly exists.

Ireland's leaders recognize, however, that reunification cannot be imposed and that it can only come about with the consent of all of the people of Northern Ireland. It is essential, therefore, that the sizeable portion of the area's population desiring continued union with Great Britain be convinced that their economic, political, religious, and other rights will be guaranteed in a reunited Ireland.

It is recognized everywhere that reunification is a long-range objective. However, our committee was told that the British government should now adopt a policy calling for the eventual reunification of Ireland. Prime Minister Lynch has urged Britain to remove its statutory "steel wall" ban to Irish unity and has called for Westminster to "indicate in a general way" that it would like to see the Irish people coming together—North and South.

At the same time, it was emphasized to us that most Irish would oppose a precipitous withdrawal of British forces at the present time, as this would lead to chaos and violence in Northern Ireland. In support of this view, Irish leaders noted that even an interim settlement in Northern Ireland was impossible as long as the violence continues.

In this same connection, the Government of the Republic emphasized its support and approval of the statement issued on St. Patrick's Day, 1977, by the Speaker of the House, Thomas P. O'Neill, Senators Edward Kennedy and Daniel Patrick Moynihan, and Governor Hugh Carey of New York. This statement appealed for an end to the violence and indicated that this was the approach that the U.S. should take with respect to the situation in Northern Ireland.

The Irish Government also welcomed the position taken by President Carter on August 30, 1977, in which he asked all Americans to refrain from providing financial or other aid to organizations whose involvement, "direct or indirect, in the violence delays the day when the people of Northern Ireland can live and work together in harmony, free from fear." Irish leaders also welcomed the President's offer to join with others to see how additional job-creating investment could be encouraged, to the benefit of all of the people of Northern Ireland once a settlement had been reached.

The subject of Congressional hearings on the situation in Northern Ireland was a matter of particular interest to our study mission. However, we met with firm and united disapproval of such action. Such hearings, the Irish leaders stressed, would exacerbate the situation and not contribute to a solution of the problems. They also argued that hearings would constitute an intervention in the internal affairs of Ireland and would be used by provisional IRA terrorists to rally support for their cause. This in turn would encourage continued violence and bloodshed.

The Northern Ireland of the present moment is not the generally tranquil Ireland of the Republic. Nor will it become such until—the Irish leaders believe—there exists one peaceful, united island.

The achievement of peace will require both leadership and a generous spirit of give and take between Ireland and England and within the Irish community itself.

But generosity has always been a dominant Irish trait. This was described in an ancient Irish poem when Finn MacCool's son said of his father: "If the leaves of the forest were of silver and gold, Finn would give them all away."

I have no doubt that the Irish—whose culture lives by generosity—will find a way to turn the troubles of the present into the bright promises of tomorrow.

[From the Milwaukee Journal, Mar. 18, 1978]

ZABLOCKI FAVORS IRISH REUNIFICATION

Speaking at a St. Patrick's Day luncheon at the Milwaukee Press Club Friday, Rep. Clement Zablocki (D-Wis.) said that recent meetings with Irish leaders in Dublin had convinced him that the United States should encourage the eventual reunification of Ireland.

He concluded a talk laced with witticism and leavened with additional foreign policy remarks by criticizing the Carter administration's relationship with Congress.

Zablocki, chairman of the House Foreign Relations Committee, met with Irish Prime Minister Jack Lynch and other officials of the Irish Republic in January.

REUNIFICATION AIM

"All of the leaders with whom the study mission met agreed that the eventual goal should and must be the reunification of Ireland," said Zablocki. "While this common Irish view is seldom seen in the United States press, it clearly exists."

Although about 110 members of Congress have signed resolutions calling for hearings on the Northern Ireland problem, said Zablocki, southern Irish leaders warned him that such hearings in the United States would only spark more violence in Northern Ireland.

Zablocki said the Irish leaders told him their people opposed a sudden withdrawal of British troops and applauded US appeals to curb the flow of private economic aid to the Irish Republican Army.

REMEDY SUGGESTED

"Our committee was told that the British government should now adopt a policy calling for the eventual reunification of Ireland," said Zablocki. "Not to do it now, but for England to look objectively and say, 'Someday there will be a reunited Ireland.' This will, I think, put aside some of the very emotional problems that are causing the killings, that are causing the atrocities."

When asked during a question and answer session if he was comfortable with the Carter administration, the 30 year congressional veteran replied that Carter has worked more closely with Congress than recent presidents, but not enough to meet expectations.

PRAISES APPOINTEE

"I think his White House kitchen cabinet could use a little improvement," he said. "Our liaison really wasn't the best. . . . Whenever he's in trouble he comes to us, but not before."

Zablocki indicated that his main criticism was that the president had too many Georgians on his staff. However, he said the appointment last spring of veteran congressional staff member William H. Cable, a former Milwaukeean, as chief of liaison with the House had improved that situation somewhat.●

RADIO SURVEY SHOWS VERY LITTLE SUPPORT FOR ANTISMOKING PLAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

● Mr. NEAL. Mr. Speaker, from Albuquerque, N. Mex., comes news that a sampling of citizens of that city shows very litle support for HEW Secretary Joseph Califano's proposed antismoking campaign. Because New Mexico is not involved in the production of tobacco, or the manufacture of tobacco products, I think it is safe to assume that some other factors were responsible for the negative response. I would contend, further, that the most likely explanation is that the majority of the people sampled in the KOB Radio news survey regard Mr. Califano's proposals as an unjustified intrusion upon the personal choices of individuals, as well as a waste of Federal funds on a propaganda campaign which would merely reiterate the warnings of the Surgeon General.

Radio Station KOB does not claim that the survey is indicative of the opinions of the entire population of Albuquerque, nor do I. The survey does lead one to wonder, however, what a nationwide poll on the same subject would produce. I personally believe that a majority of Americans would agree with the KOB findings. KOB's explanation of the survey follows:

KOB RADIO NEWS SURVEY

70 percent of the people who responded to our latest KOB Radio News Survey did not think the federal government should spend thirty million dollars for a campaign to stop people from smoking.

The News Survey is made by randomly selecting numbers from the November 1977 Albuquerque Metropolitan Telephone Directory, using a selection code predetermined by random numbers. The code insures that no person called in a News Survey will ever be contacted again, and that mechanical or personal selection prejudice will not be a factor in the choice of phone numbers called.

Each call is automatically given the question with a thirty-second time period allowed for a reply. This reply is recorded and tabulated by an automatic device.

28 percent of the people responding believed money for an anti-smoking campaign would be well-spent. 2 percent were undecided. 102 people were reached in all with 83 of these responding. A total of 136 calls were made for this sampling.

The KOB Radio News survey is made public for the purpose of information and entertainment only and is not represented to be indicative of the opinions of the entire population of the city.●

THE WILLIAM JENNINGS BRYAN DORN VETERANS' HOSPITAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. ROBERTS) is recognized for 5 minutes.

● Mr. ROBERTS. Mr. Speaker, at its 78th national convention, held in Minneapolis, Minn., August 19–26, 1977, the Veterans of Foreign Wars passed a resolution calling for legislation that would name the Veterans' Administration hospital in Columbia, S.C., the "William Jennings Bryan Dorn Veterans' Administration Hospital."

A new replacement hospital is now being constructed in Columbia. Bryan Dorn, more than any other single individual, is responsible for this great facility. My colleagues will also recall that Mr. Dorn was instrumental in helping establish the new medical school at the University of South Carolina. Thanks to the former chairman of the House Committee on Veterans' Affairs, South Carolina will have two outstanding medical schools and a medical complex in Columbia that will rank among the finest in the country. Veterans and nonveterans alike will benefit from his efforts.

Mr. Dorn sat on the Committee on Veterans' Affairs for 23 of his 26 years in the House of Representatives—serving as chairman of the committee during the 93d Congress. As my immediate predecessor in the chairmanship of the House Committee on Veterans' Affairs, he provided strong leadership that benefited all America's veterans. He established a reputation as a knowledgeable and committed legislator. While in Congress, he played a vital role in the enactment of every major piece of veterans' legislation since World War II. The veterans of this country and their dependents have no greater friend than Bryan Dorn.

Accordingly, Mr. Speaker, in carrying out the mandate of the members of the Veterans of Foreign Wars of the United States, I take personal pleasure in introducing this bill in behalf of the organization to give the new Columbia VA hospital Mr. Dorn's name. This facility will stand as a symbol of his dedication to the welfare of those who served our country in a time of need. There follows a copy of the letter I recently received from Mr. Donald H. Schwab, director of the National Legislative Service of the Veterans of Foreign Wars:

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
Washington, D.C., March 16, 1978.

Hon. RAY ROBERTS,
Chairman, Committee on Veterans' Affairs, U.S. House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: It is my pleasure to advise you that the 78th National Convention of the Veterans of Foreign Wars of the United States passed Resolution No. 315 to name the Veterans Administration Hospital in Columbia, South Carolina in honor of the Honorable William Jennings Bryan Dorn.

Our rationale therefor is that former Representative Dorn served in the Congress of the United States for 26 years and introduced, or cosponsored, considerable legislation beneficial to veterans, their dependents and survivors. Furthermore, by his own request, Mr. Dorn was a member of the Committee on Veterans' Affairs, United States House of Representatives for 23 years and during the 93d Congress was overwhelmingly elected Chairman of the Veterans' Affairs Committee and was instrumental in seeing that a new Veterans Administration hospital was constructed in Columbia, South Carolina.

In view of the foregoing, it would be greatly appreciated by the more than 1,850,000 members of the Veterans of Foreign Wars of the United States and the 590,000 members of our Ladies Auxiliary if you would introduce legislation in the House of Representatives to fulfill our resolution.

With best wishes and kindest personal regards, I am

Sincerely,
DONALD H. SCHWAB,
Director,
National Legislative Service.●

HOW TO LOWER BOTH UNEMPLOYMENT AND INFLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 10 minutes.

● Mr. REUSS. Mr. Speaker, the unemployment-inflation dilemma is one of the most critical economic problems we face today. This fact is obvious to virtually everyone. It is also obvious that the difficult task of resolving this dilemma—of reducing both the rate of inflation and the rate of unemployment—has fallen squarely on the shoulders of the Federal Government—on the administration, on the Congress, and on the Federal Reserve.

There is a third fact which is equally obvious: The Federal Government has yet to devise a program that is capable of reducing both inflation and unemployment.

It is evident to me that we need a fresh approach to our Nation's unemployment and inflation problems. What is to be done?

First. In my view, too much emphasis is being placed on macroeconomic policies aimed at controlling aggregate demand; such policies are, by themselves, inadequate to the task. At a minimum, demand management policies must be supplemented with a program of microeconomic policies designed for the purpose of alleviating pressures that arise from the supply side of the economy. Such a program should include, for example, actions aimed at the structurally

unemployed, and other measures targeted specifically at slowing the rate increase in unit labor costs over time.

Second. It is essential that we not undertake programs which have the effect of raising costs and prices without expanding output and employment; we must, as Arthur Okun put it recently, "stop the self-inflicted wounds."

Third. We must change the monetary-fiscal policy mix in such a way that more of the burden of fighting inflation is borne by fiscal policy. The Federal Reserve has for years anointed itself as the only anti-inflationary game in town. This has created a high interest rate policy which has proved inimical to private business investment spending. Not only is a low rate of capital formation detrimental to our long-run objective of slowing inflation. It also makes it difficult to absorb new entrants into the labor force in the future, and it slows the future growth of labor's real income.

Fourth. Finally, we must not allow ourselves to be pressured into using monetary and fiscal policies (or any other policies for that matter) for the purpose of artificially propping up the dollar, other than in a truly "disorderly market." Our best course with respect to the dollar is to let its price be determined by the forces of demand and supply in foreign exchange markets. We need to pass an energy bill that will effectively display to the world our intent to cut back on our consumption of oil.

But we ought never to sacrifice vital domestic objectives on the balance of payments altar.

A program forged on the basis of these principles would take us a long way toward solving our unemployment-inflation dilemma. Let us consider, therefore, each of these four principles at greater length.

1. MICROECONOMIC POLICIES IN SUPPORT OF MACROECONOMIC POLICIES

One of the most difficult problems we face today is the elimination of structural unemployment—unemployment which blights the lives of perhaps 3 million of our young people, racial minorities, and urban poor. We cannot possibly hope to achieve for these least advantaged citizens the low rates of unemployment we desire through an exclusive reliance on traditional monetary and fiscal policies. The result would simply be intolerable inflationary pressures for everyone with little impact on the problem itself.

What we need, therefore, are policies that address specifically the problems of the structurally unemployed. To be successful, moreover, these programs must be built on the basis of a close partnership between the public and private sectors.

Toward this end, I suggest that an extended network of federally-funded local employment councils be created, composed of large and small businesses, local banks, and labor and community leaders, whose purpose would be to match hard-to-employ persons with job opportunities that may in many cases already exist. Such a program would extend the work currently being done by the National Alliance of Businessmen, by many corporate sponsors of the Committee for Economic Development, and by many local business and business-labor organizations.

These local employment councils could administer a Federal training-wage subsidy plan. Qualified businesses would receive up to perhaps one-third of the wage of new employees in jobs with heavy training requirements. The effect would be to equip labor market entrants with skills, to provide them with a better shot at that all-important first job opportunity, and to insure businesses against the risk normally inherent in hiring from the hard-to-employ labor pool.

Last week I urged the President to give his immediate attention to this proposal. I also suggested that he make an announcement declaring it our objective to reduce structural unemployment by 1 million persons over the next 3 years, using private employers to the maximum extent possible, with an increase of public service employment absorbing the balance. The President could detach from his welfare reform program the proposal to double public service employment (from 700,000 jobs to 1.4 million), and send it to Congress for immediate action. I believe that such proposals will enable us to lower the unemployment rate with no concomitant increase in the rate of inflation.

There are other labor-market proposals which also ought to be given serious consideration in our fight to solve the unemployment-inflation dilemma. The most novel of these are the various tax-based income policy (TIP) proposals developed separately by Federal Reserve Gov. Henry Wallich, Sidney Weintraub and Arthur Okun. Although each of the proposals are marked by substantive differences, each shares one common feature—use of the tax system to lower real labor costs to employers, while at the same time raising after-tax compensation to employees. A successful TIP program would enable us to attain a lower rate of unemployment with a smaller increase in the general level of prices.

I am not fully convinced that TIP is an appropriate means of controlling inflation. But it is important that we learn more about it. I recommend that the Council on Wage and Price Stability (CWPS) study various TIP proposals, and report to us on their effectiveness and on their ability to be implemented in practice. Further, I ask that CWPS provide us with estimates of the extent to which past inflation rates would have been altered had a TIP policy been in place, what effects it would have had on incomes, and its net budget costs (if any).

2. SELF-INFLICTED WOUNDS

A number of actions were undertaken in 1977, and others are under consideration now, which will affect adversely our inflation rate this year and for years to come. Unfortunately, these very same proposals are also likely to lead to higher levels of unemployment and lower rates of production during 1978 than would otherwise have taken place. The sharp increase in payroll taxes enacted by the Congress late last year was perhaps the most significant self-inflicted wound of all. In addition, we readopted a farm program with its emphasis on acreage set-asides as a way of bolstering farm incomes. Such a policy reduces both agricultural supplies and agricultural productivity for which we get in return only higher agricultural prices. Other farm proposals currently under consideration are similarly inflationary in their impact. The minimum wage was recently raised 15 percent, with substantial further increases planned for the years ahead. And finally, a number of protectionist measures were put into effect last year which will be paid for by the American consumer in the form of higher prices for TV sets, shoes, steel and sugar.

What is the overall impact of all of these proposals? As Okun states in the March/April issue of Challenge magazine:

> Even with no allowance for the likelihood of additional price-raising energy taxes, the cost-raising actions of 1977 are likely to add roughly a point to the price level over the year ahead. That is more extra inflation than we would probably have gotten from doubling the size of the budgetary deficit through massive personal and corporate income tax cuts, and at least the latter course would have given us very substantial gains in output, employment, and capital formation.

We should never make the mistake, given the current structure of inflation, of assuming that these measures are only one-shot changes in the price level rather than persistent inflationary forces. As the 1978 Joint Economic Report, just released, states:

> Even when the price increase comes from a one-time change such as a decision to increase a payroll tax, or a decision by a State to increase its sales taxes, the higher prices become a part of the cost of living. This affects subsequent wage negotiations, and this, in turn, affects the behavior of unit labor costs, and therefore is likely once again to show up as a price increase. Consequently, even one-time changes that raise the price level tend to become embedded in the wage-price spiral.

As a result of these inflationary impacts, I support the proposal to reduce social security taxes by rolling back the withholding rate from 6.05 percent to the 1976 level of 5.85 percent. This proposal is also supported by the present director of CWPS, Barry Bosworth, and it ought to be embraced immediately by Secretary Blumenthal and the President. In my view, the additional scheduled rate increases should also be repealed. General revenues should be used instead to replenish and refurbish the unemployment insurance and social security trust funds. As regards the proposed tax cut for 1979, there should be a compensating reduction in the amount of personal income tax relief proposed by the administration.

With respect to our agricultural programs, I recommend the elimination of all acreage set asides. In addition, because higher price supports are both a source of inflationary pressures and an

inefficient means of insuring farmers a decent income, I recommend, first, a supplementary program of direct income supports, enabling the family farm to weather bad years without imposing unnecessary costs on consumers on socially wasteful restrictions on production; and second, a meaningful war-on-hunger program.

With respect to our international trade policies, we must continue to resist protectionist measures, seeking instead to search for ways to liberalize our trade policies and those of our trading partners.

Since, in addition to its inflationary impact, the minimum wage frequently creates the severest employment problems for precisely the people it is most intended to assist, why not try an experimental system of wage subsidies for employers in some labor markets where there exist large numbers of unemployed, unskilled teenage Americans? Should such a program prove successful, yielding demonstrable increases in employment without displacing workers who do not qualify for subsidy, then I recommend further experimentation with a differential minimum wage for new teenage workers in certain job classifications in, say, three selected labor markets. Such experimentation would serve to test whether any benefit may be had by allowing young people to earn money at subminimum rates in jobs that might not otherwise exist. Such a program should be designed with the strictest safeguards against any undermining of wage standards for those already employed, or likely to become employed by the natural growth of employment. If experimentation with wage subsidies shows that such safeguards can be designed, then differential minimum wages would seem to offer the prospect of a sufficiently attractive alternative (at no cost to the budget) to outright unemployment to justify such limited experimentation.

I further recommend the immediate enactment of a national energy plan. The proposed wellhead tax on domestic crude oil has become a political stumbling block and it should be dropped. It would be inflationary and it would not stimulate new supplies. The energy bill, with the remaining four elements of the President's plan, should become law promptly. Work should then begin on a phase two energy program, including more support for the development of alternative energy sources, such as solar, wind, and geothermal, and a standby gasoline rationing system to insure fair allocation in the event of a supply shortage.

Finally, in line with the recommendations made by Barry Bosworth last week in his internal memorandum to the President, and by Arthur Okun as well, I recommend that there be a public monitoring of all public policy microeconomic measures that raise or lower costs and prices. An increased awareness of the likely impact of these measures may help us to stop the self-inflicted wounds.

3. THE MONETARY-FISCAL POLICY MIX

Although the Federal Reserve is organizationally independent of Congress and the executive branch of Government, there is a growing concern over the consequences of this independence. This concern derives from the fact that the policy goals of the Government, on the one hand, and the policy goals of the Fed, on the other, frequently come into sharp conflict with one another—a conflict which many people view as destructive. In addition, because monetary policy is shrouded in so much secrecy, it has been difficult for the Government to formulate its fiscal policy plans with any degree of precision, since the future state of the economy cannot be known with any degree of precision without at least some knowledge of the intentions of the monetary authorities.

There are, of course, a number of very good reasons why monetary and fiscal policy ought to be coordinated. In the first place, in view of the fact that both monetary and fiscal policy can have a substantial short-run impact on the economy, there arises the possibility, in the absence of coordination, that the Fed could pursue an expansionary policy at the same time that the Government is pursuing a contractionary policy. The policy effects would cancel each other out, and neither the Fed nor the Government would attain its targeted objectives. In addition, it is also possible that the combined independent policies, without coordination, could be overly expansionary or overly contractionary; in other words, the combined policies could be a source of economic instability.

There are other reasons for cooordination as well. It is a widely held view that the Fed thinks of itself as the only anti-inflationary game in town. This kind of thinking has led the Fed a number of times to pursue a more restrictive monetary policy than was desirable from the point of view of its impact on business investment spending. In order to reduce both current and future inflationary pressures, it is essential that fiscal policy take on more of the burden of controlling inflation (not through overall aggregate measures, but through a series of specifically targeted microeconomic policies aimed at reducing cost-push and structural pressures) and that monetary policy become somewhat more expansionary in order to stimulate investment spending. In the absence of monetary-fiscal policy coordination, how are these goals to be accomplished?

As a result of these considerations, I fully endorse the recommendations contained in the 1978 joint economic report on the question of monetary-fiscal policy cordination. I do not share the views of those who believe that these recommendations threaten the Fed's independence. Indeed, as Walter W. Heller said recently in an open letter to Board Chairman G. William Miller:

> Coordination, trade-offs, and occasional compromise in pursuit of national economic goals represent not an erosion, but a constructive exercise of the Federal Reserve's independence.

4. DOMESTIC MONETARY AND FISCAL POLICIES AND THE DECLINE OF THE DOLLAR

Monetary and fiscal policy should not be used for the purpose of supporting the dollar in foreign exchange markets. I was critical, therefore, of the recent increase in the Federal funds rate and the rediscount rate, because they were specifically designed to achieve a more stable price for the dollar at the expense of our own domestic recovery program.

We also ought to use very sparingly our intervention in foreign exchange markets in support of the dollar. As I said in my speech on the floor of the House on March 9, 1978, E179, there is less reason to be concerned with the decline of the dollar than money reports would seem to indicate:

> The dollar is not in trouble. Nor is it sickly, anemic or suffering from an incurable illness as many foreign and domestic press people would have us believe. Put bluntly, the dollar is no more in trouble than is the German mark, the Swiss franc or the Japanese yen.
>
> In large measure, the continued decline of the dollar in recent months can be attributed to a number of basic market trends. The three trends most commonly cited by the Administration include: (1) The huge current account imbalances between the United States, on the one hand, and a number of our international trading partners (most notably Germany and Japan), on the other; (2) the more rapid growth experienced in the United States in comparison with the rather sluggish performances turned in by the vast majority of the major Western governments; and (3) a rate of inflation in the United States that exceeds those experienced by many of our major Western allies. Under a system of flexible exchange rates, it is quite natural to expect these differences to put downward pressure on the dollar and upward pressure on foreign currencies like the German mark, the Swiss franc and the Japanese yen. The decline of the dollar, under these circumstances, is not a sign that the dollar is sickly. On the contrary, its decline reflects the healthy operation of our foreign exchange markets. This is precisely the way flexible exchange rates are supposed to operate. This means, of course, that if (i) more investment funds are attracted home, (ii) our consumption of oil is slowed, and (iii) the differential rates of growth between the United States and her trading partners are narrowed (as the Carter Administration believes will be the case), the downward pressure on the dollar will slacken and its decline possibly reversed.
>
> In very recent weeks, a number of other pressures have been exerted on the dollar which contributed in a major way to the sharp decline registered last week. The first was a report suggesting that Iran will join with Kuwait to call for the establishment of a new pricing system for oil based on a whole group of currencies instead of just the dollar. Second, there seems also to have been some recent acceleration in the rate at which a number of foreign governments have been selling off their dollar reserve in favor of the German mark as a refuge currency. Third, although the growth prospects for Western Europe and Japan in 1978 are generally believed to be brighter than they were for 1977, it is now a widely held view that the initial growth forecasts were overly optimistic. And finally, the concern which has been expressed in recent weeks over the latest inflation and monetary base figures in the United States has caused a number of for-

eign exchange market analysts to revise upwards their expectations regarding the future course of prices in the United States for 1978. All of these factors, of course, have the effect of putting further downward pressure on the dollar. And although the magnitude of recent declines has been a source of alarm in Western Europe and elsewhere, it is hardly startling that the decline took place given the combined impact of all of the above-enumerated causes.

It also needs to be emphasized that virtually all of the depreciation of the dollar in recent months has been in terms of a few currencies only—primarily the German mark, the Swiss franc, and the Japanese yen. The Germans and the Japanese are certainly important trading partners, but they are significantly less important in terms of U.S. trade than Canada and the developing countries. And the dollar relative to those currencies has hardly depreciated at all. On the basis of trade-weighted exchange rates, the depreciation of the dollar has not been especially large. Indeed, the Federal Reserve Board has reported that since May 1970, the trade-weighted exchange rate for the United States has declined only 17 percent—hardly a startling decline.

The question that arises from all of this is: What should be the appropriate U.S. response? In my view, we should go very slow on all foreign exchange intervention operations. It was a mistake for the United States to negotiate yet another agreement with the German Bundesbank on March 13. Given the magnitude of the dollar holdings by foreigners (variously estimated at between $500 and $600 billion), and the dollar holdings of U.S. residents, there is virtually nothing that the United States or any other country can do to stem a significant attack on the dollar.

Realistically, it is a bottomless pit. We have already made more of a commitment in support of the dollar than is desirable, and we ought not to throw good money after bad. Given the events of the recent past, the foreign exchange markets are behaving about as expected. If Western European governments want to intervene to stem the dollar's decline, that may be their prerogative. But we should not be party to such a potentially costly venture.

There is every reason to believe that the dollar will stabilize and perhaps even reverse its decline once the differential rates of growth between Western Europe and the United States are narrowed. Indeed, one of the main sources of the huge U.S. trade deficit has been these differential growth rates. A study undertaken by the Congressional Budget Office last month suggests that if other industrial nations had recovered from the world recession at the same pace as the United States, we would have had by the second quarter of 1977 a small net surplus of goods and services exports over imports.

I hope that the dollar will turn around in the very near future. I was encouraged by the reports coming out of the most recent OECD meetings in Paris which suggested that most delegates had come to an agreement in favor of a more concerted growth policy on the part of all 24-member countries. I would like to see such a growth policy emphasize micro as well as macro programs. While the new concerted growth policy is still far from being implemented by the governments involved, it could serve as an optimistic prelude to proposed summit meetings in Bonn this July. In addition, the recent initiatives undertaken by the Japanese Government to eliminate some of its trade restrictions augurs well for the future reduction of that country's huge export surplus.

This leads me to the steps which can be taken by the U.S. Government that can give, as a desirable side effect, a significant boost to the dollar on the world's foreign exchanges. Foremost should be the rapid enactment of an energy bill. Our failure to enact such a bill has apparently played havoc with the dollar to the detriment of those countries against whose currencies the dollar has depreciated. We have stalled long enough. An energy bill needs to be enacted now.

We also need to do more to reverse the flow of investment spending abroad. Not only would such a return flow cause a step up in investment domestically, it would also help to push up the dollar. Under the circumstances, it seems entirely appropriate to urge American banks to reconsider their lending policies in a way that would reduce their foreign lending operations somewhat in favor of more generous lending policies to domestic business. Only a moderate shift in bank portfolios in the recommended direction would take a great deal of pressure off the dollar and it would help to finance the capital spending we so badly need. It would also take considerable pressure off the Federal Reserve, because it would permit interest rates to be brought down without excessively rapid growth in the money supply.

This is a reasonable request to make of our banking system. Interest rates are very favorable in the United States, and lending opportunities surely abound. Further, with the putting in place of the new Witteveen facility, foreign credit demands should be eased and it will then make sense for our banks to look homeward to a larger extent than they are presently doing.

And finally, there ought never to be any ambiguity with respect to the position of the United States in regard to flexible exchange rates. We will not return to the Bretton-Woods system of fixed par values, or any varient thereof. That system may have served us well in an earlier era, but in today's world economy it would only court disaster. Floating is the only exchange rate regime that permits each country the kind of flexibility it needs to realize its domestic goals without at the same time creating major problems for other trading partners. Intervention constitutes a step backwards toward that earlier era. We must not take any more steps into that past.●

RETREAT SEEN ON SOCIAL SECURITY BITE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE) is recognized for 5 minutes.

● Mr. BURKE of Massachusetts. Mr. Speaker, I am sure my colleagues are well aware of the mounting public pressure to reduce social security taxes and provide for a general revenue contribution to the social security trust funds. The Congress can no longer afford to ignore this plea from the public.

Employees and employers across the country are becoming increasingly aware of the tremendous burden that the social security taxes place upon them. If the Congress does not act to provide tax relief at the employment level this year, it is very clear that businesses will be forced to close their doors, and the unemployment rate in this country will increase dramatically. We cannot allow this to happen. We in the Congress have a responsibility to promote the principles of free enterprise and to encourage the working people of this Nation.

The following article which appeared in the Chicago Tribune on Sunday, March 19, 1978, illustrates the growing sentiment in the Congress to act now on social security tax reductions. As my colleagues study this issue, I bring to your attention my proposal, H.R. 10668, to reduce the tax rate from 6.13 percent to 3.90 percent in 1979 and provide a one-third general revenue contribution to the social security system.

The article follows:

RETREAT SEEN ON SOCIAL SECURITY BITE

(By Raymond Coffey)

WASHINGTON.—Three members of the House Ways and Means Committee are predicting confidently that Social Security payroll taxes will be sharply reduced before Congress goes home to face the voters in the November elections.

"The voice of the people has been heard," said Rep. Abner J. Mikva [D., Evanston], referring to a darkening storm of protest from taxpayers furious at the dent being put in their paychecks by Social Security deductions.

"There's going to be something done this year, some relief before we go home in October," he said.

Mikva was joined in his forecast by Rep. James A. Burke [D., Mass.], chairman of the Social Security subcommittee of Ways and Means, and by Rep. William A. Steiger [R., Wis.], like Mikva a member of the subcommittee.

Until last week such forecasts might have been discounted as political wishful thinking inspired by the approach of election day.

But last Wednesday House Speaker Thomas P. O'Neill (D., Mass.), whose political wisdom is highly valued these days in the Carter White House, added his powerful voice to the tax cut chorus.

O'Neill said he had told the White House of the growing political pressures on House members resulting from recent Social Security tax increases.

Some House members, O'Neill said, are concerned that "political repercussions will take place in the middle of their campaigns" for the November election unless there is a rollback of Social Security taxes.

"I would hope something would come from the White House" in the way of a solution, O'Neill said. "They are working on this."

But even if the White House refuses to reverse itself and support a tax rollback, Mikva, Burke, and Steiger say they are sure Congress will act on its own initiative.

With President Carter's support, Congress last year passed what amounted to the biggest peacetime tax increase in U.S. history—a bill to almost triple Social Security payroll taxes over the next 10 years as a means of putting Social Security on a sound financial footing until the end of the century.

The first of those increases is not even scheduled to take effect until next Jan. 1.

But a previously passed increase took effect last Jan. 1, boosting the tax rate for both employers and employees from 5.85 per cent to 6.05 per cent on the first $17,700 of a worker's earnings, with a maximum tax of $1,071 for the employe.

That instantly set off a storm of protest from the taxpayers.

And under last year's bill, next January's increase would boost the tax to 6.13 per cent on the first $22,900 of earnings, with a maximum tax of $1,404 for the employe.

Many members of Congress don't like even to think about what the public reaction will be.

Mikva, Burke, and Steiger have their separate ideas about what should be done to ease the burden on wage earners, but all agree that part of the load should be shifted from payroll taxes to general revenue income tax funds.

All three agree, too, that for a start at least the Social Security tax rates should be rolled back to 1977 levels—that is, as Mikva said, the 1978 increase should be eliminated and this scheduled 1979 increase be voted even before it takes effect.

Mikva says this could be accomplished by shifting at least part of the cost of the Medicare and-or Disability Insurance programs, now supported by Social Security taxes, to general revenue.

And he says this "could be accommodated within the President's own" proposed $25-billion income tax cut package—substituting a Social Security rollback for part of the income tax reduction.

Steiger also favors financing a portion of Medicare from general revenues, but according to a different formula.

Burke would settle now for a rollback to 1977 Social Security tax rates. But ultimately he favors rearranging the whole system and having it financed in equal one-third shares by employers, employes, and income tax revenues.

Burke intends to seek a vote in favor of a rollback on Social Security tax rates at an April 3 meeting of the Democratic Caucus, representing all members of the House majority.

He figures his support will be even greater by then, as members go home for the Easter recess and get more heat from their constituents.

Chairman Al Ullman [D., Ore.] of House Ways and Means and Chairman Russell Long [D., La.] of the Senate Finance Committee are both opposed to switching any part of Social Security financing to general revenues. Both command great power on Capitol Hill.

But Mikva, Burke, and Steiger do not believe either will be able to block a rollback on rates this year.

"The [public] outcry has been so great," Steiger said, that the House will surely act and "if we send it over there, there is no way the Senate is going to stand in the way" of anything so politically popular. I don't think [Long] is going to be able to stop it even if he wants to."

"These guys are going to get hit by a tidal wave [of public protest] the closer we get to the election," Burke said of opponents such as Long and Ullman.

Despite the political storm signals raised by O'Neill, a White House spokesman said he does "not expect our position on a tax rollback to change."

"The trouble," Burke said of the Carter White House, "is that we have people down there who don't know what they're talking about."

One of the administration's principal concerns, he noted, is reducing unemployment. Another is the increasingly menacing foreign trade deficit.

But, Burke said, the steep Social Security tax rates are damaging to the U.S. economy on both counts.

U.S. steelmakers, already suffering heavy market losses to foreign competitors, pay $1,500 more per worker per year in social security costs than any of their foreign competitors. The U.S. auto industry, he said, pays $1,150 more in such costs than its foreign competitors.

"If we're going to have a tax cut this year [as Carter proposes], and if the administration is talking about creating jobs [as it is]," Burke said, "then they ought to make the cut in the jobs area. It should be done at the employment payroll level."●

THE POLITICS OF SALT II

(Mr. CHARLES H. WILSON of California asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. CHARLES H. WILSON of California. Mr. Speaker, the Encyclopedia Britannica book of the year for 1977 contains an excellent analysis of the politics of the SALT II negotiations now going on in Geneva, Switzerland.

The special report, written by Prof. Robin Ranger, a Canadian, provides a special insight into the perceptions of our allies with regard to the many concessions we have made so far to the Soviets. Professor Ranger, of St. Francis Xavier University in Nova Scotia, presumably has no political axe to grind. He points out that,

The basic problem with Carter's policy on arms control was his fondness for simplistic solutions to complex problems, his overcommitment to his chosen solutions, his resultant inability to listen to alternative arguments, and his difficulty in cooperating with other political powers, within or outside the U.S.

Professor Ranger also notes the President's acceptance of "liberal arms control thinking," as espoused by Mr. Paul Warnke, has "created expectations that could not be fulfilled and impeded such progress as could have been made, except in the case of the U.S.S.R."

"There," Professor Ranger correctly notes, "he secured agreements by repeating Kissinger's practice of excessively one-sided U.S. concessions to the U.S.S.R."

I would like to place this report in the RECORD for the consideration of my colleagues and highly recommend it as an unbiased review of what has happened to our national security interests in the short period of one year.

The report follows:

THE POLITICS OF SALT II

(By Robin Ranger)

During his campaign for the presidency of the U.S., Jimmy Carter had advocated much stronger U.S. policies to limit and reduce strategic arms, prevent nuclear proliferation, and curb conventional arms sales. His personal commitment to these ideals was greater than that of any of his predecessors and with characteristic vigour, he quickly initiated policies to implement them. The results, however, fell far short of expectations. The U.S. secured an outline agreement concerning the second round of the strategic arms limitation talks (SALT II) but only by means of unilateral concessions to the U.S.S.R., dropping all proposed limits on the latter's forces. The U.S.S.R. also seemed likely to agree to a comprehensive test ban covering only the superpowers and the U.K., a significant arms-control step but one that increased the already strong criticism of the nuclear test limitation package the Carter administration wanted ratified by the U.S. Senate.

On nuclear proliferation, Carter reduced planned U.S. nuclear electric power and established much stricter controls over U.S. export of nuclear power plants and fuel, establishing more stringent safeguards to prevent their being used to develop nuclear weapons, as India had done with Canadian and U.S. supplies. But he failed to persuade the other major nuclear exporting countries to do likewise, notably West Germany, which refused to cancel its 1975 agreement to sell Brazil a complete nuclear fuel cycle. Moreover, Carter's opposition to nuclear power and the resulting uncertainties over U.S. ability to meet fuel supply commitments increased Western European and Japanese determination to become self-sufficient in those fields, since they lacked the alternative fuel sources open to the U.S. Potential new nuclear weapons powers became more interested in such arms as security guarantees when Carter reduced U.S. overseas forces.

Carter's conventional arms sales policy was officially still being developed, suggesting that it was unlikely to be effective or coherent. Meanwhile, some cuts in arms exports were made but not to such major U.S. allies as Iran or Saudi Arabia. The consequent uncertainty about the availability of U.S. arms over the long run was, however, sufficient to increase interest in self-sufficiency and alternate sources of supply in buying countries, while U.S. rivals in the international arms trade (notably the Western European nations) were quick to take advantage of the situation.

The basic problem with Carter's policy on arms control was his fondness for simplistic solutions to complex problems. his overcommitment to his chosen solutions, his resultant inability to listen to alternative arguments, and his difficulty in cooperating with other political powers, within or outside the U.S. Since arms control problems are complex, and can only be solved by close cooperation between the U.S. and its allies, Carter's approach was often counterproductive. This was especially true because of the exceptionally high degree of ideological conformity to one version of arms control thinking in his administration. All Carter's appointees in the national security field (notably special adviser on national security affairs Zbigniew Brzezinski, Secretary of Defense Harold Brown, and Paul Warnke, head of the SALT negotiating team) believed in the liberal theory of arms control. This held that the superpowers had accepted the strategic doctrine of mutual assured destruction (MAD), whereby each could deter

an attack by being able to guarantee to inflict unacceptable damage on an attacker, even after absorbing a first strike on its own deterrent forces. In the real world, according to this view, very low levels of damage would deter any rational government from even risking the use of nuclear weapons, which were therefore politically useless. U.S. strategic forces were thus more than adequate for deterrence for the foreseeable future no matter what forces the U.S.S.R. developed, enabling the U.S. to hold down its military spending (hence Carter's cancellation of the B-1 bomber) and accept Soviet advantages in SALT II (see Table). While the superpowers sought to contain the strategic arms race, they should also work along with other countries to contain the proliferation of nuclear and conventional weapons on the principle that security was better served by arms control than arms.

This view of arms control had become the dominant one in the U.S. But there were many critics of this concept, who argued that it was incorrect and disproved by experience. They pointed especially to Soviet pursuit of strategic advantage vis-a-vis the U.S. under SALT and in unstable regions of the world. Also, to these critics, those holding the dominant view were ethnocentric, assuming that decisionmakers in other nations, especially the U.S.S.R., either did or should think as they did and would therefore follow any arms control policies proposed by the U.S. But, as President Carter quickly discovered, neither the U.S.S.R. nor many U.S. allies thought as did his arms control advisers. Instead of accepting his proposals, they countered with their own, based on their perceptions of their strategic and nuclear energy requirements.

Carter's negotiations with the U.S.S.R. produced his first substantive agreements, SALT II and a comprehensive test ban, but these underlined his failure to achieve effective rather than just cosmetic arms control. The SALT negotiations had been deadlocked since then secretary of state Henry Kissinger's January 1976 Moscow visit because the U.S.S.R. insisted that its Backfire bomber should not be counted as a strategic delivery vehicle under the Vladivostok force limits but that the U.S. long-range cruise missile (LRCM) be severely restricted in range and numbers. The Soviets also rejected any restrictions on their strategic force buildup. U.S. Secretary of State Cyrus Vance (see Biography) therefore carried two proposals to Moscow in March 1977. The deferral plan sidestepped the Backfire/LRCM problem and was therefore rejected by the U.S.S.R. The U.S. comprehensive plan aimed at real strategic arms control, limiting intercontinental ballistic missiles (ICBM's) equipped with multiple independently targetable reentry vehicles (MIRV's), heavy Soviet ICBM's, and missile flight-testing. These, and the rest of the package, would lessen the imminent danger of either side acquiring an effective counterforce capability by means of rapid increases in missile accuracy. The U.S.S.R.'s increasing superiority in throw-weight (payload) gave it a greater counterforce capability, which the U.S. wanted restrained. In exchange the U.S. offered modest limits on the range of air-launched cruise missiles (ALCM's).

The Soviet Union rejected, as it had always done, any limits on its forces, calculating that Carter's personal and political requirements for a SALT II would force U.S. acceptance of its terms, as in the previous negotiations with Kissinger and Presidents Richard Nixon and Gerald Ford. The Soviet leadership bitterly opposed Carter's campaign for human rights in the U.S.S.R. but were sure he would drop this for a SALT II. They were right on both counts and secured an outline SALT II by October, in which Carter dropped all significant limitations on Soviet but not on U.S. forces. The U.S. ALCM force would be half that required to substitute for the canceled B-1 bomber, and very low range limits would be imposed on ground- and submarine-launched cruise missiles (G/SLCM's), claimed by Carter to his NATO allies to offset the massive buildup by the U.S.S.R. of its conventional ground forces, SS-20 IRBM's, and long-range strike aircraft. Moreover, despite Carter administration claims that the U.S. Minuteman force would be safe from a Soviet attack well into the 1990s, such an attack could be sure of destroying two to four times the number of existing U.S. ICBM silos by 1980. The new, mobile ICBM would be less vulnerable to such an attack because it would move back and forth along trenches 12 mi long, breaking out of these to fire. But this weapon, procurement of which was approved in September, had been so delayed that it could not enter service before 1983. Until then, the only new U.S. strategic forces being deployed would be the Trident I missile and submarine and the ALCM launcher aircraft. In contrast, the U.S.S.R. was deploying its fourth generation of strategic missiles, replacing the SS-7 through SS-13 series. They were also testing fifth-generation strategic missiles.

Carter's SALT II was thus open to the same criticisms as Kissinger's SALT I agreements and proposals. It imposed unilateral restraint on U.S. strategic forces without establishing any reciprocal restraint on Soviet troops or on the increasing Soviet counterforce capabilities vis-a-vis the U.S. These defects meant that even if SALT II could be completed it would have difficulty in securing the required U.S. Senate approval.

Carter's negotiation, in principle, of a comprehensive test ban with the U.S.S.R. appeared his one real success, provided the details could be worked out. For 20 years, such a ban had been regarded as a major restraint on nuclear-weapons development and testing. It could also lessen the chances of counterforce attacks, because, as with missiles, large numbers of tests are required before the necessary high confidence in the weapons can be developed.

The major obstacle to a test ban, initially, had been verification. Could the U.S. unilaterally verify Soviet compliance, using seismic detectors to monitor earthquakes and distinguish these from clandestine nuclear testing? By the late 1960s U.S. verification systems had been able to do this. The later and more significant obstacle was the military requirement for testing in order to develop new weapons and evaluate the performance of existing ones. This need caused the U.S.S.R.'s acceptance of a test ban to be puzzling; even if the Soviets were satisfied with their existing nuclear weapons, pressures would eventually build up for the development of new ones.

Doubts about Carter's ability to live up to his promises were reinforced by the failure to produce effective new policies limiting nuclear proliferation and conventional arms sales. Whether these could be devised and imposed solely by the U.S. was doubtful. The most the U.S. could hope to do was to coordinate its own extremely uncoordinated policies on these issues and try to persuade its allies to do likewise. Even then, success would be modest: the rate of proliferation of nuclear power plants, weapons, and of conventional arms could be slowed but not halted.

By the end of 1977 the Carter administration had made some progress on nuclear proliferation. Internally, the bureaucratic maze dealing with the export of nuclear power and the prevention of weapons proliferation (two conflicting aims) was being sorted out so that it could implement antiproliferation policies. Externally, France was persuaded to join the group of nuclear exporters formed in 1975 to try to formulate common policies on nuclear exports and safeguards. The problem of proliferation was dramatized in August, when the Soviet Union alleged that South Africa was about to conduct a nuclear test and secured U.S. and French cooperation in preventing them from doing so; however, France did not cancel its contract to supply South Africa with nuclear reactors. Moreover, this modest success was not matched by any progress in limiting the transfers of conventional but highly sophisticated weapons to the nations of the third world.

In conclusion, Carter appeared correct in his campaign claims that U.S. arms control policies had been far less successful than their Republican Party architects, notably Kissinger, had claimed. Carter also rightly stressed the reemergence of nuclear proliferation as a major problem, also recognized by the Ford administration. But Carter's acceptance of liberal arms control thinking and his assumptions of U.S. omnipotence and righteousness in this field created expectations that could not be fulfilled and impeded such progress as could have been made, except in the case of the U.S.S.R. There he secured agreements by repeating Kissinger's practice of excessively one-sided U.S. concessions to the U.S.S.R. SALT II and the comprehensive test ban would not remove the U.S.S.R.'s counterforce capability vis-a-vis the U.S. and seemed unlikely to produce political gains worth their cost.

MAJOR U.S.-U.S.S.R. STRATEGIC ARMS CONTROL AGREEMENTS, 1969-77.

1. Agreement to start Strategic Arms Limitation Talks (SALT) (1969)

2. SALT I agreements (1972)

a. Anti-Ballistic Missile (ABM) Treaty:

Signed May 26, 1972. As a treaty, it required the consent of the U.S. Senate (by a two-thirds majority) for ratification, given on August 3; entered into force Oct. 3, 1972, for indefinite period but subject to review every five years. Limited each side to 2 ABM deployment areas (each with up to 100 ABM launchers and radars), one defending their capital city and one defending their ICBM's. Banned the testing of surface-to-air missiles (SAM's) "in an ABM mode."

b. Interim Agreement and Protocol on the Limitations of Strategic Offensive Arms (Interim Agreement):

Signed May 26, 1972. As an executive agreement by the U.S. President this did not legally require U.S. Senate consent for ratification, but Section 33 of the 1961 act creating the U.S. Arms Control and Disarmament Agency (ACDA) bars action to reduce or limit U.S. arms except by Treaty or "unless authorized by further affirmative legislation by Congress." The Interim Agreement was, therefore, submitted to the U.S. Senate and House of Representatives for approval by a joint resolution. This was given on Sept. 30, 1972, only after the inclusion of Sen. Henry Jackson's (Dem., Wash.) amendment, which required U.S. equality with the U.S.S.R. in future SALT agreements. The Interim Agreement entered into force Oct. 3, 1972, for five years. It limited ICBM's and SLBM's to maximum totals for the U.S. and U.S.S.R.

c. Agreed Interpretations, Common Understandings, and Unilateral U.S. Statements on SALT I:

These claimed to define the key terms of SALT I but essentially represented U.S. interpretations that did not legally restrain the U.S.S.R. from subsequently deploying new strategic forces, especially ICBM's with vastly increased throwweight. The U.S.S.R.'s only violation of the letter of SALT I would have been the testing and/or deployment of SAM's and radars "in an ABM mode."

d. Standing Consultative Commission (SCC) on Arms Limitations:

Established on Dec. 21, 1972. The SCC was supposed to "promote the objectives and implementation" of SALT I. It did so only at a formal, legal level, avoiding substantive issues.

3. Basic Principles of U.S.–U.S.S.R. Relations (May 29, 1972):

This formalized détente on paper. The superpowers agreed to "avoid military confrontations and to prevent the outbreak of nuclear war," each refraining from seeking "unilateral advantage at the expense of the other" and basing their relations on the "principle of equality and the renunciation of the use or threat of force".

4. Threshold Test Ban Treaty (TTBT) (July 3, 1974) and Peaceful Nuclear Explosions Treaty (PNET) (May 28, 1976):

The TTBT limited underground nuclear weapons tests to a maximum yield of 150-kt provided an equivalent limit could be set on peaceful nuclear explosions (PNE's) to prevent their use as weapons tests, since the U.S.S.R. insisted on the right to conduct such. The PNET limited any one PNE to 150-kt yield, though a group explosion could exceed that total. These provisions may be verified by instrumentation and observers provided by the other party to the treaties. President Carter sought Senate ratification while trying to negotiate a comprehensive test ban treaty with the U.K. and U.S.S.R. that would ban all nuclear weapons tests.

5. Protocol to the ABM Treaty (July 3, 1974):

Reduced permitted ABM deployments to one from two sites each. Formalized the status quo of U.S. deployment of one at Grand Forks, N.D., protecting ICBM's (closed down in 1975) and Soviet deployment of one site defending Moscow (and some ICBM's).

6. Vladivostok Accord (Nov. 24, 1974):

Set framework for negotiations for a SALT II agreement to be in force from October 1977 to Dec. 31, 1985. Each side would be limited to a total of 2,400 strategic delivery vehicles, including bombers, of which only 1,320 could carry multiple independently-targetable reentry vehicles. The key aide-mémoire (official record of conversion) interpreting these terms was still secret in 1977.

7. Extension of the Interim Agreement (September 1977):

The U.S. and U.S.S.R. issued statements that each would behave as if the Interim Agreement was still in force after it expired on Oct. 3, 1977, pending its replacement by SALT II.

ECONOMIC DEVELOPMENT IN THE ST. LOUIS REGION

(Mr. PRICE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. PRICE. Mr. Speaker, I include herewith an analysis of the economic development plans in the Madison-St. Clair Counties, Ill., and the city of St. Louis and other communities on Missouri side of the Mississippi River.

ECONOMIC DEVELOPMENT IN THE ST. LOUIS REGION

This position paper sets out in some detail an analysis of the challenges facing the St. Louis region, presents an outline of the ways in which regional leaders are planning to meet these challenges, and states the specific needs of the region in terms of support by its elected officials in Washington, D.C.

The paper is the basis for remarks by Armand C. Stalnaker, chairman of the board of the St. Louis Regional Commerce and Growth Association, at the RCGA's luncheon with members of the region's Congressional delegation in Washington on March 21, 1978. In his remarks, Mr. Stalnaker, who is chairman and president of General American Life Insurance Company, stressed that the overriding purpose of the RCGA luncheon was to extend the special commercial and economic expertise of the region's business community to the bi-state area's Congressional delegation as it considers issues affecting the economic life of the St. Louis region.

"We come here to offer our help. We come in a spirit of support and cooperation, extending whatever information and expertise we may have in matters bearing upon the economy and business and jobs of the St. Louis area," Mr. Stalnaker said.

I. ECONOMIC CHALLENGES FACING THE ST. LOUIS REGION

There are a number of general areas of the region's economy that deserve special consideration in terms of problems and challenges. These areas are set out below in their relative order of importance. Specifically:

Jobs: It is estimated that by the year 2000 more than 400,000 new jobs will have to have been created just to keep pace with the natural growth of the present work force. This fact has dramatic implications for the St. Louis region. It means, for instance, that on the average about 20,000 new jobs will be needed every year for the next two decades in order to keep youths, women, and minorities supplied with the job opportunities they will be seeking. Twenty thousand new jobs a year; this growth rate is anywhere from 25 to 50 percent greater than the increase in the area's job market in the past two decades.

Transportation: Although the St. Louis area abounds in great advantages in transportation resources—centrally located in the U.S., near the confluence of the Mississippi and Missouri rivers, at a national "crossroads" in interstates, etc.—many of the region's transportation systems are old, outmoded, and in need of improvement. The Alton Locks and Dam 26 on the Mississippi needs to be replaced. The railroads need to consolidate and exchange freight in new, modern yards. The bridges linking Missouri and Illinois need to be repaired and consolidated into the freeway system. The Port of St. Louis needs streamlining, reorganization and promotion in order to expand regional river commerce. Interstate highway systems, after nearly 20 years in various stages of planning, need to be completed.

Development land: While potential land for industrial development is abundant, land that has actually been zoned for development is in a more limited supply, and that land which is both zoned and provided with utilities is in short supply.

Regional rivalries: Long a problem in the St. Louis area but now decreasing noticeably in many important areas, regional differences continue to be a challenge. Contributing to the problem is the fact that the area is served by two federal regional offices. This makes regional planning difficult, especially when having to deal with virtually two sets of interpretations of regulations and with two groups of people providing federal assistance.

National image: Like regional rivalries, this problem is quickly becoming less of a serious concern. Improvements in the relationship between unions and management in the region have helped improve what once was a negative labor image, and other recent activities, such as the 1977 Spirit of St. Louis campaign and the St. Louis County Meeting Place campaign, are doing much to create a positive image for the St. Louis area nationally.

Environmental constraints: Business growth and job development in the region are impeded to a degree by the Environmental Protection Agency's constraints, particularly the amendments to the Clean Air Act of 1977.

II. REGIONAL EFFORTS TO MEET THESE CHALLENGES

There is a new spirit of regional cooperation and progress in the St. Louis area at this point in its history, and all signs point to a continued, successful rejuvenation of the region's economy, benefitting all those who live and work there. The elements coming together in the economic development of the St. Louis region include:

A. Efforts are now under way and a study is in progress to identity the needs of the region's railway system and modernization program. The first phase of the study has been completed, funded locally and with assistance from the Railroad Administration. The second phase, expected to cost some $3 million, will begin this year. This phase will lead to an engineered solution of the location of modern new rail yards, new rail corridors, and will also include the costs and identify potential sources of funding to modernize the rail transportation network of the region.

B. A Port of Metropolitan St. Louis Council was formed in 1977, consisting of the six port districts in the St. Louis area, regional political leadership, representatives of the private sector, and officials of various pertinent public agencies. Operating under the coordination of the Bi-State Development Agency, the Council is now implementing the recommendations of an exhaustive port study that was completed under the auspices of the East-West gateway Coordinating

Council. The Council is identifying problems associated with river transportation, planning for a national promotion campaign, initiating surveys of additional industrial sites along the river, and, in general, coordinating all efforts relative to the development of the economic potential of the port.

C. The bi-state bridge situation over the Mississippi is now being examined in order to establish a priority for highway construction in the years ahead.

D. Work is well under way for continued development and improvements of Lambert-St. Louis International Airport guaranteeing the region will have a first class air terminal.

E. For the past year and a half, leaders of business and organized labor in the St. Louis region have been meeting to form an organization similar to PRIDE, which is the St. Louis construction industry's answer for improving productivity, reducing costs and reducing jurisdictional disputes. The new regional labor-management group will help the area's industrial and service trades achieve the same success that PRIDE has enjoyed. Hopefully, the image and reputation of the St. Louis area will be enhanced, and the region will become more competitive for new business opportunities and more jobs.

F. A citizen-based group known as the Spirit 2000 Committee is now being formed through the East-West Gateway Coordinating Council and the RCGA to identify the direction of the physical growth of the region to the year 2000. Aimed at reducing local opposition to the growth and development of the region, the committee's first project is the identification of capital expenditures and specific projects in the region during the past 10 years, plus the identification of projects now on the drawing boards for construction in the next 10 years.

G. Based on the success of 1977's Spirit of St. Louis celebration and subsequent national tour as a "selling device" for the region, plans are now being considered for the creation of a new not-for-profit corporation that would become the full-time sales arm for the region. A new St. Louis Partnership of the City of St. Louis, St. Louis County and the RCGA would have responsibility for calling on industrial and business leaders throughout the U.S., and working with prospects developed in this effort. Supporting advertising and promotion campaigns are also envisioned.

H. In order to create a more effective process for skilled job training to meet the needs of industry in the region, the RCGA is coordinating an effort involving the CETA agencies and the area's business community.

I. The now-vacant site of the infamous Pruitt-Igot public housing project is being studied for possible development as a Business and Industrial Square that would be a major source of new jobs for persons in the surrounding neighborhoods. While the RCGA is spearheading this effort, a separate, not-for-profit corporation is planned to begin this development, if it becomes feasible, later this year or early in 1979.

J. One of the most important steps now being taken in the St. Louis region is the establishment of an Economic Development District, both in Missouri and in Illinois. In the Missouri portion of the St. Louis metropolitan area, an Economic Development District is scheduled for formation this year. It will bring political leaders, CETA agencies, business, labor and other community interests together to focus on economic development planning, as well as strategies to solve the region's job needs. This Missouri organization will be under the umbrella of the EWGCC, with staff assistance provided by both that organization and the RCGA. The Illinois sector has an Economic Development District that includes some 11 counties in the SWIMPAC organization. In addition, the Illinois Metro East organization exists as an affiliate of the RCGA, representing business and civic leadership concerned with the development of the economy of the Illinois portion of the region.

K. Numerous other studies and research programs are under way in the St. Louis area to solve specific problems, i.e., mass transit, and 208 water studies. Other unique efforts have been initiated in the St. Louis region as stimuli to the local economy. These include the Industrial Waste Exchange; Team Assist, a program to help local businesses solve their problems and begin to expand in the region; an active foreign trade program, including a foreign trade zone; and a new Energy Research Council, whose goal is to attract research funds to local universities in cooperation with local corporations.

III. HOW THESE PIECES FIT TOGETHER

The comprehensive, innovative, and far-sighted programs outlined in the previous section are clear evidence that the St. Louis area's business, political, and civic leadership is not only working hard together to achieve improvements in the area's economy, but is frankly optimistic about the future of regional cooperation.

As the community interests begin working together to meet the challenges facing the region, these efforts will be coordinated primarily through the joint efforts of the EWGCC and the RCGA. Most of the elements needed to solve the regional economic problems have been identified, and are falling in place to bring about a thorough, well-planned economic development effort for the region.

The "Spirit 2000 Committee" and "Jobs 2000" will identify the long-range capital expansion plans, and the region's job needs, respectively. These long-range programs, coupled with the Economic Development District's shorter-range plan, can be used to identify both the needs and the sources of funding to achieve the objectives.

Specific efforts, such as the rail modernization plan, will have the benefit of these broad-based planning goals for the metropolitan region. The labor-management committee, the Center Partnership effort, and the job skill programs each will focus on immediate problems and seek solutions.

By having representatives of the RCGA and EWGCC involved in each of these plans and programs the entire economic development undertaking will benefit from shared information and a real sense of unity.

All the elements of the St. Louis region—specifically the political leadership, business leadership, labor leadership, coupled with citizen representation—are now pulling as one in this new spirit of cooperation for the economic betterment of everyone.

IV. WHAT THE ST. LOUIS AREA NEEDS FROM WASHINGTON

There are two general areas in which the member of the region's Congressional delegation can and should be supportive and helpful. Each area is outlined below.

A. Funds are needed to complete the work—or to complement the local support—in many of the programs and plans described in this report. Specifically:

1. Approximately $90,000 is needed for a 1977–78 version of the Input-Output table. The current table is based on 1972 data and needs to be thoroughly updated. This work will be done through the University of Missouri, and includes surveys of local business and industry as well as the incorporation of the latest economic data into the table.

2. Staff support is needed to devote more time to the establishment of the Economic Development District . . . approximately two people for six months, estimated at a total of $25,000.

3. Initial funding for the staffing and research effort for the "Spirit 2000" plan and community support. Local funds have been identified for a portion of this initial effort, but about $50,000 additional is needed to begin the work of this committee.

4. Funding for the Pruitt-Igoe Business and Industrial Square is also an important community interest. Funds are needed for the completion of engineering studies, site acquisition, and construction of site improvements. Initially, $100,000 is needed for staff and consultant work, with another $200,000 needed for site acquisition.

5. Economic support data, promotional literature, and information programs to describe the region, its assets and advantages to those businesses evaluating the area for the new investment. Approximately $50,000 is needed for development and implementation.

B. Congress is now deliberating or expected to consider several specific matters that have a direct and important bearing on the economy of the St. Louis region. These are issues well known to the region's Congressional delegation, and are included here in the conclusion of this report as matters of great concern to the RCGA. Specifically:

1. Locks and Dam 26: The RCGA's position in favor of replacement is well known to the delegation. What is needed now in the Senate is, quite simply, a vote! The matter has been delayed far too long for the good of the St. Louis area.

2. The Federal Highway Act: The 1976 Act expired at the end of 1977, and, as a new Act is considered by Congress, the RCGA feels strongly that the Act should contain an extension of the highway trust fund with provision for the allocation of funds for completion of the St. Louis innerbelt highway and for the much-needed improvements for the bridges over the Mississippi in the downtown St. Louis area.

3. The UDAG proposal: Although not directly actionable by Congress, support is needed for the St. Louis request for one of the first Urban Development Action Grants to bring about the rejuvenation of the north side of the St. Louis downtown area, complementing the bright new look of the downtown area on the southern side.

4. International Air Service: Another issue that may be beyond the direct involvement of the region's Congressional delegation, but support is needed on the pending CAB decision regarding a "wild card" city for expansion of international air travel to include St. Louis.

5. Clean Air Act of 1977: The Congressional delegation is requested to study the economic effects of the implementation of this Act as amended. Business growth and the creation of more jobs may suffer from the consequences of this well-intentioned environmental legislation.

V. SUMMARY COMMENTS

The purpose of this position paper on the Economic Development of the St. Louis region has been to provide the Congressional delegation with a thorough update on all the activities now under way that will eventually bring about a better place to live, work and do business.

The comments and information in this paper are offered in the spirit of cooperation with the Congressional delegation, and are themselves representative of the spirit of cooperation now growing in the St. Louis area.

As Mr. Stalnaker noted in his luncheon remarks, there appear to be fewer and fewer serious differences between the traditional rivals of this or any metropolitan area: Mis-

souri-Illinois, City-County, Business-Labor, Black-White, and so on.

Surely, differences remain and deserve the immediate attention of everyone with a true concern for the future of the St. Louis area. But the differences are becoming narrowed down to more specific issues, and this in itself is encouraging. These "problems" are becoming "challenges" . . . and the new spirit in St. Louis in 1978 is to meet these challenges head-on.

In this endeavor, the RCGA stands ready to offer its help, expertise and opinions to the political leaders in Washington who certainly share this mutual desire to make the St. Louis area a better place for all.●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. JEFFORDS) to revise and extend their remarks and include extraneous material:)

Mr. HOLLENBECK, for 5 minutes, today.
Mr. MILLER of Ohio, for 10 minutes, today.
Mr. ASHBROOK, for 15 minutes, today.
Mr. FRENZEL, for 10 minutes, today.

(The following Members (at the request of Mr. HARKIN) and to revise and extend their remarks and include extraneous matter:)

Mr. ZABLOCKI, for 5 minutes, today.
Mr. COTTER, for 5 minutes, today.
Mr. BAUCUS, for 10 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Ms. OAKAR, for 5 minutes, today.
Mr. FASCELL, for 5 minutes, today.
Mr. NEAL, for 5 minutes, today.
Mr. ROBERTS, for 5 minutes, today.
Mr. DRINAN, for 30 minutes, today.
Mr. REUSS, for 10 minutes, today.
Mr. ANDERSON of California, for 15 minutes, on March 22.
Mr. LUNDINE, for 5 minutes, on March 22.
Mr. AUCOIN, for 5 minutes, on March 22.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. CHARLES H. WILSON of California, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $739.

Mr. MURPHY of Illinois, to follow the remarks of Mr. SIMON during the debate on his amendment.

(The following Members (at the request of Mr. JEFFORDS) and to include extraneous matter:)

Mr. WYDLER.
Mr. DEL CLAWSON in two instances.
Mr. ARMSTRONG in two instances.
Mr. KETCHUM.
Mr. RUDD.
Mr. WHITEHURST.
Mr. WHALEN in two instances.
Mr. GILMAN.
Mr. CRANE.
Mr. DORNAN in two instances.
Mr. STEERS in two instances.
Mr. SYMMS.
Mr. FISH.
Mrs. HOLT.

(The following Members (at the request of Mr. HARKIN) and to include extraneous matter:)

Mr. WALGREN in two instances.
Mr. CHARLES H. WILSON of California.
Mr. BONKER.
Mr. DINGELL in two instances.
Mr. UDALL.
Mr. HAMILTON in two instances.
Mr. RODINO in two instances.
Mr. VOLKMER.
Mr. MIKVA.
Mr. WAXMAN.
Mr. BYRON.
Mr. MOAKLEY.
Mr. ANDERSON of California in two instances.
Mr. GONZALEZ in three instances.
Mr. EILBERG in two instances.
Mr. WON PAT.
Mr. CORMAN.
Mr. MINETA.
Mr. JONES of Oklahoma.
Ms. SCHROEDER in two instances.
Mr. OTTINGER.
Mr. HARKIN.
Mr. PERKINS.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 101. Joint resolution to authorize and request the President to issue a proclamation designating the third Sunday in May 1979, as "National Fallen Heroes Memorial Sunday" for firefighters and law enforcement officers who have been disabled or killed in the line of duty; to the Committee on Post Office and Civil Service.

ADJOURNMENT TO 10 O'CLOCK A.M., MARCH 22

Mr. HARKIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 35 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, March 22, 1978, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3620. A letter from the Mayor of the District of Columbia, transmitting the annual report of the Office of Emergency Preparedness of the District of Columbia for fiscal year 1977, pursuant to section 6 of Public Law 81–686; to the Committee on the District of Columbia.

3621. A letter from the Director of ACTION, transmitting a draft of proposed legislation to amend the Domestic Volunteer Service Act of 1973, and for other purposes; to the Committee on Education and Labor.

3622. A letter from the Secretary of the Interior, transmitting a report on the Department's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3623. A letter from the Secretary of Housing and Urban Development, transmitting a report on the Department's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3624. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend the act of June 27, 1960 (74 Stat. 220) as amended by act of May 24, 1974 (88 Stat. 174, 176; 16 U.S.C. 469) relating to the preservation of historical and archeological data; to authorize appropriations under section 3(b) and 4(a) for fiscal years 1979 and 1980, and for other purposes; to the Committee on Interior and Insular Affairs.

3625. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to coproduce certain defense equipment with the Federal Republic of Germany (transmittal No. 78–24), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

3626. A letter from the Assistant Administrator for Legislative Affairs, Agency for International Development, Department of State, transmitting notice of an increase in the funding level of the Agency's proposed fiscal year 1978 program in Cape Verde, pursuant to section 653(b) of the Foreign Assistance Act of 1961, as amended; to the Committee on International Relations.

3627. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to extend the authorization for appropriations to carry out the Endangered Species Act of 1973; to the Committee on Merchant Marine and Fisheries.

3628. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes; to the Committee on Public Works and Transportation.

3629. A letter from the Chairman, National Professional Standards Review Council, transmitting a request for reconsideration of the legislative action which removed the statutory requirement of an annual report from the Council to the Congress; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

3630. A letter from the Secretary of Transportation, transmitting the third annual report on the administration of the Deepwater Port Act of 1974, covering fiscal year 1977, pursuant to section 20 of the act; jointly, to the Committees on Merchant Marine and Fisheries, and Public Works and Transportation.

3631. A letter from the Comptroller General of the United States, transmitting a report on significant factors influencing ship force size and composition (PSAD–78–6, December 19, 1977); jointly, to the Committees on Government Operations, and Armed Services.

3632. A letter from the Comptroller General of the United States, transmitting a report on the status of the Army's Hellfire air-to-surface missile program (PSAD–78–19, March 21, 1978); jointly, to the Committees on Government Operations, and Armed Services.

3633. A letter from the Comptroller General of the United States, transmitting a report on the status of the Navy's ocean mine countermeasures program (PSAD–78–22, March 21, 1978); jointly, to the Committees

on Government Operations, and Armed Services.

3634. A letter from the Comptroller General of the United States, transmitting a report on Federal Aviation Administration methods to detect pilots with alcohol problems, medical examination procedures, and educational efforts directed at the effects of alcohol on flight safety (CED-78-58, March 20, 1978); jointly, to the Committees on Government Operations, and Public Works and Transportation.

REPORT OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BOLLING: Joint Economic Committee. Report on the January 1978 Economic Report of the President (Rept. No. 95-995). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Small Business. Report on movie ratings and the independent producer (Rept. No. 95-996). Referred to the Committee of the Whole House on the State of the Union.

Mr. SMITH of Iowa: Committee on Small Business. Report on product liability insurance (Rept. No. 95-997). Referred to the Committee of the Whole House on the State of the Union.

Mr. ULLMAN: Committee on Ways and Means. H.R. 2852. A bill to amend the Internal Revenue Code of 1954 to exempt certain agricultural aircraft from the aircraft use tax, to provide for the refund of the gasoline tax to the agricultural aircraft operator, and for other purposes; with amendment (Rept. No. 95-998). Referred to the Committee of the Whole House on the State of the Union.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. NIX: Committee on Post Office and Civil Service. H.R. 9279. A bill to amend title 5, United States Code to provide for retention of grade and pay for certain employees, and for other purposes (Rept. No. 95-994, Pt. I). Reported and referred to the Committee on Appropriations for a period not to exceed 15 legislative days with instructions to report back to the House as provided in section 401(b) of Public Law 93-344, and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

Mr. BURKE of Massachusetts (for himself, Mr. AMBRO, Mr. AMMERMAN, Mr. CORNELL, Mr. DENT, Mr. EDWARDS of California, Mr. ERTEL, Mr. LUNDINE, Mr. MAGUIRE, Mr. MCHUGH, Mr. NOWAK, Ms. OAKAR, Mr. ROE, Mr. WALGREN, and Mr. AKAKA):

H.R. 11673. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide for Federal participation in the costs of the old-age, survivors, and disability insurance program and the medicare program, with appropriate reductions in social security taxes to reflect such participation, and with a substantial increase in the amount of an individual's annual earnings which may be counted for benefit and tax purposes; to the Committee on Ways and Means.

By DON H. CLAUSEN:

H.R. 11674. A bill to defer from income certain amounts deferred pursuant to State or local public employee deferred compensation plans; to the Committee on Ways and Means.

By Mr. COHEN (for himself and Mr. BRECKINRIDGE):

H.R. 11675. A bill to amend the Internal Revenue Code of 1954 to provide graduated corporate income tax rates; to the Committee on Ways and Means.

By Mr. CUNNINGHAM (for himself, Mr. DICKS, Mr. MILLER of Ohio, Mr. DUNCAN of Tennessee, Mr. GRASSLEY, Mr. YOUNG of Missouri, Mr. DORNAN, Mr. BAUCUS, Mr. HYDE, and Mr. SEBELIUS):

H.R. 11676. A bill to amend the Internal Revenue Code of 1954 to exempt certain State and local government retirement systems from taxation, and for other purposes; to the Committee on Ways and Means.

By Mr. DELANEY (for himself, Mr. MOSS, Mr. STAGGERS, Mr. DINGELL, Mr. EDWARDS of California, Mr. OTTINGER, Mr. SCHEUER, Mr. MARKEY, Mr. CARNEY, Mr. KOSTMAYER, Mr. ROE, Mr. BONIOR, Mr. ZEFERETTI, Mr. SIMON, Mr. EILBERG, Mr. BIAGGI, Mr. FLOOD, Mr. SOLARZ, Mrs. MEYNER, Mr. NIX, Mr. FRASER, Mr. BROWN of California, Mr. STOKES, Mr. CORNELL and Mr. ADDABBO):

H.R. 11677. A bill to amend the Federal Food, Drug, and Cosmetic Act to repeal the exemption from regulation under that act for hair dyes; to the Committee on Interstate and Foreign Commerce.

By Mr. DINGELL (for himself and Mr. OTTINGER):

H.R. 11678. A bill to amend the Energy Policy and Conservation Act to establish the means for obtaining both short-range and long-range comprehensive energy policy analyses; to the Committee on Interstate and Foreign Commerce.

By Mr. HARRINGTON (for himself, Mr. WINN, Mr. BONKER, Mr. PEASE, Mr. NIX, Mr. GILMAN, and Mr. STUDDS):

H.R. 11679. A bill to authorize supplemental appropriations for fiscal year 1978, and to authorize appropriations for fiscal year 1979, for the Peace Corps, and to make certain changes in the Peace Corps Act; to the Committee on International Relations.

By Mr. JOHNSON of Colorado (for himself, Mr. RONCALIO, Mr. ANDREWS of North Dakota, Mr. EILBERG, Mr. NOLAN, Mr. EVANS of Colorado, Mr. MADIGAN, Mr. MURPHY of Pennsylvania, Mr. THONE, Mr. STANGELAND, and Mr. SYMMS):

H.R. 11680. A bill to amend title 23 of the United States Code, relating to highways, to authorize a program to separate rail-highway crossings in certain impacted cases; to the Committee on Public Works and Transportation.

By Mr. KEMP:

H.R. 11681. A bill to amend the Internal Revenue Code of 1954 with respect to the determination of whether scholarships under certain employer-related programs of private foundations will be treated as taxable expenditures under section 4945 of such code; to the Committee on Ways and Means.

By Mr. LEGGETT:

H.R. 11682. A bill to extend the service area for the Sacramento Valley Canals, Central Vallejo project, California, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. LUJAN:

H.R. 11683. A bill to provide for a $300 payment to an owner of a pre-1968 motor vehicle who has the vehicle scrapped; to the Committee on Interstate and Foreign Commerce.

H.R. 11684. A bill to compensate certain persons who hold invalid patents issued erroneously by the Department of the Interior; to the Committee on the Judiciary.

By Mr. NEAL (for himself, Mr. HOLLAND and Mr. MANN):

H.R. 11685. A bill to provide that funds projected to be expended for a new program on smoking and health, announced by the Secretary of Health, Education, and Welfare on January 11, 1978, be redirected for research on any potentially harmful properties of tobacco; to the Committee on Interstate and Foreign Commerce.

By Mr. PRICE:

H.R. 11686. A bill to authorize appropriations for the Department of Energy for national security programs for fiscal year 1979 and for other purposes; to the Committee on Armed Services.

By Mr. PRICE (for himself and Mr. MITCHELL of New York):

H.R. 11687. A bill to amend title 10, United States Code, to provide more efficient dental care for the personnel of the Army and Air Force, and for other purposes; to the Committee on Armed Services.

By Mr. VANIK:

H.R. 11688. A bill to amend the Tariff Schedules of the United States in order to provide for the duty-free entry of dogs and cats, regardless of the purposes for which the animals are imported; to the Committee on Ways and Means.

By Mr. WALGREN (for himself, Mr. MOTTL, Mr. MURPHY of Pennsylvania, Mr. CORRADA, Mr. KINDNESS, Mr. BEARD of Tennessee, Mr. GUYER, Mr. GAYDOS, Mr. RAHALL, Mr. CARNEY, Mr. QUILLEN, Mr. HARRINGTON, and Mr. HEFTEL):

H.R. 11689. A bill to amend title 23 of the United States Code relating to the special bridge replacement program, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. ALEXANDER:

H.R. 11690. A bill to bolster farm income by providing emergency assistance for producers of wheat, feed grains, upland cotton, and soybeans, and for other purposes; to the Committee on Agriculture.

By Mr. ARMSTRONG:

H.R. 11691. A bill to amend the Water Resources Planning Act so as to strengthen and protect the rights of the States and delineate congressional authority and responsibility with regard to national water resources policy; to the Committee on Interior and Insular Affairs.

By Mr. BURKE of Massachusetts (for himself and Mr. RINALDO):

H.R. 11692. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide for Federal participation in the costs of the old-age, survivors, and disability insurance program and the medicare program, with appropriate reductions in social security taxes to reflect such participation, and with a substantial increase in the amount of an individual's annual earnings which may be counted for benefit and tax purposes; to the Committee on Ways and Means.

By Mr. FORD of Michigan (for himself, Mr. HARKIN, Mr. STOKES, and Ms. SPELLMAN):

H.R. 11693. A bill to authorize funds for

the Hubert H. Humphrey Institute of Public Affairs; to the Committee on Education and Labor.

By Mr. FORD of Michigan (for himself and Mr. PRESSLER):

H.R. 11694. A bill to amend title IV of the Higher Education Act of 1965 to increase the availability of assistance to middle-income students and to amend section 1208 of such act; to the Committee on Education and Labor.

By Mr. FRENZEL:

H.R. 11695. A bill to amend the Internal Revenue Code of 1954 to provide a refundable Federal income tax credit for educational expenses; to the Committee on Ways and Means.

By Ms. HOLTZMAN (for herself, Mr. HALL, Mr. RICHMOND, and Mr. ROYBAL):

H.R. 11696. A bill to amend the Immigration and Nationality Act to exclude from admission into and to deport from the United States all aliens who persecuted others on the basis of religion, race, or national origin under the direction of the Nazi government of Germany; to the Committee on the Judiciary.

By Mr. KEMP (for himself, Mr. BINGHAM, Mr. CAPUTO, Mr. DORNAN, Mr. EVANS of Georgia, Mr. FLOOD, Mr. FRASER, Mr. FRENZEL, Mr. FREY, Mr. GILMAN, Mrs. HOLT, Mr. LENT, Mr. MOFFETT, Mr. RYAN, Mr. CHARLES WILSON of Texas, and Mr. WINN):

H.R. 11697. A bill to provide for the issuance of a commemorative postage stamp in observance of the 30th anniversary of the founding of the modern State of Israel; to the Committee on Post Office and Civil Service.

By Mr. MARRIOTT:

H.R. 11698. A bill to provide grants to States for the restoration of abandoned uranium mill sites and to require the Secretary of Energy to restore such sites if the States fail to do so; jointly, to the Committees on Interior and Insular Affairs and Interstate and Foreign Commerce.

By Mr. PERKINS (for himself, Mr. FORD of Michigan, Mr. BLOUIN, Mr. SIMON, Mr. WEISS, Mr. HEFTEL, Mr. CORRADA, Mr. KILDEE, and Mr. MILLER of California):

H.R. 11699. A bill to amend, revise and consolidate the provisions of the child nutrition programs authorized by the National School Lunch Act, as amended, and the Child Nutrition Act of 1966, as amended, and for other purposes; to the Committee on Education and Labor.

By Mr. ROBERTS (by request):

H.R. 11700. A bill to designate the proposed new Veterans' Administration hospital in Columbia, S.C., as the "Wm. Jennings Bryan Dorn Veterans' Hospital"; to the Committee on Veterans' Affairs.

By Mr. ROE (for himself, Mr. MCFALL, Mr. PERKINS, Mr. FASCELL, Mr. SISK, Mr. THOMPSON, Mr. BURKE of Massachusetts, Mr. CORMAN, Mr. ROSENTHAL, Mr. FRASER, Mr. MURPHY of New York, Mr. PATTEN, Mr. CHARLES H. WILSON of California, Mr. HANLEY, Mr. EILBERG, Mr. GAYDOS, Mrs. CHISHOLM, Mr. LENT, Mr. MOAKLEY, Mr. STUDDS, Mr. HUGHES, Mr. MARKEY, Mr. AKAKA, Mr. MURPHY of Pennsylvania, and Mr. CORRADA):

H.R. 11701. A bill to increase the authorization for the Local Public Works Capital Development and Investment Act of 1976; to the Committee on Public Works and Transportation.

By Mr. ROGERS (by request):

H.R. 11702. A bill to revise and extend the provisions of title XIII of the Public Health Service Act relating to health maintenance organizations; to the Committee on Interstate and Foreign Commerce.

By Mr. SEIBERLING:

H.R. 11703. A bill to amend title 5 of the United States Code with respect to the observance of Memorial Day; to the Committee on Post Office and Civil Service.

By Mr. UDALL:

H.R. 11704. A bill to amend the Atomic Energy Act of 1954, as amended, to improve the nuclear siting and licensing process, and for other purposes; to the Committee on Interior and Insular Affairs.

[*Omitted from the Record of Mar. 20, 1978*]

By Mr. REUSS (for himself, Mr. BALDUS, Mr. ASPIN, Mr. STEIGER, Mr. ZABLOCKI, Mr. KASTENMEIER, and Mr. KASTEN):

H.J. Res. 805. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."; to the Committee on Post Office and Civil Service.

[*Introduced Mar. 21, 1978*]

By Mr. BRADEMAS:

H.J. Res. 806. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."; to the Committee on Post Office and Civil Service.

By Mr. DEL CLAWSON:

H.J. Res. 807. Joint resolution proposing an amendment to the Constitution of the United States to provide for 4-year terms for Members of the House of Representatives; to the Committee on the Judiciary.

By Ms. KEYS:

H.J. Res. 808. Joint resolution to provide for the designation of the first Friday of March of each year as "Teacher Day, U.S.A."; to the Committee on Post Office and Civil Service.

By Mr. FISH (for himself, Mr. ROSENTHAL, Mr. SOLARZ, Mr. DERWINSKI, Mr. LAGOMARSINO, Mr. SCHEUER, Mr. WAXMAN, Mr. KREBS, Mr. MOORE, Mr. KINDNESS, Mr. WHITEHURST, Mr. LOTT, Mr. EILBERG, Mr. WEISS, Mr. BRODHEAD, Mr. MCDONALD, Mr. BADHAM, Mr. WALKER, Mr. SISK, Mr. LEDERER, Mr. VAN DEERLIN, Mr. LUKEN, Ms. HOLT, and Mr. LENT):

H. Con. Res. 541. Concurrent resolution expressing the sense of the Congress that the President should direct the U.S. Ambassador to the United Nations to offer a resolution in the General Assembly which would remove the observer status of the Palestine Liberation Organization; to the Committee on International Relations.

By Ms. OAKAR (for herself, Mr. ZEFERETTI, Mr. BEARD of Rhode Island, Mr. JOHNSON of California, Mr. MICHAEL O. MYERS, Mr. KILDEE, Mr. DENT, and Mr. HEFTEL):

H. Con. Res. 542. Concurrent resolution to disapprove the determination of the President denying import relief under the Trade Act of 1974 to the U.S. industry manufacturing metal fasteners; to the Committee on Ways and Means.

By Mr. UDALL (for himself, Mr. FOLEY, Mr. JOHNSON of Colorado, Mr. SKUBITZ, Mr. WEAVER, Mr. RONCALIO, and Mr. WAMPLER):

H. Con. Res. 543. Concurrent resolution relating to reviews of federally owned roadless areas; jointly, to the Committees on Agriculture, and Interior and Insular Affairs.

By Mr. HARRIS (for himself, Mr. BINGHAM, Mr. PHILLIP BURTON, Mr. DOWNEY, Mr. EDGAR, Mr. GIBBONS, Mr. KASTENMEIER, Mr. LAFALCE, Mr. LUNDINE, Mr. MOFFETT, Mr. PRICE, Mr. SEIBERLING, Mr. SIMON, Mr. STARK, Mr. WHALEN, and Mr. WIRTH):

H. Res. 1097. Resolution to amend the Rules of the House of Representatives to restrict provisions of and amendments to appropriation bills; to the Committee on Rules.

By Mr. FASCELL (for himself, Mr. BUTLER, Mr. MCCLOSKEY, Mr. RYAN, Mr. REUSS, Mr. WINN, Mr. LEHMAN, and Mrs. BURKE of California):

H. Res. 1098. Resolution to amend the Rules of the House of Representatives to restrict amendments to general appropriation bills, to restrict consideration of supplemental appropriation bills, and to prohibit consideration in the House of continuing resolutions; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

338. By the SPEAKER: Memorial of the Legislature of the State of Idaho, relative to relations with the Republic of China; to the Committee on International Relations.

339. Also, memorial of the Legislature of the State of Indiana, relative to permitting the continued collection of tolls on the Indiana Toll Road; to the Committee on Public Works and Transportation.

340. Also, memorial of the Legislature of the State of Wyoming, relative to support of agriculture; to the Committee on Agriculture.

341. Also, memorial of the Legislature of the State of Wyoming, relative to land acquisitions by the National Park Service; to the Committee on Interior and Insular Affairs.

342. Also, memorial of the Legislature of the State of Wyoming, ratifying an amendment to the Constitution of the United States proposed on September 25, 1789, to require an intervening election of Representatives before any increase in compensation accrues to Senators and Representatives; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ASPIN:

H.R. 11705. A bill for the relief of Mr. and Mrs. Joseph S. Fok; to the Committee on the Judiciary.

By Mr. KOSTMAYER:

H.R. 11706. A bill for the relief of Frank Ciccarone; to the Committee on the Judiciary.

By Mr. LUJAN:

H.R. 11707. A bill for the relief of the heirs of Demetrio Madrid; to the Committee on the Judiciary.

By Mr. PATTISON of New York:

H.R. 11708. A bill for the relief of Alexander J. Paladin; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

418. By Mr. HOLLENBECK: Petition of the mayor and council of the borough of Bergenfield, N.J., relative to ConRail; to the Committee on Interstate and Foreign Commerce.

419. By the SPEAKER: Petition of board of aldermen, Somerville, Mass., relative to the abortion issue; to the Committee on Interstate and Foreign Commerce.

420. Also petition of the city council, Philadelphia, Pa., relative to living standards in public housing projects; to the Committee on Banking, Finance and Urban Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 11315

By Mr. PRESSLER:

Amend page 2, after line 5, by inserting: "(5) the term "incumbent" means anyone who is occupying the office of Representative in, or Delegate or Resident Commissioner to, the Congress.

(6) the term "challenger" means a candidate who is eligible under section 502 for payments under section 504 who is not an incumbent.

Amend page 3, line 10, by inserting after "$1,000" the phrase "for an incumbent or $1,200 for a challenger."

Amend page 4, line 22, insert after "$1,000" the phrase "for an incumbent or $1,200 for a challenger."

Amend page 4, line 24, insert after "$10,000" the phrase "for an incumbent or $12,000 for a challenger."

Amend page 5, line 9, after "$10,000" the phrase "for an incumbent or $12,000 for a challenger."

EXTENSIONS OF REMARKS

REPRESENTATIVE STRATTON ACCURATELY QUESTIONS U.S. DEFENSE ACTIONS, POLICIES, AND TRENDS

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. WON PAT. Mr. Speaker, there is widespread concern and disquiet within our own Nation and through much of the world about the apparent lack of direction or decisiveness in U.S. defense policies.

At home there is a growing perception that U.S. military forces have been consistently whittled away in recent years to the point where we no longer are capable of deterring an aggressor from attacking or successfully defending ourselves if necessary.

Overseas, because of numerous internal and international decisions and policies we are perceived as having lost our national will to face up to difficult situations and are a "paper tiger" nation, an uncertain ally and an "easy" adversary.

It is ironic that in recent years it has been previous administrations advocating greater U.S. military strength and growth, in opposition to contrary attitudes by Congress and the general public, whereas polls now indicate a majority of Americans believe we should have a stronger defense capability and Congress, in general agrees, while it is the administration urging further diminutions.

Congressman SAMUEL STRATTON, our distinguished colleague from New York, a leading member of the House Armed Services Committee and an authority on our national defense, detailed this alarming situation yesterday when he was honored by the Washington Chapter of the American Defense Preparedness Association.

His observations and conclusions were particularly cogent and I submit them for the RECORD for the benefit of all our colleagues:

SOME PLUSSES AND SOME MINUSES ON AMERICAN DEFENSE

The story is told of Winston Churchill that one evening as he was sampling the dessert course at a banquet, he summoned the waiter to his table. "Waiter", he said, "take this pudding away; I don't like it; it has no theme."

Today the same thing might be said of America's overall defense posture. It has no theme—no clear, unambiguous theme of where exactly we want to go, and what precisely are our intentions. The Executive Branch comes up with various statements and also various actions. But there is considerable confusion as to just what they all add up to, because more often than not, the words contradict the action, or vice versa, as in the case of our troop withdrawal from Korea while we loudly proclaim with increasing shrillness, our "commitment" to defend not only Korea but our other Asian allies as well.

Meanwhile Congress, or at least some portions of it, has undertaken to challenge the Executive Branch, as on the B–1, for example, sometimes successfully, sometimes not. You can hardly blame foreign governments for being at a loss to know just who speaks for America on defense, and just what our national policy really is.

The record over the past year has been a "mixed bag"—no clear-cut theme or direction, just a collection of minuses and plusses. You're already familiar, I'm sure, with most of them, but let me just run through a few to refresh your memory, first the minuses—which do indeed seem to outnumber the plusses:

Item: The plan to withdraw from Korea, a Presidential decision made without any prior military consultation or staffing, and at sharp variance with what the Joint Chiefs recommended as their preferred alternative. We have only 40,000 American troops in Korea today, compared to nearly 300,000 in NATO, and both areas are stable and relatively calm. Yet we are proposing to withdraw this comparatively meager force from Korea while we pledge still further troops and still greater expenditures to NATO. Is one area less dangerous than the other? Is one area more important to Americans than the other?

Item: With grudging concurrence from Congress, the President has finally succeeded in burying the B–1 bomber, America's newest and latest technology candidate for the traditional manned bomber leg of our nuclear triad—note I said the manned bomber leg, not the air-breathing leg!

Yet this action was taken at the very time the Defense Department's top research and development official was extolling America's superior military technology as the best and surest way to offset Soviet superiority in both size and number.

Item: Funds have been eliminated from the budget for deployment of the MX mobile missile, although the Pentagon readily admits that our existing Minuteman ICBM force is likely to become vulnerable to Soviet attack in the early 1980's; and even though an early start on deployment options would be one of the best ways of hedging against a Soviet capability that could come even sooner than we anticipate.

Item: Funds were deleted from the 1978 defense budget for a fourth nuclear carrier, and none were included in the 1979 budget for any carrier, nuclear or non-nuclear. Yet everybody knows that the only real margin of superiority which the U.S. Navy has over the Soviet Navy lies in its carriers, especially those unconstrained by the speed and refuel limitations imposed by conventional power systems. So once again we have deliberately and unilaterally renounced the very American defense technology on which we pretend to pride ourselves.

Item: Experts have long agreed that if the U.S. is not to slip behind the Soviets in military power, the Defense budget must be increased by at least 2 percent a year, discounting inflation. Last year's appropriations, once they had been pared down in the congressional process, added up to no increase at all.

Yet this year's budget is only a bare 2 percent over last year's appropriation level, and that leaves nothing at all for the usual congressional cuts.

Item: Allegedly in the interests of standardizing NATO weapons, DOD is pushing strongly for putting a new German 120mm gun on its XM–1 main battle tank, at the risk of a substantial boost in the XM–1 program costs and possibly still further delay in its initial operating capability.

As one—of course, unidentified—Pentagon official commented wryly the other day, if this 120mm gun had been built in Ethiopia we wouldn't have given it a second look. But the crowning irony is the 105mm tank gun which is presently in use on our M–60 tank is now the standard in NATO, and a 120mm gun could not possibly become the standard until 1990.

Item: The Executive Branch is still pushing hard for a SALT II treaty in which parity is figured only in numbers, rather than in the vastly more important categories of yield and throw weight. And it does this even though a treaty negotiated simply on the basis of numbers Vladivostok or otherwise—would freeze America permanently into nuclear inferiority to the Soviets.

Item: Steps are underway within the Pentagon to "reorganize" the Department of Defense in such a way as to push the Joint Chiefs of Staff and the uniformed personnel still further from the center of the defense decision-making process. And this operation is underway even though Congress long ago designated the Joint Chiefs as the "principal" military advisors—with direct access at any time—both to the President and to the Secretary of Defense; and even though one would assume that in military matters, no less than in economic or consumer affairs, policy cannot safely be made without some occasional reference at least to expert professional advice.

So much for the minuses. What about the plusses? Well there are fewer of them, it turns out:

Item: Surprisingly, there are signs that Congress this year, in spite of its consistent past practices, may be prepared to increase the Administration's defense budget rather than cutting it. Already the House Armed Services Committee has voted tentatively to add about $2 billion to the total, including full funding for another Nimitz class nuclear carrier and one nuclear powered cruiser.

Item: In spite of announced intention to hold down arms sales abroad, even to U.S. friends and allies—and sell them wheat instead—these sales have actually increased in the past year—adding not only to our own security in such vital areas as Iran and the Middle East, but also helping to win back some of those precious petro dollars, and also easing the unit producion cost of some of America's first line aircraft, likewise a consideration not exactly to be sneezed at.

Item: While many of its details are still classified or closely held, the general format of the proposed new SALT treaty has already been subjected to searching scrutiny in Congress and the press, with the observation being made that when it comes to defense matters, the opposition to the Panama Canal treaties is just a warm up bout for the main event against an unacceptable SALT II treaty.

Item: Two highly respected members of the Senate, Senators John Glenn and the late Senator Hubert Humphrey, joined earlier this year in co-authoring a report highly critical of the Administration's decision to withdraw ground troops from Korea. As one might expect, it has gotten no front page coverage in any newspaper.

Item: The U.S. Senate did succeed in adding to the first Panama Canal treaty two provisions insuring to the U.S. not only the right to use military force to keep the canal open, but also the right to negotiate a least for a Panamanian base for those troops rather than one thousand miles away from the canal. Not a major victory, to be sure, but at least a small step in the right direction. When it comes to deterrence, after all, it's always best to be on the spot, not thousands of miles away—whether it's Panama, Europe, or South Korea.

So there you have it, a kind of rough balance sheet on just where this country stands today in defense, taking into account not only our real military posture but also our perceived military posture.

General Maxwell Taylor, Army Chief of Staff under President Eisenhower, quit his job before his term was up and wrote a book of protest entitled, "The Uncertain Trumpet". The title comes from a quotation from the New Testament: "For if the trumpet gives an uncertain sound, who shall prepare himself to the battle?" Surely the mixed bag compendium I have listed above gives off "an uncertain sound" if General Taylor and I ever heard one. And if the New Testament is right, we are in bad shape.

Yet perhaps help is now suddenly at hand from an unexpected quarter. Last Friday President Carter delivered a major defense address on the campus of Wake Forest College in North Carolina. In that address the President made several statements with which this audience would enthusiastically agree, for example:

"Discounting inflation, since 1960 Soviet military spending has doubled, rising steadily by 3 to 4 percent every year, while our military budget is actually lower than it was in 1960."

"We will not allow any other nation to gain military superiority over us."

"...even as we search for agreement on arms control, we will modernize our strategic systems and revitalize our conventional forces. We shall implement our policy ... by maintaining and developing forces to counter any threats to our allies and our vital interest in Asia, the Middle East, and other regions of the world."

"Our strategic forces must be—and must be known to be—a match for the capabilities of the Soviets. They must never be able to use their nuclear forces to threaten, coerce, or blackmail us or our friends."

Just what does this surprisingly "tough" speech mean? Does it actually signal a new, harder line in the Carter Administration on defense matters, one that will give a clearer and more certain signal not only to our allies but also to our potential enemies? Or is this just another temporary swing to the right, soon to be followed by another compensating swing to the left? Senator Jake Garn of Utah was quoted as saying, "I like the speech, I agree with it, but I don't believe it."

This may, however, be too quick and too glib a reaction. Those of us who do favor a strong defense ought not to turn lightly aside the possibility of a formidable new ally in our struggle, and even a new day dawning ahead.

After all, the papers have recently been filled with accounts of a kind of struggle under way here in Washington for the President's mind on such questions—with Secretary Vance pressing for still more diplomatic negotiations and still more treaties, while National Security Advisor Brzezinski, alarmed at the threatening implications of the recent Soviet and Cuban operations in the Horn of Africa, has been pressing for a harder defense policy, bluntly stated, to counter such expansionist activities. Even the Defense Department, we learned on Sunday, wants to delay Secretary Vance's rush for a new treaty banning killer satellites, at least until we have gotten one of our own so we have something to ban!

Of course no one knows for sure what precipitated this Friday speech. It is possible that these developments in Africa have indeed had their impact and that the President has come to realize the urgency of moving more forcefully and unambiguously to strengthen Soviet perceptions of our deterrent stance and of our tougher intentions. On the other hand, it could of course be only more brave rhetoric, unsupported by correspondingly tough actions. Only time will tell. But at least we can hope.

Regardless of which way it turns out those of us, in Congress and outside, who do believe sincerely in the need for a strong defense will continue to work:

To support countries seeking to resist or to throw off Marxist control;

To seek ratification of only a SALT treaty that will promote an equality between ourselves and the Soviets in destructive power, not in numbers alone;

To see that the budget remains big enough to provide for adequate growth;

And to keep our uniformed professionals in a position to have their views fully heard out by the top civilian officials before the military decision is made rather than after.

In all these objectives we continue to hope we can win Presidential support. It will make our job a whole lot easier. But we will continue to fight in any case.

Yet one thing is absolutely certain: if the President does indeed see the need for a sharp change in defense policy and is willing to take the lead on these matters he can clearly carry the Congress with him. There is not a single bit of doubt on that score.

If that should happen, then we will have truly moved into a new era. The country will be better for it, and at long last our defense posture will have a theme, a clear and unambiguous theme. The trumpet will then give off a clear and a certain sound, and we shall be strong and ready—not because we want war, not because we want to sell our products and increase our profits—but, in spite of all our up and down of recent years, because a strong, confident, positive influential America is still the surest deterrent to war and the surest guarantee of a just and lasting peace, for ourselves and for all nations.●

OVER THE CAPITOL HILL

HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. DEL CLAWSON. Mr. Speaker, the Daily Southeast News, published in Downey, Calif., contained a column on February 9, the Lighter Side, by Dick West. Because it treats a subject of particular interest and concern to all my colleagues, not only those of us who are "dropping out" and because I believe it is relevant to legislation I am introducing today, the column entitled "Over the Capitol Hill" is included at this point in the RECORD:

THE LIGHTER SIDE—OVER THE CAPITOL HILL

(By Dick West)

WASHINGTON.—Thus far, barely into February, 40 members of the 95th Congress have announced they will not seek re-election this year.

If the present rate continues, the dropout total will reach a new high, breaking the record of retirements two years ago.

Some lawgivers are stepping down for reasons of age or health, and some are seeking other offices. But most are quitting because they are frustrated, disenchanted, overworked or simply fed up with the whole thing.

Indeed, the percentage of members of Congress who fail to seek re-election may now have surpassed the percentage of members of the armed forces who decline to re-enlist.

The problems created by such a rapid turnover can hardly be underestimated. For one thing, it takes a lot of money to train a rookie congressman. Unless they stick around at least long enough to become a subcommittee chairman, the investment is largely lost.

Beyond that is the long-range question of whether the United States should continue to rely on an all-volunteer Congress, or whether we eventually may need to resort of some type of standby draft.

Compulsory congressional service is, of course, repugnant to our tradition of individual self-determination. But perhaps even more undesirable is the prospect of filling the legislative ranks with mercenaries who are lacking in partisanship, thirst for power, political fanaticism and other conventional motivations.

While political drafts are nothing new, most have been spontaneous aberrations brought about by deadlocked conventions or shortages of smoke-filled rooms. The concept of an organized draft on a permanent basis is something quite different.

A congressional conscription system presumably would work something like this:

Upon reaching the age of 25, which is the constitutional minimum for service in the House of Representatives, each citizen would register and be classified according to party affiliation, bigotries, conflicts of interest and so on.

The category 1-R, for example, would be assigned to right wing Republicans; liberal Democrats would be classified 1-D, and so forth.

Quotas would vary according to the number of voluntary candidates in each congressional district.

And what of draft-dodgers? Might not some people fake non-political beliefs or join third party movements to avoid being inducted into Congress?

The possibility does exist unless some

alternatives provided. I would favor giving conscientious objectors the option of serving for two years as unpaid lobbyists.

Otherwise, I fear we would see a mass migration to Canada.●

PREFERENTIAL TREATMENT IN THE TAX SYSTEM

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. BONKER. Mr. Speaker, why is it that our tax system is inherently unfair? Ten years ago, when I had no dependents to claim, it was discriminatory to unmarried citizens. Now it is married couples who are penalized, as a prominent editor in my district discovered when he entered the nuptial ranks recently. "Traditional" marriages, as he points out, are given preferential tax treatment while working spouses must pay a higher amount.

Mr. David Workman's letter to the President and myself is partially in jest, but it carries a profound truth and valid criticism of our taxing policies. Actually, it makes a good case for offering preferential treatment for working couples because, first, both are making a contribution to our economy and free enterprise system; second, not living off welfare or food stamps or unemployment; and third, not living in sin.

Mr. Speaker, I include Mr. Workman's letter in the RECORD for the benefit of my colleagues, especially those who serve on the House Ways and Means Committee:

WITH MY BOOTS ON

(By Dave Workman)

President JIMMY CARTER,
Congressman DON BONKER.

DEAR JIMMY AND DON: (I can call you that, can't I?)

I've got this little problem with my taxes. As Don knows, I got married last October. We're happy, and besides, it seemed like the right thing to do.

But, because we got married, now that tax time has rolled around, it appears that the government wants to bring the honeymoon to an abrupt end. We've found that it would have been to our advantage to have remained single and simply set up housekeeping together. We'd still be together, and we would have the added "plus" of getting a break on our income taxes.

Under the tax laws, only the "traditional" marriage—where the husband works and the wife stays at home—is given what one might call "preferential tax treatment."

Unfortunately, as with most young couples, we've found that, thanks to inflation, the cost of living, property taxes and costs ad infinitum, we are in a position that dictates we either both work or both starve. Therefore, we only qualify for a standard deduction of $3,200 while single working people living together qualify for deductions of $2,200 apiece, or a total deduction of $4,400. Now, is that fair?

Instead of being penalized for entering wedlock, married couples should get the "preferential treatment" because we are: 1) both making our contribution to the economy and free enterprise system; 2) not living off welfare or food stamps or unemployment; and 3) not living in sin.

I don't criticize without offering alternatives. I propose the tax laws should be changed to allow working spouses the same deductions as working unmarrieds who live together—$2,200 apiece, or $4,400. I further propose greater increases in deductions for dependents in families where in only one spouse works. In the case of singles living together, they should receive the lesser standard deduction for themselves and their "dependents," regardless of how many such dependents there are.

One might respond with the simple suggestion to itemize deductions. After looking over all the legal deductions to which we are entitled, we found, sadly, that they did not amount to a sum greater than the $3,200 standard deduction.

This is yet another reason why marrieds should receive the same benefits as unmarrieds; we now must pay a higher tax rate than singles, yet we must also absorb the cost of property taxes, sales taxes and more, while singles (who most likely rent) qualify for higher standard deductions to offset these costs. Even if single couples do purchase property and pay property taxes and such, they still are allowed $1,200 more in standard deductions than the married couple.

I could continue, but I think I've made my point.

Well, Don and Jimmy (I think I can call you that, now that we've talked), I hope you guys get on the ball and do something to change this situation. Feel free to contact me, anytime. Drop by the house and meet the wife; she's a great cook. But remember, we want action, not just talk.

We will be forever thankful.

DAVE WORKMAN.●

ENCOURAGING ELIGIBLE RESIDENTS TO VOTE

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. BYRON. Mr. Speaker, the Mason-Dixon Council of Boy Scouts has recently approved and will be implementing an important civic program to instill the Cub Scouts, Scouts, and Explorers of the region with a sense of "duty to their country." In accordance with the guidelines for achieving the citizenship skill award, the Scout is reminded of his responsibility as an adult to choose public officials in free elections. However, as we all know, only registered voters can exercise our invaluable constitutional right of freedom of choice. Therefore, the Mason-Dixon Council in conjunction with the Shawnee Girl Scout Council has launched a campaign designed to encourage all eligible residents of Washington County, Md., to register to vote.

Donald R. Frush has been appointed by council president, Charles King, to direct this project and its 3,400 enthusiastic participants. Election board authorities have estimated that nearly 43,000 residents in the area have not been registered to date. These young people under the supervision of Don Frush will canvass the homes of eligible voters in May and will solicit their support. The Scouts equipped with registration forms will attempt to expedite the process by registering interested persons on the spot.

I would like to take this opportunity to commend Don Frush and the Boy Scouts and Girl Scouts for their efforts and wish them every continued success in their endeavors. In an era, which had been plagued by apathy and antipathy, these young people should serve as examples to the rest of the citizenry for their active participation and cooperation in pursuing the goals of a democratic society. The members of these Scout organizations have been provided with a rare opportunity of demonstrating the highest tradition of the Scout oath, "to do my duty to God and my country."●

RESULTS OF 10TH CONGRESSIONAL DISTRICT OF ILLINOIS CONSTITUENT QUESTIONNAIRE

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. MIKVA. Mr. Speaker, approximately 14,000 residents of the 10th congressional district have demonstrated their feeling on handguns, sentencing of criminals and other major issues in responses to the 1978 10th district constituent questionnaires.

A majority of the people said they favor enactment of a Federal law banning the manufacture, sale, and distribution of handguns, except for the police, military, and licensed pistol clubs. Seventy-one percent would like such a law; 24 percent disagree and 5 percent are undecided. Legislation introduced by me last year for a handgun law is pending. I hope the response to this question will help Congress come up with realistic and effective thinking toward eliminating the handgun as a weapon of human destruction.

There is also a clear majority of people in the 10th district desiring a change in the way criminal offenders are sentenced. Seventy-five percent of the respondents believe fixed sentencing for specific crimes should be initiated along with abolishing the parole system. As a supporter of a measure to reform the Federal Criminal Code, I concur with the survey's consensus that changes in the criminal justice system, together with strict handgun controls, would provide a powerful combination for reducing the crime rate. Twelve percent said they disagree with fixed criminal sentencing and abolishment of paroles. Thirteen percent stand undecided.

On another topic, the questions on energy and the environment are significant due to their current debate in Congress. By the poll's widest margin, 82 percent of the people favor a shift in research funding to research on solar, geothermal and other renewable energy sources. At the same time, 63 percent reject the idea the environmental safeguards should be relaxed as a way to increase employment. This indicates to me that most Americans realize the urgent need to meet the environmental challenge head on before this century ends.

Looking at the responses on which way is most favored in financing social security benefits, the margin of difference is narrower than in the views expressed on the fore-mentioned topics. The questionnaire asked residents if they feel general revenue funds from the U.S. Treasury should be used to pay for part of the social security benefits. The idea is favored by 49 percent, while 35 percent disagree and 16 percent are undecided.

On the question of legislation to allow public financing of congressional campaigns, the measure is supported by a margin of 54 percent to 35 percent.

Turning to the part of the survey dealing with foreign policy, I am especially pleased that so many people in the 10th district are concerned with the important international issues that ultimately affect every U.S. citizen. Eighty-five percent believe that traditional U.S. support of Israel be maintained; 62 percent feel there should be a reduction of U.S. arms abroad; and by a narrower margin; 51 percent of the respondents support ratification of the Panama Canal treaties.

In summary, the results of this survey will be of tremendous assistance to me as the Congress looks ahead to making crucial decisions. With the interest shown by the people of the 10th congressional district I have gained both insight and strength on the vital issues before the House.

The complete questionnaire results follow:

[In percent]

	Yes	No	Not sure	No response
General:				
1. Do you favor the ratification of the Equal Rights Amendment?	52	37	9	2
2. Currently, Federal employees as well as many State and local government employees are not part of the social security system. Do you think these government employees should be included in the system as are other workers?	57	30	10	3
3. Currently, Presidential elections are federally financed in order to limit private contributions and the resulting influence of the contributors. Should this kind of financing reform be extended to congressional elections?	54	35	9	2
4. Should the B–1 manned bomber project continue to be funded?	39	43	16	2
5. Do you favor a Federal law to ban the manufacture, sale and distribution of handguns, except for the police, military, and licensed pistol clubs?	71	24	3	2
6. Should the United States commit resources to develop the neutron bomb?	39	41	18	2
7. Over the next several years, many economists predict that the private sector will not create enough jobs to hire every unemployed American able to work. Should Congress appropriate more funds to expand the public service jobs program for the unemployed?	40	47	11	2
8. 1 feature of the Carter administration's welfare reform proposal would replace welfare programs such as food stamps with straight cash payments. Do you favor such reforms?	20	63	15	2
9. Some people say that a way to increase employment is by relaxing the environmental standards for air and water pollution. Others argue that environmental safeguards should be maintained and that employment will not be adversely affected. Do you favor some relaxation of these environmental standards?	29	63	7	1
10. Convicted criminals who are sentenced to prison frequently serve a portion of their term and are then paroled. Some believe the parole system has not worked well, however. There are proposals in Congress to prescribe fixed sentences for specific crimes and abolish the parole system. Do you favor such proposals?	75	12	12	1
11. The Hatch Act currently places limits on Federal employees' political participation. Do you think that Federal employees should be allowed to participate in election campaigns, provided that safeguards exist to protect them from political pressure?	41	49	9	1
Foreign policy:				
12. In order to protect some U.S. manufacturers and American jobs, do you think that the United States should establish higher tariffs or quotas on imports, even if such action increased costs to American consumers?	37	48	13	2
13. Would you support the ratification of the Panama Canal treaties if the United States retained the authority to send in troops if necessary?	51	37	10	2
14. Do you think that there should be a general reduction in the sale cf American arms abroad?	62	26	11	1
15. Israel has been a long-standing ally of the United States and has received strong U.S. support. Some people, however, have questioned our support of Israel because of the importance of oil in Arab countries. Do you think the traditional support of Israel by the United States should be maintained?	58	27	14	1
Energy:				
16. Some people have proposed the elimination of Federal price controls on natural gas as a way of stimulating production. Others favor a modest increase in natural gas prices but with continued controls so as to keep the price of natural gas from going too high. Would you favor the elimination of all price controls on natural gas?	27	61	11	1
17. A major feature of President Carter's energy bill puts a new tax on the production of oil, with all the tax money raised being rebated to the people who pay those taxes. Others believe, however, that a portion of those tax revenues ought to go to the oil companies for development of new oil. Do you favor giving a portion of these tax revenues to the oil companies?	30	56	11	3
18. A significant portion of funds for energy research goes for research on nuclear energy. There have been proposals to shift some of those funds to research on solar, geothermal and other renewable sources. Do you tavor such a shift in energy research funding?	82	10	6	2
Social security financing:				
Although Congress approved a bill to strengthen the financing of the social security system, there are still a variety of opinions about how the financing should be done in the future. If social security benefits are to keep pace with inflation and our aging population, additional funds will have to be provibed. Which of the following do you favor for raising the necessary funds?				
19. The social security payroll tax (now set at 5.85 percent) should be increased	27	55	9	9
20. The amount of earnings taxes (now limited to the 1st $16,500 per year) should be increased	46	37	9	8
21. General revenue funds from the U.S. Treasury should be used to pay for part of social security benefits	49	35	10	6
22. The retirement age at which benefit payments begin should be raised	21	64	7	8
Health:				
23. To control hospital costs, the Carter administration has proposed a bill that would limit the percent of increase that hospitals could charge for their services. Do you favor such legislation?	67	24	7	2
24. As a result of a 1973 Supreme Court decision, abortion as a medical procedure is now available to women who can afford it, and many health insurance plans include coverage for an abortion. Do you think that similar coverage should be available to the poor, who presently receive all other medical care services through Government programs?	68	23	6	3

25. Which statement is closest to your view about national health insurance?	A	B	C	D
A. Congress should pass comprehensive national health insurance, covering all illnesses and all Americans.	31	42	25	4
B. Congress should confine itself to catastrophic health insurance, covering only that portion of the most costly illnesses.				
C. We should continue to rely solely on the current medical delivery system and on the private insurance industry.				

A TRIBUTE TO ABRAHAM LINCOLN

HON. WILLIAM L. ARMSTRONG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. ARMSTRONG., Mr. Speaker, on February 11, I was privileged to address the Moffat County Lincoln Day dinner in Craig, Colo. It was a great evening and a very, very meaningful occasion for me for a number of reasons.

The highlight of the evening, however, was a moving tribute to Abraham Lincoln, delivered by my friend, Frances Harding. Over the years, I have read and heard many speeches on the subject of President Lincoln and his contribution to our Nation's heritage. But I cannot recall having heard such a perceptive, significant, and heartwarming tribute as that presented by Mrs. Harding. I would like to share it with you:

Few leaders or statesmen have escaped the tendency of power to harden, or at least to narrow, their human sympathies. But Abraham Lincoln possessed a natural wealth of "tender compassion" which became more tender in the stress of conflict and developed into an outstanding strength.

Abraham Lincoln thought of himself as a follower—a servant of the people. When he died, people sorrowed not because they had lost a President, but because they had lost a friend that they had loved simply—as a man. His belongings were nothing—he was considered ugly and awkward—and lacking of grace. The White House was the place he

lived—and nothing more. He was so modest by nature that he was perfectly content to walk behind any man who wished to walk before him. In his humility and honesty he labored to find what the people wanted and how to obtain that. It was his compassion and sense of justice which gave him his hold on others—it formed the magnetic field whose influences could not be escaped. But it was something he carried unconsciously.

These are not characteristics which come to mind when thinking of leadership potential. Yet this man brought this country through a violent, destructive war trying to keep eventual unity and peace in mind. In his Second Inaugural Address, he requested, "malice towards none, charity for all"—there was no exultation, no boasting—yet at this point, the war was almost over and the goal of freedom for all men finally to be realized. Such humility almost passes understanding. He had succeeded in upholding the peoples' rights under the Constitution—How many presidents have been tried to that extent? It's hard to comprehend what self-satisfaction and exultation most of us would feel if challenged to that limit—it boggles my mind.

One historian wrote: "Many great deeds had been done in the war. The greatest was keeping the North together in an enterprise so arduous and so confusedly related as the Union and freedom. Abraham Lincoln did this: nobody else could have done it; to do it he bore on his sole shoulders such a weight of care and pain as few other men have done. When it was over it seemed to the people that he had all along been thinking their real thoughts for them—but they knew this was because he had fearlessly thought for himself."

Ladies and gentlemen, what a remarkable man this was to embody tremendous humility and compassion with great leadership—he truly deserves to be honored as we are doing today—and may we all try to uphold our Republican ideals in Abraham Lincoln's spirit.●

PROBLEMS AND ISSUES IN THE FARM SITUATION

HON. HAROLD L. VOLKMER

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. VOLKMER. Mr. Speaker, it appears likely that the House will soon be asked to vote on legislation to alleviate the current farm situation. I would like to share with my colleagues a recent speech by Secretary Bergland, where he bluntly outlines the problems and the major issues involved.

I believe that facts support the Secretary's contention that the farm prices have responded well to the authorities of the Food and Agriculture Act of 1977. The price of corn has increased 60 cents per bushel since September, wheat has increased 85 cents since June, and cattle and hog prices are nearly $9 and $7 per hundredweight above a year ago. There is every indication that prices will continue to improve for the major commodities.

The speech follows:

We have many things in common.

I believe in the efficacy of our farm family system of agriculture.

And so do you.

I believe the nation has a responsibility to help maintain that system economically with positive programs so that our farm families can operate on a stable sound basis in order that they can continue a high rate of production to feed 215 million people here at home and the millions in foreign countries who need our food.

You believe that too.

I believe that our food is this nation's most effective instrument to secure enduring world peace and understanding.

And so do you.

I believe that cooperatives are the farmers' best mechanism to create effective bargaining power in the marketplace and to meet the competition from other private enterprise institutions.

And so do you.

I can't think of a single, important issue relating to agriculture or to the whole nation, for that matter, where we disagree fundamentally.

I think it's been a few years since a Secretary of Agriculture could come to your convention and say the same thing.

Furthermore, I'm proud to say it.

As a member of the Farmers Union, I should speak frankly about those things that are the immediate concern to all of you, and to me as Secretary of Agriculture.

Some farmers—many farmers, in fact—are in serious financial trouble. They have grave cash flow problems—particularly the wheat and feed grain producers.

The arithmetic of their problems is simple: overproduction and record surpluses plus mounting production costs equals busted prices.

You don't need a lot of USDA statistics and trend charts to tell you that. And I didn't have to come here today to find it out. I've heard that from some 55,000 farmers in 26 states in the last four months.

Believe me, I've gotten the message.

So what do we do about the problem?

The arithmetic may be simple—but certainly the solution isn't.

You and I both know—after some bitter experiences—that there are some inescapable ground rules and some hard political realities that must be faced when we seek an answer to today's farm and food problems.

And whether we like it or not, we have to deal with those realities.

So let's take a look at some of them

When you have surpluses you have three options open to you.

One would be to pretend they aren't there—and they will just go away. Well, that's not the real world.

Finally, there is the third choice—and the one we chose.

We set out to finance the building of granaries on the farms. It's been a huge success. We have financed more farm storage last year than any year in the history of the program that has been going on since the 1950's. Granaries have been built on the farms where they belong and then we proceeded to make other accommodations to try to take care of the big crop which was in production, even in 1977, by increasing the loan rates on corn to $2 and raised milo and barley accordingly.

And the price of grain moved up and up—right in the peak of harvest. Grain prices moved up 50 cents a bushel because of that increase in loan rates.

We are now reaching the point of having the largest and most flexible food reserve program ever known to man—and it's on the farms where producers own it and control it.

This reserve means wealth. It means security to both farmers and the nation. It means strengthened prices for farmers and market stability.

You Farmers Union people have been talking about this for years. You have tried to do it with your grain cooperatives. In this case, the government is assisting all farmers in a number of ways. I have taken steps to cut the cooperatives in on this program—so as to give you a new bargaining instrument in the marketplace—both here at home and abroad.

I say that the Food and Agricultural Act of 1977 has given farmers the best opportunity they have ever had to do something for themselves in a positive and effective way.

Now the farmers have the tools to control their production of wheat and feed grains, to more nearly control the demands of the market.

You now have a way of handling your surplus inventories and free them from the price-depressing effect they have on the market.

And you farmers have the control. You have it in your power to affect market prices. The government is not the market of first and last resort.

To the extent that anything is possible in the risky business of farming, the program does blunt the ragged peaks and bottoms of the usual boom-bust cycles in agriculture. That's what every business tried to avoid—take as much risk out of your farming venture as you can. Put it on a business-like predictability basis and yet operate and benefit from a market-oriented kind of agriculture.

And there are some other realities in this approach—realities that you can't escape and must consider.

I know I can talk freely about political realities to you folks because the Farmers Union has been dealing with them face-to-face for all of the 76 years of its existence as a major farm organization.

You know that politics is a hard-nosed business. But it's also a give-and-take game, as well. And it is this give-and-take—the ability to compromise that makes this democracy work.

And I happen to know a little bit about it. I've watched government work from the outside as a farmer—just as you do. I've watched it work from the inside as a Congressman from Minnesota—dealing primarily with farm legislation.

And now I'm sitting on the hot seat and I think I can do more for farmers where I am now than in any of the other spots. At least, I'm trying.

But to get back to the business of politics. The political realities for farmers are plain to see.

Reality Number One is that farm population now represents less than 4 percent of our total population. In the House of Representatives farmers are outnumbered 400 to 35. We have a little more relative strength in the Senate but not much.

So where does that leave farmers?

If we looked only at the numbers, the prospect is pretty bleak. But that's not necessarily true if we look at political reality No. 2.

The nation's 218 million consumers constitutes that reality.

We've got them coming over to our side.

I saw this happen at first hand when I sat on the House Agriculture Committee for six years.

I saw it happen when we passed the Farm Act on 1973 and then I saw real evidence of it two years later when we tried to make some improvements in that act.

Most of you well remember those battles.

Special interests were voicing the cries of doom—that we were shipping all our food to Russia—that we were actually running short of grain—that bread prices would reach a dollar a loaf.

Farmers were really getting it in the neck. There was a calculated and quite successful campaign to blame the farmers and their programs for almost everything—primarily the cost of food.

And embargoes were ordered—foreign sales moratoriums were declared by an administration bending to the panic.

Even some of our friends in labor withheld their support or even openly opposed farmers.

But you know who came forward and stood up for the farmers?

It was some of the organized consumer groups—that's who.

My present Assistant Secretary of Agriculture, Carol Foreman, was one of those who led a most effective fight in your behalf. She and her people appeared before our Agriculture Committee time and again voicing support for farmers. The consumer organizations waged an educational campaign to make it clear that farmers were not the cause of high food prices.

It was these consumer groups who, alone, could reach the nonfarm sector with the message that it was farmers and only farmers who could fulfill the needs of the nation with adequate food and fiber. It was these consumer groups who said that it was in the nation's own best self-interest to help farmers maintain a high level of production. And that assistance meant adequate farm programs.

And so when the Farm Act of 1973 expired last year and this Administration and the new Congress started putting a new and better one together—we received the support of consumers and urban Congressmen once again.

Of course, the present program isn't everything that every farmer wants.

Can you tell me anyone—or point to any one organization—that can come up with a program that can completely satisfy every one of the some 2 million farmers we have today? Can anyone come up with a program that can meet the needs of some 400 different commodities?

Can anyone outline a program that would completely restructure our whole farm marketing system without, at the same time, completely destroying farmer independence?

Can anyone create a farm program that would take all the risks out of the weather?

After all, weather here at home and worldwide has more direct affect on price than all the government policies in this world laid end to end.

And finally, what about political reality No. 3?

What about the actual cost of a guaranteed farm price program?

Now, if you arbitrarily set the prices of all farm commodities at some magic figure called parity, we are faced with some hard problems—none of them attractive or feasible.

It would require a mandatory slash in production of wheat and feed grains—not voluntary, mind you, but by government flat. It would require the greatest and most restrictive production controls that farmers have ever experienced. It would require a restructuring of our marketing system—creating most monstrous bureaucracy.

There is nothing in the history of farm family agriculture that would indicate farmers would accept this sort of regimentation without being guaranteed adequate payments for land taken out of production. The government cost of financing such a program would be staggering and taxpayers wouldn't stand for it. Previous programs to pay farmers for not producing caused a waive of public resentment. A new and more costly attempt to revive the program would be most difficult to get through Congress.

Furthermore, such a program would dangerously imperil our reputation in foreign markets as dependable suppliers. We would become non-competitive in the export market. We could be put in a position where our reserves were inadequate to meet domestic and worldwide demands in periods of production shortfalls—which are inevitable.

And finally, arbitrarily pegging commodity prices too high would invite a new wave of farm speculation that would drive land prices up another 12 to 15 percent above current record levels. Such an increase would again have to be reflected in the artificial commodity price structure, thus perpetuating the costly cycle. Furthermore, another sharp increase in farm land prices would virtually foreclose, forever, any chance for young family farmers to enter agriculture or to develop adequate farm land resources. That point has already been reached for many farmers.

So where does that leave the farmer?

It leaves the farmer standing alone economically and politically naked.

I submit, my friends, that the Food and Agriculture Act of 1977 is not only the very best program that is politically acceptable and possible—but, more important, it is a very good program economically for farmers.

Give it a chance to work this year. It hasn't even been tested yet. And how can you be sure it won't work if you don't try it? I'm convinced it will.

From this farm program—from this Administration—you not only get understanding and awareness of your problems, which are very real—also get some positive government assistance. You have a vast reservoir of public support going for you now—that you never had before.

I say our existing farm programs, together with the help of a sympathetic Administration that cares about the welfare of family farmers gives farmers a golden opportunity to prove to themselves and the nation that they can make a self-help, voluntary program work.

The program provides outright government financial assistance. It provides the tools to control production. It provides a program to control surpluses. It will, I am convinced, greatly strengthen farm prices. The program makes us competitive and more secure in the foreign markets which are the life-blood of the wheat and grain producer.

And for the first time, we have a program that can create some semblance of economic stability within agriculture.

And I'm not just blowing smoke when I say this.

Agricultural economists are generally agreed that for every one cent increase in the market price of wheat and corn—farmers gain from $75 to $80 million dollars.

Now you just take a pencil and paper and figure out what your wheat was selling for in Bowman, North Dakota or Hayes, Kansas at its lowest point last year—and then compare it to the target price for wheat of $3.00 a bushel.

And I'm saying that if you participate in the set-aside and reserve programs, the price of wheat and feed grains can go well above the target level. And with a shortfall of production which is already evident in some parts of the world—that price could go much, much higher. And with your grain in reserve on your farm and under your control—you can sell it for that higher price.

So just multiply that $75 to $80 million dollars by 100 or 125 or 150 and get a walloping $7 to $10 billion increase in net farm income.

And if you don't use the programs offered to you—then you are saying, in effect, to the consumers and to the Congress that you really are not worried about the surplus—that you are satisfied with the current farm price outlook.

What other possible interpretation could consumers place on such inaction? And what other interpretation could the Congress, the President or I put on such a decision by farmers?

This is not a matter of throwing down the gauntlet and say "take it or leave it" without protest, without criticism, without trying to make things better for yourselves.

It's the blunt question of whether farmers want to take this opportunity to help themselves—keep farm land prices from going out of sight and thus freezing out future opportunities for young farmers. This is your opportunity to strengthen your support among the general public and help yourselves at the same time.

If I have been frank and blunt with you this evening, it is because I think you wanted it this way. That's the way friends ought to talk to each other.

As Secretary of Agriculture for all 2 and a half million farmers I have no alternative but to represent the best interests of all of them. I'm not just the advocate of the wheat farmers—or the corn farmers or the livestock rancher—the fruit grower—the dairyman. I have to consider all Americans. I no longer just represent 500,000 people in a district in Minnesota. My responsibility ranges from the potato farmer in Maine to the celery farmer in California, to the citrus grower in Florida, the tobacco farmer in Carolina, to the ranchers and farmers in between.●

CONGRESSIONAL LONGEVITY

HON. DEL CLAWSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. DEL CLAWSON. Mr. Speaker, an editorial in the Washington Post of Monday, March 20, calls attention to a basic difference of opinion concerning the true origins of the problems of the legislative branch of the Federal Government and the consequent pitfalls which surround attempts to correct the problems through remedies founded on inaccurate diagnosis. The people enjoy a very precious right of determining how many terms a member of Congress may serve. Let us not erode the "rights" of the people further by imposing another limitation. The editorial follows:

CONGRESSIONAL LONGEVITY

One of those perennial attempts to reform Congress by limiting the terms of its members was trotted out again this week before a Senate Judiciary subcommittee. Under consideration are two constitutional amendments that would limit the service of future senators and representatives to 12 or 15 years. Proposals like these have been floating around at least since 1951, when the Constitution was changed to restrict presidents to two full terms. We hope they continue merely to float and don't light.

It needs to be conceded that proponents of amendments like these, introduced by Sens. Dennis DeConcini (D-Ariz.) and John C. Danforth (R-Mo.), are focusing on a real problem: the stagnation that prolonged terms in high office can produce. The seniority system, even though it is not so strong now as it once was, places enormous power in the hands of longtime members of Congress solely because they have been there so long. That, coupled with the political advantages that incumbency generates, makes it increasingly difficult for new blood to fight its way to Washington. Even when a veteran member has dropped out of touch philosophically with his constituents, he is often able to stay in office because party officials prefer power to issues.

Sen. DeConcini also argues that this distribution of power operates to deny equal representation to voters in states and districts where hot political competition makes it difficult for any person to stay long in Congress; the representatives of those areas are never able to stand on an equal footing with those from districts that send back the same legislator election after election.

Those are valid and appealing arguments. They make the proposed limits on congressional terms seem attractive. But the senators have traced the problems to the wrong source and are thus prescribing the wrong cure. The evils—and they are that—of which they speak grow not out of unlimited service but out of the way in which Congress itself has chosen to treat that service. The cure, then, is not to keep particular people out of Congress, but rather to limit the power and prerogatives that Congress grants to those members who win reelection repeatedly. For example, restricting the length of time a member could be a committee chairman or, even, serve on one committee might not change the situation as much as would the proposed amendment, but it would certainly reduce the advantages of long service.

To attack this problem the other way, as the proposed constitutional amendments do, is to place an additional restriction on the right of voters to choose whomever they want to represent them in Washington. That right of choice is so fundamental that it should not be tampered with. Voters should be allowed to elect—and reelect—to Congress whom they please.●

PHILADELPHIA, AIRLINES SIGN MAJOR AGREEMENT

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. EILBERG. Mr. Speaker, I am pleased to inform my colleagues that the city of Philadelphia and the scheduled domestic airlines which serve it have signed a 32-year agreement under which the airlines will pay for the $176 million modernization and expansion program already completed at the Philadelphia International Airport.

Signing the agreement were Joseph A. LaSala, city representative and director of commerce, and officials of the seven domestic carriers, including John Reagan, chairman of the negotiating committee for the airlines.

The pact paves the way for Philadelphia to sell airport revenue bonds to pay back funds which were advanced for the modernization and expansion program, which has provided the city with one of the finest air facilities in the country. The city's $80 million bond issue has been given the best rating since 1953 by the two bond rating firms, Standard and Poor, and Moody's.

In announcing the agreement, Mayor Frank L. Rizzo noted the city administration's efforts to get the region's new international airport off the drawing board and into construction, ending more than 20 years of delay.

Mr. LaSala said that the new agreement between the city and the airlines is retroactive to July 1, 1974, when the previous 25-year contract expired.

The cost of construction of the airport's new facilities will be returned to the city via a set of rates and charges to be paid by the airlines for use of the airport. The charges will cover landing fees, ramp fees, and rent for the use of office space and ticket counters.

The new pact includes a provision under which the airlines would finance future airport projects which they and the city deem necessary to improve accommodations to the public.

The total cost of the airport construction project is $200 million, including $24 million for new parking garages. The Philadelphia Parking Authority built the garages through its sale of revenue bonds.●

FIGHTING GOVERNMENT REDTAPE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. HAMILTON. Mr. Speaker, in a continuing effort to reduce burdensome Government redtape and paperwork, I have written to U.S. Secretary of Labor Ray Marshall urging him to adopt changes in a Federal law regulating corn detasseling. The law was originally written to eliminate abuses of migrant farm laborers but its reach is so wide that it has created an unnecessary burden on many agricultural businesses and may result in a reduction in summer employment for young people.

I would like to insert that letter into the Congressional Record:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., March 8, 1978.

Hon. RAY MARSHALL,
Secretary of Labor,
Washington, D.C.

DEAR MR. SECRETARY: One of my constituents in the seed industry, who hires students for one to three weeks of corn detasselling work during the summer, has brought to my attention the burdensome registration requirements of the Farm Labor Contractor Registration Act of 1963, as amended in 1974.

Testimony at the hearings before the House Subcommittee on Economic Opportunity on February 22, 1978 revealed that the Department of Labor is interpreting the reach of the law broadly and the exemptions narrowly. Examination of the definitions in sections 3(b) and 3(g) of the act, and the Department's interpretive memoranda on these definitions, convince me that what started as an independent farm contractor, or crew leader, law is now an agricultural employment law.

Several amendments have been offered to the Subcommittee which would revise the reach of the law back to the source of the problem, namely, unscrupulous crew leaders. Advocates for the seed industry, including my constituent, contend that they represent substantial business enterprises, not "fly by night" operations run by itinerant farm labor contractors, and that the requirements of the law, as interpreted, constitute an unnecessary burden on them. I agree with them. In his statement before the Subcommittee on February 22, your spokesman, Assistant Secretary Donald Elisburg, expressed opposition to all proposed amendments, but his statement contained no specific evidence of labor problems in the seed industry.

It is estimated that 250,000 young people are employed for a few weeks each summer in corn detasselling. The registration requirements for the processors and the employees who engage the students will cause many in this business to rely on sterile inbred lines and mechanical means in place of hiring corn detasselers. Furthermore, the Department has apparently only scratched the surface on the registration paperwork. Secretary Elisburg reported a total of 12,506 registrants in 1977, up from 9,707 in 1976. But the American Seed Trade Association estimates that more than 15,000 persons and 10,000 vehicles might have to be registered in corn detasselling operations alone.

To state the problem in general terms, Mr. Secretary, I believe that this law, both as written and as interpreted, is vastly overinclusive when its jurisdiction is compared with the evil it is intended to eliminate. The result is an unnecessary paperwork burden on certain agricultural businesses and a predictable reduction in summer employment for young people.

Since you and I both agree on the importance of maintaining and increasing employment opportunities, especially for the young, I wanted to bring this matter to your personal attention. Everyone who has testified at the hearings and discussed the matter with me agrees with the goals of the law. The question is whether we can redirect it to only those enterprises that require this added governmental regulation.

I know you will give this matter careful attention and I look forward to hearing from you soon.

Sincerely yours,
LEE H. HAMILTON, M.C.●

BYELORUSSIA INDEPENDENCE

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. FLORIO. Mr. Speaker, March 25 will commemorate the 16th anniversary of the declaration of the independent State of Byelorussia. The proud peoples of Byelorussia, suppressed in this century by waves of invading armies and Soviet occupation, and peoples of Byelorussian descent around the world will celebrate this day with prayers and renewed hope for their once-free nation.

On March 25, 1918 a constitutional rada of the Byelorussian National Republic, representative of all national cities and counties, issued an official proclamation declaring a free and independent State. This democratic expression of sovereignty cast off forever any legitimate Russian imposition of control over the Byelorussian nation.

While still in the midst of the First World War, the free and independent State of Byelorussia made great strides in the fields of education, culture, and social welfare. Politically the nation enjoyed renewed spirit of its peoples and received international recognition by many sovereign States such as Poland, Bulgaria, Denmark, France, and Yugoslavia.

The close of the war, however, found Byelorussia vulnerable to swift moving events. Retreating German armies left a vacuum that was soon filled by Communist forces from the Soviet Union. The Bolsheviks soon occupied the Capital City of Minsk, and illegally divided the nation. Today, most of Byelorussia is under repressive Soviet control, with their own identifiable heritage and culture constantly under suppression by Communist Party organizations.

During the 60 years of domination by the Soviet Government, the democratic aspirations and hope of the Byelorussian people has not faltered. Many millions of Byelorussians have died or been deported for crimes against the Soviet State. At-

tacks on Byelorussian language and culture by government authorities have been unceasing. And yet, Byelorussian hopes for a free and independent homeland remains strong and will once again be renewed upon their 60th independence day anniversary this March 25. It is fitting that we, and all peoples of the world committed toward fighting for liberty and what is just, join the Byelorussians in their celebration.●

THE NATIONAL CHILD NUTRITION ACT

HON. CARL D. PERKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. PERKINS. Mr. Speaker, I am today introducing the National Child Nutrition Act, a bill to expand, revise, and consolidate the child nutrition programs as authorized under the National School Lunch Act and the Child Nutrition Act of 1966.

This comprehensive piece of legislation is the work of the National Child Nutrition Coalition. This coalition is comprised of a group of dedicated individuals from all parts of the country whose expertise in the area of child nutrition has been if immeasurable service to the Congress in the past. This bill is the result of a major effort on the part of this coalition to address the national concerns that they have come to know through their continuous involvement with the child nutrition programs.

The principal features of this bill are: First, a consolidation of all of the child nutrition programs that are presently authorized under two separate acts, the National School Lunch Act and the Child Nutrition Act of 1966; second, a reauthorization and expansion of the two expiring programs: the special supplemental food program for women, infants, and children (WIC), and the Child Care Food Program; and third, a number of amendments to both the expiring and on-going programs in an effort to improve the overall effectiveness of these programs.

I would like to commend the National Child Nutrition Coalition for the time and effort they spent in developing this legislation; and I am introducing this bill today because of my respect for their past efforts to improve these programs and because I believe that their ideas ought to be placed on the public record so that everyone might be able to study them. I myself agree with the basic thrusts of this bill, such as the expansion of the WIC program; but I am reserving judgment on the detailed provisions until the committee has received the administration's proposals and has had an opportunity to hear a full and free debate on all of these issues.

Mr. Speaker, let me again state my respect for the work of the National Child Nutrition Coalition, and let me urge all the Members to study carefully the suggestions of this coalition.●

THE 157TH ANNIVERSARY OF THE INDEPENDENCE OF GREECE

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. ANNUNZIO. Mr. Speaker, Greek Independence Day has a special meaning for Americans, for 157 years ago, on March 25, 1821, Greek patriots raised the flag of revolt against their Turkish oppressors and the flag was blessed by Bishop Germanos of Palaeion Patron, at the monastery of Aghia Lavra.

There followed 7 years of grim fighting during which a handful of rebels held at bay the combined might of the Sultan's Ottoman Empire. The engagements of Valtetsi, Dervenaia, as well as Missolonghi, where Lord Byron fought and died, rank among the most glorious pages of Greek history, while the exploits of the Greek Navy, under Miaoulis, Kanaris, and Sachtouris, stirred the hearts of the peoples of Europe, who finally brought pressure upon their governments to intervene in the fight and to compel the Sultan to recognize Greek independence.

The cause of Greek independence immediately caught the imagination of the American people. Our new Nation was not in a position to offer substantial assistance to the struggling Greeks. However, a few Americans volunteered to serve with the badly outnumbered Greek patriots; others organized efforts to send packages of bandages and other supplies to the Greeks; and expressions of sympathy and solidarity were forthcoming from the highest Government officials and from communities throughout our young Nation.

During the long and bitter war of independence, the world was inspired by the indomitable resistance and heroic dedication of the Greek patriots. Our own John Adams remarked:

> My old imagination is kindling into a kind of missionary enthusiasm for the cause of the Greeks.

Following the intervention of Russia, England, and France in the Greek independence struggle, however, the Greeks saw their valor and tenacity crowned with success. After many centuries of foreign rule, freedom was regained by the Treaty of Adrianople of 1829 and the London Protocol of 1830.

During the next century, the Greeks devoted their efforts to extending their boundaries to include Greeks still under foreign rule, and to establishing a stable government. When they were threatened anew with the opening of World War II, they again showed their fierce devotion to freedom and independence. Their stubborn resistance to the German invasion of 1941 delayed the opening of the German campaign against Russia by several crucial weeks.

The end of World War II brought no respite to the Greeks. Their country was devastated, and they faced a new threat within their borders in the form of armed Communist guerrilla bands seeking to overthrow the government. However, once more they showed courageous determination to preserve their liberty at all costs. The struggle against the guerrillas was long. It delayed economic reconstruction by several years. But, finally it too was crowned with success.

Americans can be proud that they played an important role in this new struggle. In 1949, America's faith was rewarded, for hostilities came to an end and the Greek struggle against the Communist forces was successfully concluded.

It is a pleasure to extend greetings to Americans of Greek descent in the 11th Congressional District of Illinois, which I take pride in representing, as well as those in Chicago and across our Nation, on the occasion of their independence day and to recall a century and a half of genuine friendship between the people of America and the people of Greece.●

SHAPELL INDUSTRIES COMMENDED FOR ENERGY CONSERVATION EFFORTS

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. MINETA. Mr. Speaker, in this age of dwindling fuel supplies, when the citizens of this country are concerned more than ever before with the conservation of our precious energy resources it is imperative that the country's building industry adopt a similar position of energy consciousness, and devote itself to producing homes that offer not only traditional values of luxury, craftsmanship, and beauty; but include an equal measure of built-in energy efficiency as well.

I am privileged to have in my congressional district a major homebuilder who has taken a leading role in the pursuit of these goals, and I would like to call to your attention that company's pioneering efforts in the area of home energy conservation.

I am referring to Shapell Industries, one of California's largest and most respected new homebuilders. Since its founding in 1954 by Nathan Shapell, David Shapell, and Max Webb, Shapell Industries has made great contributions to the betterment of community life and has strived to produce the best quality homes for buyers of all incomes. The company has been a leader in providing quality low-cost housing for southern California's senior citizens, and has been highly praised for both the esthetic beauty and the high standards of construction used in their communities.

Now, as the country faces the challenges created by diminishing energy resources, Shapell Industries has again assumed a leadership position—not on a mere experimental basis, but on a large scale at their new Quimby Hills development in San Jose, where highly energy-efficient homes are being built for as many as 400 families.

Shapell Industries has become California's first major developer to adopt

the new National Energy Watch program, a nationwide home energy conservation program sponsored by the Edison Electric Institute that encourages builders to meet strict guidelines for energy efficiency.

Starting at Quimby Hills, Shapell has built homes with more than twice the energy conservation features necessary to qualify as energy efficient, according to a scale established by Pacific Gas & Electric Co. Features include pilotless ignition gas furnaces, setback thermostats, dishwashers with off-and-on drying cycle switches, shower flow restrictors, glass-lined water heaters, and insulated hot water piping. In addition, buyers are offered a choice of three different solar energy systems that can increase the efficiency level of a home up to nearly six times the acceptable minimum.

Mr. Speaker, I would like at this time to commend the leadership of Shapell Industries, particularly President Nathan Shapell and his northern California management team including Jim Ghilmetti, Chuck Birkhead, Leonard A. Fryer, Garth Chambers, and Dennis Ysunza, for their outstanding efforts to reduce home energy consumption and extend the life of our present reserves until new sources can be developed to meet our future needs.●

A TRIBUTE TO GEN. LEW ALLEN

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mrs. HOLT. Mr. Speaker, during the past 8 months, Gen. Lew Allen, Jr., commander, Air Force Systems Command, has urged his field commanders and his staff in the headquarters at Andrews Air Force Base, Maryland, to establish goals consistent with Air Force and national objectives and to develop plans and timetables for reaching these goals.

General Allen has given pattern and perspective to the never-ending process of seeing that a cost-effective, reliable, supportable weapon system is designed, developed, and eventually produced and delivered to the operational air commands.

Bold management initiatives have been undertaken to implement Department of Defense instructions clarifying Office of Management and Budget circular No. 109, major system acquisition. New procedures have been adopted in the Air Force Systems Command to justify requirements and analyze alternatives early in the life cycle of a potential program in line with such concepts as milestone zero, mission element need statement (MENS), and zero based budgeting.

In the February 1978 issue of Government Executive, C. W. Borklund, publisher, has written a perspective article on the new management goals, initiatives and procedures undertaken by General Allen. His article deserves public attention, and I encourage everyone with any interest in this area to take the time to read it. I would also like to add personal congratulations to General Allen on his recent and most deserved promotion to the position of Vice Chief of Staff, U.S. Air Force.●

THE PANAMA CANAL TREATIES: LET'S MAKE A DEAL

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. DORNAN. Mr. Speaker, last week's vote in the Senate by a margin of 68 to 32 to ratify the Carter-Torrijos "Treaty for Permanent Neutrality" of the Panama Canal was round one. Round two, and perhaps the critical moment in the White House design to give away the U.S. canal in Panama, will come early April or May when the Senate is asked to vote on the merits of the second treaty, the agreement which actually gives away the canal.

As one who remains actively opposed to this Panama Canal giveaway, I was naturally disheartened by last week's vote. But I was less disheartened than appalled by the nature and extent of the wheeling and dealing performed by the White House in the Carter administration's efforts to twist Senate arms. We have all heard too many reports of executive department officials moving free and easy with taxpayers money in order to win Senate votes by promising pork barrel patronage. The same Carter people who suffered finger strain pointing self-righteously during the Watergate season, are now inviting similar criticisms even by some of those offended Senators who are otherwise already for the treaties.

The Wall Street Journal recently editorialized against this wheeling and dealing game-show spirit with the Carter White House, and it is certainly worth reading and passing the word along to friends and colleagues. As an opponent to the Panama Canal giveaway, I note that you do not have to be against the treaties to be against the Carter administration's unfair campaign practices to see them ratified.

The article follows:

[From the Wall Street Journal, Mar. 16, 1978]

"LET'S MAKE A DEAL"

We knew the Panama Canal treaty was going to cost the American taxpayers something but we had no idea how much. It turns out that even if the Senate rejects the treaty today, there will be a big bill to pay.

That is because of the administration's rediscovery of an old way to win the hearts and minds of legislators. You give them things.

The administration has made some handsome offers to try to win over recalcitrant Senators. Senator Talmadge of Georgia has been promised administration support for his $2.3 billion emergency farm bill. That could raise the federal dole to farmers this fiscal year even higher and provide a new higher base for further increases next year.

Senator DeConcini has been promised a $250 million federal purchase of copper for the strategic stockpile. That's only half what the Senator wanted, but it's $250 million more than the administration was offering before the Panama Canal bargaining got hot and heavy.

We're told that the other reluctant Sentors have been wooed with equal ardor. "There must be something you want," the administration come-on goes. "Just tell us your heart's desire and you might be surprised what we will do."

Not all the Senators are reacting well to the White House romancing. Republican Senator Packwood, uncommitted but leaning towards support of the treaty, is quoted in The Washington Post as saying the President should not be "master of ceremonies at 'Let's Make a Deal'." Senator Brooke of Massachusetts accused the administration of making a "crude" offer, one which he would not reveal. Senator Moynihan of New York complained that he signed on early and only got a Cuban cigar from Vice President Mondale. Senator Zorinsky of Nebraska, who has never liked Washington wheeling and dealing, had some unkind comments about the White House for the television reporters.

We ourselves don't object to the principle of wheeling and dealing; politics would be no fun without it. But we do object to the money.

The money being used to buy Senate votes has to come from American citizens, through higher taxes or faster inflation or both. As we have said all along, the Panama Canal treaty is a foreign policy sideshow; we can take it or leave it. But we do care about taxes and inflation, which the administration is dealing away. And it's especially galling to see that even if the administration loses, the rest of us have to pay.

The next treaty ought to give us some protection. The text ought at least to stipulate that if it is not ratified by the U.S. Senate all political promises offered to secure its passage become null and void.●

THE NEW ALLIANCE

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. CRANE. Mr. Speaker, I want to announce to my colleagues the formation of a precedent-setting new alliance: labor and the GOP. My colleague and friend, MICKEY EDWARDS, and I traveled to Youngstown, Ohio, last month to open this dialog. We put aside labels such as conservative and liberal and talked with local labor leaders in terms we all understood: Jobs, taxes, Federal regulations, and dumping rules. We all came away from the conference table struck by the similarity in outlook and pledged to a joint attack on these common problems.

On March 13, MICKEY and I returned to Youngstown with three pieces of legislation directed at the problems the union representatives had highlighted. These rank-and-file leaders approved of our legislative prescriptions, and our job stability package has now been dropped in the hopper.

This package contains three separate pieces of legislation. The first, the Urban Growth Act of 1978, directs itself to increasing employment opportunities and improving job stability in urban areas and areas of high unemployment.

Through a program of tax incentives (reductions in corporate tax rates, jobs tax credits for employee retention, extra investment tax credits for urban area investments, 1-year writeoff of costs of conforming to federally mandated regulations, indexing capital gains, and depreciation computations), this bill will encourage capital investment, job creation, and economic growth.

The second bill, the Truth-in-Regulation Act of 1978, requires that all Federal agency regulations be preceded by economic and environmental cost-benefit analyses to insure that the affected industries are not adversely impacted either financially or jobwise. In addition, a local business-labor-government task force will be established in each community to assess the economic and employment impacts on that locality. Should a finding be made by either the agency or the task force of any increased unemployment, the proposed regulation shall require the approval of Congress by joint resolution.

Finally, the Anti-Dumping Enforcement Act of 1978 accelerates the deliberations of the Treasury Department and the International Trade Commission when an inquiry into dumping of foreign imports in the United States is initiated. The findings timetable is cut in half, and a time certain of 6 months is placed on the final duty assessment stage. A labor-industry task force is created for the duration of the investigation to oversee Treasury's proceedings and act as liaison for the affected industries.

We have already added seven cosponsors—JACK CUNNINGHAM, BOB KASTEN, BILL KETCHUM, TOM KINDNESS, TRENT LOTT, FLOYD SPENCE, and STEVE SYMMS—to the list of those who share our excitement over this initiative. With no compromise of principles on either side, we believe a commonality of interest is reflected in this constructive legislation. We believe this package will appeal to Members from every location on the political spectrum. It is our basic premise, reiterated by the union representatives, that no-growth economic policies, overregulation, and inflation are combining to defeat those who seek to attain the American dream. The future for working Americans lies not with expanded Government programs and extended Government control over their lives, but with this thrust to lessen Government interference and preserve an economic climate for growth. We urge our colleagues to get on this bandwagon.●

HEALTH MAINTENANCE ORGANIZATIONS

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. ROGERS. Mr. Speaker, on March 10, 1978, Mr. ROSTENKOWSKI and I introduced H.R. 11461, the administration proposal to revise and extend the existing authority with respect to health maintenance organizations. Today, I am introducing by request legislation, sponsored by Senator SCHWEIKER and others in the Senate as S. 2534, which also revises the existing health maintenance organization program. I am pleased to introduce this second proposal as I am certain it will be useful to the House in its consideration of necessary or appropriate amendments to the existing health maintenance organization authority.●

DR. ERNEST AMBLER'S WELL-DESERVED APPOINTMENT AS DIRECTOR OF THE NATIONAL BUREAU OF STANDARDS

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. STEERS. Mr. Speaker, it is my great pleasure to acknowledge the recent accomplishments of a fine citizen and distinguished public official. Moreover, I am proud to number this man—Dr. Ernest Ambler, the new Director of the National Bureau of Standards—among my constituents in the Eighth Congressional District of Maryland.

As the eighth director of the 77-year-old National Bureau of Standards, Dr. Ambler will head the Nation's central reference laboratory. The bureau provides measurement methods, standards, and data that are used in industry, commerce, Government, and education. Dr. Ambler joined the National Bureau of Standards in 1953 and has continuously worked to make the Bureau an increasingly valuable scientific and technical resource. As a scientist, he has contributed directly to the state-of-the-art in measurement technology. His expertise in nuclear physics and cryogenics formed the basis in 1956 for a cooperative effort that disproved the law of parity conservation, a concept that nuclear scientists had adhered to for more than 30 years. As an administrator, Dr. Ambler has helped guide Bureau operations and policies since 1961. Among his continuing concern the Bureau's role in international science. He has long acknowledged that the Bureau can act as a prime agent in international scientific cooperation and can support U.S. foreign commerce though participation in international standardization activities. Dr. Ambler is the recipient of numerous honors, and has authored 51 publications. Born in England, he was educated at Oxford University. Dr. Ambler and his family are residents of Bethesda, Md.

An organization such as the National Bureau of Standards needs a talented person to direct it, and therefore I applaud the appointment of Dr. Ernest Ambler. Certainly he can look to continued success, and we can look optimistically to the future of the National Bureau of Standards.●

THE HOLLYWOOD 10

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. WAXMAN. Mr. Speaker, it has been a generation since the Hollywood 10 were cited for contempt of Congress for refusing to testify on their political beliefs and associations. Those who sought protection in the first amendment were deemed guilty in the eyes of many. The institutions of government were used to stand cherished ideals of freedom of speech and assembly on their head. The careers of some of our best creative talent were destroyed by the hysteria and fear which gripped the Nation.

It has taken years to overcome the suspicion and doubt. Many have unfortunately forgotten what those times were like. It is perhaps a measure of both the agony and legacy of McCarthyism that films such as "The Front" and "The Way We Were" or television dramas such as "Fear on Trial" have only recently begun to recall these events.

In August 1976, the Subcommittee on Communications held hearings in Los Angeles on the issue of violence on television. We heard from some of the leading figures in the creative community. I recall vividly, however, that for each of these witnesses, the first few moments were troubled and difficult. There was something about writers and producers coming before a congressional committee, in the glare of television lights, which evoked other hearings, from another era. The tension was almost tangible. The moment passed with the knowledge that we were eager to learn from them, to have them share their wealth of knowledge and experience. But the memory has lingered.

I am therefore especially pleased, as a Representative from Los Angeles whose district includes Hollywood, to have helped reestablish a relationship of trust and respect between Washington and the film and television industry. But we must not allow understanding of the past to slip away in the harmony of the present.

Ring Lardner, Jr. was one of the Hollywood 10. He has written a sensitive and compelling essay on that period and his involvement. It should be required reading for all who are concerned with the preciousness of freedom, and the dignity of the individual. I am therefore pleased to reprint it in the CONGRESSIONAL RECORD:

[From the New York Times, March 18, 1978]

THIRTY YEARS AFTER THE "HOLLYWOOD 10"

(By Ring Lardner Jr.)

(The author of the following article, Ring Lardner Jr., is one of the survivors of the so-called "Hollywood 10" called to testify at hearings before the House Committee on Un-American Activities, which was investigating alleged Communist subversion in the movie capital. The article is adapted from an address at a recent program here, sponsored

by the American Jewish Congress, marking the 30th anniversary of the hearings. Since the Hollywood blacklist ended for him in the 1960's, Mr. Lardner has written several screenplays, winning his second Academy Award, for M*A*S*H, in 1970, and a book, "The Lardners: My Family Remembered.")

There were 19 of us who came to be known as "unfriendly witnesses" because of our expressed attitude toward the committee. I couldn't figure out then or now how they were selected, but on the available evidence, I'd say haphazardly, there were some fairly outspoken radicals, known by me as a party member to be Communists, but others of equal prominence were not on the list, and four or five of the ones that were had only the most tenuous connections with the party and the left generally.

Soon after we had been subpoenaed, 18 of the 19 met with a group of lawyers to talk about what to do at the hearings. The one who stayed away was Bertoit Brecht because of his special status as an alien and his anxiety to get to East Germany after his appearance without being delayed by legal procedures.

The first thing we had to recognize was that the committee had us in a rather tight bind, with strictly limited choices, all of them involving distinct risks to our liberty and continued employment, especially for those of us who were indeed members of the Communist Party.

If you weren't you could say so, but because it was under compulsion you would be conceding the right of Congress to go into such matters and helping to isolate those who had exercised their perfectly legal right to be Communists. If you told the Congressmen it was none of their business, you faced the likelihood of prosecution for contempt.

Some of the subpoenaed men who were Communists wanted to say so, to proudly proclaim an affiliation they had been reluctantly concealing because that was party policy in Hollywood. Their enthusiasm for this stand declined when it was pointed out that the committee's next demand would be to name all the other members they knew. If they balked at informing, they would still have to invoke either the freedom-of-speech or the self-incrimination provisions of the Bill of Rights, ending up in either case with a shakier defense against contempt than if they had answered no question at all in a privileged area.

Once that last position was agreed upon—to answer no such questions—the remaining decision for each of us and the group as a whole was whether to base our silence on the First or the Fifth Amendment. Beginning with the next round of hearings in 1951, scores of witnesses did invoke the Fifth, and it would have been quixotic, once our case had been lost, to follow our path to prison. For us, however, to use the Fifth back in 1947 would have had several drawbacks.

First, we would have been saying in practical effect that we thought it was a crime to be a Communist—this when no member of that party had even been indicted under the Smith Act.

Second, we recognized from the start that there was the danger of a blacklist emerging from these proceedings, and we know it would be hard for the studios to proscribe us if we were upheld by the courts for asserting our First Amendment rights. But even if we were upheld on the Fifth, the general stigma which unthinking people attach to it would make it easier for our bosses to organize and justify a blacklist.

The third and most important limitation was that while the Fifth could seriously impede the committee's work, and its application to a question about Communist membership needed testing, it did not challenge the committee's very existence. By using the First Amendment, we would be saying the whole investigation was unconstitutional—that where Congress was forbidden to legislate, Congress was forbidden to investigate. Hearings such as these would be proven to have no valid purpose.

In a situation, therefore, in which the only safe and acceptable course open to us was to repudiate everything we believed in and prove we meant it by making trouble for other people, we could not be regarded as heroes for choosing a course of decency instead. In fact, we were doubly disqualified from heroic status: We weren't volunteers and we thought we were going to be winners.

It is an interesting reflection on how far all three branches of the Government departed from American tradition during those dark years that all the relevant Supreme Court decisions up till that time gave us confidence that our position would be vindicated. One that seemed to apply had gone unchallenged since 1880. It said in part: "We feel equally sure that neither of these bodies possesses the general power of making inquiry into the private affairs of the citizen."

And another that sounded even more pertinent had been handed down as recently as 1943: "If there is any fixed star in our constitutional constellation, it is that no official, high or petty, can prescribe what shall be orthodox in politics, nationalism, religion or other matters of opinion, or force citizens to confess by word or deed their faith therein."

The very same court from which those words had come, with eight Roosevelt appointees, remained intact when we testified. It was the death of two of them in the summer of 1949, while our case was pending, and their replacement by Truman-appointed reactionaries, that lost us the four votes we needed for a review of the decision against us.

For us, the blacklist began only a month after the hearings and lasted for the more fortunate of us into the 1960's. In the spring of 1950 we were denied a Supreme Court hearing, with only Justices Black and Douglas dissenting, and by summer we were serving our sentences. In the fall our number was reduced by one when Edward Dmytryk announced from his place of incarceration that he had seen the light. Soon he discovered that a mere expression of remorse, however intense, was not enough for the committee or the producers. In order to work again, he was told, one had to name names. It didn't matter what names; the committee probably had them anyway. In fact, later on, when some cooperative witnesses couldn't come up with a respectable list, names were provided them by the committee staff from their ample supply. It was a ritual that was required, but not a meaningless ritual. To the unordained confessors on Capitol Hill, it was an act of perfect contrition.

In the years since then, the remaining nine have shrunk to four. Samuel Ornitz, Adrian Scott, Herbert Biberman, Dalton Trumbo and John Howard Lawson are dead. Of the survivors only Albert Maltz and I have been free to work in Hollywood more or less when we wanted to. Alvah Bessie and Lester Cole have not. But it isn't because two aging writers may still be blacklisted or graylisted, or that many more who came after us never were able to return to their old professions, that it is valuable to recall all this ancient history today.

It is, I think, because our nation has moved through two centuries in a continuous cycle from liberty to repression and back. And there is no more reason now to relax our vigilance than there was in the days when many people thought we had been through a Roosevelt revolution culminating in a grand alliance and the unconditional surrender of the forces of hate, intolerance and aggression.●

IS THE WHITE HOUSE "TWO-TIMING" ON ISRAEL?

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. DORMAN. Mr. Speaker, the State of Israel is now as it has always been, America's principal Middle Eastern ally. No nation has come closer to perfecting a democratic model of government, nor been more tried and true as a friend in need of the United States. Israel remains the cradle of Western civilization. It was an exciting privilege for me to visit the Knesset in January and watch that dynamic law-making body in action.

Those of us who support Israel, however, and who worry about the continuing threats to her existence, have become increasingly concerned of late about a reported souring in United States-Israeli relations because of White House actions. These reported actions by the Carter administration are exactly opposite those Jimmy Carter had promised while he campaigned for the Presidency. They are opposite the standing American guarantee that Israel's sovereignty and welfare are the number one priority of United States-Middle East policy.

If Jimmy Carter has been "two-timing" on Israel, it is the latest and most unfortunate support of an age-old maxim by Seneca. Two thousand years ago, Seneca closed the vast circle of his knowledge by learning that a friend in power was a friend lost. The Carter administration is not faithful to its commitment to help Israel when the White House asks Iran to stop the flow of oil to Israel until Prime Minister Begin succumbs to President Sadat's latest demands. It is unfaithful to Israel when it lobbies other foreign neighbors to stop the sale of arms to Israel, arms she needs to assure her own survival.

With the surgical accuracy which characterizes so much of his writing, Mr. George Will recently analyzed the recent chill in the Carter administration's one time warmer relationship with Israel. I ask that it be included in the RECORD, and I urge my colleagues to join me in urging the White House to reverse yet another erosion of a campaign promise. The stakes are too high for any U.S. diplomatic polygamy when it comes to the fate of Israel.

The article follows:

THE WHITE HOUSE AS ISRAEL'S "AFFLICTION"

(By George F. Will)

From the welter of impressions created by three months of theatrics, one idea emerges. Far from pursuing new aims, Egyptian President Anwar Sadat is pursuing old aims with new methods. Since his Jerusalem trip, he has avoided negotiations

and relied on the United States to pressure Israel.

When Israeli and Egyptian negotiators began formulating a declaration of principles, there were seven points of disagreement. In half a day five were quickly resolved; then Sadat quickly withdrew his negotiators. He finched from a "merely" bilateral agreement. He wants to negotiate on behalf of others, dealing with what promises he can't keep.

In Jerusalem, he acknowledged Israel's existence. In response, Prime Minister Begin made an offer more generous than any previous Israeli government had contemplated. He proposed to return the entire Sinai (where, in 1974 and 1975, small adjustments were arduously negotiated) to Egyptian sovereignty, including Sharm al-Sheikh, where Egypt began the 1967 war by blocking Israel's southern port.

Begin asked only to keep two air bases and associated settlements, and probably would settle for one base and an associated settlement, involving a fraction of 1 percent of Sinai. The base and settlement would no more abridge Egyptian sovereignty than U.S. bases in Britain abridge British sovereignty.

Israel is the size of Maine, but needs for its security the world's third largest air force, and so needs five large air bases, one of which is in the Sinai, Israels' topography prevents moving it to within the 1967 borders. But the most compelling reason why Israel wants the Sinai base is that the base is along the historic invasion route to Palestine. It could not stop an army, but it could be an inhibiting presence. If Israel left Sinai completely, and Sadat's successor wanted to remilitarize Sinai, he would be more apt to hesitate if there was an Israeli presence in a strategic place.

Sadat does not like negotiating about such things. He likes cowboy movies, so President Carter took "How the West Was Won" to Camp David for their meeting. Sadat, always theatrical, said that inadequate U.S. support made him too distraught to enjoy movies. That had the desired effect. The administration got jittery and offered Air Force One if some senators would fly to Begin to press him for concessions.

The next issue of the Washington Review of Strategic and International Studies, published by Georgetown University's formidable Center for Strategic and International Studies, reports that the United States has approached Iran about stopping the flow of oil to Israel until concessions are made, and has asked various nations to delay arms purchases from Israel.

In addition, in the last days of Hubert Humphrey's life, the administration pressured him to send a letter reprimanding Begin for not making concessions. But Humphrey rejected the administration's draft, and his letter, sent the day before he died, said: "I realize that these (Sinai) settlements are important within the context of Israel's present security needs."

The administration says the settlements in the occupied territories are an obstacle to peace, and illegal. But most of the approximately 7,000 settlers are on the Golan Heights or in the West Bank, and can hardly be called an obstacle to peace that neither Syria nor Jordan will negotiate. And one interpretation of international law is that land from which unsuccessful aggression is launched can be occupied by the victors until they receive reasonable assurance that it will not be a source of aggression.

Pending such assurance for Israel, in the form of treaty undertakings by Egypt and Jordan, it is unreasonable for the administration to assume, and unfair for the administration to imply, that the settlements suggest illegitimate annexation rather than legitimate security concerns.

While pressuring Israel to trust the United States and adopt a more relaxed view of the connection between territory and security, the Carter administration has decided to try to sell F15s to Saudi Arabia; has sharply cut the number of F15s and F16s promised when Israel signed the 1975 Sinai agreement yielding the Mitla and Giddi passes; and tied those planes in a "package" with planes for Israel's adversaries.

So this week Begin arrives at the White House knowing that, more than at any time since 1948, the White House is among Israel's affiliations, not its assets.●

FRANK ANNUNZIO HONORED BY REPUBLIC OF ITALY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. RODINO. Mr. Speaker, Congressman FRANK ANNUNZIO has received one of the Republic of Italy's highest honors for his work in assisting in better relations between the United States and Italy. Retiring Italian Ambassador Roberto Gaja, in his last offiical act as Italian Ambassador to the United States, last week conferred the Grande Ufficiale of the Order of Merit of the Republic of Italy upon Congressman ANNUNZIO at Firenze House, the new Italian Embassy in Washington.

I was very pleased to be with Congressman and Mrs. Annunzio as Ambassador Gaja bestowed this honor in the name of Italian President Giovani Leone. We were joined by other members of Congress, officials of the National Italian American Foundation and members of the Washington, D.C., and Baltimore Italian American community. Members of Congress included: MELVIN PRICE, CLEMENT ZABLOCKI, BRUCE VENTO, MARTY RUSSO, JOSEPH LE FANTE, LEO ZEFERETTI, and ROBERT LEGGETT. Also in attendance were: Judge John J. Sirica; Robert Georgine, president of the Building and Trades Department of the AFL–CIO; Msgr. Geno C. Baroni, Assistant Secretary of HUD; and Mario T. Noto, Deputy Commissioner of Immigration and Naturalization Services.

Mr. Speaker, we all know FRANK ANNUNZIO as dedicated statesman, an exemplary chairman of the House Subcommittee on Consumer Affairs, and an outstanding representative, not only to his Illinois constituents but to the Nation as well. I am happy to call him my friend.

He can be proud to add this award to the many others he has received over the years for his diligent public service. Mr. Speaker, I know my colleagues join me in saluting FRANK ANNUNZIO.●

PHILADELPHIA FILES SUIT AGAINST EPA AND ITS TACTICS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. EILBERG. Mr. Speaker, the city of Philadelphia has just filed suit against the U.S. Environmental Protection Agency, and I am pleased to have this opportunity to provide the following background information for my colleagues.

The suit was announced by Hillel S. Levinson, managing director of the city, with the action being instituted in the U.S. District Court in Philadelphia.

Mr. Levinson said the action was begun because EPA has continually frustrated and delayed the city's efforts to build three new sewage treatment plants within a reasonable timetable, as required by the Federal Water Pollution Control Act.

Mr. Levinson explained that the city was taking this action reluctantly. He said:

> We have no choice. At Mayor Rizzo's direction, the city has been negotiating with EPA since last October for more reasonable treatment of Philadelphia, but EPA has now broken off negotiations, and wants to impose a harsh consent decree on the city.

The managing director said the consent decree would impose daily fines on the city for missing impossible deadlines. It would assert EPA control over every aspect of the planning, construction, and scheduling of the new sewage plants, and would bind the city in great and burdensome detail to numerous monthly and quarterly reports and deadlines.

In its suit, Philadelphia charges that EPA has imposed endless red tape on the city, delayed Federal funding for capricious reasons, arbitrarily refused approvals for city contracts and other procedures, required burdensome and unnecessary reports and deadlines, frequently gone back on its word, and attempted to levy fines for trivial paperwork violations.

Naming National EPA Administrator Douglas Costle and EPA Region III Administrator Jack Schramm as codefendants with EPA, the city's suit asks the district court to order EPA to cease its delays and hindrances; provide adequate funding; grant the city necessary time extensions as permitted by law; and cooperate with the city in carrying out its stream clean-up programs.

Among allegations in the city's complaint are the following:

First. EPA has unreasonably delayed approval of city applications for Federal funds needed to carry out a $464 million expansion and modernization of the three sewage treatment plants. This has delayed the start of construction at the northeast and southeast plants. Only the southwest plant is fully under construction.

Second. EPA has illegally withheld funds for the preparation of a site for the construction of the new southeast plant, but offers to release such funds if the city will sign a consent decree.

Third. EPA urged the city to improve some Fairmount Park land with digested sludge taken from three lagoons at the northeast plant, but afterwards refused to support the city's program for that project. Because the space occupied by these lagoons is needed for a new plant, the city cannot proceed with construction of the main elements of the plant despite the fact that design plans are ready.

Fourth. Other elements of the new northeast plant have been delayed by the fact that EPA has illegally sought to override normal city bidding procedures for the construction of new facilities. It has refused to let the water department rebid a rejected contract. This and other EPA-caused delays will raise the ultimate cost of the new plant.

Fifth. EPA has gone back on a 1975 agreement that set completion deadlines for Philadelphia's new secondary sewage plants ranging between 1978 and 1980. In June 1977, EPA insisted that the plants be upgraded to secondary treatment by July 1, 1977, even though two-thirds of American communities could not meet this national deadline. Since then Congress has amended the national law to permit extensions up to 1983, but EPA has refused to grant such extensions—or agree to interim treatment levels for sewage—unless Philadelphia signs a consent decree.

Mr. Levinson said that Philadelphia is on time, under the 1975 schedule, and will have its new sewage plants in operation by late 1980, as originally agreed.

He said:

We cannot, however, accept placidly a continuation of these unreasonable delays and hampering restrictions. The people of Philadelphia have too much at stake. Stream clean-up, done in a timely, orderly, and economical manner, is important to all of our citizens.

City Solicitor Sheldon Albert said:

We regret the need for a lawsuit, but all of our efforts to obtain EPA cooperation have failed. Mr. Levinson and I have been personally negotiating with EPA officials for some time. Although we have made numerous concessions, EPA remains adamant in insisting upon a harsh consent decree against the City.

Water Commissioner Carmen F. Guarino said that—

The hindrances to progress lie on the desks of EPA officials. All that the Water Department is asking is a chance to do its job, free of unnecessary restrictions. After all, our citizens do pay for the Federal aid that Congress has provided, and Philadelphia is entitled to this aid.●

UNITED NATIONS PEACEKEEPING FORCES IN LEBANON

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. HAMILTON. Mr. Speaker, I would like to bring to my colleagues attention information regarding the creation of the United Nations forces in Lebanon (UNIFIL) which will hopefully be able to start entering Lebanon over the next day or two as the Israelis start to withdraw and be able to keep Israeli-Lebanese border zone free of military activity.

Attached are copies of U.N. Resolution 425 of the Security Council adopted on March 19, 1978, a statement by Secretary General Waldheim of March 19, 1978 and U.N. Resolution 426 approving the Secretary General's report to the Security Council on the implementation of U.N. Resolution 425.

I think that my colleagues will agree that the language of UNIFIL's mandate is stronger than in some previous peacekeeping cases. Paragraph 6 of the Secretary General's report says that the forces:

Will supervise the cessation of hostilities, ensure the peaceful character of the area of operation, control movement and take all measures deemed necessary to assure the effective restoration of Lebanese sovereignty.

It is hoped that the United Nations forces will be able to reestablish calm in Southern Lebanon, the Palestinians will accept the United Nations presence, the Israelis will withdraw from Lebanon and Lebanon will be able to use this situation to reassert its authority in Southern Lebanon thereby using recent tragedies as a catalyst for reunifying the country.

This peacekeeping force has been established for a period of 6 months and its mandate can continue thereafter should the Security Council so decide. It is estimated that the costs of putting this force into Lebanon will be $68 million, some $29 mililon of which are start-up costs. The United States' share may be close to 30 percent of the total.

The United Nations documents relating to UNIFIL follow:

RESOLUTION No. 425

(Adopted by the Security Council at its Meeting on March 19, 1978)

The Security Council:

Taking note of the letters of the Permanent Representative of Lebanon (S/12600 and S/12606) and the Permanent Representative of Israel (S/12607).

Having heard the statements of the Permanent Representatives of Lebanon and Israel,

Gravely concerned at the deterioration of the situation in the Middle East, and its consequences to the maintenance of international peace,

Convinced that the present situation impedes the achievement of a just peace in the Middle East,

1. Calls for strict respect for the territorial integrity, sovereignty and political independence of Lebanon within its internationally-recognized boundaries;

2. Calls upon Israel immediately to cease its military action against Lebanese territorial integrity and withdraw forthwith its forces from all Lebanese territory;

3. Decides in the light of the request of the Government of Lebanon, to establish immediately under its authority a United Nations interim force for southern Lebanon for the purpose of confirming the withdrawal of Israeli forces, restoring international peace and security and assisting the Government of Lebanon in ensuring the return of its effective authority in the area, the force to be composed of personnel drawn from states members of the United Nations;

4. Requests the Secretary-General to report to the Council within twenty-four hours on the implementation of this resolution.

STATEMENT BY THE SECRETARY-GENERAL, MARCH 19, 1978

DEAR MR. PRESIDENT: Now that the Council has approved my report on the implementation of Security Council resolution 425 (1978), I shall proceed to put into effect the plan of operation outlined in paragraph 9 of that document. I shall instruct Lt. General Siilasvuo, Chief Co-ordinator of United Nations Peace-keeping Missions in the Middle East, immediately to initiate meetings on the withdrawal of Israeli forces and the establishment of a United Nations area of operation.

As I have informed the Council this morning following its adoption of Resolution 425 on Southern Lebanon, I have instructed Major-General Erskine, the Chief of Staff of UNTSO, to deploy UNTSO observers with a view to confirming the cessation of military action in the area.

In order to provide for an immediate presence of the new Force in the area, I have instructed Lt. General Siilasvuo to coordinate with the Commanders of UNDOF and UNEF the temporary transfer of reinforced companies from the Austrian Contingent in UNDOF and the Swedish Contingent in UNEF to serve, temporarily, as the advance guard of UNIFIL. I have contacted the Governments concerned with a view to having their agreement to the proposed temporary transfer.

I have today made initial contacts with a number of Governments with a view to ascertaining their willingness to provide contingents for the new Force. I hope to be able to consult with the Council on this matter in the very near future.

As we are about to engage in this new operation, I feel obliged to point out to the Security Council the extreme complexity and difficulty of the task confronting the United Nations Force in Southern Lebanon. It will have to ensure the peaceful character of the area of operations and to that end control movement into and out of the zone. It will have to co-operate with the Lebanese authorities, including the army and police, in the process of restoring Lebanese sovereignty.

A number of basic prerequisites have not yet been clarified. These include the modalities of the withdrawal of Israeli forces from Southern Lebanon. I shall do my best to clarify these and other matters both here at Headquarters and through the contacts which I have instructed General Siilasvuo to initiate in the area.

The nature of United Nations Peacekeeping operations, as ordered by the Security Council, requires the full co-operation of all those concerned for their effectiveness. I take this opportunity to appeal once again for such co-operation. These operations also require the full and constant support of the Council itself. This will certainly be particularly true of the operation on which we have just embarked. I shall, of course, keep the Council fully informed of developments relating to the Force and shall not hesitate to seek its support whenever necessary.

RESOLUTION 426 (1978)

(Adopted by the Security Council at its 2075th meeting on 19 March 1978)

The Security Council:

1. Approves the report of the Secretary-General on the implementation of Security Council resolution 425 (1978) contained in document S/12611 dated 19 March 1978;

2. Decides that the Force shall be established in accordance with the above-mentioned report for an initial period of six months, and that it shall continue in operation thereafter, if required, provided the Security Council so decides.

REPORT OF THE SECRETARY-GENERAL ON THE IMPLEMENTATION OF SECURITY COUNCIL RESOLUTION 425 (1978)

1. The present report is submitted in pursuance of Security Council resolution 425 (1978) of 19 March 1978 in which the Council, among other things, decided to set up a United Nations Force in Lebanon under its authority and requested the Secretary-General to submit a report to it on the implementation of the resolution.

TERMS OF REFERENCE

2. The terms of reference of the United

Nations Interim Force in Lebanon (UNIFIL) are:

(a) The Force will determine compliance with paragraph 2 of Security Council resolution 425 (1978).

(b) The Force will confirm the withdrawal of Israeli forces, restore international peace and security and assist the Government of Lebanon in ensuring the return of its effective authority in the area.

(c) The Force will establish and maintain itself in an area of operation to be defined in the light of paragraph 2(b) above.

(d) The Force will use its best efforts to prevent the recurrence of fighting and to ensure that its area of operation is not utilized for hostile activities of any kind.

(e) In the fulfillment of this task, the Force will have the cooperation of the Military Observers of UNTSO, who will continue to function on the Armistice Demarcation Line after the termination of the mandate of UNIFIL.

GENERAL CONSIDERATIONS

3. Three essential conditions must be met for the Force to be effective. Firstly, it must have at all times the full confidence and backing of the Security Council. Secondly, it must operate with the full cooperation of all the parties concerned. Thirdly, it must be able to function as an integrated and efficient military unit.

4. Although the general context of UNIFIL is not comparable with that of UNEF and UNDOF, the guidelines for these operations, having proved satisfactory, are deemed suitable for practical application to the new Force. These guidelines are, mutatis mutandis, as follows:

(a) The Force will be under the command of the United Nations, vested in the Secretary-General, under the authority of the Security Council. The command in the field will be exercised by a Force Commander appointed by the Secretary-General with the consent of the Security Council. The Commander will be responsible to the Secretary-General. The Secretary-General shall keep the Security Council fully informed of developments relating to the functioning of the Force. All matters which may affect the nature or the continued effective functioning of the Force will be referred to the Council for its decision.

(b) The Force must enjoy the freedom of movement and communication and other facilities that are necessary for the performance of its tasks. The Force and its personnel should be granted all relevant privileges and immunities provided for by the Convention on the Privileges and Immunities of the United Nations.

(c) The Force will be composed of a number of contingents to be provided by selected countries, upon the request of the Secretary-General. The contingents will be selected in consultation with the Security Council and with the parties concerned, bearing in mind the accepted principle of equitable geographic representation.

(d) The Force will be provided with weapons of a defensive character. It shall not use force except in self-defense. Self-defense would include resistance to attempts by forceful means to prevent it from discharging its duties under the mandate of the Security Council. The Force will proceed on the assumption that the parties to the conflict will take all the necessary steps for compliance with the decisions of the Security Council.

(e) In performing its functions, the Force will act with complete impartiality.

(f) The supporting personnel of the Force will be provided as a rule by the Secretary-General from among existing United Nations staff. Those personnel will, of course, follow the rules and regulations of the United Nations Secretariat.

5. UNIFIL, like any other United Nations Peace-keeping Operation, cannot and must not take on responsibilities which fall under the Government of the country in which it is operating. These responsibilities must be exercised by the competent Lebanese authorities. It is assumed that the Lebanese Government will take the necessary measures to cooperate with UNIFIL in this regard. It should be recalled that UNIFIL will have to operate in an area which is quite densely inhabited.

6. I envisage the responsibility of UNIFIL as a two-stage operation. In the first stage the Force will confirm the withdrawal of Israeli forces from Lebanese territory to the international border. Once this is achieved, it will establish and maintain an area of operation as defined. In this connection it will supervise the cessation of hostilities, ensure the peaceful character of the area of operation, control movement and take all measures deemed necessary to assure the effective restoration of Lebanese sovereignty.

7. The Force is being established on the assumption that it represents an interim measure until the Government of Lebanon assumes its full responsibilities in southern Lebanon. The termination of the mandate of UNIFIL by the Security Council will not affect the continued functioning of ILMAC as set out in the appropriate Security Council decision (S/10611).

8. With the view to facilitating the task of UNIFIL, particularly as it concerns procedures for the expeditious withdrawal of Israeli forces and related matters, it may be necessary to work out arrangements with Israel and Lebanon as a preliminary measure for the implementation of the Security Council resolution. It is assumed that both parties will give their full cooperation to UNIFIL in this regard.

PROPOSED PLAN OF ACTION

9. If the Security Council is in agreement with the principles and conditions outlined above, I intend to take the following steps:

(a) I shall instruct Lt. General Ensio Siilasvuo, Chief Co-ordinator of United Nations Peace-keeping Missions in the Middle East, to contact immediately the Governments of Israel and Lebanon and initiate meetings with their representatives for the purpose of reaching agreement on the modalities of the withdrawal of Israeli forces and the establishment of a United Nations area of operation. This should not delay in any way the establishment of the Force.

(b) Pending the appointment of a Force Commander, I propose to appoint Major-General E. A. Erskine, the Chief of Staff of UNTSO, as Interim Commander. Pending the arrival of the first contingents of the Force he will perform his tasks with the assistance of a selected number of UNTSO military observers. At the same time urgent measures will be taken to secure and arrange for the early arrival in the area of contingents of the Force.

(c) In order that the Force may fulfill its responsibilities, it is considered, as a preliminary estimate, that it must have at least five battalions each of about 600 all ranks, in addition to the necessary logistics units. This means a total strength in the order of 4,000.

(d) Bearing in mind the principles set out in paragraph 4(c) above, I am making preliminary inquiries as to the availability of contingents from suitable countries.

(e) In view of the difficulty in obtaining logistics contingents and of the necessary for economy, it would be my intention to examine the possibility of building on the existing logistics arrangements. If this should not prove possible, it will be necessary to seek other suitable arrangements.

(f) It is proposed also that an appropriate number of observers of UNTSO be assigned to assist UNIFIL in the fulfilment of its task in the same way as for UNEF.

(g) It is suggested that the Force would initially be stationed in the area for a period of six months.

ESTIMATED COST AND METHOD OF FINANCING

10. At the present time there are many unknown factors. The best possible preliminary estimate based upon current experience and rates with respect to other peace-keeping forces of comparable size, is approximately $68 million for a Force of 4,000 all ranks, for a period of six months. This figure is made up of initial setting-up costs (excluding the cost of initial air-lift) of $29 million and ongoing costs for the six month period of $39 million.

11. The costs of the Force shall be considered as expenses of the Organization to be borne by the Members in accordance with Article 17, paragraph 2, of the Charter.

March 19, 1978.●

CHILD HEALTH ASSESSMENT ACT

HON. DOUGLAS WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. WALGREN. Mr. Speaker, I would like to bring to the attention of my colleagues a letter from Mr. Edward J. Forrest, dean of the University of Pittsburgh's School of Dental Medicine:

MARCH 7, 1978.

DEAR CONGRESSMAN WALGREN: For many years, the Schools of Dental Medicine and the American Dental Association have been working to get support for programs to improve the dental health of all citizens, primarily children. During the Johnson Administration, a bill to help children was passed but never implemented. We have had the Early Screening Program which authorizes treatments that have been diagnosed by physicians in their screening examinations. Now we have the HSA Proposals and a review of their plans indicate very little attention to dentistry.

At a time when the Administration is thinking about health care, how can it even be considered reducing the dental programs for recipients of Medicaid. Good health is dependent on good nutrition which is dependent on a healthy oral cavity and good dentition.

The objectives of the dental profession include the hope that everyone will retain their teeth throughout their life time. When one reviews current programs that receive prime consideration, it seems that oral pain can best be relieved by extracting teeth. If we are to eliminate the extraction and denture program, we must start strong preventive and treatment programs for children. I respectfully urge you to give your most careful consideration to H.R. 6706, the Child Health Assessment Act.

Sincerely,

EDWARD J. FORREST,
Dean, University of Pittsburgh, School of Dental Medicine.●

JOHN J. BOYLE'S WELL-DESERVED APPOINTMENT AS PUBLIC PRINTER

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. STEERS. Mr. Speaker, it is my great pleasure to acknowledge and honor a fine citizen and his distinguished ac-

complishments as a public official. Moreover, I am proud to number this man—John J. Boyle, the new Public Printer of the United States—among my constituents in the Eighth Congressional District of Maryland.

As a 25-year employee of the Government Printing Office, Mr. Boyle is the first Public Printer to have worked his way through the ranks. He joined the office in 1952 as a proofreader after several years in the private printing industry. During his rise as an administrator, he was responsible for the establishment of the electronic photocomposition division, which consolidated all of the photocomposition activities into a single organization and evolved into the largest and most modern phototypesetting facility in the printing industry. As Public Printer and chief administrator of the Government Printing Office, Mr. Boyle oversees the printing of all orders placed by Congress and by the executive branch of the Federal Government. He also supervises the furnishing of supplies, preparation of catalogs, and distribution and sale of Government publications. Mr. Boyle has lectured throughout the United States and in England on new processes in printing and is considered to be a leading authority on the use of computers in composition. In 1977, he received the Horace Hart Award of the Education Council of the Graphic Arts Industry in recognition of distinguished public service in the field of printing and publishing. Mr. Boyle, a World War II veteran, has resided with his family in Silver Spring, Md., for 25 years.

An organization such as the Government Printing Office needs a talented person to direct it, and therefore I applaud the appointment of Mr. John J. Boyle. Certainly he can look to continued success, and we can look optimistically to the future of the Government Printing Office.●

INFLATION AND FOOD PRICES

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. HARKIN. Mr. Speaker, on Saturday, March 18, 1978, the Washington Post carried an article entitled, "The Inflation Memo." It concerned a "leaked" memo given to President Carter with regard to policies on holding down the inflation rate. The editorial writer went on to point out some things which the editorialist thought should be done to hold inflation down. One was to suggest to the President that we should not increase support prices to farmers for taking some land out of production. The writer then said that doing so would lead to "steep increases in food prices ahead." I rather doubt that they will be steep, even though I do feel that in the past few years food prices have slipped way behind other items that the consumer purchases. But the argument that higher support prices will lead to this is nonsense when you look at past history.

Does anyone think that food prices were too high in the 1940's? Too high in the 1950's? Or too high in the 1960's? Yet, when we look back at those years, we find that support prices far exceed the present level of support prices. Let us take a look at corn. In 1936, the first year we had Government support prices, the support price of corn was 55 cents per bushel. But when you factor in for inflation and bring that up in terms of 1977 dollars, the support price was $2.78 per bushel. In 1948 the support price was $1.44 per bushel, but again when you factor in for inflation and use 1977 dollars, the support price was actually $3.83 per bushel. In 1962 corn support prices, based on 1977 dollars, was $2.40 per bushel. In 1968 it was $2.31 per bushel. And then during the Nixon years, support prices began a precipitous decline. The support level went from $2.20 in 1969 to a low of $1.53 per bushel in 1975. The present support price for corn is $2 per bushel.

The 42-year average from 1936 to the present, based on 1977 dollars, is $2.86 per bushel. So to say that the present support price of $2 for corn cannot be raised because it will lead to "steep increases in food prices" is just not true. It may lead to small increases, but I think this is justified given the present plight of the farmer. However, these small increases need not even happen if the consumers will put pressure on the middleman to control their costs and to compete a little more aggressively in the process and distribution of food products.

The editorial writer went on to say that the President could expand meat imports as a check on prices that have been going up "especially fast in recent months." Again, this simply flies in the face of the facts. The fact is that, based on 1977 dollars (that is figuring in for inflation), the present retail price of beef is the lowest it has been in 30 years. Again, in 1949 the "all-cuts" retail price was 67.8 cents per pound, but based on 1977 dollars that translates to $1.86 per pound. In 1959, using the same method of calculation, retail beef averaged $1.75 per pound. In 1969, the average was $1.59 per pound. And get this, in 1973 it was $1.84 per pound; 1974, $1.72 per pound; 1975, $1.65 per pound; 1976, $1.49 per pound; 1977, $1.41 per pound. In the first 2 months of 1978 this price was increased to $1.48 per pound, not even to the level that it was in 1976.

If anything, the President should begin to restrict the import of beef into this country, and I am hoping that this will be done this year or else we will have to do it legislatively. Consumers ought to know that imported beef does not have to meet the same kind of inspection standards that American beef does, and yet there is no way for the consumer to identify this beef while shopping in a store. Also, by reducing imports and encouraging more beef production in this country, we help our balance of payments problem and return some marginal lands that are now being cropped to a better use, that is, grazing cattle. This helps in terms of conservation and also in insuring a stable supply of beef for the American consumer.

In short, the Washington Post editorial is extremely shortsighted. It sees only the immediate effects of its stated policy, but does not take into account the longer term, more drastic results that would come up if the President followed the advice of this editorial.●

POSTAL RATEMAKING AMENDMENT

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mrs. SCHROEDER. Mr. Speaker, there appears to be much ado brewing over one of the amendments which I have proposed to section 2 of H.R. 7700, the postal reform bill. The amendment is:

One. Not a move to run charities from the mails.

Two. Not a move to drive rural publications out of business.

Three. Not a move to drive nonprofit periodicals from the scene.

Each of these types of mail is protected by the amendment, which limits direct charges to them to 60 percent of the share they should pay if they paid their own way.

For the benefit of my colleagues, a copy of the amendment and a discussion of it follows:

POSTAL RATEMAKING AMENDMENT

In the Hanley-Wilson substitute, strike the language from page 1, line 3 through page 5, line 3, and insert in lieu thereof the following:

RATES AND CLASSES

Sec. 2. (a) Section 3621 of title 39, United States Code, is amended by striking out its first sentence and inserting in lieu thereof the following:

"The Postal Rate Commission shall establish rates of postage and fees for postal services in accordance with this chapter."

(b) Paragraph (a) of section 3622 of title 39, United States Code, is amended to read as follows:

"(a) From time to time the Postal Service shall request the Postal Rate Commission to render a decision on changes in a rate or rates of postage or in a fee or fees for postal services if the Postal Service determines that such changes would be in the public interest and in accordance with the policies of this title."; and

(c) Subsection (b) of section 3622 of title 39, United States Code, is amended by striking the word "recommended", and subsection (b)(3) of this section is amended to read as follows:

"The requirement that each class of mail or type of mail service bear the direct and indirect postal costs attributable to that class or type (including the costs caused by variability with volume, and all of the costs caused by the collection, transportation, processing, storing, and delivery of each class of mail or type of mail service), plus that portion of all other postal costs reasonably assignable to such class or type."; and

(d) Section 3626(a)(1) of title 39, United States Code, is amended by inserting before the semicolon at the end thereof a comma and the following:

"except that for the purposes of this subsection, those direct costs which exceed 60 percent of total estimated costs shall be reasonably assigned to all classes of mail.".

On page 5, line 4, strike the designation "(d)" and insert in lieu thereof "(e)"; and

On page 27, strike line 21 and insert in lieu thereof "60 percent of the postal costs directly attributable to mail of such class or kind"; and

On page 6, line 1, strike the designation "(e)" and insert in lieu thereof "(f)".

DISCUSSION

This amendment strikes the ratemaking provisions from the Hanley substitute and replaces it with criteria which will be fair to *all* classes of mail.

The amendment (1) by amending 39 USC 3622(b)(3), imposes proper accountability on the Postal Service and the Postal Rate Commission, by requiring full and complete attribution of all the costs which may be incurred by a class of mail.

(2) Preserves two exceptions in the bill which will allow only 60% of the direct costs of any mailing of certain mail of non-profit and charitable types and only 60% of the direct costs of the first 250,000 copies of any issue of a periodical to be charged to a mailer.

The language of section 2 of the Hanley substitute makes major changes in the criteria on which postal ratemaking will be based. The worst of these changes is that a cap of 60% is placed upon the Postal Rate Commission's authority to attribute costs of a class of mail to the mail generating these costs. If these costs—called direct costs—cannot be charged off to the mail which is incurring them, then they must be charged off to all mail classes. And the largest class of mail—first class—then gets the lion's share to pay.

Section 2 of the bill, as now written, is a disaster to the first class mailer. Nobody has done a study of its effects upon first class mail rates, but my own educated guess is that this section alone will jack up rates for first class mail by 2¢ a stamp. This increase will have nothing to do with rising costs of mail handling. It will have nothing to do with inflation. It will come about as the result of a statutory juggling of the books at the Postal Service.

The following is an example of how section 2 would work: Let's suppose that the Postal Service sends a truck to Time Magazine once a week to pick up its latest issue for mail. Time Magazine would only have to pay for 60 percent of the costs of that truck. First class mail users would pick up most of 40 percent left. However, if a like truck were being sent to the Bank of America each week to pick up first class Bankamericard bills, 60 percent of the costs of that truck would be charged to first class. But, because this is first class mail, the other 40 percent left would also mostly be paid by first class. Is it not sensible to think that America may view Electronic Fund Transfer Systems as a godsend.

In other words, section 2 of the bill would put into statute form a concept which Marie Antoinette would have loved. Those who eat bread—all of us first class users—would be forced to subsidize those who eat cake.

While section 2 of the bill might, for the short run, assist the Postal Service in, for example keeping large second class mailers from trying other sources of delivery, it is good to remember the story of the goose who laid golden eggs. Jacking up first class rates will lead to new alternatives for first class mail users. Electronic Fund Transfer Systems are coming on line. A high priced first class stamp would make the long distance birthday or anniversary telephone call a reasonable alternative. In a few years, the Postal Service could be left with a physical plant geared to the delivery of letter mail but with a reduced workforce handling magazines, junk mail, and a few parcels; and the result would not be caused by inflationary charges to first class service but an artificially created warp in the laws of supply and demand.

The large business mailers who would benefit from section 2 of the bill do so at more than just the expense of first class mail—60 percent of which is business mail itself:

A record club, by reason of subsidized postal rates on its records, would be able to undercut its competition: the small business, local record outlet.

A book club by reason of subsidized postal rates on its books, would be able to undercut its competition: local book dealers.

A magazine, with subsidized postal rates on mail subscriptions, would be able to undercut newstands prices. A person who goes to a newstand, and mails a bill on the way would be subsidizing, through the stamp used on the bill, a delivery service for magazines from which he himself gains no benefit.●

TAKE MEDICARE OFF THE PAYROLL TAX

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. MATTOX. Mr. Speaker, I want to call to the attention of my colleagues an editorial which appeared in the Christain Science Monitor on Friday, March 17, entitled "Take Medicare Off the Payroll Tax."

Mr. Speaker, that is exactly what I am trying to do, with H.R. 11306—take hospital insurance our of the social security system, and reduce payroll taxes by 2 percent this year. As the article notes, social security is an issue which will be delt with by many Congresses in the future, but it is the duty and responsibility of this Congress to cut down the regressive payroll tax, before the mandated increases take their toll on our economy.

I urge my colleagues to reflect upon this excellent editorial, and then to cosponsor with me H.R. 11306, so that the Congress can be, truly, a body which represents the people of the United States. The working people want it, employers want it—I say let's get it done.

The article follows:

[From the Christian Science Monitor, Mar. 17, 1978]

TAKE MEDICARE OFF THE PAYROLL TAX

Here is one way to start alleviating the social security payroll tax bite that is making congressmen yelp even though they don't have to pay it:

Remove medicare from social security.

The idea is not original with us, but we hasten to endorse it as a rejoinder for President Carter to offer House Speaker O'Neill after what Mr. O'Neill said to Mr. Carter this week. The general thrust was that if the White House did not get moving on cutting payroll taxes the Congress would. All this just three months after Congress passed the tax hike and the President signed it.

We have arrived at the medicare option as at least a start toward both lowering the payroll tax increase and meeting the no longer new objection of economist Milton Friedman that the payroll tax is "almost surely far and away the most regressive element in our tax system and a significant disincentive to work." He also pointed out that, for various reasons, high-income workers receive higher benefits than low-income workers in relation to taxes paid. The former, he noted, usually pay taxes for a shorter time because they start to work at a later age. And they receive more benefits because they tend to live longer.

Eventually Congress will have to come to grips with far-ranging revision of social security to meet the changing population and economic patterns of the future. But a beginning toward greater equity could be made by separating from the payroll tax those benefits which are not related to earnings. Medicare is not tied to earnings, but their financing is tied to payroll taxes. (The medical part of medicare, for which retirees pay monthly premiums, is separate from payroll taxes.)

The medicare hospital expenditures are projected to increase along with the escalation of hospital costs, exceeding medicare payroll tax income by greater and greater margins into the 1990s. The numbers are forbidding, but they are worth sampling to confirm that getting medicare off the payroll tax would become increasingly worth the effort.

By last year medicare already accounted for 15 percent of social security expenditures. It would reach twice that percentage, about 30 percent, by 1995, according to Social Security Administration projections. The dollar magnitude can be suggested by the 1977 total expenditure figure of $103,888,000,000, representing 12.88 percent of the payroll on which employee, employer, and self-employed social security taxes are paid. The medicare share was $16,166,000,000, or 1.99 percent of the taxable payroll. By 1995 these percentages are projected to rise to 15.27 percent (total) and 4.52 percent (medicare), indicating more than a doubling of the medicare percentage.

So there would be a growing saving to social security if medicare were financed in another way. The obvious alternative is the income tax, which is more progressive than the payroll tax. It is also a more appropriate source for benefits to the elderly that are not geared to their preretirement earnings. It is something for Speaker O'Neill to consider if he doesn't hear from President Carter.●

THE ROCHE BROTHERS—A SMALL BUSINESS SUCCESS STORY

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. MOAKLEY. Mr. Speaker, I would like to bring to your attention, and the attention of my colleagues, the accomplishments of two brothers from Roslindale, Mass., who together have exemplified what the ideal of the small American businessman should be.

Pat and Dan Roche share their roots in Boston's Roslindale and West Roxbury neighborhoods. The first generation sons of Pat and Ellen Roche, Pat and Dan put themselves through Boston high schools by working in a variety of retail grocery establishments, where they picked up both the essentials of managing and administrating grocery stores, and the even more essential requirement of knowing how to deal with people. Their experience was varied, from sweeping the floors, to working the cash register, to cutting meat. Their experience in neighborhood stores gave them the impression that in some instances the customer was being treated rather

unfairly. They felt an overwhelming desire to make sure that the customer was treated honestly, courteously, and promptly.

In 1952, Pat and Dan Roche noticed a "for rent" sign on the door of a small store in Roslindale. Deciding to open a meat market, the Roche brothers were unable to attract any capital backing from commercial banks, so were forced to borrow $3,500 from their parents to get their venture off the ground. The sun shone brightly on their establishment from their first week of operation. Grossing over $2,300 that first week the Roche Brothers Market doubled their weekly volume within the first year of operation. It was soon obvious that they needed more room. A loan from a Boston bank enabled them to knock down a wall and expand into the neighboring store.

Performing virtually every function necessary in running a retail establishment the likes of Roche Bros., from making the deliveries to plumbing repairs, soon necessitated the hiring of additional staff. Al DeFranco, hired in 1953, played a major role in the development of Roche Bros. Running the store from an administrative angle, Al, together with Pat and Dan, saw a need for becoming involved in community groups and local merchant associations. This involvement, together with the already well-developed rapport existing between the Roche Bros., and their West Roxbury-Roslindale neighbors, became the key element in their early success.

Roche Bros. opened a second 2,000-square-foot store in Needham in 1959; and a third, 15.000-square-foot store in Needham in 1965. Once again, service and personality seemed to be the key in their success with an opening week volume of almost $63,000. By 1966, Pat and Dan bought out the Elm Farm store in West Roxbury, feeling that the Roche Bros. name had been well established in Roslindale and Needham.

After the store opening in West Roxbury, a need arose to develop some type of upper management to handle problems that kept arising in the different stores. While Dan supervised groceries, Pat was in charge of meats. Eddie Kilduff, a former wholesaler who grew with the company, and became a part of the "family," handled the produce problems. Al DeFranco was placed in a capacity to ease the supervisory burden on the two Roche brothers that arose due to expansion. The addition of management personnel more or less followed the growth of sales. A meat supervisor/buyer and a grocery supervisor/buyer positions developed as the need for them arose.

These positions were filled with individuals who could handle people and problems that surfaced, making a decision if necessary, rather than just directing the problem to Pat or Dan. Dan Roche could perceive traits in certain individuals, whether it be an ability to deal with subordinates, a rapport with customers, or a knowledge of food retailing, and he cast these individuals in jobs that would best utilize these skills.

In 1970, Roche Brothers opened a store in nearby Westwood, financed through South Shore Bank. With the company's outstanding record, financing was no real major problem and good banking relations have developed over the years. Later in 1974, the largest store in Natick opened.

Store personality is still vital to Roche Brothers. Dan feels that the friendship and sincerity displayed by Roche Brothers personnel are keys to that personality. He also feels that Roche Brothers' success is due to store "attitude," and the level of communication between upper level management and the employees.

Roche Brothers currently has four stores; one each in Needham, West Roxbury, Westwood, and Natick. The success of the organization cannot be doubted. To a large measure, a good deal of the success is due precisely to the emphasis that Pat and Dan Roche and their staff through the years have placed on developing exemplary customer relations. In this day of giant conglomerates and multinational corporations, of consumer activism and consumer boycotts, it is refreshing to see a case which so merits our attention.

Pat and Dan Roche deserve to be honored for more than a quarter century of service to their local charities, their churches, and most importantly, their neighbors.●

PUBLIC SUPPORT FOR THE FEDERAL BUREAU OF INVESTIGATION

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. RUDD. Mr. Speaker, it is highly encouraging to see the genuine outpouring of public support for the Federal Bureau of Investigation and its special agents, who are being persecuted and maligned by the current administration because of their past intelligence-gathering efforts to stop domestic criminal terrorist groups.

A column by William F. Buckley in the Tucson Daily Citizen reports that the response was electric to formation of the Citizens' Legal Defense Fund for the FBI, whose initial resolution was to raise funds to give a proper defense to John J. Kearney, the former FBI special agent who was indicted on orders of Attorney General Griffin Bell for his surveillance of the terrorist Weather Underground.

The Citizen reminds us in an accompanying editorial that—

The Weather Underground, for those who may have forgotten, was a radical organization that originated as a dissident faction of the Students for a Democratic Society and which, in the early 1970s, was taking credit for numerous bombings in this country.

While the Justice Department's harassment and persecution of FBI special agents such as John Kearney have severly damaged the FBI and our entire national effort against organized crime and terrorism, the Citizen editorial optimistically notes that the indictment against Kearney appears to have created a turning point in the sordid persecution of intelligence agencies responsible for safeguarding American security.

For the sake of our people and the safety of our country, I certainly hope so. The public support for the FBI and the defense of its persecuted agents seems to reflect the people's attitude that our criminal justice system needs to do much more to fight and protect our society from the threat of dangerous crime.

The national public opinion research firm of Yankelovich, Skelly, and White has just completed a survey of public attitudes concerning our criminal justice system, and particularly the record of the courts. The results of that survey were reported yesterday in the Washington Post.

The Post story stated that—

The study found that community leaders and the general public thought the courts failed to take an active enough role in fighting crime—a position long held by police and prosecutors.

It is no wonder that this is so. A major reason for the failure of courts to take an active role in the fight against crime is that the Attorney General and the Department of Justice under his administration are tying the courts up in questionable litigation and persecution against selected victims, particularly in its attacks against the FBI and law enforcement officials whose job it is to stop crime.

Mr. Speaker, I hope that the Kearney case is a turning point in this sorry situation, and that the Department of Justice will soon get back to the business of supporting and leading our intelligence agencies and the courts in the needed fight against crime.

Furthermore, I hope that the Attorney General will one day see fit to respond to the concerns of Members of Congress, such as myself, who have asked him to explain and justify the Justice Department's apparent change of policy, which before he took office was to do everything possible in the intelligence-gathering area to locate, apprehend, and prosecute individuals and groups responsible for crime and subversion.

I would like to include at this point in the RECORD the recent editorial and Buckley column from the Tucson Daily Citizen:

[From the Tucson Daily Citizen, Feb. 28, 1978]

A TURNING POINT?

The Weather Underground, for those who may have forgotten, was a radical organization that originated as a dissident faction of the Students for a Democratic Society and which, in the early 1970s, was taking credit for numerous bombings in this country.

Without doubt, the Weathermen constituted a dangerous element in American society. It was for this reason that they came under constant surveillance by the Federal Bureau of Investigation. Sad to say, it was also for this reason that a federal grand jury in New York City saw fit, last April, to indict the former supervisor of the FBI's New York office, John J. Kearney, on charges that agents working for him illegally opened mail and tapped phones in search of fugitive members of the Weather Underground.

These charges, along with the other near-senseless attacks in which this country has indulged against the FBI, severely damaged that agency—just as they severely damaged the Central Intelligence Agency. Fortunately, the indictment against Kearney appears to have created a turning point in the sordid persecution of the two agencies that are responsible for safeguarding American security.

The story about what has followed in the wake of the Kearney indictment is contained in a column by William F. Buckley, appearing on this page today. The column should give heart to those who have been sensitive to the regrettable trials of the FBI.

WHAT OBJECT IN HARASSING FBI?

(By William F. Buckley)

When last April the Department of Justice brought in an indictment against former FBI agent John Kearney, for using allegedly illegal tactics in attempting during the early 1970s to penetrate and frustrate the terrorist Weathermen, a few observers became convinced that we had entered the lunatic phase of our campaign to purify ourselves, and a committee was born. It is called the Citizens' Legal Defense Fund for FBI, its address is Suite 808, 95 Madison Ave., New York, and co-chairmen are Clare Boothe Luce, former Secretary of the Treasury William Simon, and former Sen. James L. Buckley.

The initial resolution of the committee was to raise funds to give John Kearney a proper defense, and the result was electric. Contributions came in even from the ranks of the best-known recent purifiers. Leon Jaworski, for instance, the point-man in the Watergate prosecutions. Enough money to hire Edward Bennett Williams, who had expressed sympathy for the victimization of Kearney. So the defense is ready, when the attorney general strikes.

But the committee did not then go out of business. It is inundated with requests for help from other former agents of the FBI who are being harassed by civil suits. And two weeks ago, William Simon sent out an appeal for funds enclosing a document which is a chiller and which everyone concerned with the mad demobilization of our internal security apparatus should read.

It is a very long letter, from an FBI agent whose identity is protected. It tells us things we ought to know about domestic security, things that harmonize with the worrisome analysis recently given nationally by Time and Newsweek to the related problem of the CIA, and external security.

William Simon reminds us that the New York Times star foreign correspondent C.L. Sulzberger wrote, "It is believed Moscow has found a way to paralyze the U.S. by striking at its principal security services. As a consequence of such operations (attributed in part to the KGB's Department of Disinformation) the effectiveness of the CIA and FBI is held to be extremely anemic by apparently internal U.S. political arguments."

Listen now to a paragraph from the lead story in Time magazine on CIA Director Stansfield Turner:

"A Soviet KGB agent told a Time correspondent in Cairo last week: 'Of all the operations that the Soviet Union and the U.S. have conducted against each other, none has benefited the KGB as much as the campaign in the U.S. to discredit the CIA. In our wildest scenarios, we could never have anticipated such a plus for our side. It's the kind of gift all espionage men dream about. Today our boys have it a lot easier, and we didn't have to lift a finger. You did all our work for us.' "

The FBI agent who wrote to the Citizens' Legal Defense Fund makes it plain that in any comprehensive analysis, there is little difference between the CIA and the FBI. The same forces are aligned against them.

At least dramatically, the success of the see-no-evil hear-no-evil people has been astonishing. The agent writes, "A reduction in FBI investigation of domestic subversion has resulted from the imposition of . . . guidelines and recent policy changes. FBI Director Clarence Kelley revealed in September 1976 that its internal security investigations had then dropped from 21,414 in mid 1973, to only 626 (78 organizations and 548 individuals)—an amazing 97 per cent cut."

It is a symbol of our time that the Civil Service Commission, the agent reports, dropped the formerly conventional question put to applicants for federal employment: "Are you, or have you ever been, a member of the Communist Party?" Presumably we are not supposed to care. If it can be said that innocent-minded fellow travelers were once victims of thoughtless government pressure, the contemporary victims today, the Citizens' Legal Defense Fund points out, are men and women who have worked in our security forces.●

NAACP ENERGY POLICY STATEMENT—A TRAVESTY FOR BLACKS

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. OTTINGER. Mr. Speaker, the recent NAACP energy policy statement which looked favorably on deregulation of the prices of oil and gas and expansion of nuclear power, allegedly to save jobs, was a tragic error. Nothing could be worse for the poor of our land among whom are unfortunately found a disproportionate percentage of our black population.

The entire premise of the NAACP statement is wrong and misguided. The capital-intensive, high technology solutions espoused will create less jobs than the Carter policy stressing conservation and solar alternatives, and the jobs that are created in nuclear technologies are likely to be highly skilled construction and engineering positions available to few blacks, as compared to the soft path solutions.

Also, the huge consumer costs of deregulation and high-technology options will be borne disproportionately by the poor. They have no margin except through diets with which to absorb the higher costs of fuel, electricity, food, et cetera.

Lastly the high technology route is so capital demanding that it will deplete the poor of capital that would otherwise have been available for urban redevelopment programs, neighborhood health centers, and other facilities of direct benefit to them.

The case against the NAACP statement is very articulately expounded by David Brower and Steve Lyons in this month's issue of Not Man Apart, which I submit for the benefit of my colleagues:

A MISSTEP ON A HARD PATH

(By David Brower and Steve Lyons)

The NAACP's recent announcement of its opposition to the National Energy Plan proposed by President Carter has delighted NAACP's traditional adversaries and saddened its friends. The glee engendered by the news of this surprising alliance with "big oil" should be ample warning of the hazards of the position.

Amory Lovins has been warning of those hazards too, and describing the energy policy that can lead us to a durable peace. But the authors of the NAACP report apparently haven't read Lovins yet—or if they have, they're refusing to listen. Several passages indicate they've closed eyes and ears to the energy crisis as well:

"We find it very disturbing to contemplate a future in which energy supply would become a constraint on our ability to solve these critically important social and economic problems. . . . We cannot accept the notion that our people are best served by a policy based on the inevitability of energy shortage. . . ." The clear implication is that the energy shortage is a myth—or at best a self-imposed hardship we'd be healthier without. But the truth, disturbing as it is to contemplate, is that the shortage is very real—the inevitable consequence of prodigal living on a finite planet. Wanting it not to be so will not change matters.

The NAACP's endorsement of nuclear power sadly and needlessly extends the life of "the once bright hope." The environmental hazards of the technology (properly acknowledged by the NAACP report) have been debated intensely for the past decade, but all the discussion has not brought us one step closer to solving the safety problems. As long as they remain unsolved, it is irresponsible to go on splitting atoms, with only a blind faith in technical progress to assuage our fears.

The telling arguments against nuclear power, however, are not only environmental but also economic. The cost of electricity from nuclear power is higher than that from any other conventional source and rising fast, spurred by escalating uranium prices (up sixfold in eight years), design changes required to lessen danger, licensing delays, and the increased capital costs that result from them. Nuclear power is also the least labor-intensive and most capital-absorptive of available energy technologies. Exxon Nuclear estimates that half a trillion dollars would be needed to build five hundred nuclear power plants by the end of the century. That's one billion dollars per plant and a total equivalent to President Carter's entire budget for government spending in 1979! A nuclear program on the Exxon scale would require three fourths of the nation's newly formed capital, cutting by two-thirds the capital that could be establishing work places in other sectors of the economy—housing, transportation, public health, education, new small businesses. The nuclear preemption of capital would provide a few jobs in a heavily automated nuclear industry and produce a net energy loss as long as the proposed nuclear growth rate continued. Clearly, nuclear power would not be the answer even if continuing to pursue it did not lead inevitably to nuclear proliferation.

Nor is faster consumption of domestic oil reserves the answer. Oil is a precious resource that is best saved for the petrochemical functions only it can serve. If we must waste it, it would be chauvinistically wiser to import foreign oil now and sit on our own reserves until they bring a price closer to their true value. The least sensible course is to pursue the old Nixon-Ford energy policy of "strength through exhaustion," which the NAACP report now would resuscitate. In the long run, strength can come only from efforts to reduce demand, rather than to increase supply. Energy conservation is an essential part of a sustainable economy. One dollar spent that way can make as much energy available as ten dollars spent on nuclear generating facilities.

In 1974 the Ford Foundation reported that the poor are not only harder hit by high energy prices than their wealthier neighbors (direct energy use is a larger fraction of their living expenses), but less able to compensate (the energy used is more essential to

their livelihood, and their homes lack such energy-saving devices as storm windows and insulation). It stands to reason that the poor (of which minority groups form too large a part) will benefit most from energy conservation measures. Installation of energy-saving equipment in their homes will reduce the large fraction of their incomes that now goes to energy, help them adjust to the energy price rises that are sure to come, and avoid the hidden costs, at the supermarket and elsewhere, that stem from wasting energy.

Using less energy does not commit us to sitting in the dark or to massive unemployment. That the NAACP fears these consequences of a conservation program attests to the power of this decade's most pernicious fallacy: that energy use is alleged to have added to the GNP or the "standard of living," it has brought with it the highest unemployment of black youths in our history. We are forced to infer that the doubling and the inequity are related.

Energy consumption does not guarantee employment. Quite the reverse: The primary function of energy in the American economy is to power machines, whose purpose is to replace labor, not to provide it. Between 1959 and 1969, jobs in the steel industry dropped from 450,000 to 100,000, but production rose 45 percent. This feat was possible because men were put out of work by machines, which ran on cheap oil, demanded no benefits, staged no strikes. The historical correlation between increasing employment and increasing energy use is no more indication of a causal connection than is the correlation between energy consumption and mental illness. In fact, the increase of industrial energy use this century, because it made automation possible, would have resulted in widespread unemployment had the economy not grown faster than the population and deflected the labor force into the provision of services. As Herman Daly has noted, "What is responsible for increasing total employment is the increase in total goods and services, not the increase in inanimate power production, which by itself must decrease employment."

Given the importance of energy conservation, there is still the question of how best to achieve it. Past efforts to encourage voluntary conservation have not worked well. The alternative is the one President Carter has proposed: deregulation and taxation. The NAACP very properly questions the advisability of adding to financial troubles of black Americans. And skepticism about the efficiency of the proposed rebates is understandable. But the alternatives the NAACP suggests—letting the oil companies keep the profits in the hope they'll invest in exploration for new supplies, which will in turn provide more jobs—is sure to be harder on the have-nots. If anything is clear from the history of the black struggle for parity, it's that windfalls don't trickle, down or up. In all sectors of the economy profits are taken off at the top, and little is left to ooze. That the profits in this case would go to the heavily automated and capital-intensive energy industry makes it all the more doubtful that appreciable benefit from the taxes would ever accrue to black Americans.

The NAACP report laments the absence of a black perspective in the formation of national energy policy. But what would such a perspective add? Black Americans want what all Americans want, only more so because they have had so much less for so long. Among the universal needs are financial stability, satisfying work, opportunities for healthful recreation, and a pleasant home. Too many Americans, black, white and otherwise, do without these essentials. Energy policy alone cannot change that, but these ends are more likely to be realized if our national energy policy emphasizes thrift and reliance on renewable sources of energy, rather than continued dependence on foreign oil reserves that are dwindling and a nuclear technology that is both expensive and dangerous.

If environmentalists feel upset on reading the NAACP report, they can also feel remorse. For various reasons, none of them good, essential black participation has been missing from the environmental movement. It's time that changed. Our movements and the people they represent have too much in common to go on working at cross purposes. We hope for exchanges that will bring lasting cooperation. We offer it, and welcome it.●

SUGAR DADDY TO THE NAVY

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

column in the Wall Street Journal, the Members of the House are going to have to face up to some very difficult choices this year on the Navy's shipbuilding program, not the least of which is whether to build another *Nimitz*-size nuclear carrier at a cost of over $2 billion. Such ships are too costly and tend to soak up money that could otherwise be used to increase the size and readiness of our fleet. There is also serious question as to whether the *Nimitz* can perform successfully the power projection mission in areas of the highest threat that it was designed to do.

As Ken Bacon points out in a March 14 column in the Wall Street Journal, the Seapower Subcommittee and the House Armed Services Committee have been a "sugar daddy" to the Navy, continually advocating gold-plated, nuclear-powered, highly capable ships in a world of limited dollars and increasing vulnerability. We cannot continue on that course. I commend Mr. Bacon's article to my colleagues.

[From the Wall Street Journal, Mar. 14, 1978]

SUGAR DADDY TO THE NAVY

(By Kenneth H. Bacon)

WASHINGTON.—As most congressional hearings go, a recent meeting of the House seapower subcommittee got off to an unusual start: An audience of shipbuilding company officials stood when Rep. Charles Bennett entered the room and greeted him with a crisp, "Mr. Chairman."

The deference to the subcommittee's chairman is understandable. Year after year, criticism abounds about chaos and runaway costs in the Navy's shipbuilding program. Yet year after year, the seapower subcommittee and its parent, the House Armed Services Committee, advocate fat Navy shipbuilding programs.

Because of the subcommittee's traditional power over Navy matters, its budget proposal sets the tone of the Navy-shipbuilding debate in Congress. The appropriations committees and the Senate Armed Services panel end up devoting their energies to trimming the seapower subcommittee's proposal rather than modifying the normally less-generous Pentagon plan.

This year the subcommittee again is acting as sugar daddy to the Navy and its shipbuilders. The panel recently recommended a 68 percent increase in the Carter administration's shipbuilding request for the fiscal year that starts Oct. 1. It added a $2.13 billion nuclear-powered aircraft carrier and a $1.07 billion nuclear cruiser to the administration's plan to purchase 15 ships for $4.71 billion. The full armed services committee was only slightly less generous, scaling back recommended funding to a 50 percent increase over the administration's request.

THE NAVY'S GOAL

The House crew wants to bolster the Navy's fleet, which has declined to 459 ships from 976 just a decade ago. As large blocks of World War II ships have been retired, the Navy hasn't been able to build enough ships to meet its fleet goal of about 600.

But a prime reason for the shrinking fleet is that the House subcommittee, with the Navy's backing, favors expensive nuclear ships and submarines that soak up so much money that little is left for anything else. The $2.13 billion needed to build a 1,092-foot-long, 95,000 ton nuclear carrier is only the beginning. It costs at least $3 billion more to buy the 90 planes and associated equipment the ship carries. Nuclear-powered Trident submarines cost about $1.1 billion each, and that doesn't include the 24 intercontinental ballistic missiles each will carry; the Navy wants at least 14 of these giant subs. Nuclear attack submarines cost about $433 million each.

"When you add it all up we're getting about 12 combat ships and submarines a year," one admiral says. "Its' a pretty rich mix, but it's not enough. So we're being driven toward smallness," he adds. Moreover, the shrinkage comes at a time when the Soviet Union is strengthening its fleet and when the U.S. is more dependent than ever on shipments of foreign oil.

Another serious problem is the Navy's shipbuilding program. Ship construction projects are cumulatively about 100 years behind schedule and billions of dollars over initial cost estimates, partly because of the complexities involved in building nuclear ships. Relations between the Navy and its shipbuilders are so sour that the government has had to get court orders to compel some yards to complete ships. The three major U.S. shipbuilders—General Dynamics Corp., Litton Industries Inc. and the Newport News Shipbuilding & Dry Dock Co., a unit of Tenneco Inc.—have filed contract claims totaling $2.7 billion against the Navy.

Yesterday General Dynamics said it plans to stop work on 16 nuclear attack submarines, charging that the Navy has "materially breached" its contracts and failed to agree to an adequate settlement of $544 million in claims the company has filed on the program. The Navy said it will go to court if necessary to force General Dynamics to continue building the subs.

Management of the Navy's shipbuilding programs is so fouled up that "the more ships that are added to the program, the more the problem is exacerbated," according to Deputy Defense Secretary Charles Duncan.

By any concept of congressional oversight, the House Armed Services Committee and its seapower subcommittee ought to be making admirals shake in their stripes until the Navy resolves these problems. But the panels' message is quite different.

"I think it's fantastic you've done as well as you have," Rep. Bennett told Vice Admiral C. R. Bryan, commander of the naval sea systems command, at a recent hearing of the seapower subcommittee. "I think there's something wrong with the way it's being represented to the public [by the press], and it's hurting us in getting ships," the Florida Democrat said of the Navy's problems.

And when a subcommittee member had the temerity to suggest that the panel remove $1.19 billion from next year's budget for a new Trident submarine because General Dynamics has fallen more than a year behind schedule on each of the seven nuclear subs already under contract, Mr. Bennett replied: "I'm inclined to give the Navy everything it asks for this year and just add something to it."

When top Navy brass presented their budget to the House Armed Services Committee last month, members barely mentioned the Navy's problems. "I would like to have more ships," Rep. James Lloyd, a California Democrat, told them. "I want more nuclear ships." (The committee did remove most of the funds for the new Trident submarine but recommended approval of $274 million to start work on the sub.)

Not all of the committee's members share that view. Rep. Patricia Schroeder, a Colorado Democrat on the panel, complains that "this committee's idea of what's horrible with the Navy is that it's not going to get a new nuclear aircraft carrier."

ADMIRAL RICKOVER'S VIEW

But the majority advocate more nuclear seapower. After listening to the venerable Adm. Hyman Rickover, director of the Navy's nuclear propulsion program extol the virtues of nuclear power at a recent hearing, Democratic Rep. Charles Wilson of California declared: "If the preponderance of evidence favors" nuclear carriers (and it always does in Adm. Rickover's eyes), "we wouldn't be fulfilling our responsibility if we opted for an inferior carrier."

Committee members believe that nuclear ships make sense in an age of high oil prices and that the Navy is better off building big all-purpose ships than smaller ships for specialized tasks.

Ironically, that view may be challenged by President Carter, a former nuclear submariner and protege of Adm. Rickover. The administration currently is studying the size and structure of the Navy. Indications are that it will decide the service should start buying larger numbers of smaller, conventionally-operated surface ships that are less costly than nuclear models, Navy Secretary W. Graham Claytor has already told Congress he favors smaller, conventional carriers over giant nuclear ships. But the administration still backs nuclear submarines.

Those ideas aren't new, but the House Armed Services Committee and its seapower subgroup have always strived to torpedo any proposal that doesn't include big nuclear vessels. Witnesses before the committee face a plaque reminding them that the Constitution empowers Congress "to provide and maintain a Navy." But the Constitution doesn't say that the Navy has to be a small fleet of high-cost nuclear ships.●

CONGRESSMAN GILMAN HONORED FOR SERVICE TO THE HANDICAPPED

HON. HAMILTON FISH, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. FISH. Mr. Speaker, I would like to take this opportunity to share with my colleagues a speech which was delivered by the distinguished gentleman from New York, Congressman BENJAMIN GILMAN, before the Mid-Hudson Branch of the National Rehabilitation Association in January.

Congressman GILMAN was given a special award for his distinguished service to the handicapped and was nominated for this distinction by Mr. Kraft and Mr. Shuldliner, of Occupations, Inc., an affiliate of the NRA.

The handicapped have traditionally been one of the most underserved segments of our society. With groups such as Occupations, Inc., and with dedicated public servants such as our colleagues, BEN GILMAN, the handicapped have begun to receive and will continue to receive superior representation.

Mr. GILMAN's remarks are as follows:

Good evening, Ladies and Gentlemen. I am very pleased to be among friends tonight . . . among so many who have given so much for the handicapped. I thank George Kraft and Bernie Shuldiner of Occupations, Inc., and all the National Rehabilitation Association members who have honored me with this special award and I thank all of you for your continued work in the field of rehabilitation.

We are all highly aware of the needs of the handicapped and the special problems that confront them in their daily lives. The field of rehabilitation is an ever expanding, growing field with advances in technology and with the vocalization of special needs by our handicapped. An important concept regarding rehabilitation has been recently people: That rehabilitation personnel and the American public should stress an individual's abilities rather than his disabilities.

Traditionally, the term "rehabilitation" has been defined as "restoration . . . to rank, privilege or property which had been lost." Another connotation of the word is used sociologically, to mean the "restoration of mental, physical and moral health through treatment and training for the defendant, deficient and criminal."

From just these few connotations of the word "rehabilitation" one is left with a negative attitude. "Defective and criminal", used as similar circumstances for which rehabilitation is necessary lead us to believe that the "defective" or handicapped individual is bad, or has committed an offense against society.

So too, the word rehabilitation connotes restoration, rather than an exploration of potential, inferring that the rights and privileges should be restorted, rather than recognized, as if they were taken away from the individual becauss of his disability,

We should, in rehabilitation, emphasize a new freedom for the handicapped, an opening of new doors. The handicapped has not been banished from his society, but rather is isolated from it. Rehabilitation is a welcoming into, a warm greeting, a lifting of barriers.

The year 1977 was a highly significant year for the handicapped in many ways. There were some long awaited actions on the part of the Federal Government, such as the signing of section 504 regulations, and the commitment vocalized by Secretary of HEW Califano that the handicapped are afforded all of the rights granted by the Constitution. First Lady Rosalynn Carter has pledged her support and efforts toward the betterment of mental health and handicapped services in this Nation. And in May of 1977, the first White House conference on handicapped individuals took place. For the first time, the handicapped traveled from all over the country to set before the Congress and the President an agenda for action, and to express their needs and frustrations and aspirations for all America to hear. The conference was a fine success, and in the spring, legislative and administrative suggestions will be emerging from the working group which has been compiling the suggestions set forth by the conference.

In the past few years, handicapped individuals have seen our Government's responsiveness toward their needs. The education for all handicapped children act has been signed into law, and is being implemented. The Rehabilitation Act Amendments of 1973 are effecting changes within the Government and within the private sector. Funding is increasing in the area of preventing handicapping conditions, and campaigns are underway to eliminate the threat and reality of stigma in all facets of handicapped life.

The Rehabilitation Act Amendments of 1973 are indeed significant. Hearings on the extension of these amendments will be scheduled early during this second session of the 95th Congress so that the Education and Labor Committee can assess needed changes in funding and focus.

Vocational rehabilitation programs have a comparatively long history in America. In 1920, the Smith-Fess Act was passed, becoming the Nation's first vocational rehabilitation legislation. Fifty-eight years of vocational rehabilitation legislation has brought handicapped individuals to a better understanding of their potentials and chances for increased productivity. The 1973 legislation was designed too "prepare (handicapped individuals) for, and engage in gainful employment . . . providing rehabilitation services to meet the current and future needs of handicapped individuals for whom a vocational goal is not possible or feasible so that they may improve their ability to live with greater independence and self-sufficiency." The 1973 Act also "promotes and expands opportunities in the public and private sectors for handicapped individuals and places such individuals in employment."

The Rehabilitation Services Administration (RSA) in the department of Health, Education, and Welfare, was appropriated in excess of $837 million in 1977. In 1962, that appropriation was only $64 million, indicative of the growing commitment on the part of the U.S. Government towards its handicapped and disabled citizens.

While the Government is expanding its participation in aiding the handicapped, let us not be too quick to express a hasty optimism or to exercise an uncritical attitude towards the Government's progress. There is still much, much more to be accomplished. Section 504, while ideal in spirit and purpose, cannot be implemented without increased Federal assistance. Upon several occasions, Members of Congress have requested cost estimates from HEW and GAO and have been informed that estimates are not available, and that "no one has even the slightest idea how expensive section 504 really is." The same holds true for P.L. 94–142, the education for all Handicapped Children Act. The spirit of this legislation is clouded by the shortage of Federal funds.

The department of HEW has attempted twice within the last six months to "reorganize." Both plans have been presented to Members of Congress and are incoherent and cumbersome.

The first plan was abandoned for the second, which pares down the developmental disabilities office, and which lumps together programs for the blind, mentally retarded, removal of architectural barriers, disability and rehabilitation programs. While the intentions of HEW are admirable—streamlining and making the programs more accessible—the client is apparently not taken into consideration. And the clients' needs, as we are all aware, should take precedence over all other considerations. The President's committee on mental retardation, the only

high level advisory committee, having access to the White House, and having a strong role as advocate for the retarded, has been given a one year extension before dissolution. These examples of shortsightedness in reorganization are occuring all too often.

The Congress, while cognizant of the handicapped population's needs, must coordinate their efforts to insure that comprehensive programs for the handicapped are developed and implemented. Piecemeal legislation indicates a lack of foresight and concern for the overall quality of programs. The Republican task force on the handicapped, a newly formed unit comprised of myself, Congressman GEORGE O'BRIEN and Congressman CLAIR BURGENER, has introduced legislation which would create a House Select Committee on the Handicapped. Such a select Committee, modelled after the House Select Committee on the Aging, would have the responsibility of coordinating legislative efforts for the handicapped, and would conduct hearings into the special needs of America's handicapped population. This legislation will be pushed during the second session of the Congress, and hopefully, other Members of Congress will support our efforts.

The White House conference produced several significant suggestions pertaining to vocational rehabilitation, each reflecting the need to retain, expand, and modify rehabilitation programs. One suggestion was that vocational rehabilitation counsellors should be evaluated on the quality of service produced rather than the number of cases processed; another suggests vocational rehabilitation departments should change their policies so that handicapped individuals over the age of 21 can be served. In the spirit of expanding the traditional offerings of vocational rehabilitation programs, a suggestion was made to encourage the National Endowment for the Arts, high schools, colleges, and vocational education centers to develop special courses and recruiting programs designed to make handicapped individuals more aware of existing career opportunities in the arts. Delegates to the White House conference suggested too, that vocational rehabilitation services be mandated "for all handicapped, making the goal 'the least restrictive living' rather than 'substantial gainful employment', and thereby mandating the goal of each institution as habilitation or rehabilitation and moving towards mainstreaming in the community."

Resolutions passed during the White House conference included several specifically concerned with vocational education. The Office of Career Education's grant programs should ensure that the needs of the handicapped are addressed in all research and demonstration projects, and that the National Advisory Committee on Vocational Education have a member who is knowledgeable in the concerns of the handicapped.

As well, the conference recommended that funds for vocational education under P.L. 94-482 should be increased from 10%-25%. The law presently sets aside ten percent of funds for training of handicapped individuals.

Perhaps the most valuable aspect of the White House conference on the handicapped is the after-effect, the realization that so many handicapped individuals gathered in one place to make their needs known, and the recognition of a very special plight. Accordingly, Members of the Congress must take note, and must become informed of all of the legislative remedies that can be employed to create a stable and substantial life for all handicapped individuals.

Increased Federal funding is a necessity to insure that section 504 is properly implemented and to insure that our handicapped population receives a "free and appropriate public education." Presently, funds are not forthcoming, and in the instance of the education legislation, the Federal share of funding is far below the States' contributions. States have been given a mandate by the Federal Government, and the Federal Government has done little to compensate the States in their efforts towards compliance.

It would be wise to take stock of new and innovative ways to fund these federally mandated programs and to assist the States in complying with the rules and regulations promulgated for the good of all handicapped individuals.

Funding for education can be increased by voting additional federal contributions. Architectural barriers can be eliminated if Public Works or CETA funds were authorized and appropriated for this purpose. Federal jobs for the handicapped can be increased if the civil service enforced existing provisions which state that the handicapped must be granted equal opportunities for employment. CETA funds could also be used specifically for the employment of handicapped individuals, and would allow these individuals to learn skills and training they would otherwise not have the opportunity to experience.

The consumer protection agency should adequately represent the handicapped as a special group of consumers and a separate office for handicapped affairs should be incorporated into the final agency plans. Ombudsman offices for the General Accounting Office should be established to insure that the handicapped are receiving fair treatment from federal agencies.

The 1980 census should take a special look at the handicapped population and should inform the country about special handicapped minority individuals. The tax system should be examined to determine ways for making handicapped life easier, and the present system of supplemental security should reflect changes with the time. Handicapped individuals should not be penalized for working, and their benefits should not be altered to reflect outside income.

These changes can and must be made. The handicapped can only benefit from such changes.

As we continue to work for and with the handicapped, let us not pat ourselves on the back for attempting to raise the standard of handicapped life. We must be wary that we stop working because we have made some strides forward. We must continue to move forward and when we finally arrive at total equalization and when the handicapped are welcomed into our communities as contributors in whatever small or large ways they can contribute, then we can rest and say that our work has been done.

In closing, permit me to thank you again for the honor you have bestowed on me, and may your dedication and devotion to your tasks be encouraged, and may your good works multiply.

God bless.●

WATER POLICY REFORM AMENDMENTS OF 1978

HON. WILLIAM L. ARMSTRONG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. ARMSTRONG. Mr. Speaker, I am introducing a bill today to amend the Water Resources Planning Act of 1965. My bill seeks to protect the rights of States and individuals in the formulation of national water policy. This legislation will also strengthen congressional authority and responsibility over national water resources policy.

This legislation would make five major changes in the Water Resources Planning Act. Each of the changes addresses a problem that has been a subject of concern and complaint by State governments. The amendments are as follows:

First, proposals by the administration for changes in national water policy relating to or affecting water resource issues must be submitted to Congress and must be explicitly enacted into law before they can go into effect. The need for this safeguard has been vividly demonstrated by recent actions of the executive branch.

Second, procedures would be established by which the executive branch must hold public hearings where changes in national water policy are concerned.

Third, appointment of the chairman of the Water Resources Council by the President would be made subject to Senate confirmation.

Fourth, recommendations by the Water Resources Council concerning national water policies shall be transmitted to the Congress as well as to the President.

Fifth, chairmen of regional river basin commissions would be made subject to Senate confirmation.

These amendments would guarantee the rights of States would be protected, and that the concerns of States and knowledgeable private citizens will be heard before important changes are made in Federal water policy. This legislation also will restore to Congress the voice I believe it ought to have in the formulation of national water policy.

My bill will be important for all the States, but will be especially important to Colorado and her neighbors in the semi-arid West. Water has been always our most precious resource. There never has been enough of it to satisfy all of the desires of farmers and ranchers, miners, industry, and our burgeoning cities and suburbs. But through 100 years of trial and error, our State and other States in the West have worked out an equitable, practicable means of balancing the competing claims for this scarce resource.

For reasons known best to himself, President Carter, upon assuming office, decided that a thorough review of Federal water policy was in order. He established a task force to conduct a water resource policy study and recommend changes in policy.

This study was characterized by the reckless haste with which it was conducted, and by the inattention—the almost deliberate disregard—which was given to the views of State and local officials and knowledgeable private citizens.

The task force listed some 104 different policy "options" which ranged from a purely cosmetic alteration in policy to a wholesale uprooting of the entire legal system for adjudicating water rights in the Western States. The one theme that ran through all the options was an expansion of Federal authority at the ex-

pense of States' rights and individual property rights.

President Carter and other administration officials have pledged repeatedly that there will be no Federal attempt to interfere with State methods of allocating and appropriating water. But Coloradans who heard the same kind of talk last year before the axe fell on the Narrows, Fruitland Mesa and Savory Pot-Hook water projects remained wary.

It appears now that at least some of the westerners' suspicious will be justified. Secretary Andrus gave governors a preview of the likely new Federal water policy February 16. Although details are a closely guarded secret, one person who attended the closed-door meeting said the West "won't like" the new Federal water policy.

Secretary Andrus is treating the option papers as a super secret. So no specifics are known. But it hardly seems likely that these excessive security precautions would be taken if the proposed new policy is as innocuous as Carter administration spokesmen continue to maintain.

Actual submission of the water policy recommendations to the President has been delayed pending appeal of a temporary restraining order issued by a Federal court in North Dakota in a suit by the State of North Dakota, which is protesting the failure of the water policy task force to prepare an environmental impact statement on its recommendations. But there is no indication the administration plans to soften its proposed policy changes during the interim.

If the amendments that I am proposing today are enacted into law, it will no longer be necessary for States to go to Federal court in order to protect their water rights. A companion bill has been introduced in the Senate by Senators CURTIS, YOUNG, HAYAKAWA, MCGOVERN, GARN, HANSEN, ZORINSKY, JOHNSTON, LAXALT, GOLDWATER, and WALLOP.

I ask unanimous consent that the Water Policy Reform Amendments of 1978 be printed at this point in the RECORD. I ask further that the Denver Post editorials of December 16, 1977, January 10, 1978, and January 31, 1978, which point out the shortcomings of present Federal water policy, be printed in the RECORD following the text of the water policy reform amendments:

[From the Denver Post, Dec. 16, (1977]

WASHINGTON WOULD WRECK WESTERN WATER POLICY

If you live in the semi-arid West it's important that you note a water policy struggle going on between the Carter administration and Western state governments.

In a performance reminiscent of the Carter "hit list" strategy last winter—in which reclamation programs were axed secretly in White House back rooms—the administration now is trying to change the rules on Western water use.

If the plan succeeds, water use, jobs, farming, municipal growth and lifestyles could be drastically altered.

There's nothing wrong with intelligent change. But a check at the Colorado Statehouse—and a careful reading of Gov. Dick Lamm's current analysis of the federal efforts—induce a chill.

The federal people conducting the study don't know much about water use in the West. They look at water conservation in the same way they would regard fuel conservation. They don't seem to comprehend that water must be used and reused. It is not consumed by the first user. After a recent hearing a Colorado observer said of the federal planners:

"They seemed absolutely baffled by the fact that South Platte River water is used seven times between Denver and the Nebraska line. It would have been amusing if they didn't have so much power."

Backgrounding may be in order. Colorado and other water-scarce states have developed water law over many decades. The use of water generally is an ownership right, subject however to the requirement that the water be used beneficially. Court decisions have upheld and refined these laws. Western states additionally are governed by interstate water compacts approved by Congress and overseen by federal courts.

But now the Carter administration is pushing for powers which could impose federal regulation on Western water use. The impetus evidently comes from environmental pressures to stop agricultural "waste" of water and to control stream use and impoundment for additional farm and municipal diversions.

So early this year President Carter announced a water review task force. But by mid-year inept Interior Department policy makers had started the study off in hostile fashion.

The federal officers listed 104 options to be considered—but they gave state officials only one day to study the options before commenting—hardly a cooperative gesture for so complicated a subject.

Then, after taking testimony and refining the concept, the task force gave the states only two days to review the revisions before a joint meeting in Denver Nov. 16.

Such whipsawing of state officials, besides being annoying, seems to show that the Interior Department doesn't take state input seriously. The federal stance undermines President Carter's personal assurances that there will be no preemption of state water prerogatives.

But the real problem—and Governor Lamm has identified it in depth—is that the federal analysis of Western water problems is simply deficient. It fails to recognize what states have done and can do in this vital area. Further, the study teams have articulated no overall goals.

Among the specific charges against the states are these:

That the states have failed to establish water policies protecting the environment.

That they have failed to conserve water.

That there has been failure to integrate agricultural and municipal water.

Failure to provide minimum stream flows for fish and wildlife.

Failure to adequately plan and develop policies for water use.

Failure to integrate ground and surface water conservation.

As noted previously, some of the federal concepts simply are misguided. Coloradans earn $2 billion a year from agriculture, much of which rests on irrigation To call this "waste" is to advocate wrecking our economy. And to talk about impeding water storage is to surrender to the next drought.

But on the specific questions raised, Governor Lamm's Dec. 8 response is well-founded. He points out that Colorado has been a pioneer in effective use of water and will continue to be. Besides, as Denver area citizens are discovering in the Foothills controversy, state and local government is a lot more responsive than federal bureaucrats.

Lamm insists correctly that Colorado has achieved good environmental planning. Going back 30 years, Coloradans demanded protection of the environment during construction of the Colorado-Big Thompson project. Before Carter became president the Lamm administration went over—and improved—the environmental impact of federal dam plans in Western Colorado.

So how does the federal government get a corner on environmental guidance?

There are other points: The Colorado General Assembly two years ago passed a law requiring minimum stream flow to protect animals and aquatic life during dry periods. Similarly, the assembly has passed legislation governing use of ground and surface water to achieve the greatest amount of conservation.

As to integration of city and agricultural water, Northglenn, Thornton and Westminster have joined in a program of using farmers' irrigation water on an exchange basis. Federal involvement or not, this trend is going to continue. The state is ahead of the federal government.

The federal experts even mention the need for establishing metering of water use. Nearly every Colorado city outside Denver has metering and the Colorado General Assembly requires any community accepting state funds for water development to install meters as a condition of getting the state's help.

No, the federal effort leaves us as unimpressed as it did the governor. There is very little need to slip a federal collar on water use in the West. And there are very big reasons why we should not.

[From the Denver Post, Jan. 10, 1978]

WHY THE HASTE, MR. CARTER, IN YOUR RESOURCE PLANS?

President Carter took office a year ago amidst promises he would run an open, people-oriented presidency. Since then the president has angered and confused thousands of Westerners with secret White House maneuvers over natural resources.

This week, Vice President Walter Mondale is visiting Colorado and other parts of the West in a fence-mending role. He is out here to find out what is bothering Westerners. Well, there is a strong message he can take back to President Carter.

Environmental staffers, pretending an expertise they do not always have, last winter ripped salvagely into Western reclamation spending—ripping out long-planned or partly-finished projects—with no explanation.

Then the administration dumped a huge proposal for water policy changes on the West and Midwest. It gave state officials insultingly-brief periods in which to comment on the proposed options.

In both these cases Congress had to step in and correct or at least slow down the administration's headlong attacks.

You'd think the administration would have learned something from these unnecessary confrontations. Apparently not. The Office of Management and Budget, a White House agency, now has unleased a governmental resource reorganization team to plunge into a complex situation with the same inconsiderate haste so visible early last year.

On Dec. 19, just before the Christmas holiday, the OMB study team dropped into the Federal Register an announcement that it wanted response from the public on reorganization of federal resources and environmental agencies.

When? Plenty of time. Just have your comments ready by Jan. 14. A bare two weeks

counting the holidays. That's scarcely time enough for the average government body to alert the proper departments what's afoot. It certainly isn't enough to draw up a balanced response.

What's particularly painful is that the OMB study leader, William W. Harsch, had promised that OMB would inform the public of its plans through the press.

The Dec. 19 announcement was made through the obscurity of the Federal Register without benefit of supplementary press releases. It took days for even federal agencies to find out what was going on.

In past confrontations, resource agencies have suspected a covert alliance between environmentalists within the White House and those outside it. But this time the bureaucrats kept their secret so well they caught even environmental groups off guard.

The Colorado Open Space Council, a prominent environmental organization, met in Denver last week to hear details of the plan as gleaned from various sources. At the end of the meeting COSC's board voted to send a letter to OMB asking for more time to study the plan.

COSC is right regardless of one's view of resource agency reorganization. This is simply too important a subject to be disposed of in two weeks.

Many citizens have given thought to unifying such agencies as the Forest Service and the Bureau of Land Managament. The OMB team is looking at the whole picture. In one scenario it is asking the public to approve merely a better system of coordination among resource agencies. Or possibly, it says, we should set up entirely new departments according to function

That could mean a Department of Recreation office in say, Idaho Springs, adjoining a Department of Timbering office and a branch of the Department of Wildlife. Each office would be governing the same plot of ground which used to be a simple national forest tract. Is this what we want?

Or do we want to find out, first, where change is needed before plunging into reorganization?

Half the counties in 17 Western states have a stake in this reorganization. But we'll bet most of their officials don't even know they must react by Friday if they want to have some input on the subject.

The Carter administration needs to look in the mirror and ask itself if it really favors public input on public land decisions. If it answers "yes" there is a lot of groundwork to be done. The first thing to do is drop the Jan. 14 deadline and draft plans for a thorough public debate on federal reorganization of resource agencies. It is too important a subject to be handled hastily, capriciously and arbitrarily out of Washington.

[From the Denver Post, Jan. 31, 1978]

WATER WAR NOT YET WON

The Western States are going to have to maintain their battle stance on proposed federal water changes. There simply isn't any other conclusion in the wake of a federal-state meeting on the subject in Denver last Friday.

As readers may be aware the Carter administration has proposed sweeping federal controls on water policy which could wipe out much state water law, along with the private ownership right to priority use of water. The federal corrections being sought—compared to the size of the problem—constitute massive overkill.

The Carter Water Resources Policy Study Group is moving toward a Feb. 10 deadline in making recommendations to the president. The president will make a policy statement in March.

With irrigation states in the West thoroughly alarmed by these prospects, the White House last week sent Eliot Cutler of the Office of Management and Budget to Denver to consult with state lawmakers from several states.

Cutler was cordial, correct and cooperative. He promised Western input into the decisionmaking process. But he didn't promise that any Western rhetoric, as such, would get to the president's desk.

In short, Cutler didn't give away a single administration option in his Denver appearance.

That is what strikes many Westerners as unfair. The administration, protesting that "all options will be considered," is nonetheless using the old gimmick: 'What's mine is mine but what's yours we'll negotiate."

It isn't necessary to uproot the whole legal system of handling water in the Western States to get at the corrections needed, mainly involving water priorities and Indian rights. As Rep. John Scully of the Montana House of Representatives told the Denver meeting:

"I think the power (to make water policy changes) is already there—in the state courts."

Scully warned that shifting water decisions to the federal courts will merely shift the battle lines to a different sector.

"Bergland and Andrus have different positions on water use," he said in reference to the fact that Agriculture Secretary Bob Bergland and Interior Secretary Cecil Andrus represent agencies which tend to disagree on the priorities of irrigation use of water verus recreational uses.

Rep. David Little of the Idaho House of Representatives may have put the matter of federal control in the best perspective when he said:

"In southern Idaho, which is irrigated, food production is the biggest goal we have. In northern Idaho, which is timbered and has ample rainfall, there are different priorities. If we have trouble setting statewide priorities on water use in Idaho how can the federal government set policy for all 48 continguous states?"

That is an excellent question and Little partly answered it by suggesting that environmental politics is at the heart of the water policy re-write.

"Some people," he said, "are seeking federal support on water policy changes to override their enemies . . . so they can say 'to hell with irrigation.' "

Whether one agrees with the irrigation farmers or the recreationists it is obvious the whole West could suffer if the federal administration succeeds only in disrupting the present state governance of water with a blizzard of federal regulations.

Friday's meeting in Denver did little to develop any confidence the federal rule changes would have any positive message for the West's rural economy. The West's agricultural economy—while no one said so precisely—seems to be targeted as the main "problem." And that is unfortunate.

The National Conference of State Legislatures is to be commended for sponsoring the water meeting, and for trying to keep open the difficult dialogue between Washington and the West. Colorado State Sen. Dan Noble, R-Norwood, chaired the meeting and did a good job of reining in destructive criticism of the White House. But the federal planners should understand the growing bitterness. As Representative Scully of Montana observed to Cutler:

"You've united Montanans. You're making the Montana Legislature (which opposes the federal instrusion) look like a shining light—and that's the first time that's happened" in years.●

ACCOUNTING FOR POW'S AND MIA'S

HON. WILLIAM M. KETCHUM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. KETCHUM. Mr. Speaker, under the leave to extend my remarks in the Record, I include the following: Mr. Speaker, what is known as a status hearing has just been held concerning a constituent of mine, Comdr. (selectee) James B. Mills, USNR, who has been missing in action since September 21, 1966. Commander Mills is one of more than 600 American servicemen who are still officially carried as either MIA or POW (prisoner of war) as a result of the conflict in Southeast Asia.

I am sure that we all recall our President's promise that "changes in status will not take place until I am personally convinced that every man has been accounted for as accurately as possible. "Yet this status hearing was ordered by President Carter upon recommendation of Defense Secretary Harold Brown. The hearing and subsequent review will have a near-guaranteed result: a change in status to killed in action/presumptive finding of death. This determination will be based upon a lapse of time without information to indicate that the serviceman is still living. Instead of resulting from positive factual information concerning his status, the change will come about due to lack of information. Needless to say, actual information relating to Commander Mills and other POW/MIA's must come from the Communist rulers in Southeast Asia. Vietnam has blatantly ignored humanitarian consideration on many counts; not only have they denied us information on American servicemen—they have also detained many of their countrymen in "re-education" camps.

Despite Vietnam's lack of cooperation and disregard for the manner in which her own citizens are treated, the Socialistic Republic of Vietnam receives assistance from the UNDP, and has been allocated funds from multilateral financial institutions. Added to that, and as evidenced by remarks which recently appeared in the RECORD, the United States is shipping wheat to India, and India is now shipping wheat to Vietnam. The Vietnamese are being more than amply rewarded for their refusal to abide by basic humanitarian principles.

We are proceeding with death declarations for economic and political reasons. I am appalled by this situation. It would appear that the President's decision to "normalize" relations with Vietnam (including not only a seat in the U.N., but an offer to exchange embassies and to lift trade embargoes) has been thwarted by the obstacle of POW/MIA accounting. Declaring the missing servicemen dead is indeed an expedient method of eliminating this obstacle, but it is a desperately sad commentary on our Nation's moral fiber.

We have granted absolution to those who chose not to bother serving their country at all; now we are abandoning those who not only served, but who have given countless years of their lives in a limbo situation. POW/MIA families have believed in this Government for years—they have had faith that a nation which sends servicemen into combat would surely recognize the obligation to obtain the fullest possible accounting for those men. Congress has addressed this problem for an embarrassing number of years; we have voiced our indignation and issued forth demands which are now being quietly swept under the carpet.

It is our obligation and responsibility to state that demand once again, forcefully: An accounting must be forthcoming, and additional reconstruction funds should be withheld at least until basic humanitarian criteria are met.●

IN HONOR OF THE REVEREND ARTHUR S. JONES

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. RODINO. Mr. Speaker, this Saturday afternoon I will join many of my fellow New Jerseyans at a luncheon honoring the Reverend Arthur S. Jones. Reverend Jones is known as a leader and an inspiration in the communities of Newark and East Orange, and I am very proud to call him my friend. He has recently been named president of the New Jersey Council of Churches, and I would like to enter into the RECORD the following Newark Star-Ledger article naming him "Jerseyan of the Week."

The article follows:

[From the Newark Star-Ledger, Mar. 19, 1978]

CHURCH COUNCIL LEADER SINGS PRAISE OF WORK

(By Charles Q. Finley)

Rev. Arthur S. Jones of Newark, the new president of the New Jersey Council of Churches, is his own hardest taskmaster, whether it be as a minister, administrator, author or singer.

The pastor of St. Marks AME Church in East Orange and director of Newark's federally funded Comprehensive Employment and Training Delivery System, he often is up and writing before dawn.

"I'm really too tired to write at night," admitted Rev. Jones, who was earmarked as "The Young Paul Robeson" while a protege of the late renowned singer. "When I have an exciting idea, I'm up at 4 a.m. and write through until I go to my office in City Hall.

"I first came in contact with Paul Robeson in the basic progressive political movement in the late forties. We became friends and he took a personal interest in my singing. When I was directing a chorus in Boston I did a special arrangement of "Old Man River" for him and he came to sing."

Rev. Jones actually set out on a concert singing career before he felt a religious calling. He still gives recitals occasionally.

Born in Mebane, N.C., the son of a Methodist minister, he and his family moved often during his early years. He attended the North Carolina College for Negroes (now North Carolina Central University).

"I worked as a waiter, in factories, on the railroad and I dug ditches," he said. "That was the only kind of work a fellow like me could get in those days."

It was during this time that he experienced the call to the ministry and attended Kittrell College Seminary in Virginia.

"There wasn't any special event that changed the direction of my life," he recalled. "It was just the feeling of being called to do a certain thing."

After a stint in the Army Air Corps in World War II, he attended the seminary at Wilberforce University in Ohio. He also was married shortly after leaving the service.

Rev. Jones and his wife, Erma, have two children, Joseph, 32, of Newark, a counselor at Montclair State College, and Arthur L., 33, of East Orange, who is employed by a toy manufacturing firm.

Rev. Jones spent 10 years in Boston, still working at various jobs as well as in the ministry. In 1954 he became pastor of a church on Long Island, then was transferred to a church in Massachusetts. From there he became pastor of the Allen Temple AME Church in Bermuda, where he was instrumental in establishing a youth center, the first on the island.

After four years in Bermuda, he was given ministry of a church in Philadelphia, then became a consultant to the U.S. Office of Economic Opportunity (which supports the manpower program in Newark) for work with interracial day care centers in Mississippi. Following this assignment he received the OEO Achievement Award.

"I had some very scary experiences in Mississippi," Rev. Jones said, "including a crossburning at my front door."

Rev. Jones was a consultant for OEO when he came to Newark to establish a new manpower program and restructure the United Community Corporation, the OEO-funded community action program, in 1966. He took on the dual role of manpower program director for the city and pastor of the St. Marks AME Church in East Orange.

Adrienne Hatter, secretary to Rev. Jones in his city post, said "He is our leader, but at the same time he makes us feel that's what we should do. He gives us a genuine feeling what we're doing is worthwhile.

"He gets through a tremendous amount of work in a day yet remains calm. I have trouble keeping up with him."

Mrs. Ruth McClain, deputy director of the Newark manpower program, said her boss "is an enigma.

"At first blush, he strikes you as an unsophisticated, soft-spoken country preacher who could be dismissed easily, except that he's so tall. But as he talks, his wealth of experience shows through and you find his head is on straight, his priorities are in order and vast resources are available in his quick mind.

"He knows what he wants and makes his objectives clear. He expects it to be done, but he always gives those around him enough room in which to work."

Rev. Paul L. Stagg, general secretary of the New Jersey Council of Churches, expects Rev. Jones to "bring new vitality through his able and strong leadership.

"He has his feet firmly planted in the church and in the secular. He's alert and resourceful with an open spirit for all religious denominations whether within or outside the council. Being a member of a minority group himself enhances his critical vision of human justice."

Rev. Jones plans to call upon the churches and temples of the various denominations in the state to work more closely together for their common goals.

"Protestants, Roman Catholics, the Jewish community and others could make a significant difference if they cooperated more closely because most top business or political leaders are in some way associated with a church," he explained. "We would be better able to bring our combined influence to bear on the decision-making processes."

Rev. Jones said although the council is concerned with the needs of all communities in the state, the needs of the inner city are of most vital concern.

"So many youths, particularly in the minority groups, are out of work. The need for welfare reform is also a very pressing problem in the inner city," he said. "Every person should have the opportunity to do useful and meaningful work, and welfare reform should preserve the dignity of the individuals involved.

"I'm optimistic. Changes for the better have been made in Newark, he said.

"I'm especially pleased at the way those who live in the city are coming to look upon it. It's image is improving; The residents have a will to make the city work."

Rev. Jones said much progress has been made through the civil rights movement "but today another, and perhaps even greater, problem exists.

"It no longer is segregation as such with which we must contend, but rather how to bring the minority groups into the mainstream of our economic life. We have a long way to go in this area."

His optimism extends to the future of the church as a viable institution.

"I've seen the church and religion in general have its ups and downs in the last 20 years, but now I see an apparent upsurge and hope it will lead to a real religious revival along with a revival of ethical and moral ideas," he said.

Rev. Jones has written several plays which have been staged by the drama club in his church, and a book of poetry and prose called "Guidelines—from Predicament to Liberation"—which has been submitted to a publisher.

"The book contains my basic beliefs related to contemporary American society. It sets forth guidelines," he said. "The principal theme is we all grab too much, that we're all too greedy and don't care enough about the other fellow."

He finds moving among his parishioners invigorating.

"I come upon needs which stir me from one Sunday to the next," he explained. "These situations I encounter, plus my religious inspiration and reading, lead to my sermons.

"I shall continue to live by my religious convictions and its principles. Not being selfish and looking upon others with compassion and concern will continue to be my credos."●

FUNDING LEVEL FOR SPECIAL BRIDGE PROGRAM

HON. DOUGLAS WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. WALGREN. Mr. Speaker, I have recently been in correspondence with the President regarding a proper funding level for the special bridge program. The funding proposed by the President is dangerously inadequate and the response to

my letter to the President which came from OMB, not the executive office or the Department of Transportation, is both inadequate and insensitive to the problem.

I am including in the RECORD a copy of my most recent letter to the President for persons interested in the future of the special bridge program and the approximately 105,000 deficient bridges in the United States.

MARCH 16, 1978.

DEAR MR. PRESIDENT: I want to call to your attention a serious deficiency in the Administration's position on funding for bridge repair that is a great disappointment to me.

In answer to my recent correspondence with the White House about the need for funds for bridge repair, I have just received a response from the Office of Management and Budget (OMB)—a response characteristic of OMB's priority of restricting funding without proper consideration of need. I am concerned that the Administration views the bridge problem as a budgetary and not a transportation issue. As a result the Administration's transportation bill falls far short of hopes for action raised by rhetoric of the Secretary of Transportation.

In view of the kind of danger presented by deteriorating bridges, an adequate program must be measured by the time it will take to complete the work. The Administration's proposed bridge program will only slightly strengthen our currently inadequate Special Bridge Program. At the proposed $450–$500 million annual funding, it will take at least 46 years to repair all currently dangerous bridges and that makes no provisions for future deficiencies and inflation. A ten-year completion period will require $2 billion per year. I believe anything less would be short-sighted.

I can only express dismay at the process used by the Administration to derive, and subsequently justify, the proposed $450 million funding level for the Special Bridge Program. Simply put, the Federal Highway Administration (FHWA) did not ask what extra effort the state could make on the bridge problem.

In a letter dated June 30, 1977, the Federal Highway Administration asked the states to provide a list of bridge projects that could be authorized for construction during 1978 under the Special Bridge Replacement Program. These estimates, totalling $492 million, became the basis for the $450–$500 million funding level proposed by the Administration.

OMB is now using this figure as justification for a dangerously limited bridge program claiming that "states would have great difficulty in obligating bridge funds in excess of the budget levels proposed."

That is a terrible misunderstanding. Nowhere in the June, 1977, letter does the FHWA ask what extra effort states might make on bridge repair. In fact, the thrust of the letter is not that more funds may be available, but the funds are so limited that almost none would be available. Consequently, Pennsylvania only listed $6.8 million for 13 bridges despite a backlog of 403 deficient spans requiring $668 million to repair.

Dangerous bridges should be given a unique priority. Any plan that will not enable presently dangerous bridges to be fixed within ten years is not a solution.

The Administration is fast headed for direct conflict with the Congress on this issue. In the public interest, I respectfully urge you to order an immediate re-evaluation of the adequacy of the Administration's position on the level of funding for bridge repair.

Sincerely,

DOUG WALGREN.●

PATRICK SULLIVAN, OF THE INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, GREAT LAKES DISTRICT, HAS OUTLINED HOW THE ADMINISTRATION'S TRIGGER PRICING POLICY IS COSTING THOUSANDS OF U.S. JOBS AND IS THREATENING THE PORT OF BUFFALO

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. KEMP. Mr. Speaker, the economy of the Great Lakes region will lose up to $500 million—half a billion—this shipping season. Layoffs by shippers, port authorities, and businesses are expected, affecting longshoremen, grain millers, teamsters, and many others. Railroads will be affected. Even the St. Lawrence Seaway will lose money.

Why? Because of the inequities inherent in the administration's import restrictions. Those restrictions, as applied to the steel industry, use Japanese production and transportation costs to calculate minimum acceptable prices for steel import sales in the United States. Sales below those prices launch Federal antidumping actions.

Unfortunately, and it shows how little specific thinking was given to the mechanics of the trigger pricing formula as the administration rushed forward for any answer as the impact of steel imports reached a crescendo in the media, the trigger prices apply to all imports, whether they come from halfway around the world from Japan or just across the Atlantic from Europe.

There was adequate evidence before the analysts within the administration on the sources of steel imports, evidence which would have shown the substantial variation in price depending upon source. Yet one formula yielding one price was used.

I opposed the administration's policy from the outset, and I was and remain very vocal about it. The administration's policy is so shortsighted that it fails to deal altogether with the reasons why steel imports are price attractive to American users. That policy deals with the results of the problem and not one of its causes. If we are to have a long-range solution, it will have to be based on dealing effectively with the causes. And those causes are the unnecessarily high costs of doing business—especially the level of taxes paid accounting practices and regulations shouldered—by U.S. steel producers. Because the tax and accounting burdens and de facto price regulations have kept our producers from having sufficient capital to plow back into new and more modern equipment, expanded facilities, et cetera, we are less efficient than our competitors. Their steel mills—those of Japan and West Germany—are new, because they had to be rebuilt after the Second World War. Our's are often 40 years old. Putting in their new facilities and equipment has allowed those foreign producers to put in, as a part of initial construction, the pollution control devices which must be added to our facilities and equipment without adding any to increased production.

But aside from that, if this country is to have a protectionist steel import policy, then it should be a realistic one. It should differentiate between sources of steel, as to the costs of foreign production and transportation. This is what must be done, if we are to save jobs on the Great Lakes.

The specific problem on the Great Lakes is that the administration's trigger price is $48 per ton. That is the per ton trigger which should apply to Japanese steel under such a policy. But the relative cost of European produced steel on our east coast, on the Great Lakes, is $30 per ton.

What have been the results? First, some foreign steel producers are diverting steel from the Great Lakes to the gulf coast ports where lower shipment costs allow them to compete with U.S. steelmakers. The Great Lakes have lost a significant amount of cargo this way already. Cleveland's tonnage will drop by about 50 percent, or 300,000 to 400,000 tons, this year. That means jobs, starting right at the waterfront, as many as 100,000 jobs in the Great Lakes.

Second, grain shipments will suffer. About 11 percent of all U.S. grain exports now move from the Great Lakes, but they move on ships which first bring over foreign steel. Without those ships entering the lakes to unload steel, there will be none leaving with grain. As much as 50 percent of the grain leaving the lakes now could be lost to shipping, according to the director of systems and economic analysis for the St. Lawrence Seaway Development Corporation.

All of this was brought to the attention of the Great Lakes, and now to Congress, by Patrick Sullivan of the International Longshoremen's Association Great Lakes District in his statement and analysis on the administration's policy and its application to the Great Lakes.

Here is what he has said:

TRIGGER PRICING POLICY

IMPACT SUMMARY

The effect of the present policy is to destroy the present competitive transportation relationship between the nations' seacoasts. It will have disastrous effects on labor and industry in the Seaway ports since it unfairly discriminates against them. The relative impact on the Great Lakes/Seaway will be most severe since steel imports constitute 85% of total general cargo moving through these ports, and since the backhaul of grain, the principal export cargo for ships carrying steel in, will also be lost.

MAGNITUDE OF DISCRIMINATION

The normal differentials in ocean freight which establish our competitive hinterland have been seriously altered. The normal ex-

isting differentials between the Gulf and the Lakes have been nearly doubled. The result is that the more economic transportation routes become uneconomic, and cargo flows are shifted dramatically.

For example, Japanese steel via the Seaway can now be laid down in Cleveland, Ohio for $5.00 per metric ton less than via New Orleans and the river to Cincinnati. Under trigger pricing the cost advantage of the Seaway is completely lost and it is cheaper by $1.00 per metric ton to use the New Orleans route. European steel which has a $15.00 a ton advantage to cities such as Dayton, Ohio via the Seaway, could be delivered cheaper via New Orleans even though it is nearly 2,000 miles further by that route.

SOLUTION

The correct transportation differentials for Japanese steel are reflected in U.S. Census tabulations. These differentials must be maintained if competitive routings are to remain undisturbed.

Two options are possible:

(1) The Great Lakes trigger price as now calculated, would become a base rate. The East Coast and Gulf prices would be adjusted to reflect the Census freight differentials. This would mean raising the trigger prices to these coasts. (For cold rolled sheet steel this would be $6 per metric ton).

(2) Use the Gulf trigger price as the base and add the Census differentials. This would reduce the Great Lakes trigger price. (For cold rolled sheet steel this would be −$6 per metric ton). Interest charges from Japan should not alter the differential since they have never been a significant consideration in the Great Lakes/Seaway routing decision.

Note that the differentials will vary according to the kind of steel product and by specific tariff number. (See examples 1 and 2 attached).

ACTION NEEDED

The remedy must be taken immediately so as to be reflected at the earliest because of the short shipping season in the Seaway/Great Lakes. To wait until the third quarter would effectively lose the 1978 shipping season.

EXAMPLE 1.—*Cold rolled sheet from Japan, tariff schedule number 608.8744*

[Dollars metric ton]

Commercial rates[1]	Transportation costs from Japan to— Great Lakes	East coast	Gulf
Ocean freight, handling and insurance	$34	$30	$26
Differential, Great Lakes over Gulf and east coast	--	+4	+8
Alternative 1.[1 2]			
Trigger import charges	53	43	39
Revised trigger prices Lakes base (less differentials)	53	49	45
Net change	--	+6	+6
Alternative 2.[1 3]			
Trigger import charges	53	43	39
Revised trigger prices Gulf base (plus differentials)	47	43	39
Net change	−6	--	--

[1] Census rates, based on data compiled by the Bureau of Census for October 1977. Rates are weighted averages for Detroit, Cleveland and Chicago, Houston and New Orleans.

[2] Great Lakes as base coast, east coast and Gulf adjusted to commercial differentials.

[3] Gulf as base coast, Great Lakes and east coast adjusted to commercial differentials.

EXAMPLE 2.—*Hot rolled steel sheet from Japan, tariff schedule number 608.8742*

[Dollars metric ton]

Commercial rates[1]	Transportation costs from Japan— Great Lakes	East coast	Gulf
Ocean freight, handling and insurance	$33	$30	$25
Differential, Great Lakes over Gulf and east coast	--	+3	+8
Alterantive 1.[1 2]			
Trigger import charges	51	41	38
Revised trigger prices Lakes base (less differentials)	51	48	43
Net change		+7	+5
Alternative 2.[1 3]			
Trigger import charges	51	41	38
Revised trigger prices Gulf base (plus differentials)	46	43	38
Net change	−5	+2	--

[1] Census rates, based on data compiled by the Bureau of Census for October 1977. Rates are weighted averages for Detroit, Cleveland and Chicago, Houston and New Orleans.

[2] Great Lakes as base coast, east coast and Gulf adjusted to commercial differentials.

[3] Gulf as base coast, Great Lakes and east coast adjusted to commercial differentials.

If the administration is to maintain this policy, it ought to at least be a realistic policy. That requires amending this formula, the existing one on trigger prices, and amending it to provide that whether a particular steel is or is not undercutting U.S. steel be based on its true production and transportation costs, $48 from Japan, $30 from Europe. I call upon the administration to provide for this upgrading in the quality of their regulations and to do so as soon as possible.●

YOU CAN DO IT

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. WHALEN. Mr. Speaker, I would like to congratulate the conferees who recently completed work on legislation H.R. 5383, to eliminate mandatory retirement before age 70 in the private sector and the Federal Government's present retirement age of 70 for most civilian employees.

Passage of this legislation represents many years of long interest and work by one of my former constituents, Mrs. O. R. Blalack, known professionally as Terri Blake. Ms. Blake proved long ago that it is never too late to realize one's ambitions. At age 50, she decided to do all the things she had wanted to do as a young woman but never had the chance.

Shortly after moving to Hollywood from Dayton, Ms. Blake began a career in movies with a role in "House on the Sea." Some 13 films followed together with appearances on television programs and talent shows. In addition, she has done volunteer work producing shows for the USO and the Veterans Hospital in Brentwood, Calif. Ms. Blake has also enjoyed a self-made success as a building contractor.

In 1970, Terri Blake published "You Can Do It," an inspirational book for anyone faced with advancing years and its accompanying problems. As early as 1968, she attempted to interest Members of Congress to introduce legislation prohibiting mandatory retirement at age 65. Ten years later, Mr. Speaker, I would like to add my appreciation to Ms. Terri Blake's long-standing efforts on behalf of this important legislation. I know that my colleagues join me in congratulating her as she celebrates her 75th birthday this year.●

SENIOR CITIZEN INTERN PROGRAM

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. WYDLER. Mr. Speaker, anyone involved in senior citizen affairs is painfully aware that Federal policy and legislation have an enoromous effect on the quality of life of our older Americans. Because of constant changes in these policies and laws, it is extremely helpful to develop an open line of communication among all parties involved, from agency personnel, to Congress, to, most important, the senior citizen.

Because it has proven to be such an important tool in that line of communication, I am very pleased to sponsor for the fifth consecutive year my senior citizen intern program. Two representatives of the senior community in my fabulous Fifth Congressional District will come to Washington to personally study the governmental activities that affect them. They, in turn, will be able to go home and share their knowledge with older American groups in the Fifth District, and, as an important fringe benefit, bring to me their concerns and reactions both during the program and after they return home.

The 1978 senior citizen intern program will be held in Washington, D.C., from May 8 until May 19, and is open to any Fifth Congressional District resident age 65 or older. Applications requesting information including details of a candidate's involvement in the senior citizen field are available from Fifth Congressional District senior citizen clubs and organizations, or from my district office at 150 Old Country Road, Mineola, N.Y. 11501, telephone 248-7676.

Candidates must be nominated by a senior citizen club or organization, and applications must be completed and submitted no later than Thursday, April 20. All applications will be reviewed by a panel of judges representing senior organizations in the Fifth District and Nassau County.

Participants will receive compensation in the amount of $700 for their 2-week stay in Washington.

I look forward to this year's senior citizen intern program, and to meeting the two residents of the Fifth Congressional District who will come to Washington to participate. I hope to get to know them well, for I will have many occasions to seek their counsel in the year ahead.●

MAMIE MOY: 1978 OUTSTANDING SENIOR CITIZEN OF GARDENA

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. CHARLES H. WILSON of California. Mr. Speaker, it is a pleasure for me to honor an outstanding resident of Gardena, Calif. Mrs. Mamie Moy has for years given a great deal to the people of Gardena—from youngsters to senior citizens. In appreciation for her work and tireless efforts, she was named the Outstanding Senior Citizen for 1978 by the city and the El Camino Kiwanis Club.

Being the recipient of this award does not tell the whole story. Mamie Moy may be 79 years of age, but it is 79 years young. For 10 years, she has involved herself in so many community and volunteer activities that they would be too numerous to mention. More than that, it has been her vitality and cheerful attitude that has helped so many.

Mrs. Moy was born in Aledo, Ill. She worked for a time in the Nation's Capital at the Census Bureau then moved to Chicago, Ill. with her husband where she lived for 35 years. She is the mother of three sons—Russell, Robert, and Philip and the grandmother of seven.

When her husband passed away 20 years ago, she decided to pick up and move on to Los Angeles. Instead of taking things easy, she got a job, at 58, at the Morningside Hospital as an assistant supervisor to the executive housekeeper. Even though she reached retirement age and could have opted to take things a little easier, she stayed on at the hospital until she was 69.

Helping people seems to be a very definite trait of Mamie's. For the past 3 years, she has volunteered time at the Denker Avenue Elementary School as a DOVE (Dedicated Older Volunteers in Educational Service). For 3 days a week, she spent her time helping youngsters who needed extra tutoring in reading, spelling, and mathematics. Unfortunately, some people feel they must be financially rewarded for their efforts, but with tight school budgets, it is not possible always to pay for the help our school children need. That is why people like Mamie are are so important to the community. To Mamie, her compensation is, "To see the individual progress and change the youngsters make with a little attention."

Mamie's favorite volunteer program and the one closest to her heart is SCAMP (the Senior Community Action Meals Program), which is held each weekday at the Gardena Community Center. She started with the program in January, 1976, 3 weeks after it went into effect because, as she says, she needed a real purpose, and if it seems at all possible, something to take up her time and something worthwhile. In 1977 alone, she devoted 1,441 hours of her time and talent working mainly behind the scenes, helping other volunteers to get meals on the tables for other senior citizens. For her work, she received an award for having given the most hours of dedicated service to the SCAMP program, and the Outstanding Senior Volunteer. But, characteristic of Mamie's attitude, she felt the award should have gone to someone else.

Mamie Moy is an example for all of us. She has given unselfishly of a precious commodity—her time. She is most deserving of the Outstanding Senior Citizen Award. She says, she is just a volunteer, but her work tells otherwise. She is, in every sense of the word, a perfect volunteer and an outstanding community servant.●

W. TROY BAKER—A DEDICATED PUBLIC SERVANT WHO REMEMBERED THOSE WHO SERVED THIS NATION, WHEN MANY AMERICANS FORGOT

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. JONES of Oklahoma. Mr. Speaker, one of the joys of being in the Congress is the opportunity of working with dedicated public employees. On March 31 of this year, one of the most respected and admired of the public servants I have know will be retiring as regional director of the Muskogee, Okla., Veterans Administration.

That man is W. Troy Baker. Mr. Baker has served the veterans of this country since 1946, rising from a position of contact representative to his present duties as director. I have had the opportunity and pleasure to work with Mr. Baker on numerous occasions in an effort to insure that those who served our Nation in the Armed Forces were afforded the respect and benefits they have earned. Troy Baker is truly a sincere and conscientious man with a compelling desire to do a thorough and efficient job. He has always fervently pursued all avenues of assistance for a deserving veteran.

In this day and age it is all too easy to criticize the so-called bureaucrat and the shortcomings of our Government programs. In all the years I have known Troy Baker, I have never heard a single criticism of his administrative abilities—a great tribute to any man.

For those of us who were fortunate enough to work with Troy Baker. I must add that we will all miss him upon his retirement. We will miss his forthright and honest approach to his job—a job of serving his fellow man in need.

Troy Baker will long be remembered as a special sort of public employee who believed in his work and worked to see that his agency fulfilled its mandate. For in the final analysis, Troy Baker did an outstanding job. I wanted to know that this 2d session of the 95th Congress took note of his long, selfless service to the men who served their Nation.

Troy, we appreciate you, we wish you well in the future.●

THE VOLUNTARY SECTOR AND THE TAX SYSTEM

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. WHALEN. Mr. Speaker, John W. Gardner, former Secretary of Health, Education, and Welfare and founding chairman of Common Cause, recently commented on tax reform as it relates to the American tradition of contributing voluntarily to the charity or charities of one's choice.

The House again is considering proposals to close loopholes in the tax code and to simplify Federal income tax returns. Historically, itemized deductions have been claimed for donations to religious, informational, scientific, educational, and charitable organizations, that is for private giving for public purposes.

However, due to increases in the standard deduction in the last 8 years, nonprofit organizations have lost about $5 billion in contributions as the percentage of taxpayers itemizing deductions has dropped from 50 percent in 1970 to fewer than 25 percent today.

All of this may be well and good. Yet, the question arises that if these social services are not funded by voluntary contributions, how then will they be financed? Alexander Pope wrote that—

All mankind's concern is charity.

But we may discover that the Government increasingly is becoming responsible for deciding which activities deserve support.

Once again, John Gardner's perspective is timely and relevant. His thoughts on this issue merit serious consideration by this body. I commend to my colleagues his remarks before the United Way of America in New Orleans:

THE VOLUNTARY SECTOR AND THE TAX SYSTEM

In the next two or three years the federal government may successfully destroy a unique and fundamental feature of the American system. And if events continue as they have recently, the destruction will be accomplished silently and invisibly as far as the American people are concerned.

The unique feature of our system that is endangered was best described by De Tocqueville 150 years ago in a passage familiar to every informed American:

"These Americans are a peculiar people. If, in a local community, a citizen becomes aware of a human need which is not being met, he thereupon discusses the situation with his neighbors. Suddenly a committee comes into existence. The committee thereupon begins to operate on behalf of the need and a new community function is established. It is like watching a miracle, because

these citizens perform this act without a single reference to any bureaucracy, or any official agency."

Out of that practice has come, over the years, an incredible variety of American institutions—not just the committees that De Tocqueville described but libraries, museums, civic organizations, great universities, the United Way, the Little Leagues of America, the Salvation Army, symphony orchestras, garden clubs, historical societies, adoption services, hospitals, religious organizations, Alcoholics Anonymous, the 4-H Clubs, and so on. Taken all together, they constitute a vitally important part of American life. Neither business nor government, they are sometimes referred to as the nonprofit sector.

This nonprofit segment of the private sector reaches into almost every field of human interest. The movement and vitality and creativity is constant. In 1973, the Center for a Voluntary Society estimated that 70 million Americans made some significant non-monetary contribution to the nonprofit sector.

Americans have always believed in pluralism—the idea that a free nation should—within the law—allow all kinds of people to take the initiative in all kinds of activities. And out of that pluralism, has come virtually all of our creativity. Within that tradition, unpopular ideas can be expressed, an utterly unknown person can come up with an important idea, religious groups can pursue their deepest convictions, great institutions of learning can arise and function independently.

When all kinds of people are left free to pursue all kinds of activities, a surprising number of them choose to serve some community purpose. And the American tradition has encouraged that. The private pursuit of public purpose is an honored tradition in American life. We do not regard the furtherance of public purpose as a monopoly of government. And that belief has released incredible human energy and commitment in behalf of the community.

But given the apparently bottomless reservoir of human commitment, one then needs another and more earthly ingredient—money. So it turns out that all of these nonprofit sector activities depend on another powerful American tradition—the tradition of private giving for public purposes. The ingredient of private giving supplies the element of freedom.

But now the alarm that should be shouted from the housetops is that our tradition of private giving for public purposes is endangered.

Government tax policy up to now has deliberately fostered that tradition. The tax deductibility of charitable gifts is a long-established policy designed to further an authentically American idea—that it is a positively good and important thing in American life for a great many people, quite independently, in their capacity as private citizens, to contribute to charitable, religious, scientific and educational activities of their choice. And we have demonstrated that preserving a role for the private citizen in these matters encourages creativity, and keeps alive in individual citizens the sense of personal caring and concern so essential if a mass society is to retain the element of humaneness.

But there is a new school of thought which takes a very different view. According to this school of thought, a tax deductible dollar given by Mrs. Jones to a school for blind children in her neighborhood is a dollar which—but for the deductibility—would have found its way into the federal treasury, and is therefore to be regarded as government money. It should in fact be labeled a "tax expenditure".

The new doctrine began innocently enough with a concern about the multiplicity of existing tax preferences. But the charitable deduction is not to be compared with—for example—an investment credit for industry. I happen to favor certain kinds of tax credit to industry, so I'm not raising the merits of the example. Let's just agree that the tax credit, justified or not, is a transaction between government and industry. The government grant financial benefits (through the tax code) to a profitmaking segment of our economy on the grounds that there will be an equivalent or greater benefit to the economy. It makes sense to calculate the amount of the benefit given by the government; and inventing the term "tax expenditure" to describe it was convenient and useful.

But from there on, the debate grows more complicated. Those who wish to simplify our excessively complex tax structure say "Get all of these 'special treatment' items out of the tax code altogether: if any group merits preferential treatment, let them receive it not through the tax code but through outright Congressional subsidy."

With all due respect to the tax code simplifiers, they've bitten off more than they can chew. As indicated earlier, I regard certain tax preferences for industry as justifiable, but I leave it to industry to make that case. I'm going to speak for Mrs. Jones and the school for the blind in her neighborhood—not by defending that particular case but by commenting on the broad and deep considerations that underlie it.

The area of our national life encompassed by the deduction for religious, scientific, educational, and charitable organizations lies at the very heart of our intellectual and spiritual strivings as a people, at the very heart of our feeling about one another and about our joint life. It is hallowed ground. And traditionally, government leaders have agreed that here if anywhere government should keep its distance, and the maximum degree of independence should be honored; here if anywhere the personal, family and community spirit should be preserved, here if anywhere those elements of the human mind and spirit that wither under bureaucratization should have a place to stand free

And this positive policy has worked. It has nurtured and enhanced some of the most creative elements in our national life. It has permitted the emergence of great world centers of learning, it has made our museums and medical centers famous throughout the world. And it has nourished our community life.

Have there been abuses? Of course. But they have been trivial compared to the great and lasting benefits in preserving our free society

I don't think the "tax expenditure" and tax simplification theorists reject these considerations. They just haven't given much thought to them. But there's another type of theorist we have to cope with, the government-knows-best type, who positively resents the freedom of the tax deductible gift. What right, he asks, does Mrs. Jones have to decide that that "government" dollar should go to a school for blind children? The sensible thing to do, he says, is to eliminate the tax deductibility and take Mrs. Jones' dollar (along with all the other tax deductible dollars) into the federal treasury. If the school for blind children needs money, let Congress and the federal agencies decide whether that's the best use for the money. After all, isn't Congress and the bureaucracy wiser than Mrs. Jones. There's no likelihood that they have seen (or ever will see) the school for the blind she contributed to, so their judgment will not be distorted by human feeling—or first-hand knowledge.

It's the kind of doctrine that makes your head ache. Here we always thought it was a really great thing that the American people are so remarkably resourceful in launching independent, private-sector activities designed to serve community purposes. We are proud that so many Americans give—of their own volition—to institutions or organizations that seem to them worthy, giving with their hearts, participating personally rather than authorizing some distant official to put it on a computer for them. We love the idea that the American people give $30 billion a year and contribute God knows how many billion more in volunteered non-monetary services. We are proud that 80 percent of individual giving comes from families with incomes of less than $20,000 a year We feel good about it precisely because it isn't a depersonalized processing of grants by a distant government, but a personal thing that keeps alive the spirit of concern and generosity in our people.

Now we're told that Congress and the vast agencies of government could do a better job of all that. Somehow the available evidence on government efficiency doesn't drive one toward that conclusion.

And when all activity serving public purposes is safely under Congressional control, what outlet will be left for all the personal caring and concern that is now the driving force for voluntary, independent, unbureaucratic activities. Does anyone believe that a manual of regulations from Washington will unlock that miraculous energy?

This is not to speak contemptuously of the Federal Government. I've served two tours of duty in government and I respect it. In our complex, swiftly changing society in which the conflicting interests of innumerable legitimate groups must somehow be reconciled and important shared purposes must be advanced, a vigorous competent government is necessary, and we must support it and make it work. But the government will best contribute to the health of the society if it actively furthers the vitality of the private sector.

Unfortunately, elimination of tax deductibility is only one of the ways in which contemporary tax theorists are whittling away at the vitality of our voluntary sector. There are all sorts of schemes afoot. I won't go into them here because I want to conclude with one final example of the way in which government erosion of the voluntary sector could alter the whole style of our community life. The United Way is a confederation of some 2000 local United Ways across the country, that enjoy grassroots autonomy. The national office is dependent on contributions from the local organizations. The locals raise the money in their own communities. Hundreds of thousands of Americans are involved in the raising of the money and in volunteer work in the agencies. Local leadership decides how the money should be allocated among the agencies in the community. There is never a time when local agencies aren't quarreling over who should get the money, but that's as it should be. The arguments will never end because there are more needs than dollars. But the important thing is that real, live, grassroots Americans, functioning as a kind of non-governmental "Community Board", trade it out at the community level and reach their own decisions.

Someday—soon I hope—we're going to wake up to the fact that the government of a gigantic, tumultuous society can't be administered unaided by a conventional, centralized, topdown governmental hierarchy. Local levels of government and local private sector institutions are going to have to figure out how they can collaborate to make things work in the community in which they live. Washington can't do it for them.

As a former Secretary of Health, Education, and Welfare, I can assure you there is no way that a huge federal agency can make

judgments that are right for local communities. Local leaders must make those judgments. The same kind of government-private sector collaboration has to take place at the state level, and we're going to see the United Way playing a greater role at that level.

Look at the leadership of any United Way campaign and you will find strong representation of the corporations, the unions, religious and racial groups, professional organizations—the whole array of groups outside of government. And just as all these groups are represented, so all of them should rise to the defense of the voluntary tradition. Every element of the private sector should recognize the threat. What is at stake is one of the most precious customs of the private sector—the custom that people give to activities of their own choice, at their own initiative. If that custom dies then the government will lift the dollars gently from your wallet in taxes, toss them into the political cauldron of Congress, run them through the Executive Branch computers, and your favorite object of philanthropy will get what it gets. Let the government do the worrying. Why should you sweat as a volunteer to help some institution you care about? Big Daddy will look after us all.

Those who are concerned with the preservation of individual responsibility and the vitality of nongovernmental America must point out that even the present charitable deduction isn't adequate to accomplish the best result.

Five increases in the standard deduction in the last eight years decreased the number of taxpayers itemizing deductions from almost 50% in 1970 to less than 25% today. The result has been damaging to the voluntary sector. Contributions to public charities have decreased, making it more difficult to meet the increasing demand for social services. Recent studies estimate that charities have lost about $5 billion in contributions because of these increases in the use of the standard deduction, and that in 1977 alone the loss will be over $1.3 billion. If the Carter Administration's tax reform proposals pass, it is estimated that the number of taxpayers itemizing their deductions will fall to 16%.

The only way to reverse this trend is to amend the tax code to allow all taxpayers to take a deduction for their charitable gifts whether they itemize or not. This change will eliminate a two-fold danger: first, that the denial to the vast majority of Americans of any encouragement to give will bring more government into our lives, and second, that charitable giving will become the province of only the wealthy.

In a bi-partisan effort Representatives Joseph L. Fisher (D-Va.) and Barber B. Conable (R-NY.) members of the tax writing House Ways and Means Committee intend to offer just such an amendment when that important committee takes up President Carter's tax proposals. Messieurs Conable and Fisher argue that public policy should encourage the work of charitable organizations, not diminish it. They are absolutely right and we had better get behind their effort.

Surely no substantial element in the private sector wants our tradition of voluntarism and private giving to die. And most government servants don't want that outcome either. All elements in the private sector should unite to maintain a tax policy that preserves our pluralism. And government should help in every reasonable way to insure that result.

It isn't easy to defend the area covered by private giving because it's made up of so many unrelated, unofficial, unclassifiable activities. But that's one of the very qualities that makes it beautiful. It isn't a describable thing. It's an arena in which freedom survives and flourishes. Let's keep it that way.●

IN SEARCH OF A RATIONAL LINER SHIPPING POLICY

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. WHITEHURST. Mr. Speaker, on May 9, 1977, I introduced two bills dealing with rates or charges by State-owned and nonnational carriers in the foreign commerce of the United States, H.R. 7025, known as the Ocean Shipping Act of 1977, and H.R. 7026.

In further reference to the issues addressed in those two bills, I am introducing at this point in the RECORD a paper entitled "In Search of a Rational Liner Shipping Policy," which was presented at the Northwestern University Forum Transportation Center last week by Mr. Karl-Heinz Sager, deputy chairman of Hapag-Lloyd AG of Hamburg/Bremen, Germany. In this report, Mr. Sager deals with the various alternatives to organize worldwide liner shipping in the future.

I believe that Mr. Sager has raised a number of valid points, and I hope that my colleagues will give them careful consideration.

The paper follows:

IN SEARCH OF A RATIONAL LINER SHIPPING POLICY

(By Karl-Heinz Sager)

Ever since the existence of steamships enabled the inauguration of regular liner services, they have been the backbone of world trade. Technological progress over the past years which lead to new transportation systems has safeguarded that the major part of high valued industrial products will also in the future be carried by regular liner ships.

Its close network today is not only linking every seaport but also many inland points with the rest of the world. If world trade has grown manifold and if people can buy anything anywhere originating from any part on earth, this is largely due to the efficiency and steady improvement of this ocean transportation sector.

If the importance of liner shipping for our modern way of life is accepted, it must equally be recognized that the quality, frequency and economic pricing of today's liner shipping would not have been possible without the existence of Liner Conferences. The real value of these conferences still varies considerably depending on whether we look at the American trades and the so called "Open Conference" system or at the more sophisticated "Closed Conferences" in most other world trades which permits memberlines to fully rationalize their resources.

This brings me already to the heading of today's presentation:

THE VARIOUS ALTERNATIVES TO ORGANIZE WORLDWIDE LINER SHIPPING IN THE FUTURE

Why should the future look different from what has been practiced in the past? There are a number of reasons for it, most of which have developed during the past 10 years.

The growing emergence of fleets of developing countries with national cargo protection laws.

The capital intensive change to modern transportation systems, such as containers, lash, ro/ro.

The intrusion of a modern COMECON Merchant Fleet in the free trades of the Western world.

The increasingly narrow interpretation of the U.S. Shipping Act by the Department of Justice which virtually stopped the efficient work of liner conferences in the American trades.

The cross-effect of these developments has had such negative consequences for many shipowners and conferences that they will be unable to exist much longer unless changes take place.

The so called "freedom of the seas" is about to die. Bilateral equal-access agreements are common practice with and between developing and COMECON countries. How helpless the Western world is against these developments is demonstrated by the fact that even the Department of Justice has not opposed equal-access arrangements between the United States and some Latin-American countries as well as the quasi bilateral agreement with the Soviet Union both of which must be unforgivable violations against its philosophy of free competition.

But by far the majority of world trade moves between Western industrialized countries, almost all of whom have subscribed to the OECD Code of Liberalization! The adherence to this liberal philosophy has, however, so far only resulted in a diminishing influence of Western shipowners in the maritime world.

SO THE BASIC QUESTION IS, HOW IS THE WESTERN WORLD GOING TO ORGANIZE ITS LINER TRADES IN THE FUTURE?

One thing is an absolute certainty, there will be no alternative to effective conferences. The conference system is like democracy of which Winston Churchill said that it has many shortcomings, but that there is nothing to replace it.

But whereas all governments of the Western world have fully recognized the autonomy, efficiency and structure of strong conferences, the United States are about to strangle the rather weak kind of conference they permit to exist in their overseas trades.

What are the basic differences between these two types of conferences?

The expression closed conference is already misleading in its term. Even its closest version with an effective "deferred-rebate" system and a money pool has never been impenetrable for aggressive and qualified outsiders and even less so for a recognized national line of one of the trading partners.

However, these conferences offer to their members unlimited flexibility in the degree of cooperation from voluntary sailing limitations to fully integrated services within consortia and/or pools. It is today hardly questioned anymore, that such rationalization measures are not only a necessity but also to the benefit of shippers through lower transportation costs.

The other, may be even more significant is the privilege and duty of consultation between conferences and shippers. With the formation of National Shippers' Councils in most parts of the world in the 60's and the adoption of the so called "Note of Understanding" between the European Shippers' Council and CENSA in 1963 the consultation procedures became a formally established permanent institution.

Consultation should not be misinterpreted with negotiation. Consultation in its proper function means timely and meaningful discussions of all matters of mutual concern such as general rate increases or surcharges and the exchange of views before taking final decisions.

It has proved to be the most effective means of bringing shippers' views to the attention of conferences and created an understanding for the commercial necessity to have a balance of supply and demand of tonnage in liner services. The recent joint press statement by CENSA and European Shippers' Council at the conclusion of their annual

meeting at Montreux in September 1977 was an impressive manifestation that this type of conference system works to the satisfaction of both sides.

The same cannot be said of the Open Conference System which has to be practised in the American trades.

The U.S. Department of Justice has always opposed the special privileges and exceptions which were granted to conferences under the Shipping Act of 1916. Under this permanent pressure the limited operational freedom of conferences has been further restricted and its antitrust immunities over the last years eroded to a degree that their proper functioning is no longer possible.

The compulsory "open door" policy combined with either none or weak shippers' contracts offers little protection to conferences and their loyal shippers. Due to such lack of incentive, many lines or operators prefer to enter the U.S. trades as outsiders creating almost permanent overtonnaging. They feel not committed to the trade as a whole, pick out the most attractive cargoes and ports at their pleasure and leave the trade when they find better employment in the market. On the Northatlantic F.I. more than 50 lines have come and gone after worldwar II.

This philosophy prohibits any meaningful tonnage and service rationalization efforts. The fact that the American trades have developed into a real dumping ground for all categories of outsiders naturally hurts the largely conference-minded American lines the most, in spite of two Merchant Marine Acts passed in Congress for their protection.

This deplorable situation is almost unbelievable at a time when high capital demand for new sophisticated liner tonnage more than ever calls for new forms of multinational cooperation in order to maximize the economy of scale. There is no rationale other than that the traditional belief in unrestricted competition has grown into a religious doctrine wtih many influential people in the United States. This commercial and legal climate was also the reason that COMECON carriers had it so easy to enter the American scene in such a big way.

HOW CAN U.S. LAWS HAVE SUCH FAR-REACHING EFFECTS?

Many people rightly ask why the trading partners of the United States accept that the FMC or DoJ assume control over international sealanes. The answer is quite simple, most of them have no countervailing powers.

The exterritorial application of U.S. shipping legislation is being pursued so long as no national laws of its opposite trading countries are challenging its validity. Because most Western governments decided for good reasons not to regulate international liner conferences, their shipowners are now confronted with the full thrust of unilateral U.S. Anti-trust regulation.

In contract, the Department of Justice and even the FMC refrain from any interference wherever the other nation has its own maritime legislation. This is a two-way road of political behavior and encourages countries to introduce unilateral shipping Laws. As a consequence private shipowners are to a growing extent facing a combination of unilateralism, bilateralism, and protectionistic legislation all over the world.

IS THERE ANY MULTINATIONAL SOLUTION TO THIS DEVELOPMENT?

More and more shipowners and governments in the Western world are seriously considering whether the UNCTAD Code of Conduct for Liner Conferences, approved by an overwhelming majority of member countries in 1974, may in the end not be the best solution for a worldwide order in liner shipping.

In spite of a number of reservations which do exist with regard to certain parts of this document, the UNCTAD Code acknowledges many premises, which are indispensable for shipowners as well as shippers:

Absolute priority for "self regulation", i.e. government interference or the respective application of certain clauses of the Code will only take place if the commercial parties cannot agree amongst themselves.

The support of the conference system, which is under strong attacks in certain parts of the world, particularly the United States.

The promotion of cargo sharing, which is the only way for an economical operation in modern liner shipping with its huge investments.

The affirmation that shipowners should earn a reasonable profit.

The obligation for consultations between shipping conferences and shippers' councils.

The self-restraint of governments to the role of observer.

The fate of the UNCTAD Code depends largely on the maritime countries of the European community and Japan. In spite of certain differences of opinion they are presently in the last stage of finding a common platform to be able to jointly ratify the Code. If nothing else helped to unite them, it is the U.S. shipping legislation and the COMECON threat.

IS "DEREGULATION" ANOTHER ALTERNATIVE?

In this country there are many people who believe that "deregulation" may be the answer for liner shipping in the future. Deregulation has almost become a slogan as if it were an ingenious solution for all difficulties of our present worldwide economy as well as the transportation industry. In liner shipping deregulation means dissolution of conferences and a "free for all".

The Department of Justice is among its main protagonists and in this context came out early last year with a number of recommendations for the so called regulated liner industry. I hope that today the antitrust division looks more critical at this document which took two years to be completed and which was not exactly scientifically done, to say the least. But this can be no surprise when considering that none of these experts had any practical knowledge of the shipping industry.

If the conference system does not work in the American trades, it is not because the system is wrong, but because it was never allowed to function. If an aeroplane is never permitted to take off the ground no one can blame the pilot.

What the Department of Justice recommended was that conferences were to be stripped of their vital components even further. Most shipowners agree in that they would rather have "deregulation" or operate as outsiders than be members of such disabled conferences.

But no one should have illusions because "deregulation" would lead to a deadly rate war and without slightest doubt result in a financial collapse of many carriers within less than a year. Only the strongest would survive such battle with the state-owned comecon fleets in the forefront.

For the American lines—apart from those with very healthy parent companies—the only alternative would be a take-over by the U.S. government. But governments don't like to pay for shipowners' loses, they generally tend to rather allocate a specific part of their national trade to their national lines.

Therefore we can expect with near certainty that once the "deregulated" phrase is over, shippers will be faced with only few lines left, with cargo sharing legislation, and certainly with higher freightrates. If some people consider today's conferences in the American trades as monopolies, I wonder what they then are going to call them.

WHY IS A NEW REGIME REQUIRED IN U.S. TRADES?

Contrary to the days of conventional ships the organization of liner shipping in the container and ro/ro age requires not only a longterm commitment by the carriers in a particular trade but, above all, a capital investment which normally surpasses the financial capabilities of any individual company. It is therefore not only an option but often a commercial "must" for container carriers to look for partners in order to form a national or multinational consortia. This new form of international cooperation is strongly encouraged by governments all over the world with the exception of the United States, where these new technologies had their origin.

In the Conference linking Europe with the Caribbean and Central American countries F. I., a new fully-containerized joint service under the trade name of Caribbean Overseas Line (CAROL) was inaugurated last year with fast modern standardized vessels. Partners of this Consortia of otherwise independent lines are CGM of France, Hapag-Lloyd of Germany, Harrison of England, and KNSM of Holland. Research, planning, and preparation of this service took about 4 years with all lines ordering 6 sisterships at the same shipyard. I dare say that this unparalleled service would not exist, had the formation required Section 15 agreement in the United States.

But Section 15 agreements are only one of several features of the present U.S. shipping legislation and administration which stand in the way of modern linership operations. As long as this official American policy is not being changed there will be no real progress in its liner trades.

No one could have foreseen in 1916 when the Shipping Act was passed what the transportation requirements would be 60 years later. If this rather natural thesis is accepted, U.S. legislators should take the courage and wisdom to proceed with the necessary amendments that are long overdue. But those amendments should not only overhaul outdated legislation, they should also improve the slow and bureaucratic administrative procedure.

WHAT IS THE ANSWER FOR THE AMERICAN TRADES?

I believe, I have covered the various alternatives how liner shipping could be organized in the future, viz, the closed and the open conference system, unilateral legislation, bilateral equal-access agreements, multinational consortia and joint services, as well as deregulation.

I have mentioned the UNCTAD Code of Conduct for Liner Conferences as a possible compromise that would give liner shipping an international order which is so urgently needed.

With regard to the overseas trade to and from the United States I dare say that almost any change is better than what we have now. Conference members are more than anxious to offer American shippers and cosignees first class services at reasonable prices as well as regular consultations, but what they need in return is a legislative environment that would allow them—

To rationalize supply and demand of their services.

To make cargo sharing arrangements,

To set freightrates at appropriate levels for shippers to earn a reasonable return on investment,

To have rate-making authority on intermodal transportation,

To build a consultation machinery with shippers' councils to be formed in the United States,

To enter into effective contract arrangements with shippers, and

To protect themselves against competition, particularly from Eastbloc fleets.

It is my understanding that a growing number of responsible people in this country is becoming aware that liner shipping is in distress. I particularly refer to the former and the present chairmen of the FMC, Messrs. Bakke and Daschbach, who in remarkable public presentations strongly advocate a change of the American maritime policy vis a vis liner shipping.

But I know that a number of Senators and Congressmen who have taken an interest in this field, are seriously concerned as well. I call on them to introduce and promote new legislation. If my above points are taken into account, they will also be able to help the United States to a healthy Merchant Marine.●

FREEDOM FOR CYPRIOTS

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. YATRON. Mr. Speaker, as a member of the House Committee on International Relations, I have long espoused the need to implement a foreign policy that adequately recognizes the great tragedy that has been perpetrated upon the Cypriot people by Turkey. It is essential that we restore the moral authority of this country in its conduct of foreign policy.

Despite strong words, the administration has failed to exhibit decisiveness in this area. It is the responsibility of the Congress, therefore, to insure that the people of the world know that the United States cannot and will not condone the injustices which have been perpetrated upon the Cypriot people. Clearly, this is an issue which cries out to all humanity for a solution.

In view of the uncontroverted evidence of violations by Turkey on Cyprus, I feel the United States must speak out now. If we are to preserve our credibility and commitment to human rights throughout the world, we must be prepared to stand up for those rights wherever violations occur.

America must take a firm and consistent stand with our allies as well as our adversaries, or our words will ring hollow to the world.

Turkish aggression against Cyprus symbolizes the deprivation of the most basic rights of an entire population through the use of force.

Recently I received a copy of the following resolutions from Mr. Frank Antinopoulos, supreme secretary of the Greek-American Progressive Association. Because my strong feelings on this issue concur with those expressed in these resolutions, I would like to present them to my colleagues in the House in the hope that they will receive favorable consideration:

FREEDOM FOR CYPRIOTS

RESOLUTIONS

Whereas, The unconscionable occupation of a part of the Island of Cyprus by Turkish troops has been condemned by resolutions of the United Nations as an invasion of a sovereign State, and the Congress of the United States, considering that invasion and occupation illegal acts perpetrated with the illegal use of NATO war material, has imposed restrictions to further military aid to Turkey, the lifting of which restrictions is to be contingent upon a substantial progress toward a peaceful settlement and termination of the occupation;

Whereas, The Turkish Government continues to ignore the resolutions of the United Nations and exerts pressure on the United States Government to lift the arms embargo without a change of the status quo in Cyprus and, instead of taking steps to end the occupation, the Turkish Government has populated the occupied parts of Cyprus with emigrants from Turkey;

Whereas, Resolutions of the United Nations have no practical value, unless the member nations severally and jointly act to enforce them;

Whereas, According to disturbing recent reports, the Executive Branch of the United States Government is considering further military aid to Turkey as an issue separate from the Cyprus Question and intends to seek the lifting of the embargo;

Whereas, The Turkish Government through various actions has selectively suppressed the rights of its citizens comprising the Ecumenical Patriarchate in Istanbul, has rendered that venerable institution a virtual prison of its occupants who live in constant fear of sacrilege and of the loss of their lives, and is repeatedly violating treaties in an obvious endeavor to extinguish the viability of the Ecumenical Patriarchate at its present location; and

Whereas, President Carter has promised in much-publicized speeches to speak and act forcefully regarding violations of human rights in other countries, and favorable consideration of Turkish requests at present would not be in consonance with such pronouncements; be it, therefore,

Resolved, That the Supreme Lodge of the Greek-American Progressive Association protests President Carter's intent to have the embargo of arms to Turkey lifted and petitions him to abandon this intent;

Resolved, That the Supreme Lodge of the Greek-American Progresive Association petitions the members of the United States Senate and House of Representatives to remain steadfast in their resolve now in effect, whereby the lifting of the embargo of arms to Turkey is conditional upon substantial and concrete steps taken toward ending the occupation of Cyprus;

Resolved, That the Supreme Lodge of the Greek-American Progressive Association petitions the President of the United States to use his influence to reverse the trend of actions being taken by Turkish authorities against the holy Ecumenical Patriarchate, its occupants and its institutions in Turkey, and to have restored the rights and privileges no longer enjoyed by the same; and

Resolved, That the Supreme Secretary is directed to send copies of these resolutions to the President, the Vice-president and the Congress of the United States, and to publicize these resolutions within and without the Association.

Adopted unanimously by the Supreme Lodge of the Greek-American Progressive Association in meeting assembled in Pittsburgh, Pennsylvania, on the 25th day of February 1978.●

NUCLEAR LICENSING REFORM

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 21, 1978

● Mr. UDALL. Mr. Speaker, today I am introducing the Nuclear Siting and Licensing Act of 1978. This is legislation proposed by the President to reform the process which this Nation licenses commercial nuclear generating facilities.

As we are well aware, the President's energy program contemplates increased reliance on present generation light water nuclear powerplants, while deferring fuel reprocessing and terminating the Clinch River Breeder project. It is the opinion of many that the current licensing system constitutes an insurmountable barrier to the attainment of the country's light water reactor goals and thus legislation is needed to streamline the process. Despite the nuclear industry's adamant, (and I believe shortsighted and self-defeating) opposition to the President's reprocessing and breeder reactor policy, the President is attempting to carry out his commitment to light water technology by proposing this legislation. I believe Mr. Carter is to be complimented for his good faith efforts, and indeed, his patience.

Mr. Speaker, there is much confusion about the purpose of this legislation. During the rather lengthy development of the bill by the Administration, we read news stories or heard public comment about a bill that would "expedite" or cut short the 10 to 12 years it takes to bring a nuclear reactor from the conceptual stage to operation. This characterization is misleading. The purpose, it seems to me, is to restructure the licensing process so that the delays ascribable to the licensing process are moved to an early time in the proceedings prior to industry investment of substantial capital. While this is a worthy objective that deserves full consideration, I must urge caution in its pursuit because of its inherent conflict with full public participation and the unencumbered authority to protect the public's health and safety. The conflict is not necessarily irreconcilable, but when the subject is nuclear power, limiting the ability to regulate or narrowing the public's roll in the process are steps which should not be lightly taken.

I think it also important to note at this time that nuclear licensing reform will not be useful unless something is done to boost public confidence in the Nuclear Regulatory Commission. I have observed that the NRC has had a difficult time in establishing itself as an independent regulatory agency separate from the agencies whose job it is to promote the use of fission power. I hope the administration takes careful note of the need to develop a strong and independent NRC when it selects the candidate to fill the Commission seat that is now vacant. It is particularly important that the appointee be well qualified to give full consideration to the technical and social factors that enter the Commission's decisionmaking.

Mr. Speaker, this is not the kind of bill that can move quickly and I intend no disrespect of the administration when I point out that it failed to meet its own goal in drafting this priority legislation by 7 months. The issues, which range from NEPA and federalism, to the complexities of administrative procedures

and nuclear technology itself, are all difficult. I am introducing this bill today not because I necessarily agree with the administration's resolution of these issues, but because the proposal deserves a full airing which will commence on April 4 when the Subcommittee on Energy and the Environment holds its initial hearing on the bill.●

HOUSE OF REPRESENTATIVES—*Wednesday, March 22, 1978*

The House met at 10 o'clock a.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

My grace is sufficient for Thee: for my strength is made perfect in weakness.—II Corinthians 12: 9

O God, our Father, the light of life, the strength of our spirits, and the glory of all that is good, we lift our hearts unto Thee that we may receive anew the wisdom, the power, and the love which make us sufficient for all our needs. We come to Thee with lives stained by wrongdoing, sobered by failure, subdued by difficulties yet with a desire and a determination to do our best for our country that there may be justice, freedom, and good will among our people and among the nations on this planet. Make us great leaders of a great people in a great age; for Thy name's sake. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries, who also informed the House that on the following dates the President approved and signed a bill and a joint resolution of the House of the following titles:

On March 14, 1978:

H.R. 9851. An act to amend the Federal Aviation Act of 1958 to improve cargo air service.

On March 15, 1978:

H.J. Res. 746. Joint resolution making urgent power supplemental appropriations for the Department of Energy, Southwestern Power Administration for the fiscal year ending September 30, 1978.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 494. Concurrent resolution expressing the sense of Congress regarding the operation of certain rail passenger service by the National Railroad Passenger Corporation.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3813) entitled "An act to amend the act of October 2, 1968, an act to establish a Redwood National Park in the State of California, and for other purposes."

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 6782. An act to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion.

ADJOURNMENT OF THE HOUSE FROM WEDNESDAY, MARCH 22, 1978, TO MONDAY, APRIL 3, 1978

Mr. WRIGHT. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 544), and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 544

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Wednesday, March 22, 1978, it stand adjourned until 12 o'clock meridian on Monday, April 3, 1978, and that when the Senate recesses on Thursday, March 23, 1978, it stand in recess until Wednesday, March 29, 1978 or April 3, 1978, as determined by the Senate on Thursday, March 23, 1978.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

FINANCIAL PLIGHT OF THE AMERICAN FARMER

(Mr. WHITTEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous material.)

Mr. WHITTEN. Mr. Speaker and my colleagues, you have honored me throughout the years by having me as chairman of the Subcommittee on Agriculture and Related Agencies of the Committee on Appropriations. We all have been disturbed recently at the terrible financial plight facing the American farmers at the moment. Not only that but those of us who have studied history realize that, if this problem is not soon solved, it will spread to other sections of our economy and we will all go down the road to financial ruin together.

Later today we will take up a supplemental appropriations bill to meet limited disasters in several sections of our Nation. At that time I expect to discuss in detail the legal authority and the funds we have now to alleviate the farmers' immediate problem without waiting for new legislation. I would like to call attention to a bill which I introduced, which would raise farm prices in the same proportion that the wages received by labor and the price index are increased. This bill, H.R. 9608, has been endorsed by all members of my Appropriations Subcommittee and many others. I hope it will have your support as well as that of members of the Legislative Committee who are considering its provisions at the present time.

SKOKIE MARCH SHOULD NOT BE ALLOWED

(Mr. LEHMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEHMAN. Mr. Speaker, I strongly oppose the march of the American Nazi Party in Skokie, Ill., on April 20. The constitutional right of freedom of speech and freedom of assembly does not grant the license to incite violence and inflict injury.

Because so many survivors of Nazi Germany reside in Skokie, the Nazis have deliberately selected a place where the most harm could be directed toward Jews. They have publicly stated their aim to incite hatred since, in their words, "Where one finds the most Jews, one finds the most Jew-haters."

It is not the case that this march is planned simply to express an opposing point of view and thus should be absolutely protected by the first amendment to the Constitution. I believe in the protection provided by the first amendment to express views that I do not like, however disagreeable they are to me. However, when there is declared intent to arouse emotions, violence is not only likely, but intended. This goes far beyond the toleration and protection of views provided by the free marketplace of ideas where opposing viewpoints are presumed to compete equally.

Those of us who firmly believe in the first amendment can still consistently hold a hierarchy of values which allows us to recognize, in practice, when an act of physical harm is in the offing. John Stuart Mill, in his great work, "On Liberty," wrote of the difference between freedom of opinion and the responsibility of one's actions. Even opinions lose their immunity when the circumstances in which they are expressed cause injury.

It is my firm belief that where there is reasonable assurance that Nazi or similar activity is primarily used to incite violence, it must not be allowed.

AUTHORIZING THE CLERK TO RECEIVE MESSAGES FROM THE SENATE AND THE SPEAKER TO SIGN ENROLLED BILLS AND JOINT RESOLUTIONS DULY PASSED

Mr. WRIGHT. Speaker, I ask unanimous consent that, notwithstanding any adjournment of the House until Monday, April 3, 1978, the Clerk be authorized to receive messages from the Senate and that the Speaker be authorized to sign any enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

The SPEAKER pro tempore (Mr. BRADEMAS). Is there objection to the request of the gentleman from Texas?

There was no objection.

AUTHORIZING THE SPEAKER TO ACCEPT RESIGNATIONS AND APPOINT COMMISSIONS, BOARDS, AND COMMITTEES

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that, notwithstanding any adjournment of the House until Monday, April 3, 1978, the Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR

WEDNESDAY BUSINESS ON WEDNESDAY, APRIL 5, 1978

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order on Calendar Wednesday, April 5, 1978, may be dispensed with.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I wonder if the distinguished majority leader will tell us the calendar for the remainder of the day. I understand there have been some changes in the order. Will we finish the postal bill?

Mr. WRIGHT. If the gentleman will yield, yes, the gentleman is correct, there have been changes.

The business in order for the remainder of today is first the emergency appropriation for disaster relief, which we will take up immediately; second, we will consider H.R. 9518, the Shipping Act Amendments of 1978. That last measure is under an open rule with 1 hour of debate.

We would hope to complete those two bills, and if we do so within a reasonable time, then the House will adjourn. We do not expect to take up any further consideration of the postal reform bill today.

Mr. BAUMAN. In that event, does the majority leader have any time for adjournment, perhaps noon? It would seem to me we might be able to finish within 2 hours.

Mr. WRIGHT. If the gentleman will yield, we will finish just as quickly as we can.

I should not want to preempt or prejudge the disposition of the House, but I should think these two measures might be dispensed with in relatively good order.

Mr. BAUMAN. I thank the gentleman.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

EMERGENCY APPROPRIATIONS FOR DISASTER RELIEF

Mr. MAHON. Mr. Speaker, pursuant to the order of the House on Thursday, March 16, 1978, I call up the joint resolution (H.J. Res. 796) making an urgent supplemental appropriation for disaster relief for the fiscal year ending September 30, 1978, and ask unanimous consent that the joint resolution be considered in the House as in the Committee of the Whole.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 796

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sum is appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 1978, namely:

FUNDS APPROPRIATED TO THE PRESIDENT

FEDERAL DISASTER ASSISTANCE ADMINISTRATION

DISASTER RELIEF

For an additional amount of "Disaster relief", $300,000,000, to remain available until expended: *Provided,* That not to exceed 3 per centum of the foregoing amount shall be available for administrative expenses.

GENERAL LEAVE

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks in regard to this joint resolution (H.J. Res. 796).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. MAHON. Mr. Speaker, I move to strike the last word.

Mr. Speaker, last week hearings were conducted by the Subcommittee on Housing and Urban Development, headed by the gentleman from Massachusetts (Mr. BOLAND), in regard to additional funds required for disaster relief. The full committee on Monday of this week approved the recommendation of the subcommittee and the resolution is now before us.

The legislation was handled in the subcommittee and in the full committee by the gentleman from Massachusetts (Mr. BOLAND) who will now make a statement in regard to the legislation.

Mr. BOLAND. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, this supplemental appropriation of $300 million is urgently required to fund relief activities in numerous States affected by severe weather.

To review the funding situation—the Congress provided $150 million for disaster relief in the regular annual Appropriation Act for 1978. It was believed that this amount would be sufficient to cover the costs associated with an average year for emergency and disaster declarations. However, the extensive flooding in Johnstown, Pa., Kansas City, and Appalachia in 1977 quickly demonstrated that additional funding would be required. In recognition of this the administration transmitted a supplemental request of $150 million with the President's budget in January. Since that time, severe weather conditions in Michigan, Indiana, Ohio, Massachusetts, Rhode Island, Connecticut, California, and elsewhere have resulted in a requirement for an additional $150 million. The request for the second $150 million increment of supplemental funding is still pending within the administration.

Over $168 million of the $300 million the committee is recommending is for reimbursement to other Federal agencies for relief already provided for past declarations. These reimbursements have had to be delayed due to the shortage of funds. This relief comes in many forms—such as temporary housing, unemployment assistance, individual and family grants, debris removal, and repair and restoration of damaged facilities. The balance of the $300 million is required to insure that States and localities will be reimbursed for costs they have already incurred and to provide a small reserve for potential emergency and disaster declarations during the balance of fiscal year 1978.

Mr. Speaker, the disaster relief fund is exhausted. Firm commitments to States and localities far exceed the current balance on hand. These funds are required today. I urge their immediate approval.

Mr. WHITTEN. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, my colleague, Hon. EDDIE BOLAND, of our Committee on Appropriations has done a fine job in bringing this bill for $600,000,000 before us to remedy as best we can the disaster costs that have accrued as he has pointed out.

Mr. Speaker, I take this time to point out a much greater threat—in fact, an impending disaster facing the American farmer and through him our entire economy.

I have pointed out the seriousness of the existing situation numerous times

on the floor, as well as before the legislative committee and numerous groups of farmers.

On February 14, I again called attention to the testimony before our Appropriations Subcommittee for Agriculture of which I have the honor to serve as chairman: We had before our Subcommittee Gov. Donald E. Wilkinson of the Farm Credit Administration. The Governor testified that farm income had dropped 28 percent since 1972 and 56 percent since 1973. He further testified that many borrowers from the Production Credit Associations were mortgaging their land to the Federal Land Banks to pay their production costs. The Farmers Home Administration has loans outstanding of more than $20 billion, much of it for farm production. The Federal Deposit Insurance Corporation is calling on commercial banks, which have deferred payments due to farmers, to foreclose farm mortgages.

Not only is this situation disastrous to the many who are engaged in agriculture, but it is also going to be felt by those with whom they deal and provide a major market for. If we do not do something to correct the situation, it will rapidly reach all the way through our economy.

As I mentioned a moment ago, on yesterday I called the attention of the Secretary of Agriculture and his associates to the fact that, under existing law, there is ample authority and enough money to meet the situation.

I would like to call the attention of my colleagues in the House to the fact that under the charter of the Commodity Credit Corporation, that corporation, which is a $14.5 billion corporation—and we find this in 15 U.S.C., 714(c)—is given the following specific authority: First, to support prices through purchases; second, to procure commodities for sale; third, to remove and dispose of surpluses; and fourth, to export for the development of foreign markets.

That means that this $14.5 billion corporation is presently authorized—and it has over $13 billion now available to move in and support farm prices at the present time on a moment's notice.

Not only that, but this Congress some time ago, at the instance of our Subcommittee on Appropriations, provided for a sales manager. At that time we had $10 billion worth of commodities on hand and our Government would not offer them for sale in world markets. We had no sales manager; we had no programs; we had nothing. Then we provided for a sales manager—see 15 U.S.C. 713 (a–10)—and in a short time, we sold these commodities for dollars. Now it appears we have a sales manager; but we have few, if any, commodities.

I want to make it plain that my suggestion would not call for channeling all our commodities through the Commodity Credit Corporation. But it would mean that we can support farm prices immediately in order to prevent an overwhelming disaster and to restore our farmers to a workable basis. Not only that, but if CCC had stocks on hand, our Government working through a sales manager, could assure that American companies, American international companies, or others maintain our share of foreign markets. In case they failed to sell our production, we could move in and sell such commodities to the point of keeping our customers and, thus, prevent another such disaster, such as the embargo on the export of soybeans.

So, Mr. Speaker, I want to repeat that I spent an hour yesterday with the Secretary of Agriculture and his associates pointing out that we already have existing law and existing funds that could be used to meet the present emergency. The Secretary was to have seen the President on this matter yesterday afternoon and, I understand, did see him.

In today's Washington Post—and I hope the Members will read that story closely—we will see that Mr. Bergland said the chances are 50–50 that the administration would move in under existing law to meet this need.

The Secretary of Agriculture is to meet with the chairman of the Legislative Committee of the House, Mr. FOLEY, and the chairman of the Senate Committee, Senator TALMADGE, tomorrow to see what can be worked out under existing law to meet the problems of our farmers. Certainly I hope and trust that we may have immediate action, for I am convinced additional legislation will come too late for this year.

Mr. Speaker, I call the attention of my colleagues to this important matter, and I ask them to join with me in urging our President and the Secretary of Agriculture to move in with the money they now have and with the authority they now have to prevent an overwhelming disaster which will certainly occur to the detriment of the whole economy unless we do act quickly and positively.

So, Mr. Speaker, I want to repeat that I spent an hour yesterday with the Secretary of Agriculture and his associates pointing out that we already have existing law and existing funds that could be used to meet the present emergency. The Secretary was to have seen the President on this matter yesterday afternoon and I understand did see him.

In today's Washington Post—and I hope the Members will read that story closely—we will see that Mr. Bergland said the chances are 50–50 that the administration would move in under existing law to meet this need.

The Secretary of Agriculture is to meet with the chairman of the Legislative Committee of the House, Mr. FOLEY, and the chairman of the Senate committee, Senator TALMADGE, tomorrow to see what can be worked out under existing law to meet the problems of our farmers. Certainly I hope and trust that we may have immediate action for I am convinced additional legislation will come too late for this year.

Mr. Speaker, I call the attention of my colleagues to this important matter, and I ask them to join with me in urging our President and the Secretary of Agriculture to move in with the money they now have and with the authority they now have to prevent an overwhelming disaster which will certainly occur to the detriment of the whole economy unless we do act quickly and positively.

Mr. COUGHLIN. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, the committee chairman has done his usual, very excellent job in explaining this joint resolution. The minority does concur with him.

I just wish to call the attention of the Members to one item which is contained in the committee report. That is in connection with snow removal. The committee has requested the FDAA to review the criteria under which localities may receive reimbursement for snow removal expenses. This provision has been applied in a very unfair way in the past.

I would hope that we could instruct the FDAA to review those criteria. Many communities which work hard and take care of their own snow removal expenses do not receive reimbursement, whereas other communities which are lax and wait for emergencies to occur do get funds for snow removal. That is inherently inequitable.

Mr. Speaker, I hope this can be reviewed so that fair criteria may be developed for applying these funds.

● Mr. KETCHUM. Mr. Speaker, I would like to commend the distinguished chairman for expeditiously handling this vitally needed appropriations measure.

In my own district of California I have witnessed firsthand the devastating effects of a dust storm in December and a torrential downpour less than a month later. The compounding of these natural disasters has dealt a serious blow to farmers, businessmen, and homeowners alike, and now communities across the district and State are attempting to pick up the pieces in the storm's aftermath. Through the Federal assistance we are appropriating here today, this House is taking an essential step to help them recover from these serious losses.

I would like to voice my concern, however, over the President's refusal to declare a Federal disaster for Kern County immediately following the dust storm. In many instances the dust storm had a more crippling effect on my constituents than the floods. Although many victims of both disasters have been helped through the declared disaster assistance for the floods, many others continue to suffer as a direct result of the dust storm alone. The Arvin Union School District, for example, desperately needs an appropriation of over $119,000 to recover from the dust storm's damage. It certainly is difficult to rationalize and explain how one school district with minor disrepairs can qualify for Federal assistance while another with major damages in the same area cannot.

Despite my frustration over this situation, I do want to applaud the action taken in this Chamber today, and I would urge the Federal Disaster Assistance Administration to fully implement the specific recommendations offered by the committee for implementation in the future.●

Mr. MAHON. Mr. Speaker, I move the

previous question on the joint resolution to final passage.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the joint resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 393, nays 4, not voting 37, as follows:

Mr. GONZALEZ changed his vote from "present" to "yea."

So the joint resolution was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO HAVE UNTIL MIDNIGHT, FRIDAY, MARCH 24, 1978, TO FILE REPORTS ON H.R. 11192 AND H.R. 10909

Mr. ROGERS. Mr. Speaker, I ask unanimous consent that the Committee On Interstate and Foreign Commerce may have until midnight, Friday, March 24, 1978, in which to file the reports to accompany H.R. 11192, the Recombinant DNA Act, and H.R. 10909, the Clinical Laboratory Improvement Act of 1978.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

PROVIDING FOR THE CONSIDERATION OF H.R. 9518, SHIPPING ACT AMENDMENTS OF 1978

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1074 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1074

Resolved, That upon the adoption of this resolution it shall be in order to move, clause 2(l)(4) of rule XI to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 9518) to amend the Shipping Act, 1916, to provide for a three-year period, to reach a permanent solution of the rebating practices in the United States foreign trade. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Merchant Marine and Fisheries now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and all points of order against said substitute for failure to comply with the provisions of clause 7, rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand

a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Massachusetts (Mr. MOAKLEY) for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from California (Mr. DEL CLAWSON) pending which I yield myself such time as I may use.

Mr. Speaker, the resolution provides for the consideration of the bill (H.R. 9518), to amend the Shipping Act of 1916, to provide for a 3-year period, to reach a permanent solution to rebating practices in the U.S. foreign trade.

This is a 1-hour open rule.

The resolution waives points of order against consideration of the bill under clause 2(l)(4) of rule XI. The rule requires the report to accompany each bill to contain an inflationary impact statement. The report (H. Rept. 95–922) does not contain such an estimate. However the report does contain a congressional Budget Office estimate which indicates that "no significant costs to the Government would be incurred as a result of enactment of this bill." As a result to Committee on Merchant Marine and Fisheries does not anticipate that enactment of H.R. 9518 would have any inflationary impact on prices and costs in the operation of the national economy. In view of this the Committee on Rules considered the waiver to be noncontroversial.

The resolution waives points of order against the committee amendment in the nature of a substitute under clause 7 of rule XVI. The committee substitute is technically not germane to the original bill. However, since any committee can eliminate the point of order by reporting a clean bill, the Committee on Rules views such waivers for committee substitutes as routine.

The adoption of a substitute precludes the motion to recommit from containing instructions to report back with any amendment. Again, since this problem would not exist with a clean bill, the Committee on Rules routinely provides for instructions in the case of a bill reported with a substitute. This simply protects the rights of the minority.

I would commend the gentleman from New York (Mr. MURPHY) and his colleagues on the Committee on Merchant Marine and Fisheries. The committee has worked very hard to monitor the Federal Maritime Commission investigation of rebating practices and has responded quickly and effectively to deal with the problems which became obvious in the course of this review.

The bill will restructure penalties to provide more meaningful deterrents to abuse and bring the authority of the FMC more in line with the usual practice of Federal regulatory bodies.

The bill was reported unanimously from committee and the rule was adopted in the Committee on Rules by voice vote. I know of no real opposition to the bill and I think there is general agreement that the rule provides a fair and orderly procedure for its consideration.

Mr. Speaker, I urge the adoption of House Resolution 1074.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1074 provides for the consideration of H.R. 9518, a bill to amend the Shipping Act of 1916. This is an open rule allowing 1 hour of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Merchant Marine and Fisheries. The committee substitute is made in order as an original bill for amendment under the 5-minute rule.

Two waivers are contained in the rule. The first waives clause 2(1)(4) of rule XI, which requires an inflationary impact statement. The statement was not provided in the committee report. Second, all points of order which may lie against the committee substitute for failure to comply with clause 7, rule XVI, the germaneness rule, are waived.

After consideration of the bill under the 5-minute rule, the bill is to be reported to the House with any amendments adopted. A separate vote may be demanded in the House on any amendment to the bill or committee substitute. Finally, one motion to recommit is permitted with or without instructions.

Mr. Speaker, H.R. 9518 has received significant bipartisan support. The bill strengthens the provisions of the Shipping Act of 1916. It increases the penalties for illegal rebating in U.S. foreign trade. There have been indications of widespread secret rebating practices in the shipping industry. The roots of the problem possibly lie in overtonnaging and uncompetitively high shipping rates set by the common carriers. Though the bill does not directly address these problems, it does set higher fines as a deterrent to those companies that may consider engaging in illegal shipping practices.

Mr. Speaker, the rule should be adopted and the House proceed with consideration of the legislation.

Mr. Speaker, I have no requests for time. I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. BROWN of California). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. RUSSO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 365, nays 33, not voting 36, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 9518, with Mr. BURLISON of Missouri in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from New York (Mr. MURPHY) will be recognized for 30 minutes, and the gentleman from Michigan (Mr. RUPPE) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from New York (Mr. MURPHY).

Mr. MURPHY of New York. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise today to commend for favorable consideration of the House, legislation reported out unanimously by the Merchant Marine and Fisheries Committee; namely, H.R. 9518, a bill that would amend the Shipping Act, 1916, to strengthen the provisions prohibiting rebating practices in the U.S. foreign trades. Under present law, common carriers by water in the foreign commerce of the United States are prohibited from charging any rates lower than those in their published tariffs. With extensive overtonnaging in our trades, many carriers have been offering secret kickbacks, commonly called rebates, to attract more cargo for their ships. The purpose of this legislation is to strengthen the provisions of the Shipping Act, 1916 and, thus, the powers of the Federal Maritime Commission relating to the prohibitions and sanctions for rebating in our foreign trades. Rebating threatens the stability and unimpeded flow of our ocean commerce, and the inability of the FMC to enforce our laws against rebating in a nondiscriminatory manner threatens the preservation of a strong and competitive U.S. merchant marine.

This landmark legislation would permit the FMC to carry out its regulatory function to deter rebates, in a swift, effective, and even-handed fashion. And, for the first time, foreign-flag ocean carriers would be required to comply with FMC subpenas and discovery orders or face exclusion from our ocean trades. Through this legislation, the committee intends that unlawful rebating practices will be severely curtailed and eliminated from our ocean commerce.

BACKGROUND AND NEED FOR THE LEGISLATION

In the spring of 1976, representatives of Sea-Land Service, Inc., the largest U.S.-flag unsubsidized container line, disclosed to the Federal Maritime Commission that extensive audits of its overseas operations in the U.S. ocean trades had revealed widespread payments of illegal rebates by Sea-Land employees and agents. Subsequent months of analyzing documents and negotiating a settlement culminated in an agreement dated January 5, 1977, under the terms of which Sea-Land agreed to pay a civil penalty of $4 million. This is the largest civil penalty settlement in the history of U.S. transportation. Widespread, illegal rebating in the U.S. ocean trades became apparent, when, based largely upon the Sea-Land disclosures, the FMC commenced investigation of more than 200 shippers and consignees and some 27 U.S.- and foreign-flag carriers.

Ever since enactment of the Shipping Act, 1916, there have been reports of malpractices in the U.S. foreign trade routes. In 1961, the Federal Maritime Commission was established as an independent regulatory body by reorganization plan No. 7, which separated the Nation's existing ocean shipping laws into two categories and entrusted them to different Federal agencies for administration. The Maritime Administration, U.S. Department of Commerce, assumed the promotional mission. The FMC was given responsibility for those statutes designed to protect U.S. shippers and the public interest as a whole against excesses on the part of common carriers by water and certain other persons "subject to the Shipping Act." From the extensive hearings held on H.R. 9518, it is apparent that the FMC has failed to provide consistent and effective regulation in dealing with the complex nature of the rebating problem. While sporadic penalties have been imposed for rebating violations, the problem, until recently, was never attacked in an organized and long range program or fashion.

Sections 16 and 18(b)(3) of the Shipping Act, 1916, as amended, prohibit common carriers by water in our liner trades from allowing any person to obtain transportation or related services for property at less than the published rates in their tariffs on file with the FMC. In other words, the statute prohibits any carrier subject to the jurisdiction of the Commission from offering any direct or indirect monetary inducement that departs from the rates contained in its published tariff in order to attract cargo. The act similarly prohibits shippers, cosignors, cosignees, forwarders, brokers, or other persons subject to the jurisdiction of the Commission, from obtaining or attempting to obtain transportation at less than the published tariff rates. Violations of these prohibitions are called malpractices, of which rebates are one example. Clearly, the statutory prohibitions constitute a mandate for "fair" competition in the U.S. liner trades. That mandate also goes to the very heart of the U.S. concept of the liner conference system.

The FMC has accurately explained the liner conference system and detailed the harmful effects of rebating. A liner conference is a group of carriers serving the same ocean trade that have agreed to operate on the basis of a common tariff covering ocean cargo rates and terms and conditions of service. In the U.S. ocean trades, a conference agreement must be approved by the Commission pursuant to section 15 of the Shipping Act, 1916, before implementation. The theory underlying the conference system is that the common tariff will neutralize, to a large extent, the prospect of predatory economic competition between carriers serving a given trade, thus providing shippers and consumers with dependable service at stable rates. Apart from the fact that rebating is illegal in the U.S. ocean trades, a conference carrier that "breaks ranks" by rebating is not only taking advantage of the honesty of his competitors who abide by the published conference tariff, he is also endangering the stability of our trades and the integrity of our tariffs. Hence, rebating within U.S. liner conferences is a particularly pernicious practice under our shipping laws as they stand today. In the final analysis, it is the American consumer who will pay the hidden costs.

Rebating is simply a device to attract traffic away from competitors. Generally speaking, when times are good, the load factors experienced by carriers in U.S. liner trades are sufficiently high that the incentive for "cargo stealing" diminishes even without the existence of other stabilizing mechanisms. Conversely, when times are bad, traffic is light and the incentive to "steal cargo" increases, since there are no effective stabilizing mechanisms in what is essentially a capital intensive industry. In other words, since there is no effective mechanism in a given U.S. trade to smooth out fluctuations in traffic and their economc impact on individual carriers, rebating goes hand-in-hand with the ratio between available cargo and the liner tonnage competing for that traffic.

Unlike a railroad that can increase or decrease the size of its trains to conform to the traffic, ocean carriers incur substantially the same voyage costs for bunkers, insurance, and crews' wages, whether the vessel is empty or fully loaded. Therefore, in periods of slack traffic, the demand for any cargo is progressively accelerated.

The FMC testimony clearly set forth the result of the deficiencies in our present shipping regulatory laws. We operate our liner trades on a "come one, come all" basis, inviting participation of foreign-flag carriers as cross traders (carriers trading between countries other than their own) as well as in our bilateral trades. Given the range, value, amount, and predictability of ocean cargo to and from the United States, our policy of freedom of access to our liner trades has attracted ocean carriers away from less lucrative routes. The result is that our liner trades tend to be overtonnaged even in good times, and, absent an effective mechanism to stabilize the liner cargo/tonnage ratio, a climate conducive to rebating often prevails in the ocean trades of the United States.

The hearing record on H.R. 9518 reveals that although the FMC has been proceeding deliberately in its rebating

investigation, nevertheless more than a year has elapsed since the Sea-Land settlement in January 1977 and no further compromise or penalty assessment with respect to any of the 27 foreign-flag or U.S.-flag carriers currently under investigation has yet been concluded. It then becomes obvious that a compelling need exists for legislation to furnish the FMC with new weapons for combating rebating.

PROBLEMS OF EFFECTIVE ENFORCEMENT OF REBATING PRACTICES

Rebating violations may be committed through a variety of complex transactions that frequently involve overseas accounts and records scattered throughout the world. With the onset of containerization even greater competitive pressure has been placed on the liner trades and rebating has become far more sophisticated and extensive. Varieties of rebating described by witnesses during the hearings included acceptance of currency at lesser rates of exchange than officially prevailing: absorption of drayage; nonassessment of demurrage on containers; and numerous other methods.

The major direct problems faced by the committee in fashioning legislation were:

First. The penalties for rebating under the existing provisions of the Shipping Act, 1916, have not been sufficient to take the profit out of rebating, and the difficulty of enforcing those penalties often makes rebating worth the risk;

Second. Every major foreign nation has adopted a hands-off policy in terms of regulation of its shipping, or has provided various statutory schemes designed to reserve cargo for its national flag carriers. Most of these countries permit closed conferences, shippers' councils, pooling and rationalization schemes, or have moved to enact cargo reservation laws similar to those contemplated in the UNCTAD code of liner conduct. In many foreign ocean trades, rebates are legal. Thirteen of our trading partners have enacted "blocking statutes" which, in one form or another, prohibit their companies from providing business records and other information to agencies of other nations, such as the FMC;

Third. Severe nonconference competition has contributed to the pressures that stimulate rebating. In recent years, this competition has taken on new dimensions in the form of state-controlled carriers whose goals may transcend commercial profit, and whose economic power comes from the state itself; and ultimately

Fourth. Overtonnaging in a capital intensive industry, such as the ocean transportation industry, has encouraged rebates and other malpractices, often committed in competitive self-defense.

NATURE OF H.R. 9518, AS AMENDED

On October 12, 1977, I introduced H.R. 9518, together with Mr. LEGGETT, Mr. BREAUX, Mr. ZEFERETTI, Mr. OBERSTAR, and Mr. AKAKA.

As introduced, the bill proposed to amend the Shipping Act, 1916, "to provide for a 3-year period, to reach a permanent solution of the rebating practices in the U.S. foreign trade." There are three major provisions in the bill:

First. All carriers and shippers in the foreign commerce of the United States would be required to respond fully to an expedited complaint procedure providing for an FMC order of hearing and investigation relating to rebates. Failure to cooperate subjected a carrier to severe penalties including tariff suspensions and denial of entry to U.S. ports;

Second. A provision was included to encourage everyone who had engaged in rebating to come forward and disclose such violations by providing immunity from civil penalties and criminal prosecution. This provision expressly would not affect any settlements already reached between the FMC and certain carriers, consignors, and consignees in any way; and

Third. A requirement that the FMC, within 18 months of enactment of the bill, would report to the Congress on the results of rebating disclosures encouraged by the provisions of the bill.

The Subcommittee on Merchant Marine of the House Committee on Merchant Marine and Fisheries held 7 days of hearings on H.R. 9518. Testimony was presented on October 14, 20, and November 1, 30, and December 6, 1977. Hearings resumed on January 24, 1978, and were concluded on January 27, 1978.

On January 31, 1978, the Subcommittee on Merchant Marine met in markup session and reported H.R. 9518, as amended, to the full Committee on Merchant Marine and Fisheries by a voice vote. On February 8, 1978, the Committee on Merchant Marine and Fisheries approved H.R. 9518, with amendment, by a unanimous vote of 28 to 0, and ordered the bill reported to the House.

The committee heard voluminous testimony in uniform support of a rebating bill, although there was considerable objection to provsions of H.R. 9518, as originally introduced. The amended version of H.R. 9518, a bill, "to amend the Shipping Act, 1916, to strengthen the provisions prohibiting rebating practices in the U.S. foreign trades," is legislation that results from carefully addressing this conflicting testimony on the original provisions of H.R. 9518. The immunity provision was struck in its entirety, and briefly, H.R. 9518, as amended would:

First. Increase the civil penalties now provided for malpractices by means of false billings, classification, and the like from not more than $5,000 per violation to not more than $25,000 per violation;

Second. Increase penalties for tariff related violations other than rebating from $1,000 per day to not more than $5,000 per day;

Third. Increase penalties for rebating violations from not more than $1,000 per day to not more than $25,000 per shipment. In addition, for a rebating violation the FMC could suspend a carrier's tariffs up to a year.

Fourth. Authorize the FMC to require certification by executives of carriers, shippers and forwarders relating to corporate policy and efforts to prohibit rebating and to cooperate in any investigation of rebating;

Fifth. Authorize the FMC to suspend tariffs for failure to comply with subpenas or discovery orders in a formal rebating investigation. The President would have authority to nullify such suspension orders in the interest of national defense or foreign policy requirements. Also, require the Secretary of State to negotiate with other maritime nations to secure compliance with the FMC's requirements for information;

Sixth. Clarify the intent of the Congress in the 1972 act which changed the specific rebating violations from a criminal penalty to a civil violation to insure that the provision would be retroactive and the intent of the Congress would be made clear; and

Seventh. Authorize the FMC to assess all civil penalties under the Shipping Act, 1916, in order to provide swift, effective, uniform action on rebate violators.

In sum, H.R. 9518, as amended, furnishes the Federal Maritime Commission with a veritable arsenal of weapons which can be brought to bear against those who in any way impede the free flow of commerce along our international trade routes.

The difficulties of combating rebating under the deficiencies of the Shipping Act and the uncooperative, if not hostile, foreign environment are compounded by this Nation's lack of a coherent national maritime policy.

Obviously, the resolution of these broader matters cannot come from hearings that were designed to, and for the most part did, focus on rebating. But, the discussions convincingly demonstrate the immediate need for a coordinated and single-minded governmental policy of support for the U.S. merchant marine, or we must be prepared to publicly abandon the concept of maintaining a merchant marine capable of preserving our economic security and meeting our defense transportation needs. The committee is currently addressing the root problem of overtonnaging and predatory competition from State controlled carriers in separate legislation.

H.R. 9518, as amended, constitutes a major step toward our objective of establishing a strong merchant fleet owned by American citizens, operated by American crews, and fully capable of serving our international economic, military, and political commitments under all foreseeable circumstances.

Mr. Chairman, fundamental notions of fairness and decency demand that we act swiftly to clear our international trades of illegal rebates. The payment of such rebates runs counter to the moral values and expectations of the American people. It is not only unethical, but it destroys fair competition and imposes unnecessary and hidden costs on the shipping public. Finally, they create severe problems between the United States and citizens of friendly foreign nations

which could result in serious foreign policy implications.

Mr. Chairman, I urge passage of this significant and very necessary legislation.

Mr. BIAGGI. Mr. Chairman, I rise in support of H.R. 9518, legislation intended to strengthen the power of the Federal Maritime Commission to combat rebating.

Mr. Chairman, the legislation we have before us is the outcome of a year of work by the dedicated chairman of our committee, Mr. MURPHY, the principal sponsor of this legislation. After months of hearings the committee has fashioned a bill to clear our foreign trades of malpractices and insure fair competition for U.S. liner fleets with their foreign-flag competitors.

For the first time the bill would enable the Federal Maritime Commission to invoke far more severe monetary penalties for rebating than now possible under the Shipping Act. The relatively light penalties that are now prescribed in section 16 and 18 of the act—$5,000 and $1,000 respectively—have not been sufficient to deter a carrier from illegally rebating to attract cargo or to deter shippers from soliciting or accepting such rebates. In other words, the economic benefits of rebating can often be greater than the penalties which are now prescribed for that illegal activity. The bill would increase the penalties to $25,000 per violation for all types of rebating prescribed by the act.

In addition, the FMC, upon finding of a rebating violation, could suspend any or all of that carrier's tariffs or right to utilize conference tariffs for up to 12 months. Such suspension would effectively exclude that carrier from our foreign trade. Any carriage of cargo during such suspension period would subject the offender to a civil penalty of not more than $50,000 per shipment.

These powerful penalties coupled with FMC power to assess them directly, will provide swift, even-handed deterrence against rebating and insure that our foreign trades will offer fair competition to U.S.-flag operators.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. The chairman has addressed what I consider and what the committee considers to be the heart of this legislation—the assessment of civil penalties on rebating. I want to rise in support of that particular issue and of the language the committee has drafted. But I would also like to compliment the chairman for a truly outstanding job.

The gentleman has expended a prodigious amount of effort and a great deal of time over the past 2 years in concentrating on this key issue, one that goes to the heart of the ability of the United States to compete in international commerce and to revive our merchant marine. Furthermore, the chairman has taken this issue on singlehandedly and has brought it to a very successful conclusion.

Mr. Chairman, that reminds me of the words of the great Governor of the State of Minnesota, Floyd B. Olson, who was one of the all-time heroes of our State. It was said that he was not afraid to step on the toes of the mighty.

In taking on this issue, the chairman has had to step on the toes of the mighty in this field, and I compliment him for the leadership he has exhibited.

Mr. MURPHY of New York. Mr. Chairman, I thank my colleague, the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, I rise in strong support of H.R. 9518, a bill to amend the Shipping Act, 1916, to strengthen the provisions prohibiting rebating practices in the U.S. foreign trade.

I am pleased that we are able to bring this antirebating bill to the floor today, which I believe has been worked out to address and resolve the very real problems and concerns facing the ocean shipping industry.

H.R. 9518 would give the FMC power to assess all civil penalties under the Shipping Act, 1916. The Commission currently has the power to compromise claims for such penalties but refusal of a party to compromise leaves the FMC with only one option—to refer the case to the Department of Justice for collection of the penalty in a U.S. district court. This not only adds another layer of review and possible delay to the case but, results in inconsistent penalties that vary on the basis of the opinion of the particular court as to the seriousness of rebating activity.

The bill would leave with the FMC the power to compromise claims, but would add the power to adjudicate an appropriate penalty upon failure to reach a compromise. We believe this approach is proper in that it will help to ease the workload of the Federal courts, result in more expeditious penalty cases and provide a consistency to the level of penalties assessed.

Under these existing procedures there necessarily and unavoidably is a certain amount of dual and overlapping effort on the part of the Commission and the Department. The Commission has used its own judicial machinery to determine the existence or nonexistence of a violation. In the event it determines the existence of a violation and refers it to Justice, the Department must establish de novo in the U.S. district courts not only the bases for fixing of assessing penalties, but the factual existence of the violation itself.

When the actual complaint is filed in the court, a considerable period of time may elapse before the case may be assigned for trial because of the tremendous backlog of cases confronting most of the Federal courts.

This means that the penalty for violations of the Shipping Act may not be assessed for many months, and in some instances years after the infraction has occurred. By the time the penalty is imposed, any impact it has on business practices in the industry is diluted or lost completely.

Further, where a considerable period of time has elapsed from the infraction to the trial, the courts frequently are inclined to impose a much lighter sentence than if the case had been prosecuted promptly. No regulatory purpose is accomplished in these instances since the amount of penalty is usually insufficient to deter the offender from future transgressions.

The penalties should be in sufficient amounts to take away from the guilty party any profits which could be attributed to the violations plus such additional amount as will serve to discourage future violations.

Under present practices, penalties vary widely depending upon the court having jurisdiction. At present, penalties are fixed and assessed by various judges in various U.S. district courts. They have no special awareness of the intricacies of the shipping industry and the appropriate amount of penalties sufficient to constitute effective deterrents. They also lack awareness of the amount of penalties imposed by other judges of other U.S. district courts upon other violators who have similar prior records and who have committed similar offenses.

Consequently, the fixing and assessing of penalties has become largely a function of when, where, and by whom the fixing and assessing is done, rather than a function of consistency and relativity.

The Commission's primary function is regulation. Its day-to-day operations bring it into contact with many apparent violations. Because of this the Commission has developed a certain expertise which enables it to separate the wheat from the chaff. It knows what to look for and how to go about it and is better equipped to properly evaluate the offense and to adjudge an appropriate penalty designed to take the profit out of the rebating, and to deter the offender from further violations.

Further, the committee intends that this power to assess all civil penalties be effective upon enactment of this legislation, so that penalties for violations occurring with the 5-year period immediately preceding enactment could be assessed by the Commission. This will assist the FMC in clearing the backlog of rebating violations with appropriate civil penalties.

Mr. Chairman, I urge passage of H.R. 9518, as amended, in order that our international liner trades will be cleared of the costly and unethical practice of rebating.

Mr. ZEFERETTI. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I will be happy to yield to the gentleman from New York.

Mr. ZEFERETTI. Mr. Chairman, I rise in support of H.R. 9518.

One of the basic problems with enforcing our laws against rebating has historically been the difficulty of proving violations against corporations whose records are maintained in foreign countries. As a practical matter, only U.S. carriers and shippers now face a substantial risk of penalties for rebating. The problem is not only the mechanical one of service of

process abroad, but stems also from "blocking" statutes that have been enacted by at least 13 foreign nations which may prohibit their citizens from turning over business records to an agency of another government, such as our FMC.

To overcome this problem, H.R. 9518 provides for three mechanisms:

First, every carrier will be required to certify periodically, through its chief executive officer, that, among other things the carrier will cooperate with the FMC in any investigation of illegal rebating. Shippers and forwarders can also be required to file such certifications.

Second, the Secretary of State is directed to establish a regime of cooperation with other maritime nations to insure access to information necessary for FMC regulation.

Third, if a carrier refuses to comply with an FMC subpena or discovery order, the Commission may suspend that carrier's tariff until it has complied.

Since this subject is one which contains foreign policy ramifications, the President is given the authority to overrule the FMC on matters involving this suspension power.

Through these measures, H.R. 9518 will for the first time, permit nondiscriminatory enforcement of our antirebating statutes. This will permit U.S.-flag liner fleets to operate on a competitive basis to the benefit of the American consumer.

I would like to commend the gentleman from New York (Mr. MURPHY) for providing extensive hearings into all aspects of the bill which in turn has produced legislation that addresses the rebating problem.

Mr. Chairman, I urge my colleagues to vote favorably on this important maritime regulatory measure.

Mr. MURPHY of New York. I thank my colleague for his remarks.

Mr. JONES of North Carolina. Mr. Chairman, will the gentleman yield?

Mr. MURPHY of New York. I yield to the gentleman from North Carolina.

Mr. JONES of North Carolina. Mr. Chairman, I want to rise in strong support of H.R. 9518, and urge the Members of this House to acknowledge the fine job done by the chairman of the committee with a favorable vote on final passage.

Mr. MURPHY of New York. I thank my colleague.

Mr. RUPPE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in strong support of H.R. 9518, the Shipping Act Amendments of 1978. This is an important bill and should be passed by the House without delay.

I would like to congratulate the chairman of the full committee and the ranking Republican on the Merchant Marine Subcommittee for bringing this legislation to the floor.

Mr. Chairman, this legislation deals with a problem which has caused instability in the U.S. foreign commerce to the detriment of both U.S.- and foreign-flag ship operators. That problem, illegal rebating—the practice of a liner company kicking back a portion of the published freight rate for a commodity to a shipper in exchange for his agreement to ship his goods on the carrier's vessel—has been prevalent for years. Recently, this practice has reached epidemic proportions for two reasons.

First, there exists in our liner trades extensive overtonnaging which has increased the competition for cargo. In this regard, we must remember it costs just as much to operate an empty vessel as it does to operate a vessel fully laden with cargo. Secondly, there is the inability of the Federal Maritime Commission, the agency vested with regulatory authority over ocean transportation, to effectively enforce the prohibitions against rebating contained in the Shipping Act of 1916. In short, a carrier rebates because the competition for cargo is intense and the regulatory agency cannot effectively enforce the law.

H.R. 9518 addresses the latter situation. It makes no attempt to deal with the former. Although the committee recognized that overtonnaging in a capital intensive industry is one of the causes of rebating, we believed that consideration of that cause involves fundamental questions of maritime policy. Such a consideration will be very time consuming. Thus, the committee sought to make rebating less attractive by increasing sanctions for its commission and by enhancing the enforcement tools of the FMC.

Let us examine some of the major provisions of H.R. 9518. One of the most serious flaws in the regulatory machinery contained in the Shipping Act of 1916 is the lack of sanctions against foreign-flag operators who do not comply with Federal Maritime Commission requests for information. This flaw has severely hindered the FMC's ability to enforce U.S. shipping law in a nondiscriminatory fashion. This legislation authorizes the Federal Maritime Commission, after consultation with the Secretary of State, to suspend a carrier's tariff if such carrier refuses to honor subpoenas for documents.

Also, the bill specifically recognizes that the problem of access to information is not only caused by the intransigence of foreign-flag carriers, but by so-called blocking statutes enacted by foreign governments. In this regard, the bill directs the Secretary of State to enter into negotiations with nations whose vessels are engaged in the U.S. foreign trades to seek the establishment of a "regime of cooperation" which will allow the Commission to satisfy its requirements for information. The Secretary is given 180 days after enactment to report to the President and the Congress on the results of his negotiations.

This provision, which was contained in a similar bill authored by me, was added because the committee had received testimony from the State Department indicating that they were already engaged in such negotiations and that they were on the verge of concluding such a regime with several of our shipping partners. I strongly believe that these negotiations should be encouraged. At the same time, I believe that these negotiations should not be allowed to drag on indefinitely. If those negotiations fail to provide the FMC with satisfactory access to information, the bill states that the civil penalties specified for failure to comply with subpenas become mandatory.

Another provision of H.R. 9518 that will give the Federal Maritime Commission additional enforcement authority over foreign-flag carriers is that which requires certifications from U.S. and foreign carriers, forwarders, shippers, and other persons subject to the Shipping Act. Under this provision, the Commission will require the chief executive officer of every vessel operating common carrier in the foreign commerce of the United States to file a periodic, written certification, under oath, attesting to: The fact that it is company policy not to engage in illegal rebating; that such policy has been recently promulgated to all company owners, officers, employees, and agents; the steps taken within the company to prevent or correct illegal rebating; and that the company will fully cooperate with the Commission in its investigations of illegal rebating and in its attempts to end such practices. The bill also gives the Commission discretionary authority to require any shipper, consignor, consignee, forwarder, broker, other carrier, or other person subject to the Shipping Act of 1916 to file a similar certification.

Although the substance of the certification is generally described, the bill provides that the Commission may prescribe the frequency, form, and specific content of the certification. These provisions are intended to allow the FMC to achieve the purposes of the bill without imposing an undue administrative burden on the parties involved. To enforce the filing of these certifications, the bill authorizes a civil penalty of not more than $5,000 per day for failure to file a certification. As with other civil penalties provided for in the Shipping Act, the bill would allow the Commission to assess this penalty.

These provisions along with the tariff suspension provisions and increased penalties for failure to comply with Commission orders as well as for rebating will give the FMC significantly expanded powers over U.S.- and foreign-flag carriers. I firmly believe that these additional powers will discourage rebating and will help bring stability to the U.S. foreign trade.

In summary, H.R. 9518 is a good bill and I urge my colleagues to support its passage today.

Mr. Chairman, I yield 10 minutes to the gentleman from California (Mr. McCLOSKEY).

Mr. McCLOSKEY. Mr. Chairman, I rise in support of H.R. 9518, the Shipping Act Amendments of 1978 with some reservations. This bill represents an experiment—granting the Federal Maritime Commission new and strong measures to attempt to deal with the practice

of illegal rebating, a practice which is destructive to the conference system of shipping in the U.S. foreign trades and to all operators within that system, including the U.S. operators.

I want to commend the chairman of the committee, the gentleman from New York (Mr. MURPHY) for his leadership in bringing this bill to the floor under extremely difficult conditions and in trying to attack a major problem of the U.S. shipping industry and, indeed, the Nation, without the usual support that we would expect from an administration which promised to make maritime policy a matter of "continuing Presidential attention."

We do two things in this bill that we utlimately may have to reverse upon further consideration. First, we give the Federal Maritime Commission broad new powers to deal with illegal practices in the U.S. foreign trade. We do this despite the clear showing of the testimony before the committee that the Federal Maritime Commission, in the past 6 years has been wholly ineffective in exercising the powers that it has had. It may be that we will ultimately want to consider abolishing the Federal Maritime Commission entirely because of its past miserable record. If its future activities are as inadequate in protecting a strong U.S.-flag merchant marine as those activities have been in the past, we should, indeed, abolish the Commission.

The second thing that the bill does is to clear up an ambiguity in the law which we ourselves in the Congress created back in 1972.

I would like to make some legislative history on what we did in 1972 and what we do here today because it is clear that in this second aspect of the bill we remove the possibility of criminal prosecution against individuals and companies in the shipping industry of the United States. Upon very serious and sober reflection, it seems to me that despite this unhappy result of removing the possibility of criminal prosecution, it is the only fair thing that Congress can do under the circumstances that face us, and which we ourselves have created.

I say this because back in 1971 and 1972 our committee received testimony from the Federal Maritime Commission Chairman, Helen Bentley, and from the Attorney General of the United States, Richard Kleindienst, that we should change the penalties for illegal rebating from criminal to civil. We passed a bill, H.R. 755, in 1972 at the recommendation of the Federal Maritime Commission and the Attorney General. We passed the bill at their suggestion, believing that we were changing rebating from a criminal to a civil offense. But we have been advised by the Department of Justice in testimony in recent weeks, however, that under section 371 of the Criminal Code, the conspiracy section—making it a crime to defraud the U.S. Government of one of its lawful functions—the Department of Justice retained the right to bring criminal conspiracy charges against an individual or a company which engaged in illegal rebating. This is an anomaly in the law because in the case of a civil offense we do not ordinarily deem a conspiracy to commit a civil offense a crime. In a misdemeanor offense we have specifically limited conspiracy to commit a misdemeanor to misdemeanor status; to say that conspiracy to commit a civil offense should be a felony is to put citizens of the United States on notice while they can commit a civil offense and be subject only to a civil penalty, if at the discretion of someone in the Department of Justice the violation of law is grave enough for the Department of Justice to say that conspiracy to commit this civil offense is also conspiracy to defraud the Federal Maritime Commission of its lawful function of enforcing the rebating law, rebating can then become a felony. Under these circumstances we do not have a government of law, not of men, as I understand to be one of the treasured and basic principles of justice in this country. We have a government of men, because someone in the Department of Justice can contend at any time that a given civil offense is so grave that a conspiracy to commit it is, thus, a felony. No citizen and no company can then be put on notice as to what types of illegal rebating can be so grave as to justify criminal prosecution under the conspiracy statute.

Mr. MURPHY of New York. Mr. Chairman, will the gentleman yield?

Mr. McCLOSKEY. I yield to the gentleman from New York.

Mr. MURPHY of New York. I thank the gentleman for yielding.

I want to compliment the gentleman particularly for his assistance in this legislation and to make it crystal clear that the committee intended that the language in section 10 cover only rebating violations and would not preclude prosecution under laws, regulations, or statutes such as income tax, the Bank Secrecy Act, or violation of SEC laws.

Mr. McCLOSKEY. I thank the chairman for that intervention because I think it is clear that we on the committee have grave reservations about enacting into law a bill which intrudes on the historic prosecutorial discretion of the Department of Justice. But it was we in the Congress who chose to tell the world in 1972 that we considered rebating a civil offense. The fact of the matter is that probably rebating cannot be committed on a vast scale without violations of the Internal Revenue Code, without violations of the currency transfer laws, or without violations of the Securities and Exchange Commission's law and regulations. And we do not intend by this bill, as the chairman has pointed out, to remove anyone from criminal liability for any acts committed in the process of rebating, or committed in conjunction with rebating which would be criminal. What we say in this bill is that we do not think it fair, having told the shipping industry 6 years ago that rebating was a civil offense, to urge today that conspiracy to defraud the Federal Maritime Commission of its lawful function of enforcing the rebating laws should be a felony. The Federal Maritime Commission, which asked us in 1971 to transfer the jurisdiction of the enforcement of the rebating laws out of the Criminal Code to themselves, admittedly has been ineffective in enforcing this law. In fact, a year after the law was enacted, Chairman Bentley abolished the Bureau of Enforcement within the Federal Maritime Commission, and even after being apprized of the widespread existence of rebating as early as the fall of 1975, when Seatrain pleaded guilty, and then in the spring of 1976 when U.S. Lines and Sea-Land admitted that it was a widespread practice in the U.S. foreign trades, even then the record of the Federal Maritime Commission in the prosecution of civil offenses has not been good.

In this second aspect of the bill, clarifying our intent in 1972 that we intended all aspects of rebating to be civil rather than criminal, I think it is possible that we may ultimately want to reverse our action upon further reflection and after full hearings. We may very well want to again make rebating a criminal offense. We had testimony from one administration witness to that effect in the last few days, and unless the FMC can demonstrate far greater competence than it has shown in the past, it may be that stern criminal penalties may be the only way to control this pervasive practice which has so damaged the U.S.-flag shipping companies.

But regardless of what we may ultimately do to try to come up with a comprehensive new maritime policy for the United States, this bill today seems the only fair way to attack the confusion and ambiguity which we ourselves created back in 1972.

Again I want to commend the chairman for the gentleman's leadership in this regard. I think we have come up with a bill which is the only conceivable answer to the problem that the chairman has described. I am glad to support H.R. 9518; but as I say, I think our major obligation is to review the entire maritime policy of the United States and to supply what the administration has thus far refused to supply in its first 15 months in office, that is continuing Presidential attention to a new maritime policy which once again will make the U.S. maritime flag prosperous and a matter of pride to all of us.

While I agree with what this bill seeks to do, but am distressed that we are here considering only a partial and piecemeal remedy for what is admittedly a chaotic situation in U.S. maritime affairs.

What is needed is a comprehensive review and revision of the entire structure of U.S. maritime law. H R. 9518 seeks only to assist in resolving the illegal rebating problem, a problem which has seen the three major unsubsidized U.S. carriers—Sea Land, Seatrain, and U.S. Lines—admit to wholesale violations, and which finds 7 of the 10 U.S. subsidized liner operators currently under

investigation by the Federal Maritime Commission. As recently as last week Seatrain pled guilty to the very type of criminal charge—conspiracy to defraud the FMC by rebating—which this bill would prevent. All elements of the industry agree that rebating is caused by overtonnaging in the U.S. liner conferences. Chairman MURPHY himself said—

> The basic cause of rebating is over-tonnaging, and, consequently, a measure of control over capacity is probably the long term solution to this problem.

H.R. 9518 makes no effort to deal with the overtonnaging question. It attacks only the symptom of the problem, not its cause.

Overtonnaging occurs in large part because of longstanding philosophical differences among the Antitrust Division of the Justice Department and the Departments of State, Commerce, and Treasury.

To resolve these differences will require not only a review of the basis shiping laws of the United States but a solid resolution of policy by the administration.

The basic shipping laws of the United States are contained in the Merchant Marine Act, 1936, as amended in 1970, and the Shipping Act, 1916 as amended in 1972.

The difficulty with the 1916 act lies in the philosophy and enforcement policies of the Antitrust Division, as they conflict with the 1936 act's mandate to the Department of Commerce to promote the U.S. merchant marine. All witnesses before the committee conceded that until this conflict is resolved by the administration, there can be no solution to the current ills of the U.S. maritime industry.

The administration's failure to address this situation has been painfully clear during the past few weeks. After conflicting testimony from the Maritime Administration, the Federal Maritime Commission, the State Department, the Justice Department, and the Department of Transportation on the "pernicious practice of rebating—to quote Maritime Administrator Blackwell—the President's Office of Management and Budget declined the committee request to testify and present a uniform policy position. In recent weeks, the administration has repeatedly declined to appear before Senate and House committees to present an administration position.

The administration's failure to take the initiative to propose legslation is also clear. On October 14, 1977, Mr. Blackwell, the head of the Maritime Administration—the agency responsible for both the promotion of the U.S. merchant marine and, under section 212(a) of the 1936 act, for recommending statutory changes to remedy problems with such promotion—first admitted that legislative change is absolutely essential if we are to preserve a U.S.-flag merchant marine in our liner trades but then stated that we may "never" get legislative proposals from the administration to correct the situation. On February 7, 1978, Mr. Blackwell also admitted that he had withheld proposing legislation intended to promote the dry bulk portion of the U.S. fleet—by his own admission the weakest segment of the U.S. fleet—because he did not believe that the political climate after the defeat of cargo preference would be receptive to a proposal which would be perceived as being beneficial to the U.S. merchant marine.

The failure of the administration to face the underlying policy questions would not be quite as significant if it were not for the following:

First. Chairman MURPHY has properly stated:

> We have no coherent national maritime policy. . . . Unless immediate steps are taken in the near future—the United States Merchant Marine fleet will either be nonexistent or nationalized. . . . The Merchant Marine Act of 1970 . . . was a failure.

Second. Maritime Administrator Blackwell conceded the failure of the present law when, in 1977, he supported the ill-fated cargo preference bill after testifying in 1974 that:

> Cargo Preference . . . would be the most serious admission of failure of the Merchant Marine that we could make.

Third. Department of Transportation Secretary Adams recently stated:

> I believe that we are approaching a critical point in U.S. maritime policy. It seems apparent that before the end of this century, we will be unable to afford all of the maritime promotional policies currently contemplated by some of the segments of the industry. If they are adopted, ultimately nationalization of the industry appears to be inevitable. I would hate to see Conrail joined by "Conwater".

Fourth. Ten of the 13 major U.S.-flag carriers have either conceded wholesale violations of our basic shipping law or are under investigation by the FMC for possible violations.

Fifth. The FMC itself has been wholly unable to investigate, let alone enforce, the violations of the Shipping Act, 1916, within reasonable time periods.

Sixth. The Justice Department has had to step back into the prosecution of shippers and carriers using conspiracy statutes rather than leaving Shipping Act violations to the jurisdiction of the FMC as both Justice and the FMC testified to Congress in 1972 would be the most effective way to handle the rebating problem.

Seventh. The U.S. merchant marine, heavily supported by direct construction and operating subsidies (fiscal year 1979 construction subsidies equal $157 million and operating subsidies equal $262.8 million), is admittedly only "marginally adequate" to serve as an auxiliary to the Navy in the event of war, and is getting less adequate as each day passes without administrative action.

Eighth. Coordination between the Navy and the U.S. merchant marine has properly been termed a "national scandal" by Chairman MURPHY.

Ninth. Three of our 10 major subsidized liner operators are in poor financial condition and one has recently declared bankruptcy in spite of receiving $120 million in direct subsidies over the last 5 years, as well as extensive indirect assistance through U.S. mortgage guarantee programs and cargo preference policies.

At this point it might be appropriate to note what this administration's promises were prior to the President's election in November 1976.

In a letter dated May 25, 1976, to Jesse M. Calhoun, president of the National Marine Engineers' Beneficial Association, AFL–CIO, then-candidate Carter stated the following:

> My approach is to achieve a maritime program which will return us to the seapower status we deserve and need. I intend to work for the following objectives:
>
> 1. Assure continuing presidential attention to the objective of having our Nation achieve and maintain the desired U.S.-flag merchant marine.
>
> 2. Dedicate ourselves to a program which would result in a U.S.-flag merchant marine with ships that are competitive with foreign-flag ships in original cost, operating cost and productivtiy.
>
> 3. Enact and develop a national cargo policy which would assure our U.S.-flag merchant marine a fair share of all types of cargo.
>
> 4. Continue to enforce our American cabotage laws, such as the Jones Act, which require that U.S.-flag ships trade between our U.S. domestic ports.
>
> In the months ahead, I hope to issue a comprehensive paper on our overall program for returning our Nation to its No. 1 status as a maritime Nation.

In a brochure of President Carter's campaign promises prepared by Commerce Clearing House, the following commitment by the administration appears:

> (1) Favoring a strong, privately owned and operated American flag merchant fleet, backed by a force of skilled and highly trained seamen and managers from both industry and Government run schools. (Statement on Maritime Policy, Post-Convention No. 182).
>
> (2) Devising and implementing a national maritime policy which would include:
>
> (a) A commitment to a higher level of coordination of the diverse subcabinet activities involved in maritime policy (such as through the appointment of a marine affairs advisor to the President who would serve as a member of the NSC);
>
> (b) Commitment to the programs set forth by the Merchant Marine Act of 1970 and to its objective of maintaining, under the American flag a fleet whose vessels are in all respects competitive in original cost, operating cost, productivity and versatility, to foreign-flag fleets; and
>
> (c) Commitment to develop a national cargo policy to assure the American flag fleet access to a fair share of all types of cargo in the American trade.

It is almost a national disgrace that as H.R. 9518 is reported to the full House for consideration, the administration still is unable to advise:

One. Whether the administration supports H.R. 9518 or not;

Two. That the administration has achieved the promised "higher level of coordination of the diverse subcabinet activities involved in maritime policy," (or indeed any coordination of such policy at all); or

Three. What part H.R. 9518 might play in a new national maritime policy which works.

It is my hope that in the few months remaining for action by the 95th Congress, the administration will give us clear guidance in the consideration and adoption of a comprehensive new national maritime law which will both solve the overtonnaging problem and permit a strong, competitive, prosperous, and honest U.S.-flag merchant marine.

This bill will give the Federal Maritime Commission—FMC—new and expanded powers to deal with malpractices in the U.S. foreign trades. We do this despite the clear showing in testimony before the committee that the FMC has failed to come even remotely close to properly exercising the powers it does have.

The burden will be on the Commission in future months to prove that they can effectively regulate the U.S. trades. If they cannot, we should consider a different regulatory structure, including abolition of the FMC itself.

Mr. RUPPE. Mr. Chairman, we have no further requests for time. I yield back the balance of my time.

Mr. MURPHY of New York. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I want to congratulate the gentleman from California (Mr. McCLOSKEY) on the gentleman's initiatives in this legislation. The gentleman very fully and clearly stated the case.

And, I would commend my colleague, the gentleman from California, for his own great efforts in fashioning the legislation which is before the House today. I would also say that we are in agreement that this legislation which is addressed to the issue of rebating does not by itself solve all of the problems of the deficiencies of the Shipping Act and this Nation's lack of a coherent national maritime policy.

During voluminous hearings on this bill wide-ranging testimony on rebating and a national maritime policy was adduced from all Government agencies involved, available carriers and trade associations.

The hearings have disclosed that the various Government agencies—FMC, Maritime Administration, Department of State, Department of Justice, Securities and Exchange Commission, Department of Transportation, Department of Treasury—differed sharply amongst themselves in regard to basic maritime policy decisions required to achieve control of overcapacity.

The hearings further revealed that there is a distinct lack of coordination among the Government agencies responsible so that we have no coherent national maritime policy. Indeed, the agencies and departments are often in conflict, with the result that it is difficult if not impossible to achieve the objectives of the Shipping Act, 1916.

In fact, specific diverse and often conflicting proposals from the witnesses to remedy overtonnaging included strengthening the dual rate contract system; providing for the operation of closed conferences, and the formation of shippers' councils; the control of entry into the U.S. liner trades; consideration of the UNCTAD 40–40–20 Code of Liner Conduct; the promotion of pooling and cargo sharing; bilateral trade agreements; the loosening of antitrust laws; enactment of controlled carrier legislation to block predatory pricing by the Soviets and Eastern bloc countries; and the use of the Trade Act of 1974 and the Special Trade Representative to oversee shippng.

Obviously, the resolution of these broader matters cannot come from hearings that were designed to, and for the most part did, focus on rebating. But the discussions convincingly demonstrate the immediate need for a coordinated and single-minded governmental policy of support for the U.S. merchant marine, or we must be prepared to publicly abandon the concept of maintaining a merchant marine capable of preserving our economic security and meeting our defense transportation needs.

As my distinguished colleague from California is aware, the Committee on Merchant Marine and Fisheries has been seeking to enact legislation that will carry out our national shipping policy as stated in the Merchant Marine Act of 1936 and the Shipping Act, 1916. That is, to establish and maintain a strong merchant fleet, owned by American citizens, manned by American crews, and capable of serving as a naval and military auxiliary in time of war or national emergency.

In addition to the measure before the House to clear our trades of malpractices, we are already engaged in hearings on H.R. 9998, a bill designed to remedy the problem of predatory rate-cutting which threatens the stability of our ocean trades by State-controlled carriers.

And this very morning we commenced hearings on H.R. 11422, a comprehensive bill whcse purpose it is to deal effectively with the overtonnaging problem. This bill, which has been cosponsored by my distinguished colleague from California, for the first time would make some of the most significant changes to our maritime regulatory system since the Shipping Act became law in 1916.

It is designed to remedy three basic problems in our maritime industry today. First. the authorization of closed conferences and the use by them of deferred rebate systems would tend to resolve the severe problems of overtonnaging in our trades in recent years. Shippers' councils would be authorized in order to offset the economic power of such conferences. Second, agreements between conferences of water carriers and bureaus of inland carriers would greatly assist development of through, intermodal services. Third, the problem of administrative delay in the approval of agreements in our liner industry would be eliminated by permitting all such agreements to become effective upon filing with the FMC. The Commission could thereafter disapprove any such agreement it found detrimental to commerce, contrary to the public interest or otherwise in violation of the Shipping Act.

The failure of maritime agencies at the Government level to cooperate, communicate, and coordinate their activities has left us vulnerable to other foreign flags since we lack a well-defined shipping policy. I must certainly agree that we cannot allow this historical lack of coordination and fragmentation to continue at a time when other governments are investing growing quantities of money, energy, and national pride in their merchant fleets.

We have set forth a comprehensive and dedicated program to effect a national, coherent maritime policy. We believe that the initiatives undertaken by the Merchant Marine and Fisheries Committee will result in a new maritime national law which will both solve the overtonnaging problem and permit a strong, competitive, and prosperous U.S.-flag merchant marine.

Mr. Chairman, I have no further requests for time.

The CHAIRMAN. All time has expired.

Pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute recommended by the Committee on Merchant Marine and Fisheries now printed in the reported bill as an original bill for the purpose of amendment.

The Clerk read as follows:

H.R. 9518

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Shipping Act Amendments of 1978".

SEC. 2. Section 16 of the Shipping Act, 1916 is amended, by striking "$5,000" in the sixth paragraph, and inserting, in lieu thereof, "$25,000".

SEC. 3. Section 18(b) of the Shipping Act, 1916 is amended by deleting subsection (6) thereof and by adding the following new language in lieu thereof:

"(6) Whoever violates any provision of this section, other than subsection (b)(3) hereof involving rebates or refunds shall be subject to a civil penalty of not more than $5,000 for each day such violation continues.

"(7) Whoever violates subsection (b)(3) hereof by means of rebates or refunds, shall be subject to a civil penalty of not more than $25,000 for each shipment on which a rebate or refund was paid and to suspension by the Commission of any or all tariffs filed by or on behalf of such carrier, or suspension of that carrier's right to utilize any or all tariffs of conferences of which that carrier may be a member, for a period not to exceed twelve months. Any carrier whose tariffs or rights of use thereof have been suspended pursuant to this paragraph and who accepts cargo for carriage during the suspension period which cargo otherwise would have been governed by the provisions of the suspended tariff(s) shall be subject to a civil penalty of not more than $50,000 for each shipment so accepted.

"For purposes of this subsection and section 22(c) of this Act, a shipment shall mean all of that cargo, the carriage of which is evidenced by a single bill of lading.".

SEC. 4. Section 21 of the Shipping Act, 1916 is amended by designating the existing two paragraphs as subsection "(a)" and by adding a new subsection (b) as follows:

"(b) The Commission shall require the chief executive officer of every vessel operat-

ing as a common carrier by water in foreign commerce and to the extent it deems feasible, may require any shipper, consignor, consignee, forwarder, broker, other carrier or other person subject to this Act, to file a periodic, written certification under oath with the Commission attesting to—

"(1) a policy prohibiting the payment, solicitation, or receipt of any rebate which is unlawful under the provisions of this Act;

"(2) the fact that such policy has been promulgated recently to each owner, officer, employee, and agent thereof;

"(3) the details of the efforts made, within the company or otherwise, to prevent or correct illegal rebating; and

"(4) full cooperation with the Commission in its investigation of illegal rebating or refunds in United States foreign trades, and in its efforts to end such illegal practices.

The Commission may by regulation prescribe the form and content of any certification required under the authority of this subsection. Failure to file any such certification shall result in a civil penalty of not more than $5,000 for each day such violation continues.".

SEC. 5. Section 22 of the Shipping Act, 1916 is amended as follows:

(a) designate the two existing paragraphs as "(a)" and "(b)", respectively;

(b) amend subsection (b), as designated by this Act, by deleting therefrom the phrase "except as to orders for the payment of money,"; and

(c) immediately after subsection (b), as designated by this Act, insert the following:

"(c)(1) In addition to, and without limiting the authority granted to the Commission by subsections (a) and (b) hereof, the Commission may, on its own motion, institute an adjudicatory investigation into possible violations of section 16 (other than paragraphs First and Third) involving rebates or refunds in foreign commerce or violations of section 18(b)(3) involving rebates or refunds, with the powers set forth in subsection (c)(2) hereof in addition to those already contained in sections 27, 43, and other sections of this Act.

"(2) Failure on the part of any person, respondent to a proceeding instituted pursuant to subsection (c)(1), or any other person directly or indirectly controlling, controlled by, or under common control with such respondent, to comply with any subpena or any duly issued order compelling an answer to interrogatories or to designated questions propounded by deposition or compelling production of documents in relation to any investigation conducted under subsection (c)(1), shall authorize the Commission to issue an order to show cause why any or all tariffs filed pursuant to section 18(b) of this Act, by or on behalf of a respondent carrier, or any or all rights of a respondent carrier to utilize such tariffs in the case of conference tariffs, should not be suspended until that carrier or any person directly or indirectly controlling, controlled by, or under common control with such carrier, has fully responded to the pertinent deposition, interrogatory, production request or motion, or subpena, and after such proceeding, and after consultation with the Secretary of State, to so suspend those tariffs or the respondent carrier's rights to utilize such tariffs. Any carrier whose tariff(s) or rights of use thereof have been suspended pursuant to this subparagraph and who accepts cargo for carriage during the suspension period which cargo otherwise would have been governed by the provisions of the suspended tariff(s) shall be subject to a civil penalty of not more than $50,000 for each shipment so accepted.

"(3) The Secretary of State shall take appropriate steps to negotiate a regime of cooperation with other maritime nations engaged in United States foreign trades to secure compliance with the Commission's requirements for information. He shall issue a report to the President and the Congress within one hundred and eighty days after enactment of this Act on the results of those negotiations. If the President deems that the steps taken provide satisfactory Commission access to such information, he shall so certify to the Congress within thirty days after receipt of the Secretary's report. If such certification is not made, the penalties prescribed in paragraph (c)(2) for failure to comply with information requests shall be mandatory.

"(4) Before any tariff suspension ordered pursuant to paragraph (c)(2) becomes effective, it shall be immediately submitted to the President who may, within ten days after receiving it, disapprove any such order if he finds that disapproval is required for reasons of the national defense or the foreign policy of the United States.".

SEC. 6. Section 23 of the Shipping Act, 1916 is amended by deleting therefrom the language ", other than for the payment of money,".

SEC. 7. Section 27 of the Shipping Act, 1916 is amended by deleting from subsection (b) thereof the phrase "other than for the payment of money".

SEC. 8. Section 29 of the Shipping Act, 1916 is amended by deleting therefrom the phrase "other than an order for the payment of money,".

SEC. 9. Section 30 of the Shipping Act, 1916 is amended in the initial and final paragraphs thereof by deleting the phrase "for the payment of money" and by inserting, in lieu thereof, the phrase "for the payment of reparation".

SEC. 10. Section 32 of the Shipping Act, 1916 is amended by inserting at the end thereof the following new subsections:

"(d) No penalty shall be imposed on any person for conspiracy after August 29, 1972: (1) to rebate or refund in violation of the initial paragraph or paragraph Second of section 16, or under section 18(b)(3) of this Act; or (2) to defraud the Commission by concealment of such rebates or refunds in any manner.

"(e) Notwithstanding any other provision of law, the Commission shall have authority to assess or compromise all civil penalties provided in this Act: *Provided, however,* That, in order to assess such penalties a formal proceeding under section 22 of this Act shall be commenced within five years from the date when the violation occurred.".

SEC. 11. The provisions of this Act, including the amendments made by this Act, shall become effective immediately upon its date of enactment.

Mr. MURPHY of New York (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. Are there any amendments to the committee amendment in the nature of a substitute?

If not, the question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the Chair, Mr. BURLISON of Missouri, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 9518) to amend the Shipping Act, 1916, to provide for a 3-year period, to reach a permanent solution of the rebating practices in the U.S. foreign trade, pursuant to House Resolution 1074, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. FORD of Tennessee. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 390, nays 1, not voting 43, as follows:

Metcalfe	Scheuer	Whitley
Pepper	Shipley	Wilson, C. H.
Risenhoover	Teague	Wilson, Tex.
Roberts	Thornton	Young, Alaska
Roncalio	Traxler	
Rudd	Tucker	

The Clerk announced the following pairs:

Mr. Annunzio with Mr. Sarasin.
Mr. Akaka with Mr. Broyhill.
Mr. Shipley with Mr. Frey.
Mr. Traxler with Mr. Cohen.
Mr. Flood with Mr. Fraser.
Mr. Whitley with Mr. Findley.
Mr. Risenhoover with Mr. Anderson of Illinois.
Mr. Charles Wilson of Texas with Mr. Goodling.
Mr. Charles H. Wilson of California with Mr. Madigan.
Mr. Dellums with Mr. Young of Alaska.
Mr. Diggs with Mr. McKinney.
Mrs. Collins of Illinois with Mr. Thornton.
Mr. Metcalfe with Mr. Derrick.
Mr. Pepper with Mr. McEwen.
Mr. Florio with Mr. Roberts.
Mr. Edwards of California with Mr. Roncalio.
Mr. Lloyd of California with Mr. Udall.
Mr. Meeds with Mr. Tucker.
Ms. Keys with Mr. Teague.
Mr. Howard with Mr. Scheuer.
Mr. Heftel with Mr. Rudd.

Mr. GEPHARDT and Mr. BAUMAN changed their vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill to amend the Shipping Act, 1916, to strengthen the provisions prohibiting rebating practices in the United States foreign trades."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that all Members who wish to do so may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO HAVE UNTIL FRIDAY, MARCH 31, 1978, TO FILE REPORTS ON H.R. 10822 AND H.R. 10823

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries may have until Friday, March 31, 1978, to file the committee reports on H.R. 10822, the National Sea Grant Authorization Act of 1978, and H.R. 10823, authorizations for the National Advisory Committee on Oceans and Atmosphere.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PERMISSION FOR COMMITTEE ON MERCHANT MARINE AND FISHERIES TO HAVE UNTIL MIDNIGHT, FRIDAY, MARCH 31, 1978, to FILE CERTAIN REPORTS

Mr. MURPHY of New York. Mr. Speaker, I ask unanimous consent that the Committee on Merchant Marine and Fisheries have until midnight, Friday, March 31, 1978, to file reports on the following bills:

H.R. 11465. To authorize appropriations for the U.S. Coast Guard for fiscal year 1979, and for other purposes;

H.R. 10730. To authorize appropriations to carry out the Marine Mammal Protection Act of 1972 during fiscal years 1979, 1980 and 1981;

H.R. 10878. To extend until October 1, 1981, the voluntary insurance program provided by section 7 of the Fishermen's Protective Act of 1967;

H.R. 10882. To authorize appropriations to carry out conservation programs on military reservations and certain public lands during fiscal years 1979, 1980 and 1981;

H.R. 10883. To authorize appropriations to carry out the Endangered Species Act of 1973 during fiscal years 1979, 1980 and 1981;

H.R. 10732. To authorize appropriations to carry out the Fishery Conservation and Management Act of 1976 during fiscal years 1979, 1980 and 1981;

H.R. 10884. To authorize appropriations to the Office of Environmental Quality for fiscal years 1979, 1980 and 1981;

H.R. 10255. To assist the States in developing comprehensive fish and wildlife resource management plans and in implementing such plans with respect to nongame fish and wildlife:

H.R. 7749. To implement the Agreed Measures for the Conservation of Antarctic Fauna and Flora of the Antarctic Treaty, and for other purposes; and

H.R. 3489. To amend section 216(b) of the Merchant Marine Act of 1936, to entitle Delegates in Congress from Guam and the Virgin Islands to make nominations for appointments to the Merchant Marine Academy.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11495, AUTHORIZING RESEARCH, DEVELOPMENT, AND DEMONSTRATION PROJECTS RELATING TO AVIATION

Mr. BOLLING, from the Committee on Rules, submitted a privileged report (Rept. No. 95–1000) on the resolution (H. Res. 1100) providing for the consideration of H.R. 11495 to authorize research, development, and demonstration projects relating to aviation, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 11400, AUTHORIZING APPROPRIATION OF SPECIFIED DOLLAR AMOUNTS FOR EACH OF NATIONAL SCIENCE FOUNDATION'S MAJOR PROGRAM AREAS

Mr. BOLLING, from the Committee on Rules, submitted a privileged report

(Rept. No. 95–999) on the resolution (H. Res. 1099) providing for the consideration of H.R. 11400 to authorize the appropriation of specified dollar amounts for each of the National Science Foundation's major program areas (and certain subprograms), and to provide requirements relating to periods of availability and transfers of the authorized funds, which was referred to the House Calendar and ordered to be printed:

APPOINTMENT OF CONFEREES ON H.R. 6782, RAISIN MARKETING PROVISIONS

Mr. FOLEY. Mr. Speaker, by direction of the Committee on Agriculture, and pursuant to clause 1, rule XX, I move to take from the Speaker's table the bill (H.R. 6782) to permit marketing orders to include provisions concerning marketing promotion, including paid advertisement, of raisins and distribution among handlers of the pro rata costs of such promotion, with Senate amendments thereto, disagree to the Senate amendments, and request a conference with the Senate thereon.

The SPEAKER. The gentleman from Washington (Mr. FOLEY) is recognized for 1 hour.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Speaker, I have heard—and I say this by way of rumor—that what we are doing is passing this so that we can then have a conference committee on the agricultural bill that the Senate has passed, so that the House in effect would end up with a major revision of agricultural policy in the United States without having had a chance to look at it more. Is that correct or incorrect?

Mr. FOLEY. Mr. Speaker, I will tell the gentleman that the Senate amendments to the Raisin Marketing Orders and Promotion Act are far reaching. They involve, among other things, proposed increases in targets and loans on wheat, feed grains, and upland cotton and provide for a land diversion program for soybeans as well as the forestated crops.

As the gentleman knows, however, any agreement that results from the deliberations of this conference committee will come back before the House to be either accepted or rejected by its membership.

Mr. SIMON. Mr. Speaker, I have great respect for my colleague, the gentleman from Washington, but it just seems to me when we are dealing with a matter that affects our balance of payments and that affects what can happen to the farmers of this Nation, we ought to have our House Agriculture Committee go into that in some depth and that we ought to really know what we are doing, and not be faced with a conference committee.

This is a legislative body and I am concerned about the haste with which this is, all of a sudden, happening.

Mr. BURLISON of Missouri. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I will be glad to yield to the gentleman from Missouri.

Mr. BURLISON of Missouri. Mr. Speaker, of course the gentleman from Illinois knows that the House Committee on Agriculture has held very extensive hearings for several weeks on this legislation and that time is of the essence in most of the country so far as farmers are concerned. I would hope that the House will agree to a conference and that the House conferees will come back with an agreement with the Senate conferees in short order so that our farmers can know what the program for 1978 is.

Mr. SIMON. Mr. Speaker, frankly I speak without knowledge of what has takes place. I would ask the gentleman has the House Committee on Agriculture in fact deliberated on the Dole bill for some time?

Mr. BURLISON of Missouri. Mr. Speaker, if the gentleman will yield further, the House Committee on Agriculture has held some weeks of hearings on the farm problem and the farm situation and on various proposals for solutions to them. As the gentleman may know I have testified before that committee and have followed very closely what they have done because of my interest in that bill. Because of constraints of time, the House should go to conference.

Mr. SIMON. I share that interest and concern and I hope we are doing the right thing.

Mr. ANDREWS of North Dakota. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from North Dakota.

Mr. ANDREWS of North Dakota. Mr. Speaker, I would like to make a point, since we are talking about the parliamentary procedure, and I can understand the concern of the gentleman, but in reply let me say that out in the farming areas of our country that the season does not wait upon parliamentary procedure. Spring is here. The farmers are moving into their fields. We are about to go on a 10-day recess. We need this in order that the farm families of the country may know the full facts that they are going to have to face and what the program will be for the operation of their farms.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Louisiana.

Mr. MOORE. Mr. Speaker, I intend to support the motion offered by the gentleman from Washington (Mr. FOLEY). I think this matter should be taken care of as quickly as possible, albeit a bit extraordinary. I would also say that as soon as the motion passes that I intend to offer a privileged motion to instruct the House conferees to support the Dole amendment to the Senate bill or the House bill as adopted in the other body to maintain flexibility of parity approach and I would urge the adoption of that motion to instruct.

Again I thank the gentleman for yielding.

Mr. FOLEY. Mr. Speaker, I would say to the gentleman from Louisiana (Mr. MOORE) that although I appreciate his support of my motion, I do not and cannot support his desire to instruct the conferees in the event that it passes.

If we are to move here in a responsible way, I think we must have this body's permission to go to conference unencumbered so that we may truly consider and address the very complex matters involved in the Senate amendment. I would hope the gentleman from Illinois can appreciate and support the reasoning behind this request. In my view, to require that our Members go to conference with the Senate and accept without debate a very complex provision which has not been discussed in the House itself would be a serious abuse of parliamentary procedure. Under the circumstances, I would hope that the Members of the House will allow us some flexibility by supporting our effort to desire to disagree with the Senate amendment. If this is done, we will then come back to our colleagues in the House with a fully considered conference report and accept their judgment on it.

Because the so-called Dole amendment poses administrative difficulties that could well take many. many weeks to implement, it appears likely that its adoption at this time might further complicate the problems faced by the very farmers and ranchers we would like to help in 1978.

I urge those of you who are truly interested in providing relief for these hard pressed farm families of America not to mistakenly withhold that help by sending this committee into conference with instructions thereby eliminating all freedom to fully discuss these important issues and to work out a practical and efficacious solution.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Louisiana.

Mr. MOORE. I thank the gentleman for yielding.

I certainly agree that nothing is intended by my motion to instruct to in any way delay or in any way harm what we hope will be forthcoming from that conference committee, but I do not think the chairman is telling the Members of the House that a motion to instruct binds the House conferees and certainly it does not instruct the Senate conferees.

Mr. FOLEY. I know the gentleman is correct when he says it does not bind the House conferees. What I fail to understand though, is why he would seek to instruct our conferees on an intricate amendment involving procedures, costs, and impacts unknown to most of our members before the conference meets to discuss these very points. I believe that support for my distinguished friend's motion to instruct the conferees will damage our opportunity to bring an effective bill to the floor of this House which will help farmers in this 1978 year.

Because this amendment has not been explored and discussed in the Committee on Agriculture or on the House floor to any degree, I think it is vital to all concerned that the conferees be allowed

to look at its provisions without previous instructions that it be accepted; to do otherwise runs contrary to responsible parliamentary action.

Mr. SIMON. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding.

I simply want to concur with the chairman of the Committee on Agriculture, the gentleman from Washington (Mr. FOLEY), on resistance to the motion. We do not know the impact on America's farmers. We do not know the impact on our deficit. We do not know the impact on inflation. We do not know the impact on the balance of payments. These are things that we ought to take a look at. Just blindly to instruct our delegation, our conferees, is certainly not wise legislative procedure, and I hope we will support the chairman of the Committee on Agriculture in this resistance.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Mississippi.

Mr. WHITTEN. I thank the gentleman for yielding.

Mr. Speaker, I hope that this matter will come up on a motion to table in the event it should become necessary.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the distinguished minority leader.

Mr. RHODES. I thank my friend, the gentleman from Washington, for yielding.

It strikes me that if this Dole amendment is so complex—and I agree that it probably is, it is not wise to go to conference on it. It seems to me that maybe the best thing that could happen right now would be for the chairman to take the rest of this hour and try to explain to us what is in this bill. We have not heard a word yet as to the merits of it, and before I vote to go to conference on it, with the facts staring us in the face that there has been no hearing in the Committee on Agriculture, and with nobody on this side really knowing what is in the bill, I would like to be enlightened further. Lacking that, I feel that I might be constrained to vote against going to conference, even though I recognize that there is some haste in getting an agriculture bill.

Mr. FOLEY. I will say to the gentleman, the distinguished minority leader, that what we are dealing with here are provisions which the Senate has attached to a relatively simple and uncontroversial rasin marketing bill. Involved are some very far-reaching amendments to the present farm program which include provisions introduced by the distinguished chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, the gentleman from Georgia, Mr. TALMADGE, by the Senator from South Dakota, Mr. MCGOVERN, the Senator from Kansas, Mr. DOLE, and others. It is an extremely complex series of amendments. I hope that I might be pardoned for saying that I am not sure they are entirely consistent one with the other. In any event, they provide for significant increases in the target prices on wheat, feed grains, and cotton and for mandatory diversions being made available by the Secretary on wheat, feed grains, cotton, and soybeans.

The question that the gentleman from Louisiana raised with respect to the Dole amendment, authorizing payments of a substantially increased character to farmers who cut back as much as 50 percent of their plantings under a so-called flexible parity approach, in my view poses severe administrative problems in terms of implementation. It is my own judgment that if we are to have any meaningful program to boster the farmers income, it must be one which cannot only be passed by both bodies but can also be implemented without enormous administrative complications.

I am perfectly willing, as are the other House conferees, to consider all the Senate amendments in conference and try to work out an agreement which we can present to the House and the Senate for their consideration.

I am extremely concerned, however, over proposals to instruct the conferees in advance of the conference and while it is true that this has happened before on occasion, in most instances those instructions were fairly simple and dealt with issues which had been thoroughly debated in the House. As a result Members clearly knew the impact of their instructions. In this case, we must go beyond the more philosophical question whether we want to instruct conferees. This is a somewhat inflexible instruction involving an extremely complicated aspect of the farm problem. Moreover, it is important to realize that this instruction may not be entirely consistent with our ability to look at other features of the Senate amendments and then come back with an achievable and rational program.

Having said this, I urge that you allow us to go to conference and that you not bind or restrict us with a complicated instruction dictating our collective response to something the House has not had an opportunity to consider adequately.

Mr. MOORE. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Louisiana.

Mr. MOORE. Mr. Speaker, I think that the arguments just made are exactly why this motion to instruct is necessary. This House has never seen a portion of the bill and will never see it. This is the only opportunity the House will have whether they wish to see the Dole flexible parity approach in a farm bill. Most Members are familiar with that. Most farmers want that. That is what they have been telling us. The other body agreed to it in the bill and the Congressional Budget Office has told us this will cost less than any other part of this program.

Mr. FOLEY. Mr. Speaker, I concur that the House is not wholly familiar with this bill which involves a very complicated amendment raising difficult questions of administration. Furthermore, the cost analysis has not yet been completed. For these and other reasons which I have touched on, I urge that Members on both sides of the aisle not limit the scope of our consideration.

Mr. SEBELIUS. Mr. Speaker, I was prepared to rise and speak in support of the motion to instruct offered by the gentleman from Louisiana.

However, the majority leadership chose to table the motion and prohibit us from discussing the matter on its merits. I regret the action because this concept has over 35 sponsors in the House. It was introduced as a unique approach to the farmer problem and I was principal sponsor in the House.

The intent of the bill is not to react to farmer pressure but rather to respond to the economic problem that forced farmers to come to Washington in the first place.

The discussion of the flexible parity bill to date has focused on problems of cost and implementation. Of course these problems are subject to debate. However, the cost will be much less when we get our supply-demand picture back in shape.

The individual farmer can choose the target price he needs up to parity, but must scale down his production accordingly. Flexible parity will not interfere with exports. Now for the first time, farmers will have the ability to individually and collectively control their production.

The American farmer likes and wants the bill for those and many other reasons. Hundreds of my farmers say that the flexible parity approach is what they want most of all. It is their top priority. It will cost less than the Talmadge approach of paying for 31 million acres of set-aside.

In conference the farmer will doubtlessly come out the loser, if we did not instruct the conferees. I just wanted to do this part of the bill the way the farmer wants it for a change.

Mr. THONE. Mr. Speaker, one thing that can be effected with the flexible parity concept is a raise in the market price of farm commodities. Certainly this is necessary. And the time is now. Also, this concept allows a guarantee to the farmer of a target price certain, with the goal of a higher market price, but at least the guarantee is there.

The current inventory of our grains is in excess as we all know well. So we must reduce the production side of this equation, and the flexible parity concept addresses this problem head on. This then will shift a needed price increase from the Government to the marketplace. Our Nebraska farmers are not looking for a Government subsidy, they want just a little equality in this ridiculous cost-price disparity that is now in operation. Everything the farmer buys is sky high while his income is at a 30- to 40-year low.

This just cannot continue for the

farmers of America. The centerpiece of the Senate bill is the Dole flexible parity proposal, and it should be retained by the conferees.

Mr. FOLEY. The question before the House, Mr. Speaker, is on the motion to disagree with the Senate amendments and request a conference with the Senate thereon.

Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Washington (Mr. FOLEY).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. YATES. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 332, nays 63, not voting 39, as follows:

The Clerk announced the following pairs:

Mr. Annunzio with Mr. Watkins.

Mr. Akaka with Mr. Tucker.

Mr. Lloyd of California with Mr. Kastenmeier.

Mr. Shipley with Mr. Goodling.

Mr. Teague with Mr. Thornton.

Mr. Charles H. Wilson of California with Mr. Cohen.

Mr. Pepper with Mr. Frey.

Mr. Mottl with Mr. Broyhill.

Mr. Risenhoover with Mr. Anderson of Illinois.

Mr. Roberts with Mr. Findley.

Mr. Flood with Mr. Forsythe.

Mr. Meeds with Mr. Evans of Indiana.

Mr. Metcalfe with Mr. Madigan.

Mr. Traxler with Mr. Rudd.

Mr. Whitley with Mr. Roncalio.

Mr. Fountain with Mr. Sarasin.

Mrs. Collins of Illinois with Mr. Scheuer.

Mr. Dellums with Mr. Charles Wilson of Texas.

Mr. Diggs with Mr. Milford.

Messrs. ERLENBORN, HUGHES, WOLFF, HARRINGTON, HOWARD, SNYDER, STRATTON, and PATTEN changed their vote from "yea" to "nay."

So the motion was agreed to.

The result of the vote was announced as above recorded.

PREFERENTIAL MOTION OFFERED BY MR. MOORE

Mr. MOORE. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. MOORE moves that the managers on the part of the House at the conference on the disagreeing votes of the two Houses on the bill H.R. 6782 be instructed to concur in the language of the Senate amendment as follows:

"TITLE II—PRICE SUPPORT FOR PRODUCERS SETTING ASIDE ACREAGE FOR THE 1978 CROPS OF WHEAT, FEED GRAINS, AND UPLAND COTTON

"SEC. 201. This title may be cited as the "Flexible Parity Act of 1978".

"SEC. 202. Effective only with respect to the 1978 crops, title I of the Agricultural Act of 1949 is amended by adding at the end thereof new sections 116 and 118 as follows:

"1978 WHEAT LOAN RATE AND TARGET PRICE

"SEC. 116. Notwithstanding any other provision of this Act—

"(a) The Secretary shall make available to producers loans and purchases on the 1978 crop of wheat at a level not less than $2.85 per bushel.

"(b) The established price for the 1978 crop of wheat shall be at a level related to the amount of cropland that the producers on a farm voluntarily elect to set aside from production. If the acreage the producers voluntarily set aside is—

"(1) 20 percent, the established price shall be $3 per bushel;

"(2) 25 percent, the established price shall be $3.25 per bushel;

"(3) 30 percent, the established price shall be $3.50 per bushel;

"(4) 35 percent, the established price shall be $4 per bushel;

"(5) 40 percent, the established price shall be $4.25 per bushel;

"(6) 45 percent, the established price shall be $4.50 per bushel;

"(7) 50 percent, the established price shall be $5.04 per bushel.

"1978 FEED GRAIN LOAN RATES AND TARGET PRICES

"SEC. 117. Notwithstanding any other provision of this Act—

"(a) The Secretary shall make available to producers loans and purchases on the 1978 crop of corn at a level not less than $2.40 per bushel.

"(b) The established price for the 1978 crop of corn shall be at a level related to the amount of cropland that the producers on a farm voluntarily elect to set aside from pro-

duction. If the acreage the producers voluntarily set aside is—

"(1) 10 percent, the established price shall be $2.10 per bushel;

"(2) 20 percent, the established price shall be $2.25 per bushel;

"(3) 25 percent, the established price shall be $2.45 per bushel;

"(4) 30 percent, the established price shall be $2.65 per bushel;

"(5) 35 percent, the established price shall be $2.85 per bushel;

"(6) 40 percent, the established price shall be $3.05 per bushel;

"(7) 45 percent, the established price shall be $3.25 per bushel;

"(8) 50 percent, the established price shall be $3.45 per bushel."

TITLE III—UPLAND COTTON

SEC. 301. Section 103 of the Agricultural Act of 1949, as amended, is amended by adding at the end of subsection (f)(4) the following new sentence:

"Notwithstanding any other provision of this Act, the established price for an individual producer for the 1978 crop of upland cotton shall be at a level related to the set-aside such producer voluntarily makes pursuant to this Act as follows:

"If the set-aside is:

"20 per centum, the established price shall be 54 cents per pound;

"25 per centum, the established price shall be 59 cents per pound;

"30 per centum, the established price shall be 64 cents per pound;

"35 per centum, the established price shall be 69 cents per pound;

"40 per centum, the established price shall be 74 cents per pound;

"45 per centum, the established price shall be 79 cents per pound;

"50 per centum, the established price shall be 84 cents per pound.".

TITLE IV—GRAIN RELEASE PRICES

SEC. 401. Effective for the period beginning on the date of enactment of this Act and ending one year thereafter—

(1) Section 110(b)(5) of the Agricultural Act of 1949 is amended by striking out "wheat has attained a specified level which is not less than 140 per centum nor more than 100 per centum of the then current level of price support for wheat or such appropriate level for feed grains, as determined by the Secretary" and inserting in lieu thereof "the commodity has attained a specified level which is not less than the current parity price for such commodity."

(2) Section 110(b)(6) of the Agricultural Act of 1949 is amended by striking out "is not less than 175 per centum of the then current level of price support for wheat or such appropriate level for feed grains as determined by the Secretary under this Act" and inserting in lieu thereof "is not less than 105 per centum of the current parity price for such commodity".

SEC. 402. Effective for the period beginning on the date of enactment of this Act and ending one year thereafter, section 110 (d) of the Agricultural Act of 1949 is amended by striking out "150 per centum of the then current level of price support for such commodity" and inserting in lieu thereof "the parity price for such commodity."

SEC. 403. Effective for the period beginning on the date of enactment of this Act and ending one year thereafter, the language following the third colon in the third sentence of section 407 of the Agricultural Act of 1949, as amended by section 408 of the Food and Agriculture Act of 1977, is amended by striking out "115 per centum of the current national average loan rate" and inserting in lieu thereof "the current parity price".

Mr. MOORE (during the reading). Mr. Speaker, I ask unanimous consent that my motion be considered as read and printed in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, earlier in the debate on the previous motion the gentleman from Washington (Mr. FOLEY) made the comment that many Members did not fully understand all the contents of the bill that is to be sent to conference. I also understand from discussions on the floor that there might be some attempt to cut off debate with a motion to table the pending motion offered by the gentleman from Louisiana.

I would hope that is not the case, and that we could have at least some discussion of the motion to instruct so that the Members could have a full understanding. This is the only vote we are going to have on the so-called Dole flexible parity part of the bill. I would hope that there would be no attempt to cut off discussion, even though some Members might be opposed to the provisions. With all the many problems facing our farmers the least we can do is to permit full debate on the parity issue as embodied in the Dole bill. It is an insult to American farmers to treat this issue in such a cavalier manner.

Further reserving the right to object, I wonder if the gentleman from Washington could give me assurance that he will not try to cut off debate on this important issue.

Mr. FOLEY. If the gentleman will yield, I have a privileged motion at the desk which I will ask the Clerk to read immediatley following the conclusion of the reading of the pending motion.

Mr. BAUMAN. So the gentleman does not intend to permit any discussion at all?

Mr. FOLEY. We have had discussion on the matter. We have had sufficient discussion on the matter, and we should proceed with this motion.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

Mr. PRESSLER. Mr. Speaker, reserving the right to object, I would certainly like to join in the effort to get a discussion of the Dole bill and of the problems that face our farmers. I feel it would be very appropriate, in view of the condition of the American agricultural market and the efforts which have brought this to the attention of Washington, and very interesting to have a discussion of the farm problem this afternoon. If we wait until after the recess it will be tragic because spring planting in now underway. Our farmers need to know what the set-aside program will be. Let us act now. I urge a "no" vote on the tabling resolution to be offered by Mr. FOLEY.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Louisiana?

Mr. ROUSSELOT. Mr. Speaker, I object.

Mr. MOORE. Mr. Speaker, I withdraw my unanimous-consent request.

The SPEAKER pro tempore. The Clerk will read the preferential motion.

The Clerk concluded reading the preferential motion.

PREFERENTIAL MOTION OFFERED BY MR. FOLEY

Mr. FOLEY. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. FOLEY moves to lay the motion to instruct conferees on the table.

PARLIAMENTARY INQUIRY

Mr. MOORE. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). The gentleman will state his parliamentary inquiry.

Mr. MOORE. Mr. Speaker, on behalf of the gentleman from Nebraska (Mr. THONE) and myself, I would like the Members of the House to understand that if this motion to table my motion to instruct the conferees is agreed to that that then will prohibit all debate, it cuts off all debate of whatsoever kind on the matter.

The SPEAKER pro tempore. The Chair will state that that is not a parliamentary inquiry.

The question is on the preferential motion offered by the gentleman from Washington (Mr. FOLEY) which is not a debatable motion.

The question was taken and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MOORE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 224, nays 167, not voting 43, as follows:

Mr. Evans of Indiana with Mr. Roncalio.
Mr. Barnard with Mr. Pritchard.
Mr. Milford with Mr. Watkins.
Mr. Moffett with Mr. St Germain.
Mr. Murphy of New York with Mr. Stark.

Mr. WHITE and Mr. KEMP changed their vote from "yea" to "nay."

So the preferential motion to table was agreed to.

The result of the vote was announced as above recorded.

EXPLANATION OF "FLEXIBLE PARITY" AMENDMENT

Mr. MOORE. Mr. Speaker, the purpose of this amendment is to raise 1978 market prices of wheat, feed grains, and cotton.

In the case of the grains, the amendment seeks to achieve this goal in two ways:

First, the individual grain farmer would be encouraged to reduce his 1978 plantings by an escalating price support tied to the size of his set-aside. In other words, the more land a grain farmer idled, the higher his farm deficiency payments would be.

If, for example, a wheat farmer set aside 20 percent of his 1978 wheat acreage he would be guaranteed $3 per bushel—the same as present law. If he set aside 50 percent, he would be guaranteed $5 per bushel—the January parity price for wheat.

Each farmer would make his own choice: first, whether to participate at all; and if so, to what extent. The CBO estimates that the "blend" of participation would be 35 percent. Thus there would be a significantly smaller wheat crop in 1978 under this program.

The second way this legislation tries to keep market prices up is through the device of preventing USDA from releasing or selling surplus grain back into the market at less than 100 percent of parity.

The way the present law works the "farmer-held" surplus grain will start coming back onto the market when wheat prices reach $3.15 a bushel—$3.29 if the loan is $2.35. Under the bill, the wheat price would have to reach $5 before this grain became available for commercial use.

Thus, a combination of these two devices * * * a larger set-aside and a stricter rule on sales of Government-controlled surpluses should bring 1978 grain prices up to profitable levels.

In the case of upland cotton, the amendment permits individual cotton producers to set aside up to 50 percent of their planted acreage in return for an 84 percent target price.

Unlike the grain provisions of the bill, however, the CCC release prices for cotton are not changed. The reason for this is that synthetic fiber competition makes such a policy impractical in the case of cotton.

ANSWER TO ARGUMENTS AGAINST FLEXIBLE PARITY

There have been three principal arguments advanced against the amendment.

The first is that it would be too complex to institute this year. This is just not so! The present law permits set-aside sign-ups until May 1. Surely the new regulations, if preliminary work were to begin right away, could be implemented in time to give producers their choices allowed under the bill. The flexible parity provisions simply parallel the present program and only give producers additional 1978 options.

The second argument advanced is that the release price provisions on grain would be disruptive and unfair to producers already signed up for the reserve program.

That argument does not hold water either, because the legislation is prospective and not retroactive in regard to existing agreements. It would cover only new agreements and all existing contracts would be honored. Of course, if the Secretary wished to renegotiate agreements with the consent of grain producers, he could do so.

The third argument is that this amendment will be unduly expensive. The source of this attack is the USDA. However, the Congressional Budget Office had a different view and when this amendment was debated in the Agriculture Committee of the other body they made the following estimate:

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE

MARCH 10, 1978.

1. Bill Number: S. 2481.

2. Bill title: Flexible Parity Act of 1978

3. Bill status: As introduced on February 2. 1978

4. Bill purpose:

S. 2481 authorizes a program that would enable the producers of wheat, feed grains, and cotton to select a target price for each commodity. To receive the selected target price, the producer would be required to place a specified percentage of land in the voluntary set-aside program.

S. 2481 also changes the price release levels for the grain reserve program (Title XI of the Food and Agriculture Act of 1977). Release of stocks would be geared to parity prices rather than to the price support level for each commodity.

5. Cost estimate:

The following table presents the estimated costs of S. 2481:

[In millions of dollars]

Variable parity	
Fiscal year 1979	$1,650
Fiscal year 1980	−1,391
Fiscal year 1981	0
Fiscal year 1982	0
Fiscal year 1983	0

These costs fall within budget function 350.

6. Basis of estimate:

Using the Data Resources, Inc., agricultural model, each possible acreage set-aside level was analyzed. The cost estimate represents the 35 percent set-aside level on each crop, a likely average of the choices of various producers.

Costs for fiscal year 1979 increase because target prices rise faster than market prices, and thus total government outlays increase. However, the market price effect carries over to the 1979 crop year, decreasing deficiency

payments and loans in fiscal year 1980. Some minor effects may carry through to fiscal year 1981.

The maximum fiscal year 1979 cost of this bill would be approximately $3.4 billion, assuming that all producers select the target prices. The offsetting savings in fiscal year 1980 would be approximately $2.8 billion.

The provisions regarding grain reserve release prices are not likely to result in additional federal costs.

7. Estimate comparison: None.

8. Previous CBO estimate: None.

9. Estimate prepared by: Marilyn K. Moore (225-7760).

10. Estimate approved by: James L. Blum, Assistant Director for Budget Analysis.

Thus a $300 to $600 million cost is a lot less than other alternatives and a lot better than letting thousands of grain and cotton farmers go under.

The fact is that this amendment touches the heart of the administration's "cheap grain" policy that the present grain reserve is constructed to accomplish.

The amendment has been thoroughly debated in the other body which adopted it on March 21 by a record vote of 55 to 39.

It is strongly supported by the minority side of this body and I hope there will be sufficient support from our friends on the other side of the aisle who would rather represent their districts than they would the White House economic planners who are committed to a "cheap grain" policy.

Thus I especially hope that colleagues who serve on the Agriculture Committee and who have already introduced "flexible parity" bills of their own, such as Mr. HIGHTOWER, Mr. GLICKMAN, Mr. JENRETTE, Mr. ROSE, and Mr. RISENHOOVER, will support this effort.

In its present form this amendment is less expensive than the alternatives available to the Committee of Conference—some $300 to $600 million net cost according to a CBO estimate of March 10, 1978.

This is an amendment that will give the House the chance to live up to its parity policy pronouncement on the Humphrey-Hawkins bill. It is an amendment that signals the end of unfair food policy toward the grain producers of our country, and it is an amendment that is battle-tested in debate in the other body.

I therefore sincerely urge the House to vote for my motion to instruct our House conferees to concur in a "flexible parity" amendment.

PERSONAL EXPLANATION

Mr. FOUNTAIN. Mr. Speaker, on rollcall 181, the vote concerning the motion of the gentleman from Washington (Mr. FOLEY) to send the bill H.R. 6782 to conference, I was unavoidably detained on official business as I was meeting with a group of my constituents concerning important business in my district. Had I been present, I would have voted "aye" to send the agricultural bill to conference.

GENERAL LEAVE

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the motion to proceed to conference on the bill H.R. 6782.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The SPEAKER pro tempore. Without objection, the Chair appoints the following conferees: Messrs. FOLEY, POAGE, DE LA GARZA, JONES of North Carolina, JONES of Tennessee, MATHIS, BOWEN, ROSE, RICHMOND, WAMPLER, SEBELIUS, JOHNSON of Colorado, and MOORE.

There was no objection.

GENERAL LEAVE

Mr. BAUMAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the motion to instruct and on the motion to table on the appointment of conferees on H.R. 6782.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

PERMISSION FOR COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE TO HAVE UNTIL MIDNIGHT, MARCH 31, 1978, TO FILE REPORT ON H.R. 11567

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent that the Committee on Interstate and Foreign Commerce may be permitted to file its report on H.R. 11567 by midnight, March 31, 1978, when the House will not be in session.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

HOUSE DENIED OPPORTUNITY TO LOOK INTO IMPORTANT PART OF FARM BILL

(Mr. MOORE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORE. Mr. Speaker, I take this opportunity to let my colleagues know that I am very much disappointed we were given no chance to really debate my motion to instruct conferees. The set-aside provision is really the most important part of this emergency farm bill. The fact that the House is only going to have just a total of an hour to deal with the entire bill when the conference report is returned denies us the opportunity to really look into the most important part of the bill. Had the motion to table been defeated, we would have had a very needed additional 1 hour's debate on my motion and the all-important set-aside alternatives. My motion, in which we intended to instruct conferees to concur in the language of the Dole Senate amendment, is the best way to go about a set-aside program. The Congressional Budget Office has stated that it is cheaper than any other approach, the farmers want it, and ASCS officials have stated that it can be administered. The fact that we have been denied the right today to even discuss or debate it is a travesty.

CONGRESSIONAL ACTION TO AID AGRICULTURE

(Mr. BAUCUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BAUCUS. Mr. Speaker, I'd like to talk about agricultural problems and action Congress must take to help America's farmers and ranchers.

Agricultural legislation is one of my major interests. I grew up on a ranch in Montana's Helena Valley, so I have had a lifetime of experience with agricultural problems. Currently, I am chairman of the Congressional Rural Caucus Agriculture Committee, and serve on the House Subcommittee for Agricultural Appropriations. My work with Montana's farmers and with these committees convinces me that we are facing the most severe agricultural crisis in this Nation's history.

A recent survey of banks in Montana showed that a third of all agricultural borrowers are in trouble. Congress must take action now to avoid widespread farm and ranch bankruptcies.

We need to act in three areas. First, to alleviate the credit crunch many farmers and ranchers face, we have got to expand the availability of farm credit.

Second, we have got to raise farm prices. We must provide adequate price support so that farmers can cover their production costs and, in addition, earn a decent return for their hard work and huge investments.

Finally, we have got to expand foreign markets. American farmers are the world's most efficient food producers. To insure the long-term viability of agriculture, we have got to open doors to let our farmers sell their products overseas.

AGRICULTURAL CREDIT

I will cover each of these areas for action in more detail and explain the steps I believe are necessary.

Again, the most pressing problem is credit. Almost every day I am contacted by Montana farmers and ranchers being forced out of business because they lack credit.

It is not lazy or inefficient farmers in trouble. Almost all farmers have watched their capital positions erode through recent years of prices below costs of production. People in financial trouble now are those who started with limited capital—those just getting started or running small operations.

Many banks and production credit associations refuse to extend credit to borrowers who have had trouble meeting their payments in the past 2 years. Most of these borrowers are good farmers and have large equities because they own valuable farm and rangelands. But they cannot find anyone willing to refinance their operations.

I cosponsored legislation early this year to provide necessary refinancing through the Farmers Home Administration. My proposal would have allowed farmers who could not get funds elsewhere to borrow up to $1 million from the FmHA. The full amount of the loan would have to be repaid, with interest, but payments would have been deferred for 2 to 5 years—time to allow farm prices to rise.

Recently the Agriculture Committee included this idea of emergency refinancing in a comprehensive Farmers Home Administration bill. Their scheme is of lesser scope than my original proposal. Nevertheless, it will provide relief necessary to keep many of our farmers and ranchers in business.

Mr. Speaker and fellow colleagues, the FmHA bill has been passed by the Agriculture Committee and now awaits action by the full House. I cannot emphasize too much the importance of passing this bill quickly. Each day we delay will result in farmers being unnecessarily forced out of business.

The bill will double the lending limits for FmHA operating and ownership loans to $100,000 and $200,000 respectively. It will provide a refinancing scheme to help farmers suffering from the "economic disaster" of low farm prices. Under this program, the FmHA will guarantee loans of up to $400,000 made by private lending institutions.

LOAN RATES AND TARGET PRICES

Additional credit will keep farmers in business. But unless accompanied by higher prices, in the long run it only aggravates financial problems.

American agriculture and other farm groups have done a tremendous job convincing the public of the importance of higher farm prices.

It is clear now that the administration is not going to use the discretionary power it has under the 1977 Food and Agriculture Act to increase farm income. The Department of Agriculture could raise loan rates or make payments for set-aside land, but continues to resist that course of action.

So we in Congress must act.

Senator TALMADGE has introduced in the Senate a bill to provide cash payments to farmers who set aside land in excess of the 20 percent wheat and 10 percent feed grain set-asides required in the present program.

While the Talmadge bill would help some farmers, in its current form it is unacceptable for Montana. A large part of Montana's crop is winter wheat, planted last fall. Thus, Montana farmers who have already planted their crops cannot afford to take advantage of the set-aside payments offered by the Talmadge proposal.

To help wheat farmers, any bill we pass should increase loan rates and target prices for wheat and feed grains.

The U.S. loan rates have a big impact on world wheat prices. Some will argue that increases in loan rates will result in the loss of overseas markets for agricultural products.

In the short term this is unlikely. Currently, the United States is the only nation with major supplies of high quality wheat available for sale. Other major exporting nations have either sold their available supplies—as Canada has—or harvested small crops—as Austrialia did due to drought.

Over a period of years some nations might increase their production slightly to take advantage of higher wheat prices. But the potential for higher world wheat production is small.

And even if American sales do decrease somewhat, income will still increase because of the higher price. A recent USDA study on the effect of wheat prices at 100 percent of parity showed this clearly.

Even at 100 percent of parity, U.S. export sales in the near term would not decline much. By 1982 exports would be reduced 30 percent. But because the price received—$5.04 per bushel—is about double current market prices, export income would rise substantially.

Congress should raise the loan rate to something over $3 per bushel. Such a loan rate would immediately increase U.S. and world prices. It would increase farm income. And it would provide a positive benefit to the balance of trade deficit.

Our trade deficit is causing the value of the dollar to fall relative to other currencies. It is ridiculous to contribute to this deficit by underpricing the agricultural goods we sell abroad.

In addition to increasing loan rates, Congress must adjust target prices upward. Higher target prices are required to bolster farm income and encourage participation in set-aside programs.

I organized an effort with several of my colleagues that resulted in this House raising last year's wheat target price from $2.65 to $2.90. That increase produced $35 million in additional deficiency payments to Montana wheat producers. Those payments were necessary to prevent wholesale bankruptcies in farming communities.

Our farmers are "up against the wall" financially. And when farmers do not have money to spend, the communities that depend on farm purchases suffer also.

Farmers are major consumers of automobiles, trucks, tractors. and other manufactured goods. So the tremors of low-farm incomes are being felt throughout the U.S. economy.

The huge stocks of wheat and feed grains currently on hand continue to depress prices. Although I do not believe set-asides are a viable long-term solution to farm problems, we have got to do something to reduce these burdensome inventories.

Set-aside programs are voluntary. To get farmers to participate in set-asides, we provide an incentive in the form of a target price.

But current target prices are so low most farmers tell me they will not participate in set-asides. They will forgo target price protection and plant their normal acreages of crops.

To keep from adding to our surpluses we have to raise target prices. I believe the "flexibility parity" schemes offered in several Senate and House bills have merit.

Under flexible parity arrangements, the target price a producer receives is tied to the amount of land he sets aside. For example, the target price might be $3 per bushel for a 20-percent set-aside, $4 per bushel for a 35-percent set-aside, and $5 per bushel for a 50-percent set-aside.

To insure participation in set-aside programs, the payment for a minimum set-aside must be substantially above the loan rate. Thus, in the case of wheat, we need to provide a target price of about $4 per bushel for farmers who set aside 20 percent of the acreage they plant.

PROTECTION FOR LIVESTOCK PRODUCERS

We must be cautious not to aid crop farmers to the detriment of livestock producers. Cattlemen have suffered through 4 years of prices far below production costs.

During these 4 years cattlemen have substantially reduced cow herds. They are now cautiously optimistic about prospects for the industry. Montanans who produce cattle tell me they do not want Government price supports or production restrictions. But they do ask for protection from unfair foreign competition. And they do not want our crop policies to encourage a dangerous expansion in cattle numbers.

Thus, we should continue to discourage haying and summer grazing of set-aside lands.

I recognize that preventing grazing on croplands during winter months would disrupt some farm-ranch operations and I supported efforts to allow winter grazing in the present program.

Also, an unusually hard winter and drought last year depleted hay supplies in many Western regions, especially Montana. Some short-term relaxation of the ban on haying may be desirable. But it should not be done in such a way as to encourage farmers and ranchers to expand their herds.

We need to pass legislation to control the flow of imports into the United States. Foreign beef should meet the same inspection and labeling standards as domestic production and be labeled as imported. I introduced a bill (H.R. 2010) to do this over a year ago because I believe it is fair and necessary for both producers and consumers.

In addition, canned and processed beef should be included under the present import quotas and a countercyclical formula for imports explored. Under the present system imports increase as a percentage of domestic slaughter.

But the largest slaughter occurs when prices are low and cattlemen are reducing their herds. Imports are allowed to increase at the worst possible time—when domestic production is highest. When prices here are high due to short supplies, imports are unnecessarily restricted.

Livestock producers are aware of the importance of world trade, and few of them advocate completely stopping imports. But they object to imports entering in a way that disrupts the domestic industry.

EXPANSION OF WORLD TRADE

Two-thirds of the world's people live in developing countries. They will continue to need more food supplies to meet the needs of growing populations with growing incomes.

Congress must create opportunities for world trade so American farmers can profit from this increasing demand. World trade in grains is affected by a complex system of subsidies, tariffs, quotas, and Government purchasing

boards. This world system tends to discriminate against American grain.

One thing Congress has to do is work with the administration to reduce trade barriers.

Currently, the administration is involved in two sets of trade talks that affect agriculture. One is the Multilateral Trade Negotiations in Geneva. These talks, commonly called the Tokyo round, involve 97 countries and all manufactured as well as agricultural products. The second set of trade talks is the International Wheat Council negotiations, also in Geneva. These talks involve major wheat importing and exporting countries, and the goal is negotiating a new International Wheat Agreement.

Congress has a responsibility to provide input into these trade negotiations.

Any trade treaties negotiated by the administration have to be ratified by the Senate. In addition, any treaty changing U.S. domestic policies also requires House concurrence.

Farm State Congressmen need to work with Ambassador Strauss, the administration's chief negotiator, to see that our interests are protected.

The Trade Act of 1974 authorizes U.S. participation in the current round of Multilateral Trade Negotiations. That act specifies that agriculture will be treated equally with other industries in the negotiations.

This provision was necessary because agriculture got the "short end" in the Kennedy round of Multilateral Trade Negotiations in 1968.

During the Kennedy round of negotiations, members of the Common Market insisted that there should be no restraints on their internal policies. U.S. negotiators went along with this idea and let the European community keep its system of variable levies and export subsidies.

The variable levies keep grain prices within the Common Market fairly constant. When world prices decline, the variable levy increases.

Thus, our wheat and feed grains cannot compete in the European community even when we set prices very low. Common Market farmers are assured of their prices, which vary from $4.25 to $5.75 per bushel depending on the country.

A second trade problem with the European community is their export subsidies. The Common Market countries pay hefty export subsidies for dairy products, which then enter this country and compete with domestic dairy products.

Ambassador Strauss has promised not to come back from Geneva without trade concessions for agricultural goods.

I understand the difficulty of getting trade concessions from the Common Market. Agricultural policies have been called "the glue that holds the European community together." Their negotiators will be unwilling to relax quotas and variable levies.

But we have to present a tough stance and do the best we can. The present system is just too unfair to our farmers.

We should hold Ambassador Strauss to his promise to obtain concessions for agricultural goods during the multilateral trade negotiations.

The United States is also currently negotiating with other wheat-producing and consuming nations for an international wheat agreement.

The administration's proposal for the wheat agreement is an international system of reserves.

When prices reach a certain price, or lower "trigger" point, participating nations will have to add to their reserves.

If prices reach an upper "trigger" point or price, nations would have to release wheat from reserves.

This reserve system would have a stabilizing effect on world prices. Hopefully, the boom-to-bust cycle we have experienced the past few years would be moderated.

Most farmers I have talked to do not oppose the U.S. proposal in principle. But they are worried about what the trigger prices will be.

The upper and lower trigger prices will effectively set a ceiling and floor on world wheat prices.

I am concerned that the trigger prices might be set so low that farmers would not be able to obtain decent prices.

Recently, I joined other farm State representatives in cosponsoring a resolution asking the Presidest to seek two goals in intenrational negotiations—expansion of export markets and prices that would bring farmers parity returns.

In addition to cooperating with the President, there are things Congress should do on its own initiative.

One of the most important bills currently pending in Congress is the Agricultural Trade Expansion Act developed by Senator Humphrey and Congressman FINDLEY. I am a cosponsor of the House bill.

What the bill does is authorize the Commodity Credit Corporation to offer intermediate-term credit for periods of 3 to 10 years. In addition, the bill authorizes the CCC to offer credit to countries with nonmarket economies.

For many foreign countries, credit is a major factor in determining where they buy grain.

Intermediate-term credit has been lacking for buyers of U.S. wheat. The CCC currently can offer credit for only 3 years or less. Public Law 480 loans have been available for periods of over 10 years, but only to poor countries. Many countries cannot get commercial credit at a competitive interest rate.

SUMMARY

I have outlined major agricultural needs—additional credit, higher prices, and additional sales overseas—and my proposals for achieving these goals.

This is not to imply that other agricultural problems such as taxation, burdensome Federal regulations, public land uses, and so forth, are unimportant. Certainly, these problems deserve the full attention and consideration of Congress.

But we in Congress should set a major priority to pass legislation increasing the availability of farm credit and strengthening farm prices.

Our farmers and rural communities have a crying need for such legislation; and to quote William Jennings Bryan:

Burn down your cities and leave our farms and your cities will spring up again as if by magic; but destroy our farms, and the grass will grow in the streets of every city in the country.

LEGISLATIVE PROGRAM

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, I take this time to inquire of the distinguished acting majority leader as to the program for the balance of the week, next week, and the week after that, if the gentleman has all of the information available.

Mr. KOSTMAYER. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from Pennsylvania.

Mr. KOSTMAYER. Mr. Speaker, the program for the House of Representatives for the week of April 3, 1978, is as follows:

On Monday, the House will meet at noon. The Consent Calendar will be called. There are 4 bills scheduled under suspension of the rules, and they are as follows:

H.R. 10984, Friendship Hill National Historic Site;

H. Con. Res. 359, recognition of General Kosciuszko;

H.R. 6900, Oregon Trail bill; and

H.R. 10970, Lowell, Mass., National Cultural Park.

On Tuesday, the House is scheduled to meet at noon. We will call the Private Calendar. There are three bills scheduled under suspension of the rules:

H.R. 8099, water rights for Ak-Chin Indians;

H.R. 11003, White House authorization; and

H.J. Res. 730, National Oceans Week.

There is also scheduled a series of nine House committee funding resolutions.

On Wednesday, the House is scheduled to meet at 3 p.m. to complete H.R. 7700, the Postal Act of 1978.

On Thursday, the House is scheduled to meet at 11 a.m. to consider H.R. 10899, the International Banking Act of 1978, subject to a rule being granted.

On Friday, the House is scheduled to meet at 11 a.m. to consider H.R. 11495, the FAA Research and Development Authorization Act of 1979, subject to a rule being granted, an open rule with 1 hour of debate.

Next the House will consider H.R. 11400, the National Science Foundation Act, 1979, subject to a rule being granted, an open rule with 1 hour of debate.

The House will adjourn by 3 p.m. on Fridays and by 5:30 p.m. on all other days except Wednesdays.

Conference reports may be brought up at any time.

Mr. RHODES. Mr. Speaker, I thank the gentleman from Pennsylvania (Mr. KOSTMAYER). He has, as always, done a very thorough job of giving the program of the House to us.

All that remains for me to do, Mr. Speaker, is to wish the gentleman from Pennsylvania and the Members of the House a very happy Easter and a good work period, either at home or in Europe or in Africa or wherever the work might be performed.

Mr. BAUMAN. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from Maryland.

Mr. BAUMAN. Mr. Speaker, I would just like to address a question to the distinguished acting majority leader.

We just had the better part of an hour's debate on the Senate amendments concerning the farm program. We were told that it was imperative that action be taken on these before we adjourn.

Is the gentleman telling us that we are not going to act on any farm program before all the southern as well as other States will have to plant their crops? May I also ask the gentleman: Are we walking out of Washington with no farm program at all to act on? Is that the leadership's position? Perhaps that is an unfair question to put to the gentleman from Pennsylvania.

Mr. KOSTMAYER. Mr. Speaker, if the gentleman will yield further, as the gentleman from Maryland (Mr. BAUMAN) knows, we will return here on April 3, convene at 12 o'clock noon, and take up appropriate business at that time.

Mr. RHODES. I thank the Senator and the gentleman from Pennsylvania (Mr. KOSTMAYER), and yield back the balance of my time.

PERMISSION FOR COMMITTEE ON THE JUDICIARY TO FILE CERTAIN REPORTS ON H.R. 10210 AND H.R. 2660

Mr. KOSTMAYER. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may have until midnight tonight to file certain reports on H.R. 10210 and H.R. 2660.

Mr. Speaker, this matter has been cleared with the committee minority.

The SPEAKER pro tempore (Mr. ROSTENKOWSKI). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

ANNUAL REPORT OF NATIONAL ADVISORY COUNCIL ON ADULT EDUCATION FOR FISCAL YEAR 1977—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Education and Labor:

To the Congress of the United States:

I transmit herewith the Annual Report of the National Advisory Council on Adult Education for Fiscal Year 1977, as required by Section 311(d) of the Adult Education Act of 1977 (Public Law 89-750), as amended.

JIMMY CARTER.

THE WHITE HOUSE, *March 22, 1978.*

REPORT ON ACTION TAKEN IN 1977 BY U.S. ARMS CONTROL AND DISARMAMENT AGENCY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on International Relations:

To the Congress of the United States:

One year ago, in my inaugural address, I pledged "perseverance and wisdom in our efforts to limit the world's armaments to those necessary for each nation's own domestic safety." The report which I am transmitting is an account of the actions taken in 1977 by the U.S. Arms Control and Disarmament Agency toward the fulfillment of that pledge.

The Arms Control and Disarmament Agency is the focal point of my Administration's efforts to reach arms control agreements through negotiations and to develop policies which will lead to reduced worldwide reliance on weaponry. This central role was legislated by the Congress seventeen years ago, and it is entirely in keeping with my concept of how these objectives should be pursued.

The arms control policy and goals set forth in this report reflect my own commitment to the achievement of these important objectives. In the nuclear age, when war could bring catastrophic consequences, our national security policy must include efforts to control arms, as well as to provide for our military defense. The two are complementary activities, both necessary to achieve our overall objectives—peace and security for this Nation and the world.

When necessary, we will maintain our security and protect our interests by strengthening our military capabilities. Whenever possible, however, we seek to enhance our security through arms control. Our security and the security of all nations can be better served through equitable and verifiable limits on arms than through unbridled competition. The United States has chosen arms control as an essential means of promoting its security. As we pursue this continuing course, we must convince other nations that arms control is in their interest as well. Their cooperation is vital if balanced arms control agreements are to be achieved.

Ensuring the stability of the nuclear relationship between the United States and the Soviet Union is the most urgent arms control task today. In the longer term, however, I believe that preventing the worldwide proliferation of nuclear weapons may be of equal significance. Other pressing problems, such as the worldwide traffic in vast quantities of sophisticated conventional arms and regional arms buildups, have far-reaching implications for our own peace and security and that of the rest of the world. As such, I have taken steps to restrict U.S. arms transfers and to gain the cooperation of other suppliers in curbing worldwide sales.

The challenge of preventing war—and redirecting resources from arsenals of war to human needs—is the greatest challenge confronting mankind in this last quarter of the twentieth century. It is a challenge I accept.

JIMMY CARTER.

THE WHITE HOUSE, *March 22, 1978.*

INTRODUCTION OF NEW YORK CITY LEGISLATION

(Mr. MOORHEAD of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I want to announce to the House the introduction today with bipartisan cosponsorship by 11 members of the Subcommittee on Economic Stabilization of the Banking Committee—along with the chairman of the full committee—of the New York City Financial Assistance Act of 1978. In addition to myself and the chairman of the full Banking Committee. the cosponsors are the ranking minority member of the subcommittee, Mr. MCKINNEY of Connecticut, and Messrs. ASHLEY of Ohio, BARNARD of Georgia, BLANCHARD of Michigan, CAPUTO of New York, FAUNTROY of the District of Columbia, LAFALCE of New York, LUNDINE of New York, PATTISON of New York, and VENTO of Minnesota. By their cosponsorship of this bill, the cosponsors do not mean they are committed to every comma, word, or paragraph of this bill. It does mean that we have reached a consensus that this is a bill which so nearly approaches their beliefs that it can form a basis for bipartisan legislation for the subcommittee, for the full committee, for the House, and ultimately, the other body of the Congress.

Introduction of the bill follows lengthy, detailed, and tough-minded study of the New York City situation as it has evolved since passage by Congress in late 1975 of the present program of short-term seasonal loans. The bill we are introducing today was prepared by the Office of the Legislative Counsel under instructions by me to put into legislative language the proposal of the administration, as presented to our subcommittee by Secretary of the Treasury Blumenthal on March 2, but it is our bill and not theirs.

Its chief feature is authority for the Secretary of the Treasury to guarantee over the next 4 years up to a maximum of $2 billion of city or city-related securities, with a maximum guarantee period of 15 years. Unlike the Treasury proposal, our bill allows some use of this authority for short-term seasonal loans as necessary, but within the overall ceiling of $2 billion. In testimony before our subcommittee, the Secretary said he would not "propose" but he would not "oppose" such short-term seasonal financial assistance.

Mr. Speaker, I shall elaborate my thinking and that of my colleagues in extension of my remarks. Let me say here only that this bill sets no precedent for other cities or for a change in our constitutional system. It is the minimum that is necessary to get New York City on its feet and off our backs. Much as we might like to, we cannot turn our backs on this problem without taking very serious risks for the country as a whole. I believe that the House—and the other body—will come to see this as the bill moves forward along the legislative path.

LEGISLATION TO AMEND INTERNAL REVENUE CODE TO CLARIFY TREATMENT OF CONTRIBUTIONS IN AID OF CONSTRUCTION TO REGULATED ELECTRIC AND GAS UTILITIES

(Mr. LEDERER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEDERER. Mr. Speaker, I am today introducing a bill which has been cosponsored by a number of members of the Ways and Mean Committee to amend section 118 of the Internal Revenue Code of 1954 which will clarify the treatment of contributions in aid of construction to regulated electric and gas utilities.

Section 118 of the Internal Revenue Code should be amended to specifically confirm the long-standing rule that contributions in aid of construction and amounts similarly treated, termed as highway relocation reimbursements, do not constitute gross income to regulated gas and electric utilities. These amounts collected by gas and electric utilities should be treated as contributions to capital in the same manner as they are treated for water and sewerage disposal utilities.

In general, contributions to capital of a corporation are not income and, therefore, are not taxable. The Tax Reform Act of 1976 confirmed this treatment for regulated public utilities providing water or sewerage disposal services as long as the contributions or property purchased with these amounts are not included in the utility's rate base for ratemaking purposes. However, Congress failed to confirm the tax treatment of contributions in aid of construction for gas and electric utilities. It now appears that the Internal Revenue Service will not treat these contributions to gas and electric utilities as contributions to capital in the same manner as water and sewerage disposal utilities.

Generally, contributions in aid of construction are payments by the customers of a public utility for all or a portion of specific construction costs incurred to extend service providing gas or electric energy—including steam—in excess of a prescribed standard established by the applicable regulatory commission. Typically, they are payments made to extend utility service long distances or into isolated areas where use of the utility's own funds would not be justified from the standpoint of return on investment. If the facilities were built without receipt of any contributions in aid of construction, the cost of such facilities would be borne in part by customers who receive no service or benefits from them.

Reimbursements utilities receive from Government agencies for costs incurred in relocating their facilities to accommodate Government projects also have traditionally been excluded from gross income in a manner similar to the treatment of contributions in aid of construction. However, customer connection or reconnection fees, that is, payments made by a customer to have utility service turned on or off or to have service supplied within normal prescribed limits, have not been excluded from income by the gas and electric industry. These fees are taxable as income, and no change in the treatment of connection fees is contemplated by this proposal.

Contributions in aid of construction have the following additional features:

The utility is compelled by contract and regulatory requirements to use the contributions received solely for construction of the facility. Rules of both the Federal Regulatory Commission and of most State regulatory agencies require this result.

The property constructed for customers with such contributions is not depreciated for book purposes and is excluded from rate base. The utility cannot earn a rate of return on such property.

No investment tax credit or depreciation is allowable for Federal income tax purposes with respect to such property.

For almost 50 years, contributions in aid of construction to regulated public utilities have been excluded from gross income and treated as contributions to capital. The Internal Revenue Service issued Revenue Ruling 75–557, 1975–2 C.B. 33, on December 4, 1975, which could be misconstrued to change this long-standing historical treatment. The Tax Reform Act of 1976 eliminated this threat only for regulated public utilities providing water or sewerage disposal services. The applicability of this ruling to other utilities has not been resolved, but the Internal Revenue Service is now asserting its application to gas and electric utilities.

Failure to treat these payments as contributions to capital will create a serious inequity between water and sewerage disposal utilities and gas and electric utilities. To the extent the tax liability is not reimbursed by increasing the amount of the contribution, utility rates will have to be increased to pay for the tax, which would effectively force all utility customers to subsidize these projects. The alternative is to approximately double the contribution amount to provide sufficient funds to pay the tax liability on the contribution and to complete the construction work.

However, this alternative is unacceptable because it will drive up the cost of new housing. By taxing contributions in aid of construction received by utilities, a builder or developer is required to pay substantially higher front-end costs, which contributes to the accelerating housing cost problem. These costs are ultimately passed on to the consumer. Such result makes it more difficult for the average American family to afford the purchase of a new home. The inequity of the taxable treatment of contributions in aid of construction also increases the cost of public projects that require the relocation of utility facilities.

Since contributions in aid of construction and relocation costs have been regarded as nontaxable for over 50 years, this proposal results in no net revenue loss to the U.S. Treasury. The proposal only codifies the historic treatment of these amounts as nontaxable for gas and electric utilities.

RECOGNITION OF BERNARDO DE GALVEZ AND ORDER OF GRANADEROS DE GALVEZ

(Mr. GONZALEZ asked and was given permission to address the House for 1 minute.)

Mr. GONZALEZ. Mr. Speaker, I am introducing a simple resolution today to recognize Bernardo de Galvez, for his great contribution to the independence of the United States, and the Order of Granaderos de Galvez whose purpose is to commemorate that contribution.

During our study of American history, we are well aware of a number of foreign officers who aided us during the Revolution, the Marquis de Lafayette of France, and Thaddeus Kosciusko of Poland, but nothing is mentioned of Bernardo de Galvez for whom the city of Galveston, Tex., is named. Perhaps he is not a part of our history texts because he was not formally recruited as a foreign officer, but his actions contributed a great deal to the winning of our independence from England.

Bernardo de Galvez Gallardo y Ortego was born in a village near the city of Malaga, Spain, in the year 1746. He enrolled in the academy at Avila, Spain, at the age of 16, and demonstrated his ability as an expert strategist, as well as a very competent diplomat. He served Spain in the army in Portugual, in New Spain against the Apaches, in Algiers, and was sent to Louisiana as colonel of the fixed regiment. He was subsequently named governor of the province by a royal decree in 1776.

The war that broke out with England soon thereafter afforded him the opportunity to utilize his talents, and his marriage to Felicitas de St. Maxent, the daughter of a prominent Louisiana family, identified him with the Creoles who later cooperated with him in the war.

In the 2 years preceding Spain's entry into the War of Independence, Galvez did all that he could to weaken the British in that quarter of the world, supplying the American soldiers with arms and seizing British ships that had been carrying on a profitable contraband trade with Louisiana.

Because of his efforts, every major British post in West Florida was destroyed and his control of the lower Mississippi basin made it impossible for the English to use this waterway to attack the Colonies from the Northwest.

The most famous episode of his career is his conquest of Pensacola. The forces defending this fort were so formidable that Galvez had to obtain reinforcements from Havana. And on his first attempt to reach Pensacola, his fleet was crippled by a storm. Undaunted, he returned to Havana, reorganized his fleet and made his second attempt to take this British fort. The admiral of the fleet, who was independent of Galvez, refused to cross the bar under the guns of the British fort, alleging that to do so would be to court certain destruction. Galvez finally had to resort to shaming him into compliance by running the gauntlet in a small ship, the *Galveztown*, that belonged to his own Louisiana forces. The

British were finally forced to surrender after a powder magazine exploded and opened a breach in the fortifications. His conquest of Pensacola was commemorated when he was made Count de Galvez and Viscount de Galveztown, and on his coat of arms was emblazoned the ship Galveztown with the proud inscription "Yo solo" (I alone).

Records indicate that Galvez had excellent relations with the American commanders during the war years, especially with Gen. George Washington.

He was appointed interim successor as Viceroy of Mexico after his father's death in 1784, and served in this capacity until his death in Mexico City in November 1786.

The Order of Granaderos de Galvez was formed to commemorate the ideals of patriotism and democracy espoused by Bernardo de Galvez and, at this point, I am including the pledge taken by members of this Order:

Because I love my country with my whole heart, my whole mind and my whole self.

Because I believe in the greatness of the United States of America.

Because I believe that to conquer the future, America must acknowledge its present and its past without omissions.

Because I believe that without the name of Spain and its contribution to the discovery, explorations, settling and the independence of the United States of America, I would not understand the richness of its history.

Because I believe George Washington and Bernardo de Galvez were two of the great heroes of the independence of our country and because I want to honor their memory and the memory of all men who fought and died for the independence of the United States of America.

I solemnly promise and swear before this Holy Book which is the supreme truth and I solemnly promise and swear on this symbol of my will to struggle, to uphold all of that which I believe and I pledge to support the articles of the Constitution and by-laws of the Order of Granaderos de Galvez.

It is a privilege to bring to the attention of my colleagues certain aspects of the life of Bernardo de Galvez and also the intent and purpose of the Order of the Granaderos de Galvez, and my hope is that the House will consider and support this resolution which honors a great and noble Spaniard who made such an outstanding contribution to our War of Independence.

EXECUTIVE BRANCH APPLICATION OF HUMAN RIGHTS POLICIES

(Mr. ZABLOCKI asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ZABLOCKI. Mr. Speaker, the Congress has repeatedly made clear its desire for the furtherance of human rights in all countries of the world. A number of specific human rights provisions have been mandated in foreign affairs legislation passed by the Congress. The Committee on International Relations, I am pleased to say, has been in the forefront in efforts to insure that the executive branch gives full and effective application to the intent of Congress in this important area of our foreign policy.

It is in this context, Mr. Speaker, that I must point out at the same time the necessity for the executive branch to exercise a certain balance and perspective in its decisionmaking concerning human rights policies. There are other elements of our national interest—our security, our economy, our relationships in the international community—which also must be kept in mind. To pursue any single one of these elements without due account for the others can risk damage to our overall national interest and, indeed, can be counterproductive for particular human rights and other objectives we are trying to achieve.

It also is clear that an effective human rights policy is not necessarily an inflexible and intrusive one. There are many occasions in which quiet diplomacy, applied in appropriate and timely fashion, may do more for human rights than a highly visible approach.

The intent of Congress in enacting human rights provisions was to give general policy direction to the executive branch. We did not mandate a rigid formula, but rather allowed the administration a certain degree of flexibility in carrying out the policy. We did not expect that all foreign assistance decisions would be based solely on human rights considerations.

Because of congressional interest in this matter, I am inserting in the RECORD the following memorandum received by the International Relations Committee from Under Secretary of State Warren Christopher. The memorandum describes the framework and proceedings of the interagency group on human rights and foreign assistance—which Secretary Christopher heads.

The material follows:

THE DEPUTY SECRETARY OF STATE,
Washington, D.C., March 14, 1978.

Hon. CLEMENT J. ZABLOCKI,
Chairman, Committee on International Relations, House of Representatives.

DEAR MR. CHAIRMAN: In view of the considerable amount of legislation requiring that human rights considerations be brought to bear on the distribution of foreign assistance, I thought you would be interested in knowing what arrangements we have made to comply with the statutory requirements. The attached memorandum provides a capsule view of our efforts.

Sincerely,

WARREN CHRISTOPHER.

THE INTERAGENCY GROUP ON HUMAN RIGHTS AND FOREIGN ASSISTANCE

STATUTORY FRAMEWORK

To assure compliance with our laws and policy on human rights and foreign assistance, the Interagency Group on Human Rights and Foreign Assistance was created pursuant to a National Security Council directive dated April 1, 1977.

The statutes which Congress has enacted in this area impose wide-ranging and substantial restrictions on the distribution of foreign assistance. Specifically, Section 116 of the Foreign Assistance Act of 1961, as amended, provides in pertinent part as follows with respect to U.S. bilateral economic assistance:

"Section 116. Human Rights—(a) No assistance may be provided under this part to the government of any country which engages in a consistent pattern of gross violations of internationally recognized human rights, including torture or cruel, inhuman, or degrading treatment or punishment, prolonged detention without charges, or other flagrant denial of the right to life, liberty, and the security of person, unless such assistance will directly benefit the needy people in such country."

In addition, at the time the Interagency Group was created, a similar provision governed U.S. actions in the Inter-American Development Bank and the African Development Fund. In October 1977, that provision was extended to govern U.S. actions in the World Bank and the Asian Development Bank as well. The statutory provision applicable to these international financial institutions (IFI's) is Section 701 of P.L. 95–118, which provides in pertinent part as follows:

"Section 701. (a) The United States Government, in connection with its voice and vote in the International Bank for Reconstruction and Development, the International Development Association, the Inter-American Development Bank, the African Development Fund, and the Asian Development Bank, shall advance the cause of human rights, including by seeking to channel assistance toward countries other than those whose governments engage in—(1) a consistent pattern of gross violations of internationally recognized human rights such as torture or cruel, inhumane, or degrading treatment or punishment, prolonged detention without charges, or other flagrant denial to life liberty, and the security of person; . . . . . ."

"(f) The United States Executive Directors of the institutions listed in subsection (a) are authorized and instructed to oppose any loan, any extension of financial assistance, or any technical assistance to any coutry described in subsection (a)(1) or (2), unless such assistance is directed specifically to programs which serve the basic human needs of the citizens of such country."

In addition, Section 703 of the same Act imposes an affirmative duty on the Executive Branch to seek to channel the rewards in international economic programs to countries whose governments show respect for human rights and to "initiate a wide consultation" toward that end.

Further, the Ex-Im Bank is under a statutory injunction to:

"Take into account, in consultation with the Secretary of State, the observance of and respect for human rights in the country to receive the exports supported by a loan or financial guarantee and the effect such exports may have on human rights in such country." (PL 95–143, October 26, 1977.)

Similar legislation is pending as to the International Monetary Fund and the Overseas Private Investment Corporation.

Another statute to which the Interagency Group is responsive is the new human rights amendment to PL 480. This amendment, enacted in August 1977 provides in pertinent part as follows:

"Section 112. (a) No agreement may be entered into under this title to finance the sale of agricultural commodities to the government of any country which engages in a consistent pattern of gross violations of internationally recognized human rights, including torture or cruel, inhuman, or degrading treatment or punishment, prolonged detention without charges, or other flagrant denial of the right to life, liberty, and the security of person, unless such agreement will directly benefit the needy people in such country. An agreement will not directly benefit the needy people in the country for purposes of the preceding sentence unless either the commodities themselves or the proceeds from their sale will be used for specific projects or programs which the President determines would directly benefit the needy people of that country. The agreement shall specify how the projects or programs will be used to benefit the needy people and shall require a report to the President on such use within six months after the commodities are delivered to the recipient country."

MANDATE AND COMPOSITION OF THE INTER-AGENCY GROUP

In light of these extensive legislative requirements, and in pursuance of the Administration's human rights policy, the Interagency Group was directed by the NSC to examine our bilateral and multilateral foreign assistance decisions as they relate to human rights, to provide guidance regarding specific decisions on bilateral and multilateral assistance, and in general to coordinate the Administration's position in this area. It was directed further that the Group should be chaired by a representative of the Secretary of State, that it should include a representative of the Secretary of the Treasury, as well as officials of the Department of Defense, the National Security Council Staff, and the Agency for International Development. Shortly after this directive was issued, the Secretary of State designated the Deputy Secretary of State as his representative to chair the Interagency Group.

The Group has met regularly since April 1977. Participants in the Group's deliberations have also included representatives of the Agriculture Department, the Commerce Department and the Ex-Im Bank. In addition, Treasury's representatives, the Assistant Secretary of the Treasury for International Affairs (or his deputy), have usually been accompanied by the U.S. Executive Directors to the World Bank and the Inter-American Development Bank. Thus several agencies, each with an interest in the subject matter, are represented at every meeting.

PROCEEDINGS OF THE INTERAGENCY GROUP

Prior to each of its meetings, the Group receives extensive agenda materials. These materials include detailed descriptions of the loans or grants to be considered, including consideration as to whether the proposed assistance would benefit the needy. The agenda materials also include extensive information on human rights conditions in the countries proposed as recipients of assistance. In addition, other fundamental U.S. interests with respect to the country in question are described, since the Group pays close attention to the relationship of our human rights concerns to other critical U.S. objectives. The agenda materials also include a list of other U.S. or multilateral assistance to the proposed recipient which is likely to be presented for decision in the near future, as well as a description of previous U.S. actions concerning the human rights situation in the country in question.

At the Group's meetings, each loan or grant on the agenda is separately considered. The representative of the relevant State Department regional bureau leads off the discussion with an assessment of our overall bilateral relationship with the recipient country, of the human rights situation there, and of the role our position on the loan or grant under consideration might play. Comments are then called for by other participants. There is a full airing of the issue. Typically, the discussion will focus not only on the current situation but also on whether there is a genuine trend toward or away from improvements in human rights conditions.

After discussion, the Group frequently recommends that the loan or grant should be approved, either because human rights conditions in the recipient country are good or are authentically improving or because the assistance will benefit the needy. When appropriate, the Group may advise that the approval should be accompanied by a diplomatic demarche explaining our human rights concerns and making it clear that we are seriously taking human rights considerations into account in our foreign assistance decisions. In general and where possible under applicable law, we prefer to discuss our human rights concerns diplomatically before taking any steps with respect to foreign assistance.

When the human rights situation in the proposed recipient country is poor and not improving, the Group may recommend that the U.S. not support the proposed assistance. This will particularly be the case where the assistance will not be likely to benefit the needy. In these circumstances the Group will frequently recommend that a diplomatic demarche be made to the government concerned, explaining our position and urging human rights improvements.

In practice, the Group has recommended the deferral of several AID programs to certain governments whose human rights practices were judged to be highly abusive. The number of bilateral assistance loans or grants which were recommended for deferral is small in comparison to the number of projects which were recommended for approval. The approval ratio reflects the fact that much of our bilateral economic assistance goes to countries with good or improving human rights records as well as the fact that such assistance is so heavily concentrated on meeting basic human needs. As has been frequently stated, the Administration fully endorses the view that human rights include the right to fulfill such vital human needs as food, shelter, health care and education

The Group has also recommended that the U.S. abstain or vote against approximately 20 IFI loans to governments wtih poor human rights records. Again, the number of loans which the Group has recommended for approval greatly exceeds the number as to which abstention or opposition has been recommended. This also results from the fact that many proposed recipients of IFI assistance have good or improving human rights records and because a large proportion of IFI assistance is designed to serve basic human needs. This proportion is not as great as in the case of our bilateral economic assistance.

The Group stays abreast of human rights developments in the countries receiving U.S. foreign assistance and has on a number of occasions recommended approval of loans or programs as to which it had previously recommended opposition, absention or deferral.

Needless to say, no automatic formula can be applied to decide how to vote on particular loans to particular countries, and inevitably seeming inconsistencies will appear. But the Group has learned that the diversity of cultures and the different stages of economic and political maturity make it essential to treat each country on the merits of its own situation and not to attempt to pursue our human rights obejctives in precisely the same way as to all countries. In short, tactics must differ from country to country, but our goal—to enhance respect for human rights—remains constant as to all countries.

The Group is continually examining its own procedures to determine how best to improve its operation and effectiveness. The Group is conscious that in systematically bringing human rights considerations to bear on the range of our foreign assistance decisions, it is performing a new function. Inevitably, performance of this function has at times been controversial, as the various participants grow accustomed to the new situation. Nevertheless, we believe it is an important function that must be performed if we are to comply effectively with statutory commands and to be true to our human rights commitments.

RURAL HOUSING ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LUNDINE) is recognized for 5 minutes.

Mr. LUNDINE. Mr. Speaker, I am extremely pleased today to join my distinguished colleague from Oregon (Mr. AUCOIN), in introducing the Rural Housing Act of 1978. Last year, Congressman AUCOIN and I sponsored both the Rural Housing Act of 1977, H.R. 6235, and the Consolidated Farm and Rural Development Act of 1977, H.R. 6236.

As a result of the supportive and cooperative efforts of the distinguished chairman of the subcommittee, Mr. ASHLEY, the Congress adopted a number of important rural provisions in the Housing and Community Development Act of 1977, Public Law 95–128, which were similar to those contained in H.R. 6235. These changes will enable the rural housing programs administered by the Farmers Home Administration to operate more effectively. In addition, at the initiative of the distinguished chairman of the Subcommittee on Conservation and Credit, Mr. JONES of Tennessee, two provisions contained in H.R. 6236, which will greatly improve the FmHA water and sewer grant program, have been added to legislation soon to be considered by the House.

We are pleased by this support of rural housing and community facility legislative efforts. There are, however, a number of additional steps which must be taken to adequately address the challenge of achieving the goal of a decent home for every American. Many of these further initiatives are contained in the legislation we are introducing today.

The Rural Housing Act of 1978 represents a step forward in broadening the service concept of the FmHA programs and in correcting deficiencies and omissions in the current delivery system for rural low and moderate income housing programs. Central to the legislation we are proposing is the strengthening of the FmHA and the ability of that agency to serve its program participants.

As a Nation, we have recognized that additional incentives are needed to allow the private sector to meet the housing needs of low- and moderate-income people. These problems are particularly acute in the rural areas of our country where higher levels of poverty prevail, where the population tends to be older and more dispersed, and where hardships are less obvious to most except those who suffer from them. It continues to surprise people that rural America contains almost two-thirds of the Nation's substandard housing while constituting only a little more than 30 percent of its population. This is a statistic in which we can take little comfort.

Much of the responsibility for the special housing needs of rural areas has been given to the Farmers Home Administration—FmHA—in the Department of Agriculture. This Agency had its origins in the depression of the 1930's when the Farm Security Administration was established as a lender of last resort for poor farmers and other rural people for housing and related purposes. The FmHA is unique among Federal agencies in that

it provides services directly from over 1,750 locally based county offices directly to rural residents. In addition, the FmHA can, through many of its programs, provide direct loans for housing and community development.

Over the years, FmHA has been given additional program responsibilities without corresponding budget support. Today, the FmHA has responsibility for numerous programs involving housing, farming and rural development. As a lender of last resort, the FmHA responds to the special needs of rural areas which are credit needy and often without the traditional public or private institutions which deliver housing resources. In the past few years, increasing costs of fuel, rising taxes, mounting construction costs, and inflation in general have adversely affected the ability of the FmHA to serve those people and communities most in need of assistance—low- and moderate-income people and the smaller, rural communities which are unable to provide basic services to their citizens.

The Rural Housing Act of 1978 is a series of amendments to title V of the 1949 Housing Act as amended. This is the basic law which provides the FmHA the authority to administer all of its housing programs. While there are 14 sections in the Rural Housing Act of 1978, I will limit my remarks to several sections which are of primary importance in our efforts to improve housing in rural America.

HOMEOWNERSHIP SUBSIDY FOR LOW- AND MODERATE-INCOME PERSONS

Since its inception, the major housing program administered by the FmHA has been its single family homeownership program. This program, section 502, provides credit for acquisition of newly constructed, existing, or rehabilitated housing. It is appropriate that this is the major housing program of the FmHA when one considers that almost 75 percent of rural Americans own their own home. Yet for low- and moderate-income people in rural areas, the dream of owning a home has all but evaporated.

We are all acutely aware of the corrosive effect of inflation on our lives. Nowhere has this been more true than in its effect on single family homeownership opportunities for low- and moderate-income persons. The level of income which can be served by the FmHA 502 homeownership program has been moving steadily upward with no alternative available for others. In some sections of the country, the impact of inflation, combined with skyrocketing costs of utilities and taxes, have made it almost impossible to serve any family with an adjusted income under $9,000. Under these circumstances, it is impossible for the FmHA to meet its legislative mandate to serve the housing needs of low-income families.

Section 8 of the Rural Housing Act provides for new authorities for the section 502 homeownership program which permit other items of housing costs to be included in any subsidy formula. This change parallels the authority which already exists in the section 8 program. Certainly if we can permit private owners to accumulate equity through subsidization of rental costs, the same benefits should be extended to those whose incomes are too low for eligibility under any available homeownership program.

This section of the Rural Housing Act also contains a provision that would prevent unjustified enrichment of the owner through appreciation realized on resale. This is accomplished by giving FmHA the authority to recapture subsidy funds when a profitable sale of an FmHA financed house is made.

While this homeownership provision is the most important feature of the Rural Housing Act of 1978, there are several other sections which merit a few words because of their importance to the long-term effectiveness of the FmHA housing programs. In particular, I will address the sections dealing with an appeals procedure, a research division within FmHA and loans on land subject to remote title claims.

APPEALS PROCEDURE

We believe that the FmHA is an ideal vehicle to serve the needs of rural people. Still, we are convinced that special care and attention must be given to make sure that the rights of people to have access to FmHA programs is fully protected. One of the ways this can be done is by providing an adequate appeals procedure for those who feel that they have not been treated fairly.

There are some documented cases where the rights of applicants have been abused through arbitrary decisions by FmHA employees, with little opportunity for such abuses to be challenged administratively in a due process system. The establishment of a due process appeals procedure will result in a more careful and responsive evaluation of administrative decisions by FmHA employees. Similar procedures for appeal already exist for builders faced with disbarment by FmHA, and many other agencies have had an appeals procedure in place for some time. For example, the USDA food stamp program and all HUD housing programs are subject to such an appeals procedure.

RURAL HOUSING RESEARCH

The Housing and Community Development Act of 1977, Public Law 95–128, directed the establishment of a research capacity within FmHA. The FmHA has not carried out this mandate. This section in the Rural Housing Act of 1978 directs FmHA to perform specific research directed toward the needs of the elderly, handicapped, farmworkers, and Indians. It requires a specific assessment of the impact of rural growth patterns, and the provision of economically and environmentally sound rural community facilities. Baseline data is often unavailable for small communities and rural areas. Therefore, we propose to increase the authorization for this research from $1 to $10 million annually.

Information similar to that available for urban areas as a result of HUD's $60 million-plus research capability is nearly nonexistent for rural areas. FmHA, which is currently the largest direct Federal lender in the country, is forced to assess rural patterns, rural community facilities and services, and the housing needs of special groups in a virtual vacuum. HUD simply does not engage in research peculiar to rural areas. Seasonal and migrant farmworkers, mountain people in the Appalachian area, Indians on reservations, the rural elderly and others rely on FmHA to meet their housing needs. It simply does not make sense to anticipate adequate solutions to these problems from an agency that has been so severely handicapped by the lack of appropriate research data. It is time for Congress to act on the recognition of these needs by establishing a separate research division within the Farmers Home Administration.

REMOTE TITLE CLAIMS

This amendment would permit the FmHA to make loans on land where an owner could not provide clear title because of a remote claim. The problem of remote claims clouding titles may be more widespread than originally thought. The problem is one faced by many low-income families in the Southeastern and Southwestern United States. In the Southeast, the problem is that of numerous heirs to property who are often very difficult to locate. In the Southwest, the problem is Spanish land grant claims. The cost of clearing title is often more costly than the land itself.

Under the proposed amendment the FmHA would permit loans for its housing programs on such land when convinced that the claim to the land were remote enough to make it unlikely that any future action would be forthcoming against FmHA. Experience with the FmHA 504 program, which does not require a clear title, shows that only 3 cases out of 43,000 loans and grants have resulted in adverse title action. Clearly, this is an acceptable risk to make use of land in areas where housing is in short supply.

Mr. Speaker, if we are to deal effectively with the rural housing problems of our country, it will be necessary to move aggressively and imaginatively with solutions. We hope you will join us in supporting the Rural Housing Act of 1978.

I include the text of the Rural Housing act of 1978:

H.R. —

A bill to amend title V of the Housing Act of 1949 to increase and extend authorities thereunder, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Rural Housing Act of 1978".

FORECLOSURE PREVENTION POLICY STATEMENT

SEC. 2. Section 505 of the Housing Act of 1949 is amended by adding at the end thereof the following sentence: "Foreclosure or any other forced liquidation of the indebtedness of any loan made, insured, or guaranteed under this title shall be undertaken only as a last resort and only after a determination that granting of a moratorium under this section, cancelling inter-

est payments under this section, refinancing under section 501(a), crediting of interest under section 521(a), or any other authorized servicing or counseling measure cannot reasonably be expected to result in enabling the mortgagor to retain his or her right, title, and interest in the land (and improvements thereon) which secures the mortgage."

RURAL HOUSING RESEARCH

SEC. 3. (a) Subsections (b) and (c) of section 506 of the Housing Act of 1949 are amended to read as follows:

"(b) The Secretary is further authorized and directed to conduct research, technical studies, and demonstrations relating to the mission and programs of the Farmers Home Administration and the national housing goals defined in section 2 of this Act. In connection with such activities, the Secretary shall seek to promote the construction of adequate farm and other rural housing, with particular attention to the housing needs of the elderly, handicapped, migrant and seasonal farmworkers, Indians, and other identifiable groups with special needs. The Secretary shall conduct such activities for the purpose of stimulating construction; improving the architectural design and utility of dwellings and buildings; and utilizing new and native materials, economies in materials and construction methods, and new methods of production, energy conservation, distribution, assembly, and construction. In addition, the Secretary shall conduct such activities for the purpose of reducing the cost of such dwellings and buildings and adapting and developing fixtures and appurtenances for more efficient and economical farm and other rural housing use.

"(c) The Secretary is further authorized to carry out a program of research, study, and analysis of rural housing in the United States for the purpose of developing data and information on—

"(1) the adequacy of existing rural housing;

"(2) the nature and extent of current and prospective needs for rural housing, including needs for financing, subsidies, improved design, utility, comfort, and the best methods of meeting such needs;

"(3) the adequacy of the rural housing stock to meet the special needs of the elderly, the handicapped, farmworkers, and Indians and the best methods of meeting such needs;

"(4) problems faced by rural people, including farmers, eligible under section 501 for purchasing, constructing, improving, altering, repairing, and replacing their housing;

"(5) rural growth patterns and the interrelation of rural housing problems and the problems of housing in urban and suburban areas;

"(6) the status of community facilities and services in rural areas, problems resulting from inadequate facilities and services, and recommendations to alleviate such problems; and

"(7) any other matters relating to the provision of adequate rural housing and related community facilities."

(b) Section 506(d) of such Act is amended by striking out "capacity" and inserting in lieu thereof "division".

(c) Section 506 of such Act is further amended by adding the following new subsection at the end thereof:

"(f)(1) The Secretary shall conduct a study of housing which is available for migrant and settled farmworkers. In conducting such study, the Secretary shall—

"(A) determine the location, number, quality, and condition of housing units which are available to such farmworkers and the cost assessed such farmworkers for occupying such units;

"(B) recommend legislative, administrative, and other action (including the need for new authority for such action) which may be taken for the purpose of improving both the availability and the condition of such housing units; and

"(C) determine the possible roles which individual farmworkers, farmworker associations, individual farmers, farmer associations, and public and private nonprofit agencies can perform in improving the housing conditions of farmworkers.

"(2) The Secretary shall transmit the results of the study described in paragraph (1) to each House of Congress within 1 year after the date of the enactment of this subsection."

COMPENSATION FOR CONSTRUCTION DEFECTS

SEC. 4. (a) Section 509(c) of the Housing Act of 1949 is amended by striking out the last two sentences and by inserting the following after "structural defects" in the first sentence: ", or other defects not in conformance with such standards as he has prescribed under subsection (a),".

(b) Section 509(d) of such Act is amended to read as follows:

"(d) The Secretary is authorized, with respect to any previously occupied dwelling purchased with financial assistance authorized by this title which he finds to have structural defects, or other defects not in conformance with such standards as he has prescribed under subsection (a), to make expenditures for (1) correcting such defects, (2) paying the claims of the owner of the property arising from such defects, or (3) acquiring title to the property, if such assistance is requested by the owner of the property within eighteen months after financial assistance under this title is rendered to the owner of the property or, in the case of property with respect to which assistance was made available within thirty-six months prior to the date of enactment of the Rural Housing Act of 1973, within eighteen months after such date of enactment."

(c) Section 509 of such Act is amended by adding the following new subsection at the end thereof:

"(e) Expenditures pursuant to subsections (c) and (d) may be paid from the Rural Housing Insurance Fund created by section 517. The Secretary shall issue rules and regulations for the orderly processing of applications for assistance under subsections (c) and (d) and rules and regulations providing for due process review of any determination made by the Secretary denying assistance under such subsections. The Secretary shall also maintain records at a single location of all requests for assistance filed and the disposition of the requests. Nothing in this section shall be construed as precluding judicial review of any decision of the Secretary denying assistance under this section or as precluding any owner from seeking remedies under any other provision of law."

(d) Section 517(j) of such Act is amended by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(7) after October 1, 1978, and as approved in appropriation Acts, to make expenditures authorized by section 509(d).".

APPEALS PROCEDURE

SEC. 5. Section 510 of the Housing Act of 1949 is amended by redesignating paragraph (i) as paragraph (j) and by inserting after paragraph (h) the following new paragraph:

"(i) issue rules and regulations protecting the rights of all persons and organizations applying for or receiving assistance under any section of this title over which the Secretary has authority. Such rules and regulations shall provide that, whenever any person or organization has applied for assistance under this title and such assistance is denied for reasons other than the availability of funds, or whenever a decision has been made to terminate or reduce assistance under this title to any person or organization which is already receiving such assistance, such person or organization will be given—

"(1) adequate written notice of the reasons why assistance was denied, reduced, or terminated;

"(2) adequate written notice that such person or organization has a right to appeal the decision at a hearing held in accordance with the provisions of this section;

"(3) an opportunity to appeal any decision denying, reducing, or terminating such assistance to an impartial official who has the authority to reverse such a decision after having conducted a hearing within a reasonable time after it has been requested by the person or organization affected by the adverse decision; at such hearing the appellant shall have the right to (A) present evidence through witnesses or otherwise, (B) inspect records and data in the possession of the Secretary which pertain to the appeal, (C) cross-examine witnesses, (D) be represented by counsel, and (E) have the hearing officer make the decision on the record, in writing, stating the reasons for the decision; and

"(4) an opportunity to have the decision of the hearing officer reviewed by the Secretary; and such rules and regulations shall also provide that, whenever any person or organization has had assistance reduced or terminated and, as a result of an appeal or otherwise, it is subsequently determined that such assistance was erroneously or improperly withheld, such person or organization shall be entitled to receive all benefits and assistance that have been withheld as a result of the original decision to reduce or terminate such assistance; and".

ASSISTANCE AUTHORIZATIONS

SEC. 6. (a) Clause (b) of section 513 of the Housing Act of 1949 is amended to read as follows: "(b) not to exceed $100,000,000 for loans and grants pursuant to section 504 for the fiscal year ending September 30, 1979".

(b) Clause (c) of such section is amended to read as follows: "(c) not to exceed $50,000,000 for financial assistance pursuant to section 516 for the fiscal year ending September 30, 1979".

(c) Clause (d) of such section is amended to read as follows: "(d) not to exceed $10,000,000 for research and study programs pursuant to subsections (b), (c), and (d) of section 506 for the fiscal year ending September 30, 1979".

(d) Section 514(d) of such Act is amended by striking out "$25,000,000" and inserting in lieu thereof "$50,000,000".

(e) Sections 515(b)(5) and 517(a)(1) of such Act are each amended by striking out "1978" and inserting in lieu thereof "1979".

(f) Section 523(f) of such Act is amended—

(1) by inserting "and for the fiscal year ending September 30, 1979, such sums, not in excess of $25,000,000," immediately after "$10,000,000 for any such fiscal year," in the first sentence; and

(2) by striking out "1978" and inserting in lieu thereof "1979" in the second sentence.

(g) Section 523(g) of such Act is amended by striking out the period at the end of the first sentence and inserting in lieu thereof the following: ", and not to exceed $5,000,000 for the fiscal year ending September 30, 1979".

(h) Section 525(c) of such Act is amended by inserting after the first sentence the following sentence: "There are also authorized to be appropriated for the fiscal year ending September 30, 1979, not to exceed $10,000,000 for the purposes of subsection (a) and not to exceed $10,000,000 for the purposes of subsection (b).".

CONGREGATE HOUSING FOR ELDERLY AND HANDICAPPED FAMILIES

SEC. 7. Section 515(d)(3) of the Housing Act of 1949 is amended by striking out "and" the first time it appears and by striking out the period at the end thereof and inserting in lieu thereof the following: ", and (C) provision is made for supervisory assistance personnel, including living quarters for a limited number of such personnel."

ASSISTANCE TO PERSONS RECEIVING LOANS TO PROVIDE OCCUPANT-OWNED, RENTAL, AND COOPERATIVE HOUSING

SEC. 8. (a) Section 521 of the Housing Act of 1949 is amended—

(1) by inserting "(A)" after "Sec. 521. (a)(1)";

(2) by striking out everything in the first sentence after "one-eighth of 1 per centum" and inserting in lieu thereof a period; and

(3) by inserting the following at the end thereof:

"(B) From the interest rate so determined, the Secretary may provide the borrower with assistance in the form of credits so as to reduce the effective interest rate to a rate not less than 1 per centum per annum for such periods of time as the Secretary may determine for applicants described in subparagraph (A) if without such assistance such applicants could not afford the dwelling or make payments on the indebtedness of the rental or cooperative housing.

"(C) For persons of low income under section 502 or 517(a) whom the Secretary determines are unable to afford a dwelling with the assistance provided under subparagraph (B), the Secretary may provide additional assistance, pursuant to amounts set forth in appropriation Acts and for such periods of time as the Secretary may determine, which may be in an amount not to exceed the difference between (i) the amount determined by the Secretary to be necessary to pay the principal indebtedness, interest, taxes, insurance, utilities, and maintenance, and (ii) 25 per centum of the income of such applicant.

"(D) With respect to borrowers under section 502 or 517(a) who have received assistance under subparagraphs (B) or (C), the Secretary shall provide for the recapture of all or a portion of such assistance rendered upon the disposition or nonoccupancy of the property by the borrower. In providing for such recapture, the Secretary shall make provisions to provide incentives for the borrower to maintain the property in a marketable condition, and the Secretary in appropriate cases may make provision for the borrower to receive from the sales proceeds a relocation allowance. Notwithstanding any other provision of law, any such assistance whenever rendered shall constitute a debt secured by the security instruments given by the borrower to the Secretary to the extent that the Secretary may provide for recapture of such assistance.

"(E) The assistance rendered to any borrower under subparagraphs (B) and (C) shall not be considered to be income or resources for any purpose under any Federal or State laws including, but not limited to, laws relating to welfare and public assistance programs.

"(F) Loans subject to the interest rates and assistance provided under this paragraph (1) may be made only when the Secretary determines the needs of the applicant for necessary housing cannot be met with financial assistance from other sources including assistance under section 235 or 236 of the National Housing Act.

"(G) Interest on loans under section 502 or 517(a) to victims of a natural disaster shall not exceed the rate which would be applicable to such loans under section 502 without regard to this section."

(b) Section 517(j) of such Act is amended by striking out "(2)" in paragraph (4).

RURAL RENTAL ASSISTANCE

SEC. 9. (a) Section 521(a)(2)(A) of the Housing Act of 1949 is amended by inserting after "rental" the second time such term appears in the first sentence the following ", congregate, or cooperative".

(b) Section 521(a)(2)(A) of such Act is further amended by striking out "income" the second time it appears in the first sentence and inserting in lieu thereof "adjusted annual income (as heretofore defined by the Secretary for purposes of determining eligibility for housing financed under sections 502 and 515)".

(c) Section 521(a)(2)(A) of such Act is further amended by striking out "20" each time it appears therein and inserting in lieu thereof "50".

(d) Section 521(a)(2)(A)(i) of such Act is amended by inserting "or by a loan under section 514" immediately after "section 515 for elderly or handicapped housing".

(e) Section 521(a)(2)(A) of such Act is amended by striking out "and (ii)" in the second sentence and inserting in lieu thereof the following: "(ii) when market conditions indicate that a substantial need exists for subsidized family housing that cannot be met without a greater percent of rental assistance, the Secretary shall make such payments without respect to the 50 per centum limitation, and (iii)".

MUTUAL AND SELF-HELP HOUSING

SEC. 10. Section 523(b)(1)(A) of the Housing Act of 1949 is amended by inserting "or land" after "options" in the proviso.

SITE LOAN CHANGES

SEC. 11. (a) Section 524(a) of the Housing Act of 1949 is amended by striking out "prescribed" in the second sentence and all that follows through "1 per centum," and inserting in lieu thereof "of 3 per centum,".

(b) Section 524(a) of such Act is further amended by adding at the end thereof the following: "The Secretary may guarantee loans made by banks and other public and private lending institutions to limited profit developers at the market rate. The authority for loans guaranteed under this section shall be separate from the authority for insured loans under this section. The processing of applications for such guaranteed loans may be conducted only by the State or district offices of the Farmers Home Administration. At least 50 per centum of the sites developed under the guaranteed site loan program shall be used to serve needs of persons of low income.".

LOANS ON LAND SUBJECT TO REMOTE CLAIMS

SEC. 12. (a) Title V of the Housing Act of 1949 is amended by adding at the end thereof the following new section:

"LOANS ON LAND SUBJECT TO REMOTE CLAIMS

"SEC. 529. The Secretary may make, insure, or guarantee loans with respect to land where the title is otherwise uninsurable by private insurance companies because of remote claims or encumbrances to enable otherwise eligible persons who hold title to such land to benefit from assistance under this title, except that such land may not be part of any land which is divided or to be divided into two or more lots for the purpose of sale by the person holding such land. In the event of a court decision adverse to the title claim of any person holding any such loan after assistance has been made available to such person under this title, the Secretary may use the funds of the Rural Housing Insurance Fund to pay the holder of such remote claim or encumbrance and any funds so expended shall be reimbursed by annual appropriations.".

(b) Section 517(j)(3) of such Act is amended by inserting "including payments under section 529," after "Fund,".

(c) Section 521(a)(1) of such Act is amended by inserting "or 529," after "or 526(a),".

ENERGY CONSERVATION

SEC. 13. Title V of the Housing Act of 1949 is amended by adding the following new section at the end thereof:

"ENERGY CONSERVATION

"SEC. 530. (a) The Secretary shall withhold assistance authorized under sections 502, 514, 515, and 516 of this Act from any otherwise eligible borrower who, after January 1, 1979, fails to incorporate into any structure, commenced by such borrower after that date, such energy conserving construction techniques, design features, and materials as may be necessary to substantially reduce energy consumption. The additional costs attributed to such construction in order to reduce energy consumption may not exceed the estimated cost of the energy savings over a ten-year period. The Secretary shall take the long-term energy savings into account in determining eligibility under sections 502, 514, 515, and 516 and shall not deny assistance as a result of any increased construction costs resulting from energy conservation devices or techniques that are to be included in the structure.

"(b) The Secretary shall encourage the inclusion, in all housing constructed with assistance under this Act, of locally available space heating systems, including, but not limited to, coal and wood burning stoves, fireplaces or furnaces, heat pumps, low cost solar- or wind-powered systems, or any combination of such systems. The cost of such space heating systems may be included in the loan to any eligible borrower when it is determined to be economically feasible for the initial borrower, or to any subsequent borrower, who may seek assistance under the provisions of section 502 or 504 to replace or modify an existing space-heating system.

"(c) The Secretary shall establish minimum standards for implementing the provisions of subsections (a) and (b).".

AUTHORIZED PROGRAM LEVELS FOR GUARANTEED AND INSURED LOANS

SEC. 14. Section 517 of the Housing Act of 1949 is amended by adding the following new subsection at the end thereof:

"(o) Such sums as may be made available in appropriations Acts for the purpose of establishing the level of loan programs funded under this section shall be treated as budget authority for purposes of title X of the Budget and Impoundment Control Act of 1974.".

RURAL HOUSING ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. AUCOIN) is recognized for 5 minutes.

● Mr. AUCOIN. Mr. Speaker, I am extremely pleased, along with my colleague from New York, Mr. LUNDINE, to introduce a bill which would do much to provide homeownership opportunities to moderate- and low-income families in rural areas. The bill also would mandate that FmHA create a research division within its organization and carry out a study of the housing needs of migrant and settled farmworkers—probably the most poorly housed group in our Nation.

As you know, Congressman LUNDINE and I also introduced the Rural Housing

Act of 1977. Thanks to the cooperation and leadership of the distinguished chairman of the Subcommittee on Housing and Community Development, Mr. ASHLEY, many of the provisions of that earlier bill were included in the Housing and Community Development Act of 1977. These changes will do a great deal to improve the delivery of housing assistance to low-income families in rural areas. However, there still is a need to improve existing programs and to create new ones to better meet the needs of this country's rural poor. That is the purpose of the bill which I introduce today.

Mr. Speaker, the First Congressional District in Oregon which I represent includes urban, suburban, and rural areas. The housing needs found in my district are just as diverse. I think my work on housing issues in the Congress has reflected the breadth of that need. During consideration of the Housing and Community Development Act of 1977, I worked hard to see that the major elements of the bill addressed the need of both urban and rural areas. And, I strongly supported a community development allocation formula to provide sufficient funds to battle the tragic blight for many of our largest urban areas.

The bill I introduce today addresses two critical rural housing needs: The ever-increasing inability of low-income families to achieve homeownership and the housing needs of migrant and settled farmworkers.

Farmers Home Administration currently provides low-income families to moderate- and low-income families to finance the acquisition of a newly constructed, existing or rehabilitated housing. However, increasing costs of homeownership have raised the minimum income which families must have in order to qualify for FmHA loans. This is true even when inflation is taken into account since homeownership costs have risen faster than the incomes of moderate and low-income households.

Mr. Speaker, the fact is that today FmHA can serve hardly anyone with an income under $7,000. I think that situation represents a perversion of the FmHA program especially when one considers that 75 percent of the households in rural America who live in substandard housing have incomes under $6,000.

Something must be done to help these people. It is clear that if the Farmers Home Administration is to fulfill the intent of Congress set forth in 1949, that every American is entitled to decent housing, then new authority must be provided to that agency.

The bill which Congressman LUNDINE and I introduce today will provide FmHA with the tool it needs to help in particular the very low-income people in rural areas obtain a home.

Section 8 of the act expands FmHA's section 502 homeownership program and creates a homeowner assistance program. It provides the FmHA may subsidize homeownership costs, including principal, interest, taxes, insurance, and maintenance. A family pays 25 percent of their adjusted gross income as their contribution toward total housing costs. The difference is paid by Farmers Home Administration.

The families may accrue equity, but the act provides that the Government may recapture equity up to the total amount of the subsidy to the family. Farmers Home Administration must make provisions to insure that families can retain some equity upon sale of the home. This equity for the family will serve as an incentive to keep up the home.

The program that we are proposing is not really a new concept. The costs that Farmers Home Administration will subsidize are the same costs that are subsidized under the Department of Housing and Urban Development's section 8 program. The difference between the two programs is that under section 8 of the Government's share of the rental costs benefit the owner of the rental unit which the low-income family is renting. The owner is using the Government subsidy to build equity as well as pay for taxes, insurance, interest, and maintenance costs. The renter household gains decent housing, but has nothing else to show for his share of those housing costs.

Under the homeowner assistance programs for rural Americans, can and have not only help provide a needy low-income family with decent shelter, but it can help that family build equity and, most important, achieve homeownership.

I am pleased to say that this proposal has the backing of the administration. It has submitted a similar proposal and requested funding in the proposed budget for fiscal 1979.

Mr. Speaker, the homeownership assistance program, and other housing programs for rural Americans, can and have done a great deal to improve housing conditions of the rural poor. But there is part of our rural population whose occupation makes it very difficult for them to access the housing resources available to other rural low-income families. Mr. Speaker, I am talking about the migrant farmworkers of this country.

These people perform work that most other Americans will not do. They are instrumental in getting the food we eat from the field to the table. Yet many farmworkers are forced to live in a kind of squalor, difficult for most Americans even to imagine.

Because of the intrinsic mobility in their jobs, farmworkers find it difficult to access the social services that are available to other rural poor. That is why special programs have been created to provide job training, day care, emergency food, and other kinds of necessary services.

Farmers Home Administration also has a special program to help provide housing for farmworkers. The section 514/516 program provides loans and grants for construction of farmworker housing. The units built under this program must be predominantly occupied by farmworkers, either seasonally or yearround.

However, costs of construction, operation, and maintenance being what they are, it has become nearly impossible to construct units with rents low enough for farmworkers to afford. In my district, this is especially true because much of any new housing built would only be lived in and produce rental income during summer months, although operation and maintenance costs would pile up year-round.

The Carter administration, to its credit, has recognized the need for assisting more farmworkers by significantly increasing the funding level requested for the 514/516 program. While this infusion of new funds is desperately needed, the housing produced will barely scratch the surface of need for decent farmworker housing. There is not now, nor is there ever likely to be, enough money to even begin solving the problem.

If we are going to improve significantly housing conditions of farmworkers, then we must look for better ways to encourage the development of new housing and the rehabilitation and maintenance of existing housing. More dollars in the current Farmers Home Administration program will help, but they will not do the job alone.

Mr. Speaker, for that reason I have included in the Rural Housing Act of 1978, a provision that Farmers Home Administration must undertake a study of the housing needs of migrant and settled farmworkers. It must report back to the Congress within 1 year with the results of that study, together with recommendations for improving the housing conditions of farmworkers.

The provision also requires that Farmers Home Administration consider the roles that individual farmworkers, and farmers, as well as public and private nonprofit organizations can play in providing decent housing for farmworkers.

In examining solutions, I hope Farmers Home Administration will not simply look at conventional publicly subsidized housing. It also should investigate incentives for farmers to construct and maintain adequate housing, use of housing, (such as student housing) that may be vacant during summer months, self-help housing and any innovative techniques that might be applicable.

Performing a study clearly is but a small step toward providing decent housing for this country's farmworkers. It is not intended to reexamine the impoverishment of farmworkers. Their circumstance is well documented. Instead, this study should examine concrete solutions for the problems we know exist.

Mr. Speaker, there are many other important provisions in this bill, including an appeals procedure for Farmers Home Administration, judicial review in the compensation for defects program, title insurance by Farmers Home for remote claims, and many others. However, I ask unanimous consent that a section by section summary of the bill be placed in the RECORD immediately following my remarks and I urge my colleagues to support this legislation on the basis of its social worth as well as the jobs it will stimulate in new construction.

SUMMARY OF THE RURAL HOUSING ACT OF 1978

SECTION 1—TITLE

This Act my be cited as the "Rural Housing Act of 1978."

SECTION 2—FORECLOSURE PREVENTION

Section 505 of the Housing Act of 1949 provides for moratorium relief to those who have problems meeting mortgage payments for reasons beyond their control such as illness and unemployment. Section 2 is language added to make clear to FmHA that foreclosure and forced liquidation of property for nonpayment are last step measures when all other steps fail. Testimony at Senate hearings on S. 1150 detailed cases when County Supervisors acted hastily in foreclosing without using the remedial tools at their disposal.

SECTION 3—RURAL HOUSING RESEARCH

The Housing and Community Development Act of 1977, PL 95–128, directed the establishment of a "research capacity within FmHA." The FmHA has chosen to ignore this mandate. Section 3 changes the term "capacity" to "division" which clarifies the Congressional intent. FmHA's housing programs are the major activity of the agency and yet most basic research is done by other USDA divisions which are basically oriented to Agriculture. In addition, housing matters must wait for their turn in the priority order of the other divisions.

Section 3 repeats the language of H.R. 6235 which directs the agency to perform specific research directed toward the needs of the elderly, handicapped, farmworkers, and Indians; the impact of rural growth patterns; and the provision of economically and environmentally sound rural community facilities. It also would increase the authorization for this research from $1 to $10 million annually. This is a small amount when compared to the $62 million being requested by HUD for research in FY 1978. Finally, it would direct FmHA to conduct a special study on migrant farm labor housing needs and solutions.

SECTION 4—COMPENSATION FOB CONSTRUCTION DEFECTS

PL 95–128 authorized FmHA to compensate purchasers of newly constructed houses for structural defects in their construction. Section 4 would extend such coverage to existing houses as well. In addition, section 4 broadens the coverage of defective items beyond those solely structural in nature. Finally, this section eliminates preclusion of judicial review in either the new construction or the existing housing programs.

SECTION 5—APPEALS PROCEDURE

Another very significant feature of this bill is the requirement that FmHA adopt a due process appeals procedure so that all persons and organizations applying for and/or receiving assistance under all FmHA housing programs have an opportunity to appeal the refusal, modification or termination of that assistance.

The FmHA County Supervisor, with whom most persons seeking FmHA assistance have primary contact, has almost unlimited discretion. Under the existing system the applicant does not learn of the specific reasons for an adverse action unless and until (s)he arranges a meeting with the County Supervisor, who then orally communicates the reasons. If the applicant seeks an appeal, the reviewing official is usually the district director, who has a stake in affirming the County Supervisor's decision because of the close working relationship which usually exists between them and the fact that a County Supervisor's poor record reflects badly on the district director.

The essence of this bill's appeals procedure is the right of the applicant to: know the specific reasons why the adverse decision was made; have the decision reviewed by an impartial official; present oral evidence at an evidentiary hearing; and have the appeal decided in a timely fashion, based on the record and not on shifting reasons.

SECTION 6—ASSISTANCE AUTHORIZATIONS

This section extends and expands the authorization for all FmHA Housing programs. It attempts to simplify what has become a cumbersome and verbose section in past legislation.

Specifically the section would make the following changes:

1. Section 504 Home Repair Loans and Grants—provide $100 million authority until September 30, 1979.

2. Section 516 Farm Labor Housing Grants—provide $50 million authority until September 30, 1979.

3. Section 506 Research—provide $10 million authority until September 30, 1979.

4. Section 514 Farm Labor Housing Loans—provide $50 million in authority until September 30, 1979.

5. Section 515 Rural Rental Housing—extends the present unlimited authority until September 30, 1979.

6. Section 523 Self-Help Technical Assistance Grants—provides $25 million in authority until September 30, 1979.

7. Section 523 Self-Help Site Loans—provides $5 million in authority until September 30, 1979.

8. Section 525(a) and (b) Technical Assistance Grants and Loans—provides $10 million authority for each of these programs until September 30, 1979.

SECTION 7—CONGREGATE HOUSING FOR ELDERLY AND HANDICAPPED FAMILIES

This is a technical amendment to take care of an inadvertent omission made when PL 95–128 was marked up. This provision will make the FmHA congregate housing authority similar to that of HUD.

SECTION 8—HOMEOWNERSHIP SUBSIDY FOR LOW AND MODERATE INCOME PERSONS

In the most far reaching provision in the bill, very low income persons, no matter how low income, "who cannot otherwise afford to repay a loan under section 502" would be afforded the opportunity to obtain homeownership. FmHA would pay the difference between 25% of the family's adjusted income and all homeownership costs, including mortgage payment, property taxes, insurance, utilities and maintenance. FmHA would be allowed to recapture subsidy payments in case of a profitable sale by the borrower, so long as the borrower received enough to relocate.

SECTION 9—RURAL RENTAL ASSISTANCE

This section would increase the number of units in a FmHA rural rental project which may be assisted by the rental assistance program. Presently the law allows only 20% of the units to be assisted when families are occupants. This section raises the percentage of units which can be assisted to 50 percent. When market conditions are such that there is a substantial need for housing for low-income people the Secretary would be required to subsidize more than 50 percent of the units.

The other provision of this section is technical in nature.

SECTION 10—MUTUAL SELF-HELP HOUSING

This section would allow the self-help revolving loan fund to be used to purchase land as well as obtain options.

SECTION 11—SITE LOAN CHANGES

The interest rate on Section 524 site purchase and development loans would be reduced from market rate to 3%. Section 12 would provide new authority to conduct a guaranteed site loan program for private limited profit developers. This new authority would permit the Secretary to guarantee loans made by public and private lending institutions to developers. At least 50 percent of the sites developed with such loans would have to be used to serve low-income people. Currently, only public and nonprofit bodies qualify for direct Section 524 loans.

SECTION 12—LOANS ON LAND SUBJECT TO REMOTE TITLE CLAIMS

FmHA would be authorized to make loans on land where private companies will not provide title insurance solely because of remote or outstanding claims or encumbrances on title.

SECTION 13—ENERGY CONSERVATION

All housing financed by FmHA would be required to incorporate energy conservation techniques in future construction and, at the same time, consider long term operating savings in determining borrower eligibility. Use of alternative local energy sources would also be made explicitly eligible and would be encouraged.

SECTION 14

This amendment would require that the program levels for the insured and guaranteed housing programs be treated as appropriations for purposes of impoundment control. Thus, if the President wished to defer the attainment of or rescind program levels which have been approved by Congress, he would be required to transmit a rescission or deferral message in accordance with the Budget and Impoundment Control Act.●

WILLIAM A. WOLF HONORED BY KNIGHTS OF COLUMBUS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. LEDERER) is recognized for 15 minutes.

Mr. LEDERER. Mr. Speaker, it gives me a great deal of personal honor to recognize before the Members of this House, a man from Philadelphia's Fourth District Knights of Columbus. Knight William A. Wolf, a lifelong resident of the Borough of East Lansdowne, Pa., until his marriage in June of 1977 to the former Mary Gerhard, has received from his brothers in the Knights of Columbus a special and distinct honor. Brother Wolf has been recognized to possess the necessary talent, experience and leadership abilities to serve in the Office of State Deputy of the Pennsylvania Council of the Knights of Columbus. This is indeed a high honor for any knight and for any citizen.

Mr. Speaker, Brother Wolf has been a member of St. Cyril of Alexandria Parish his entire life. His primary education was received at that parish. He is currently a member of St. Charles Borromeo Parish in Drexel Hill, Pa. A necessary prerequisite for leadership in the Knights is an excellent education. Brother Wolf graduated in 1954 from St. Joseph's Preparatory School. In 1958 he received his B.S. in economics from the Wharton School of the University of Pennsylvania. He has continued over with his education in graduate studies.

Mr. Speaker, beyond his obvious mental abilities, Brother Wolf has worked

long and hard in both the civil and spiritual worlds. He has been a member of the Holy Name Society for most of his life. He has always been there when his parish needed him. He has served as a member of the local volunteer fire company, along with distinguished service as a fire policeman.

Brother Wolf is a bright, successful businessman. In 1958, he opened his own life and general insurance agency and now his agency is licensed in New Jersey, Delaware, and, of course, Pennsylvania. Brother Wolf has been appointed to the supervisory committee of the Knights of Columbus Philadelphia Federal Credit Union. In 1972, he was appointed committee chairman, and in December 1973, Brother Wolf became the new treasurer-manager.

Mr. Speaker, Brother Wolf's accomplishments in service of the Knights of Columbus are many and varied. It would require much more time than I am allowed to cite each accomplishment for the Members of the House. Allow me, however, to mention just a few.

Brother Wolf joined the Columbus Council No. 992 on his 18th birthday. His father, then State-Deputy-elect Carl A. Wolf, was his sponsor. Brother Wolf started as warden of his council and went on to serve in many offices as well as the grand knight.

Mr. Speaker, William A. Wolf is an example of the fine citizens in the Knights of Columbus. He is a true good American who has served his community and country selflessly. May I offer, as a Member of this House, my personal congratulations to Brother Wolf and to all the knights who he represents. It gives me a great deal of personal pride to have the distinct privilege to represent citizens like Brother Wolf in this august body.

HOW INFLATION DID IN BUGS BUNNY

The SPEAKER pro tempore. Under a previous order of the House the gentleman from California (Mr. GOLDWATER) is recognized for 5 minutes.

● Mr. GOLDWATER. Mr. Speaker, what will it take to induce our present administration to concentrate on the dangerous effects its policies are having on inflation?

A ratification of the proposed coal strike settlement will guarantee an upward surge of our Consumer Price Index. The eroding purchasing power of our dollar is driving up the cost of both imported goods, and products on the domestic market. With the farm community facing serious problems, retail food prices are certain to continue their upward spiral. And forthcoming negotiations in the construction industry promise to add to our inflationary woes.

If these dire economic consequences do not faze the President and his fiscal advisors, then perhaps they should read the following article, which appeared in the Washington Star on March 12, 1978:

HOW INFLATION DID IN BUGS BUNNY

(By John Fialka)

I have become resigned to the fact that inflation picks away at my wallet, silently disposing of income that I was disposed to dispose of.

I have stood patiently by while inflation nibbles away at the size of such familiar and useful things as two-by-fours and French wine bottles, secretly injecting us into a world of flimsy and fraud while giving us the illusion that was are making more money.

But this time it has gone too far. We have evidence of a heinous crime: the forced retirement of Bugs Bunny at the hands of inflation. This should be regarded as national scandal, a crime against the flag, for, as Robert MacKenzie, a television critic, recently pointed out, Bugs Bunny is "an American character as indigenous as Will Rogers."

Mind you, "The Bunny," as he is known in the trade, is not suffering. He still pulls in between $15 and $20 million a year endorsing products ranging from dental floss to brokerage firms, and by collecting the royalties on books and on the approximately 900 Bugs Bunny cartoons now in circulation.

But the chef d'oeuvre of The Bunny's creators, the five-minute cartoons that used to be shown in movie theaters, can no longer be made because they now cost too much to produce.

The Bunny is a true child of the later phase of America's industrial age. He was invented by a committee, a group of young animators and directors at Warner Brothers who decided in the 1930s that what the world needed was a new rabbit.

Their creation was named after one of the directors, "Bugs Hardaway," and he passed through a number of phases, depending upon which of four directors was handling him.

Mel Blanc gave The Bunny an accent "somewhere between Brooklyn and the Bronx" and the animators eventually stabilized the character around the concept of "a smart ___ easterner," as Hal Geer, executive director of animation for Warner Brothers, puts it.

While the characters of Warner Brothers' chief cartoon rival, Walt Disney, tended to be romanticized because they were aimed at children, The Bunny, according to Geer, was aimed at an adult audience. His jokes were "right out of the burlesque."

The new rabbit hit a nerve. He became everyman's dream. "Bugs one ups everybody simply by his wits. He always wins, usually because of the stupidity of his adversary," explains Geer, who has watched The Bunny develop since World War II.

Oh, if life could only serve up a series of enemies as wonderfully incompetent as Elmer Fudd, or the Tasmanian Devil or, my favorite Bunny foil, Yosemite Sam.

But the ultimate foil for The Bunny, according to Geer, has been "the dollar sign." It used to take one animator a week to do 40 feet of film or 30 seconds of the standard five-minute Bunny cartoon. Today's animators, according to Geer, must produce three times as much footage in a week to support themselves.

As a result, the modern cartoons are crammed with stick figures, moving in jerky animation when compared with the subtle grace and the wide range of expressions of The Bunny. While there were once 12 drawings per second of cartoon film, now there are only two.

As a result, the new cartoons done for television suffer from what Geer calls "eight frame itis" a variety of tricks designed to use the same drawings over and over again.

Beyond that, the adult movie market for the five-minute cartoon has almost disappeared. Theater owners now feel that they have to hustle popcorn and candy between feature films to stay afloat.

The old Bunny cartoons are still very big on television. Geer says The Bunny "walks away" in the ratings from any other Saturday morning cartoon show.

Nevertheless, Warner Brothers made the decision some time ago that if they could not afford to match the quality of the old Bunny cartoons, they would not make any more. The Bunny's occasional appearance on television specials, according to Geer, are usually expanded versions of the old drawings.

The hard truth is that Fudd's "wetched wabbit" has been put permanently in his hole by something far more lethal than Fudd's shotgun or Yosemite Sam's six-shooters.

Again, the Rabbit is not hurting. He is probably down there clipping coupons or opening royalty checks between carrots.

But the rest of us are the poorer for it. The Bunny has been taken away from us. We are being told we can no longer afford to laugh at a smart ____.

When inflation's hand in this treachery is exposed, woe be it to the congressman who is caught overloading the budget. We can tolerate a little tampering with wine bottles and two-by-fours, but some things are sacred.●

KANSAS CITY TO HOUSTON HIGHWAY BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. SKUBITZ) is recognized for 5 minutes.

● Mr. SKUBITZ. Mr. Speaker, today I am introducing a bill which authorizes the construction of the Sam Houston Memorial Highway. This highway would stretch from Kansas City, Mo., to Houston, Tex.

This legislation would link up one of the great commerce centers of the Midwest, Kansas City, to a great commerce center and port of the Southwest, Houston. Construction of the route would produce thousands of new jobs and generate millions of dollars of new trade in Kansas City, eastern Kansas, eastern Oklahoma, eastern Texas, and Houston. Construction of the route would greatly improve the traveling conditions between these two great cities and along the corridor route which the highway would follow. In many instances the route would upgrade existing highways from a safety condition that can only be termed extremely hazardous to a quality equal to that of our best Interstate Highways. The new highway would serve communities which are for the most part poorly served by the present Interstate System. Because of the proximity of the highway to the Port of Catoosa, Okla., the route would greatly improve the shipping efficiency to and from the port.

My bill provides that the route of the highway would generally follow existing U.S. numbered highways. The highway would be four lanes and have limited access. Funds for constructing the highway would be made available from the highway trust fund, if State and/or local governing bodies provide matching funds equal to 20 percent of the project's cost.

This 80–20 matching formula is not a

figure which I have drawn out of thin air, on the contrary, it is the matching formula recommended by the Carter administration for U.S. primary highways.

The route would traverse the shortest distance between Houston and Kansas City. I know this because it is provided for in the legislation and because the route would service four communities which make up the highway corridor. Those communities which would definitely be served by the highway are Nacogdoches and Longview, Tex., Broken Bow, and Afton, Okla., and Pittsburg, Kans. By naming these corridor communities, we are fairly certain of the highway's route; however, work in determining the highway's specific route would begin upon enactment of my bill. The route is named for Sam Houston not only because of his contribution to the Nation but also without the support of the Texas delegation, this bill will never become law.

The present administration as well as previous ones have placed heavy emphasis upon completion of the present Interstate System before work is begun on expanding the system. To a limited amount, I agree with this viewpoint. Because of this agreement work would begin, at the latest, 2 years after enactment of my bill. This would permit more construction on the Interstate System and most importantly the Congress would have an established timetable for beginning work on the Kansas City to Houston route.

It is my understanding that much of the work remaining on the Interstate System is within densely populated areas and thus the building time is relatively slow compared with the construction time in open country. I believe that we need to continue to link our great cities together by quality highways. Mine is only one proposal and I am sure that there are other projects which also have great merit and should also be constructed.

This bill may or may not become enacted before I retire from Congress at the end of this session. But what matters is that the seed has now been planted for the construction of this highway. Someday, I am confident there will be a route such as I have proposed between Kansas City and Houston. It was good to have the opportunity to plant this seed.●

AN IMPORTANT CLARIFICATION OF THE DEBATE ON LAST WEEK'S HUMPHREY-HAWKINS BILL AND THE KEMP-QUIE AMENDMENT TO ESTABLISH PERMANENT TAX RATE REDUCTIONS AS A MEANS OF ACHIEVING REAL ECONOMIC GROWTH AND JOBS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 5 minutes.

● Mr. KEMP. Mr. Speaker, an important clarification of the record, of the floor debate, on last week's Humphrey-Hawkins bill and the Kemp-Quie amendment to establish permanent tax rate reductions as a national economic recovery goal, must be made. The closeness of the vote on that amendment, 194 to 214, meaning that only 11 people had to change their "nay" votes to "yea" votes for the amendment to have carried, requires that clarification.

In the course of the debate on Wednesday, March 15, the distinguished majority leader, JIM WRIGHT of Texas, used the following argument against the Kemp-Quie amendment, the following, and I quote verbatim from the CONGRESSIONAL RECORD of that date, page 7041:

> It is estimated by the Congressional Research Service that these reductions, were they to go into effect, would bring about a loss of revenue of more than $150 billion by 1983. I do not know whether that is accurate or not, but that is the estimate of the Congressional Research Service.

The majority leader's remarks were followed in the course of the colloquy by our colleague, PAUL SIMON, of Illinois, found on that same page 7041:

> I appreciate the gentleman (Mr. WRIGHT) yielding. There is just one minor correction. I had the same sheet the gentleman had that contained the error and the loss of revenue is not by 1983 but in 1983, according to the Congressional Research, it is $151.2 billion. The total increase in the deficit, were this amendment to be adopted, would be $570 billion by 1983.

The debate continued and the Kemp-Quie amendment was narrowly defeated and in substantial measure upon this part of the debate and the fear that it engendered. It is not my purpose here this afternoon to impugn the integrity of either gentleman. Both are of substantial reputation before this body, and I am confident neither would have used these figures if they had known how they were computed and how that computation makes them wholly invalid.

The facts, with respect to these figures, are as follows:

First, they were not figures prepared by the Congressional Research Service of the Library of Congress. The CRS has assured me of this. The CRS was called by a congressional staff member and asked for tax revenue projections with respect to the amendment, projections which could be used in helping defeat my amendment.

Second, the figures were from the computers of the Department of the Treasury, widely regarded as the least accurate of any in the country. They are regarded that way because the formula used in the econometric model on the computer is one of wholly static analysis. In other words, all it can tell anyone is what the the dollar loss would be if the Internal Revenue Code were amended such and such a way and that amendment produced absolutely no change in economic output and economic behavior. That is obviously and patently absurd, as a principle on which to base a projection, because everyone knows changes in the tax laws produce changes in conduct. As a matter of fact, the changes in conduct which are expected to occur are the very reasons Congress usually enacts a tax reform or a tax amendment.

Third, when the Department of the Treasury, presumably in recognition of the fact that its analyses are static ones, told the CRS what their figures were, it stressed that they were only gross revenue losses and not net revenue effects. In other words, that they were initial losses which could be offset by changes in economic conduct in each and every day after Congress enacted them. Thus, by definition, the net effects—which are the real ones with which Congress should have been dealing in its debate on March 15—would have been different. How much different is shown by the Department of the Treasury's projections on the gross revenue losses of the Kennedy tax cuts of the early to mid-1960's.

At the time President John Kennedy proposed tax rate reductions for both individuals and corporations—the reductions on which the goals of the Kemp-Quie amendment were patterned—the Treasury was asked to prepare estimates on the revenue impact. Treasury did so. In marked contrast with what actually happened after the tax cuts he proposed were enacted, because economic conduct was changed as a result of that enactment, Treasury estimated great losses.

Here is the dramatic difference between what Treasury said would happen and what actually did happen, all with respect to revenue impact:

[In billions]

Year	(1)	(2)
1963	−$2.4	+$7.0
1964	−5.2	+6.0
1965	−13.3	+4.0
1966	−20.0	+14.0
1967	−23.7	+19.0
1968	−24.2	+4.0
Total	−89.0	+54.0

[1] Treasury-estimated revenue losses.
[2] Actual revenue gains.

Furthermore, the beneficial effect of permanent tax rate reductions need not be measured only in terms of revenue impact, one which shows that more revenue is brought in, not less, because while the rates are lower, the economic base to which they are applied is larger because the economy grew as a result of the rate reductions. The beneficial effects can also be measured in terms of substantially reduced unemployment, the very objective of the Humphrey-Hawkins bill.

Look at the dramatic drop in unemployment after the Kennedy tax cuts were passed, especially the drop in unemployment among blacks, the hardest hit of the presently high, unacceptably high unemployment:

Unemployment rate after the Kennedy tax cuts

[In percent]

Year	All workers	Blacks	Black males 20 years+
1961	6.7	12.4	11.7
1962	5.5	10.9	10.0

Unemployment rate after the Kennedy tax cuts—Continued

[In percent]

Year	All workers	Blacks	Black males 20 years+
1963	5.7	10.8	9.2
1964	5.2	9.6	7.7
1965	4.5	8.1	6.0
1966	3.8	7.3	4.9

That is a 2.9-percent drop in unemployment among all workers—a drop of 43 percent in all those unemployed; a 5.1-percent drop in unemployment among blacks—a drop of 41 percent in those blacks unemployed; and a 6.8-percent drop in unemployment among black males 20 years of age or more—a drop of 58 percent in those blacks unemployed. That is something every Member of this Congress should be seeking, not something 214 should have opposed on March 15 by blocking a means of making similar reductions possible.

Fourth, the figure used by my colleague (Mr. SIMON) of $570 billion—which I reiterate is the static figure—is a compilation of the static figures for 1978, 1979, 1980, 1981, 1982, and 1983 combined. It is a total figure, not one for 1983. The Treasury figures which he used are as follows:

Treasury estimate of unadjusted revenue impact

[In billions]

1978	—$24.9
1979	—56.1
1980	—96.3
1981	—111.8
1982	—130.1
1983	—151.2
Total	—570.4

If the Treasury is as far off today, as it was when it made the Kennedy tax cut projections, that unadjusted revenue loss would translate into a $345.8 billion gain, although I am not about to fall into the numbers trap of saying that is what would absolutely happen. It is just that it is based on the same margin of error that resulted in the 1960's.

Mr. Speaker, I am fully aware of the nature of floor debate. Many Members are trying to speak, to be heard; others are coming and going. So-called fact-sheets are quickly drafted by staff to rebut assertions made in support of amendments.

In this case, I am sure no one would have ascribed figures to the Congressional Research Service, if they had known they had come from the Department of Treasury.

I am sure no one would have used the gross, initial impact figures, had they known that Treasury had made it very clear to CRS in its discussion with them, that there were "no feedback effects" in the figures, and that is a direct quote from Treasury.

I am sure no one would have used figures, which opened them to the allegation of CRS that the figures used were "a misquote," and that is a quote from CRS if they had known what the figures really were.

But these figures were used, and they were wrong. The next time this matter is debated on the floor, and it will be, I assure my colleagues of that, I trust that the right figures, the net revenue impact figures, will be available and used by the Members engaged in debate.

Of course, conditions are different in part today, parallels are never exact. Americans are all too painfully aware of the added cost; that is, tax, of excessive regulations, burdensome paperwork, and international pressures. But, my position is that reducing tax rates is a good starting point to helping turn around a discouraging work and investment climate in America.●

PROPOSALS FOR DISTRICT OF COLUMBIA BASIC CRIMINAL CODE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. DIGGS) is recognized for 10 minutes.

● Mr. DIGGS. Mr. Speaker, the following letter, which was written on Monday, March 20, 1978, concerns the proposals of the District of Columbia Law Revision Commission. I would like, at this time, to insert it into the RECORD for the information of my colleagues.

COMMITTEE ON THE
DISTRICT OF COLUMBIA,
Washington, D.C., March 20, 1978.

DEAR COLLEAGUES: I received from the Speaker the recommendations of the District of Columbia Law Revision Commission for a District of Columbia Basic Criminal Code. As you know, the Law Revision Commission was established by Congress in 1974, P.L. 93-379. I would like to take this opportunity to extend my deepest appreciation to the members and staff of the Law Revision Commission for the many long hours and the hard work, at great personal sacrifice, that were necessary to complete this task.

The District Committee's Subcommittee on the Judiciary, so ably chaired by my distinguished colleague, Mr. Mazzoli of Kentucky, has worked with the Law Revision Commission and the District of Columbia Council throughout the process to ensure that the recommendations were made in a timely fashion and that the views of the community were taken into account.

During the debate on the extension of the prohibition on amendment to the Criminal Code by the D.C. Council, which I introduced (P.L. 94-402; H.R. 12261; Congressional Record, Vol. 122 (1976)), it was my hope that the extra time provided by that act would enable the Law Revision Commission to submit a proposed Criminal Code for Congressional consideration so that jurisdiction over this area could be assumed by the locally elected government as contemplated at the time of enactment of the Home Rule Act.

It is my expectation that Congressional review of the proposals will enable the local government to assume these functions on February 1, 1979, as currently provided by law. Therefore, it is my desire that no further delay, as a minority of the Commission members seem to suggest, will occur to impede this important next step in the process of further Home Rule for the District.

Sincerely,

CHARLES C. DIGGS, Jr.,
Chairman, Committee on the District of Columbia.●

HOUSING REFORM NEEDED NOW

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, this past week I had the opportunity to testify before the House Subcommittee on Housing and Community Development about an issue which I feel can affect the future of Federal housing policy in this country, particularly those programs serving low-income people. The Housing Subcommittee will reauthorize a number of our Federal laws pertaining to housing later this year and at that time it will recommend substantive changes in many of our housing programs. It is my hope that these recommendations will include several important changes in HUD's section 8 rental assistance program.

The section 8 program became this Nation's primary vehicle for providing housing to low-income people and the elderly in 1974 and although the program has made significant inroads into providing housing to the elderly, it, for the most part, has failed to serve families. In addition, section 8's track record in low vacancy areas, such as my own district in California, has been even worse.

Because I view the success of the section 8 program as an essential factor in the success of our overall housing policy, I would like to share my testimony with my colleagues in the House, bringing your attention to my specific concerns about the program and to the Rental Assistance Reform Act, sponsored by Representative KOSTMAYER and myself, which seeks to address these concerns.

Mr. Speaker, I submit a copy of my testimony to the RECORD:

TESTIMONY OF HON. LEON E. PANETTA BEFORE THE SUBCOMMITTEE ON HOUSING AND COMMUNITY DEVELOPMENT

Mr. Chairman and Members of the Subcommittee: I greatly appreciate this opportunity to testify before the Subcommittee on a matter which I feel is of major importance to the success of federal housing policy in this country, particularly those programs serving low-income people.

In 1974, the Section 8 New Leased housing program became this nation's primary vehicle for providing housing to low-income people. Although the program was not entirely new, for the first time this program set out to permit eligible low-income families to enter into lease agreements with owners of private accommodations. This approach encourages mixing of economic groups by permitting low-income people the freedom of choice to decide where to live and provides an incentive for the private sector to become involved in construction of low-income housing by giving developers much of the responsibility for the operation of the program. I think the basic intent of the program was sound and continues to be important today.

However, after four years of experience with the program, it is time to examine where the Section 8 program is and where it is going. For the past several months I have been looking into this matter and the situation which I have found is alarming. A whole series of reports, including oversight hearings held in 1975; 1976, CRS reports in 1975 and 1976, a HUD Field Study in 1976 and a GAO report in 1977 show that Section 8

is less than successful and that major changes are desperately needed.

I recommend that members of the Subcommittee pay heed to these reports and to the comments of builders, public housing officials and tenants throughout the country who are urging Congress to take action to reform this important program. This year's reauthorization process provides us with an excellent opportunity to do just that.

A few weeks ago, Representative Peter Kostmayer and myself introduced the Rental Assistance Reform Act, a bill which we feel begins to address the problems with the Section 8 housing program. Already, we have 20 co-sponsors and the support of the Housing Assistance Council, the National Association of Counties and Rural America. At this point I would like to insert a copy of the bill into the record, along with a summary of provisions.

The Section 8 program is ineffective mainly because of a reluctance on the part of owners, public housing agencies, and developers to participate. Without this participation, low-income people cannot be served to the extent that is needed.

There are two primary reasons why the Section 8 program is not working. One, fair market rents do not accurately reflect the costs of building and managing units for low-income people, especially for large families, and in low vacancy areas: Two, the responsibility for the operation of the program has been taken out of the hands of local public housing agencies and given to regional HUD offices which are understaffed and out of touch with the needs of local housing markets.

I would like to discuss each of these problems in light of specific sections in the Rental Assistance Reform Act which address them.

The level of the Fair Market Rents set by HUD is crucial to the workability of the program. Low-income families, in general, require a number of services and amenities which private landlords are not normally equipped to provide and which serve to substantially inflate rents far above those for physically comparable units in the unsubsidized market. Since the success in the existing, new construction and substantal rehabilitation programs depends on the private owners' willingness to lease properties to lower income persons, fair market rents must provide financial incentives to attract their participation. As things stand now, the rents established by HUD many times do not reflect the current costs of producing and financing units as well as meeting Section 8 requirements. Fair market rents are even less effective in stimulating landlords participation in providing housing to families with three or more children.

A 1976 HUD Field Study indicates that 60% of the families served by Section 8 have one or two members and 80% of the participating families are occupying units with two bedrooms or less. In addition, fair market rents do not stimulate owner participations in low vacancy areas where the need for low income housing is even greater. I think that an extra financial incentive above the prevailing market rent is needed to encourage owners to assume the greater risk and more costly responsibilities involved in participating in the Section 8 program. For this reason, Section 3 of our bill allows the maximum monthly rents to exceed the fair market rents in low vacancy areas for units serving families and also spells out in detail all costs that must be reflected in FMRs so that developers will be compensated for extra expenses incurred as a result of HUD requirements.

A related problem for the owner and for the operation of the Section 8 program is the role of public housing agencies. Despite the fact that in 1974 the Congress firmly stated its intent that the primary responsibility for carrying out the leasing program should be vested in local public housing agencies, this is not the case today. In fact, subsequent HUD regulations have actually prohibited PHA's from becoming involved in administering assistance contracts and managing local housing units. This trend is unfortunate since it is the public housing agencies which have the experience and desire to serve low-income people. In many places, the local public housing agency may indeed be the only entity in the area with such experience.

Furthermore, private developers do not want to bother with cumbersome HUD regulations and administrative red tape. To change this situation. Sections 2, 4 and 6 of our bill will allow public housing agencies to become more involved in the management, and administration of the program. Also, the bill provides added incentives for public housing agencies to become involved in the rehabilitation and construction of new projects.

There are several other problems that have contributed to low participation rates in and the general instability of the Section 8 program. Low administration fees for PHAs and the lack of an effective outreach program have greatly impeded the full implementation of Section 8 in many areas of the country. Section 7 of H.R. 10844 establishes a minimum administrative fee for communities operating fewer than 50 units and establishes an outreach program to inform prospective tenants and developers about the program. I think these provisions will address the specific concerns of our smaller communities.

Mr. Chairman, the Section 8 program must be modified and improved so that it can better respond to the urgency of the housing crisis facing this nation. For example, in my own state of California, due to escalating property taxes and inflated land prices, virtually no housing will be available to low-income families if something is not done soon. We must recognize the cry for help coming from communities throughout the country by making the Section 8 program respond to this growing need. Therefore, I urge this Subcommittee to take on this challenge in the immediate future and I volunteer my service in providing whatever assistance is required to make these changes a reality. It is my hope that the Rental Assistance Reform Act sponsored by Representative Kostmayer and myself will provide the essential first step in this difficult task.●

RECOLLECTIONS OF THE ANSCHLUSS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

● Mr. WEISS. Mr. Speaker, during my statement on the House floor last week celebrating the 40th anniversary of my arrival in the United States from Hungary, I recalled that the day before I arrived was the day of the Anschluss, Austria's capitulation to Hitler. The New York Times of Sunday, March 19, carried the following eloquent but grim recollection of that tragic day in a small Austrian town. The article was written by Mr. Hans Knight, a columnist for Discover, the Sunday magazine of the Philadelphia Bulletin.

"EIN VOLK, EIN REICH"

(By Hans Knight)

PHILADELPHIA.—The Town of Mödling, Austria (population 19,000) is a half-hour's tramway ride from Vienna, and although it is a beautiful piece of land where Beethoven and Schubert once sought solitude, it has never achieved fame beyond its immediate pine-wooded surroundings.

Not long ago, I went back to Mödling. I had spent my childhood there. It was early evening and I walked up the street until I came to the bank building across from the town hall. The town had changed little.

The bank still had the low windowsill on which I had perched, with some excitment, the night of March 12, 1938. I sat down on the ledge again.

Everything seemed large that night, the night of the *Anschluss*. Bonfires flickered from the hills. The wood-smoke wafted into the streets below, smelling pleasant and making eyes water. People lined the street, some milling about in low, muttering expectancy, and others standing in front of their homes and stores, listening and waiting.

From around the bend, far below the town hall, came the muffled sound of drums, the rhythmic crashing of feet, the blurry sound of voices. As the parade approached, the words became clear.

Solo: "Austria . . ."
Chorus: "Awake."
Solo: "Judah . . ."
Chorus: "Perish."
All together: "Ein Volk, ein Reich, ein Führer."
Solo: "Sieg . . ."
Chorus: "Heil!"

Now the marchers appeared. They were mostly young boys and girls, carrying flaming torches. Some of the people in the street melted into the column. Others stood quietly, their backs pressed against the walls. The marching column, unfolding, poured into the town hall square. Some 30 policemen appeared on the building's ramp, cautiously fingering their rubber truncheons, uncertain what to do.

The shouting had subsided to a low buzz. Somebody produced a wooden ladder and leaned it against the town hall's facade. A boy in leather shorts and white stockings climbed up the ladder, a small dagger dangling from his belt. With a few quick slashes he cut off the Austrian flag and fastened a swastika flag to the pole. The crowd along the periphery gasped. The boy looked down.

"The rats have left the sinking ship," he cried. "The Schuschnigg regime has resigned. The slavery is over, the Fuhrer is coming. Sieg Heil!"

The crowd took up the cry. Someone started singing the Horst Wessel song. A gray-haired man in a large overcoat stared at the tattered Austrian flag on the ground. "This should not be allowed," he kept saying. "Why don't the policemen arrest them?"

Another bystander answered him, softly: "There is nothing they can do. The Germans are marching in, I heard it on the radio. What do you want? Perhaps it will not be so bad. Perhaps things will be different again. It is best to howl with the wolves."

The policemen, though, had now received an order. They pulled swastika arm bands from their pockets and slipped them over their elbows. The crowd roared approval. Near the bank building, a couple of windows shattered.

A man wearing a cloth cap turned to his companion. "This can't last," he said. "The Russians won't allow it. The English are arming like mad. In six months this will be over." The other man said: "I don't care as long as they give us some work. Things can only get better."

The horn of a truck made the crowd part. The truck was filled with men in brown shirts. The side of the truck bore an anti-Jewish banner.

Not far from the town hall the synagogue was already burning. Tongues of flame licked upward toward the gilded Star of David. A fire truck carefully sprayed the adjoining buildings.

Near the creek that wound through the town, there was a commotion. Some students had grabbed a teacher, a well-known Catholic, handed him a pail of black paint and pushed him down the stone steps to the creek bank. They told him to write something on the wall.

He shook his head and a tall youth whipped his fist across his face. Another youth kicked his shin. Slowly the teacher began to write on the wall: "I am a patriotic swine. I am a traitor to the fatherland." They let him go and he vanished into the darkness. Up on the hills, the bonfires crackled far into the night.

Now, on my visit, I thought I could still smell the sweet, acrid scent of the wood smoke, hear the joyous chant, "We thank our Führer."

The next morning I walked down the stone steps to the creek bank. I tried to find a trace of what they had made the teacher write on the wall. The years had washed it away.●

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. FOUNTAIN) is recognized for 5 minutes.

● Mr. FOUNTAIN. Mr. Speaker, I found H.R. 50, as presented to the House for final passage, to be a reasonable statement of national policy for dealing with some hard questions on the related problems of both inflation and unemployment.

In fact, the bill as reported by the Education and Labor Committee was, in many respects, light years removed from the original text of the so-called Humphrey-Hawkins legislation first introduced a few years ago, a bill which I could not have supported as I indicated to my constituents.

Earlier versions of the bill would have authorized massive and expensive new Federal jobs programs, automatically making the Government the employer of last resort and guaranteeing a permanent job—of whatever nature and in whatever form—for every American adult. Let me repeat that—every American. Had this legislation been enacted in any of its previous forms, runaway inflation would have hit every American family, and massive increases in Federal taxes would have been the order of the day. Our private free enterprise and competitive system could not have long survived.

Fortunately, those bills were withdrawn when it became evident that the Congress and the American people would not stand for economic chaos of that magnitude.

About all the old bills and the new bill have in common are the introducers and the identifying number.

The version which passed the House sets economic goals for the Nation—goals for the private sector and Government to work together in meeting. Of course, not all the goals in this legislation—worthy though they may be—will be satisfied.

However, the emphasis is rightly placed on the role of private enterprise in providing jobs. The fiscally responsible way to reduce unemployment—and hold down inflation—is to encourage expansion in business and industry, increased capital formation, and greater private investments.

Polls show that an overwhelming majority of the American people regard inflation as a national problem much more serious than unemployment. Deficit Federal spending—such as that needed to finance new jobs programs—is directly related to inflation. But this bill authorizes no new programs, it appropriates no money, and it does not require any new Federal rules and regulations. In short, in the form in which it passed the House, it is an acceptable piece of legislation.

During floor debate, I supported many modifying amendments to the committee's bill. Among them were these:

To set a goal of 3 percent inflation by 1983 (rejected).

To establish price stability goals and require the President to submit to the Congress specific programs aimed at reducing inflation (adopted).

To set a goal of 100 percent parity for farmers by 1983 (adopted).

To make a balanced budget a national goal and to require the President to make recommendations aimed at achieving this goal (rejected).

To consider the effects of foreign imports on American jobs and unemployment (adopted).

To pay particular attention to the unemployment rate among veterans (adopted).

To consider job-related effects of limitations on outside income upon recipients of social security benefits and Federal pensions (adopted).

To require stimulation of private sector employment, small business, and rural development before new public jobs programs are initiated (adopted).

To provide permanent tax cuts for individuals and businesses as a means of spurring the economy (rejected).

To require the President to recommend reforms for improving the functioning of Federal agencies (adopted).

To insure that nonurban areas receive proportionate shares of any antirecession aid to State and local governments (adopted).

To exclude from the official unemployment figures those on strike, those out of work less than 4 weeks, those not seeking full-time jobs, those who voluntarily quit their last jobs, and those who have jobs waiting but have not yet begun work (rejected).

To insert a "sunset provision" terminating the bill's provisions after 5 years unless extended by the Congress (rejected).

Mr. Speaker, H.R. 50 is not a perfect bill. However, on balance, it is reasonable legislation which sets national policies, yet requires additional positive action by the Congress and the President before establishing, or extending, new or existing Federal jobs programs to achieve the goals enunciated in the bill.

While I support the overall aims and objectives of H.R. 50, I am reserving my judgment on what may come back in a conference report and on future legislation which may be proposed for implementation purposes. I will support responsible legislation, but I will not hesitate to oppose programs which are too inflationary or are wasteful of the taxpayers' money, as would have been the case with H.R. 50 as originally written. Again the new H.R. 50 is an entirely different piece of legislation establishing certain very deserving goals which hopefully can be reached through the private free enterprise system. A system that has helped to make our Nation great and strong. H.R. 50 was finally designed and so amended as to give encouragement to the countless numbers who truly need jobs and who are ready, able, and willing to work. That is the American way. That is democracy in action.●

PARTIAL CORPORATE INTEGRATION—RELIEF FROM DOUBLE TAXATION OF DIVIDENDS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. ULLMAN) is recognized for 5 minutes.

● Mr. ULLMAN. Mr. Speaker, on Thursday, February 2, 1978, I published in the CONGRESSIONAL RECORD, page 2132, a proposal that would represent a start toward eliminating the double taxation of dividends.

Under my proposal, starting in 1979, eligible shareholders would receive a tax credit generally equal to 10 percent of their cash dividends. This shareholder credit would increase by 2 percentage points a year starting in 1981 to a total credit of 20 percent of cash dividends paid in 1985.

Under the proposal, credits allowable to the shareholders of any corporation would be limited to a portion of the Federal income taxes actually paid by the corporation. This portion of the corporation's taxes would be accounted for in a shareholder credit account maintained by the corporation. As a general rule, the amount to be added to the account for any taxable year would be limited to the maximum amount of shareholder credits the corporation could have declared for such taxable year if it distributed all of its fully taxed income. However, during an initial transitional period the amount to be added to the shareholder credit account was not specified.

In the floor statement accompanying my integration proposal, I asked witnesses to address themselves to it during the committee's hearings on the subject of double taxation of dividends. Since the publication of my proposal, various groups and interested parties have given me their comments on the proposal, particularly with respect to additions to

the shareholder credit account during the transition period.

In view of these comments, I have now formulated rules which could apply during the transition period. Starting in 1979, corporations would be permitted to add 100 percent of their Federal income tax liability to their shareholder credit accounts—instead of 10.83 percent of their tax liability discussed in the earlier integration proposal. This percentage would be phased down to 30 percent—instead of 21.67 percent—by 1987 when the total shareholder credit would be 20 percent of the cash dividends paid to shareholders.

When the integration proposal is fully phased in, a corporation distributing one-half of its earnings would receive the full benefit of the proposal so long as it has an effective Federal income tax rate at least equal to 25 percent of its financial income. Corporations with a lower effective tax rate—or a higher dividend payout ratio—would be given the choice of either declaring a lower rate of credit for its shareholders or of paying an additional tax.

I would again like to state that corporate integration is a structural change to the corporate income tax system; I do not intend for it to be a substitute for other tax reductions or to be contingent on enactment of any offsetting tax increases. My modified integration proposal is designed to have an initial revenue impact—about $1.6 billion—so that there is no need for any tradeoffs.

Besides the addition of a transitional rule, I have made other additions and modifications to the original integration proposal. I now insert into the RECORD a general explanation of the modified integration proposal.

PARTIAL CORPORATE INTEGRATION—RELIEF FROM DOUBLE TAXATION OF DIVIDENDS

GENERAL EXPLANATION

Present law

Under present law, income earned by a corporation is taxed at the corporate level at tax rates up to 48 percent. This corporate income is again taxed when distributed as a dividend to individual shareholders at individual tax rates ranging from 14 to 70 percent. In order to relieve a portion of this double tax, each individual is given an exclusion for the first $100 of dividends.

General proposal

Under the proposal, starting in 1979, eligible shareholders would receive a tax credit generally equal to 10 percent of the cash dividends received by them. The amount of this shareholders credit would increase by 2 percentage points a year starting in 1981 to a credit of 20 percent of cash dividends paid in 1985. The shareholder credit would be available for dividends paid from earnings and profits arising only after the effective date of the proposal.

For any corporation, credits allowable to its shareholders would be limited to the amount in a "shareholder credit account." This account would equal 100 percent of the U.S. Federal income taxes actually paid by the corporation for 1979 and would be phased down to 30 percent by 1987.

Whenever allowable shareholder credits would otherwise exceed this limitation, corporations would be given the choice of either paying a tax to the Treasury, which dollar for dollar would be treated as additional shareholders credits, or of electing a lower rate of shareholder credit for their shareholders.

Tax consequences to individual shareholders

Shareholders receiving dividends would include in their gross income the amount of any cash dividend received plus the amount of their shareholder credit. They would be allowed to claim the amount of the shareholder credit against their Federal income tax liability. Shareholders would be allowed to claim a refund if this credit exceeded their income tax liability.

The current $100 dividend exclusion could be phased out during a transitional period.

The following example illustrates how the proposal affects individual shareholders:

Under present law, individual shareholders A and B each compute their marginal Federal income tax liability attributable to their dividends as follows (the example disregards the dividend exclusion):

	Shareholder	
	A	B
Dividend income ($10×10 shares)	$100	$100
Tax rate (percent)	20	60
Tax liability on dividends	$20	$60

Under the proposed credit, the computation would be as follows:

	Shareholder	
	A	B
Dividend income ($10×10 shares	$100	$100
Gross-up by amount of shareholder credit ($100×10 percent)	$10	$10
Dividends included in gross income	$110	$110
Tax rate (percent)	20	60
Tax on dividends before credit	$22	$66
Shareholder credit	$10	$10
Tax on dividends after credit	$12	$56
Tax reduction from present law	$8	$4

The tax reduction is higher for the low-bracket shareholder than for the shareholder in the high bracket. This illustrates that integration is a relatively progressive way to reduce corporate taxes.

Shareholder credit account

Each corporation would maintain a "shareholder credit account" on its books. At the close of each taxable year a corporation would add a certain percentage of its Federal income tax liability (net of all allowable tax credits) to its shareholder credit account. The percentage of a corporation's tax liability which would be added to the shareholder credit account would be fixed by statute as follows:

Percentage of corporate tax liability added to shareholder credit account

Taxable years beginning in—	
1979	100
1980	100
1981	90
1982	80
1983	70
1984	60
1985	50
1986	40
1987	30

At the close of each of its taxable years, the the corporation would subtract from its shareholder credit account the total amount of the shareholder credits it declared for the benefit of its shareholders for the year. Unless the corporation elected a lower rate, this would initially be 10 percent of cash dividends paid.

Any amount remaining in the shareholder credit account after these adjustments would be accumulated in the account and carried forward to future taxable years. The transition rule could contain an appropriate limitation on additions to the shareholder credit account which may be carried over to future years.

Foreign tax credits

The Secretary of the Treasury would have the authority (within certain limits) to allow corporations to add a portion of their foreign tax credits to the shareholder credit account as a result of agreements with foreign governments. These agreements would be made subject to approval by both the House and the Senate.

Corporate election

The corporation would be required to declare the rate of shareholder credit applicable to any dividend prior to payment of such dividend.

Shareholders eligible for the tax credit

All U.S. citizens and individual resident aliens would be permitted to claim the shareholder credit. In addition, regulated investment companies, real estate investment trusts, subchapter S corporations, partnerships, trusts and similar entities would be able to make shareholder credits related to corporate dividends which they received from other corporations available to their own shareholders, partners or beneficiaries.

Shareholders ineligible for tax credit

a. Tax-exempt shareholders: Tax-exempt shareholders would not be permitted to claim the shareholder credit on dividends which they receive from U.S. corporations except to the extent such dividends are taxed to tax-exempt shareholders as unrelated business income. For this purpose, tax-exempt shareholders would include qualified pension and profit-sharing trusts.

b. Foreign shareholders: Foreign shareholders of U.S. corporations would not be permitted to claim the shareholder credit on dividends they receive from such corporations. However, the Secretary of the Treasury would have the authority to grant the foreign shareholders a portion of the dividend tax benefit through agreements with foreign governments (described above, *Foreign tax credits*).

Corporate shareholders

Under current law, corporations are generally entitled to a deduction equal to 85 percent of the amount of dividends received from U.S. domestic corporations. A 100-percent dividends received deduction is allowed for dividends received from small business investment companies and from members of an affiliated group.

Under this proposal, corporations would still be entitled to the dividends received deduction. However, corporations would not be entitled to claim the shareholder credit on dividends received from other corporations. Instead, corporate shareholders would be permitted to add to their own shareholder credit account the shareholder credit related to the dividends.

Corporate distributions eligible for shareholder credit

The shareholder credit would be given only with respect to pro rata cash distributions which are classified as dividends under the Internal Revenue Code. Thus, the share-

holder credit would not be given with respect to partial or complete liquidations, redemptions, constructive dividends, or other corporate distributions which are not paid from earnings and profits.

Net operating losses

Under present law, a net operating loss may be carried to, and allowed as a deduction in, the three immediately preceding taxable years and the seven taxable years following the year in which the net operating loss arises. A taxpayer, however, may elect not to carry the loss back to preceding years.

Under the proposal, if a net operating loss is carried back and applied against an earlier year's taxable income, the corporation would be required to adjust its shareholder credit account to reflect its reduced tax liability for the prior year.

Audit adjustments and amended returns

Any adjustments to tax liability for the corporation's previously filed tax returns made by an amended tax return or by an Internal Revenue Service audit would require adjustments to its shareholder credit account. The tax liability of any shareholder would not be affected by these adjustments.

Timely reporting

Corporations would be required to report to shareholders by the end of February the amount of dividends paid during the preceding calendar year and the shareholder credit allowable with respect to those dividends.●

EQUITY FOR CONSUMERS ON CHECKING ACCOUNTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, when we return from the recess, I plan to introduce legislation to provide clear authority for consumers to receive interest on checking accounts in all types of federally chartered depository institutions.

This legislation will be designed to end the charade over checking accounts which has cost the American consumer millions of dollars in lost interest and great inconvenience. At this moment, we have a myriad of Federal laws and regulations which do nothing but hamstring the checking account customer and dampen competition among financial institutions.

The proposed legislation would:

First, end the 45-year-old prohibition against the payment of interest by commercial banks on demand—checking—accounts;

Second, give federally chartered savings and loan associations and credit unions explicit authority to provide checking accounts for their customers and members.

Mr. Speaker, existing Federal laws and regulations provide a confusing picture for both consumers and financial institutions. Just recently, the Federal Reserve has issued regulations proposing that commercial banks be allowed to make "automatic" transfers of funds from savings to checking accounts—a first cousin to the payment of interest on demand deposits. The Congress has authorized NOW accounts (negotiable orders of withdrawal) in 6 New England States but not in the other 44 States. In addition, we have a variety of gimmicks employed by some financial institutions—telephonic transfers, bill payer services, and other devices designed to circumvent restrictions on checking and savings accounts.

It is time to stop this banking by gimmickry and allow the consumer a straightforward freedom of choice in handling his checking account. The depression-generated fears about the volatility of checking accounts are long outmoded and are groundless in an industry now highly sophisticated and with accounts backed by $40,000 of Federal insurance.

Mr. Speaker, I do not anticipate that the payment of interest on checking accounts will cause any substantial increase in the costs of banks and other financial institutions.

Financial institutions will compete for these funds on a straight price basis and will be in a position to give up many of the costly giveaways and other gimmicks now employed to attract deposits. The direct competition in the marketplace—on the basis of explicit price—will be beneficial to both the financial institutions and the consumers.●

REVERSE ANNUITY MORTGAGE BILL FOR OLDER HOMEOWNERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. MILFORD) is recognized for 5 minutes.

● Mr. MILFORD. Mr. Speaker, I have become extremely concerned about the plight of many of our older Americans. With the spiraling costs of food, energy, drugs, and other necessary items, they are having an increasingly difficult time making ends meet. I believe that all Federal, State, and local governments have an obligation to assist these older citizens in ways that are truly helpful to them without forcing them to turn to welfare programs or to exist in any substandard way. I believe it is a tragedy that many of these individuals, who have worked hard all their lives and have made valuable contributions to society and to us all, find upon retirement that they must "subsist" rather than to continue to live their lives fully.

It is out of this concern that I am introducing today legislation which will allow for a new type of mortgage instrument—the reverse annuity mortgage—which is designed to help older homeowners.

At this time, the only way a person can regain the equity built up in a home—often a home which was purchased many years ago and which is now paid for—is to sell. That is exactly what many older homeowners are finding they must do. There are two basic reasons for taking this course of action: they either need additional funds on which to live or they cannot afford to make the necessary repairs or improvements on their homes in order to continue living in them. The end result is the same—they must give up their homes. These are often homes in which they have lived for years and raised their children.

The reverse annuity mortgage, provided for in this legislation, would permit homeowners to borrow on the equity already built up on the home. This equity could be paid in increments and provide an income supplement or free up funds with which needed home repairs and improvements could be made. The individual would then have the advantage of being able to continue living in his or her own home.

The reverse annuity mortgage will tend to prevent deteriorating neighborhoods. Aging neighborhoods often go hand in hand with aging residents simply because these homeowners cannot afford to make needed improvements. Under the provisions of this bill, our senior citizens will be able to obtain additional funds on which to live or with which to repair a leaky roof, remodel an aging bathroom, or add an elevator to a stairway for the person who could no longer climb stairs.

Under the reverse annuity mortgage, this loan would not have to be repaid until the home was sold or the title changed hands. Under some conditions, the homeowner can have the loan receipts mailed to him as monthly payments to be used as subsistence, or irregular amounts to be used for such things as medical payments, and so forth.

I believe this is a good, sound way we can assist our older citizens in continuing to live in dignity in their own homes, without forcing them into substandard living conditions or to go on welfare.

I urge my colleagues' support for this program.●

LEGISLATION FOR THE FARMERS IS MOVING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. SIKES) is recognized for 10 minutes.

● Mr. SIKES. Mr. Speaker, there is much satisfaction to be gained from the fact that legislation to provide more realistic programs for the benefit of American farmers and farm families is now moving through Congress. The Senate, under the leadership of Senator HERMAN TALMADGE of Georgia, has passed a bill which contains many of the features needed by farmers, including flexible parity. This is not in the form sought by farmers, but it is an improvement over present laws. The bill has been sent to a Senate-House conference and it is hoped that a meaningful bill will result. Activities by farmers in recent months to stress their plight resulting from bad crop years, high cost of production, and frequently poor markets, has finally reached the consciousness of the American public. Congress, which in the past

has been controlled too much by bureaucratic conceptions of solutions to the farmers' economic problems, now is taking more realistic steps to remedy the situation.

In addition, the Secretary of Agriculture is promising action, particularly by expanding crop insurance programs and in enlarged sales of farm produce abroad. All of these may require long deliberations in Congress before final action is taken. It is to be hoped that the administration will take a more active part in this program by supporting new legislation or in taking steps which are possible under administrative procedure to improve the present situation.

The activity of farmers on Capitol Hill has been helpful in focusing attention on the requirement for new programs if the farmers are to continue to produce. This, however, is a costly drain on their resources and planting time now is at hand. It is hoped that there is now sufficient awareness of the serious economic plight of the farmer to insure completion of needed action when Congress returns from the Easter recess.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 5 minutes.

● Mr. DRINAN. Mr. Speaker, in the early afternoon of Monday, March 20, I was unavoidably absent from the House due to a late morning press conference in Boston with Governor Dukakis.

Had I been present for rollcall vote No. 166, ordering a second on a motion to consider the Middle-Income Students Assistance Act under suspension of the rules, I would have voted "aye."●

NATIONAL GOOD NEIGHBOR DAY

The SPEAKER pro tempore. Under a previous order of the House the gentleman from Pennsylvania (Mr. KOSTMAYER) is recognized for 5 minutes.

Mr. KOSTMAYER. Mr. Speaker, I yield my time to the gentleman from Montana (Mr. BAUCUS).

Mr. BAUCUS. I thank the gentleman for yielding.

Mr. Speaker, last Congress I introduced House Joint Resolution 542 to designate the fourth Sunday in September annually, as "National Good Neighbor Day." Passage of this resolution will recognize, coordinate, and promote the volunteer efforts of groups and individuals throughout America.

Supporters of and participants in this program need congressional action, not for the use of Government funds or facilities, but to provide further impetus to an idea continually gaining momentum.

The Governors of 19 States have issued proclamations supporting "National Good Neighbor Day" and the departments of education from 11 States have supported and helped publicize the efforts of the nonprofit National Good Neighbor Day Foundation.

It is certain, however, that the strongest support comes from senior citizens, handicapped citizens, and others who personally benefited from past activities. Evidence of volunteer efforts which benefited communities at large is also abundant; parks, recreation areas, and other public facilities miraculously appeared repainted, well groomed and free of litter the morning after Good Neighbor Day. These are only some of the examples of good done for our common environment by neighborly volunteers.

Through the legislative process a worthwhile resolution which will take little of our time can substantially benefit us in terms of a national community. In the past, more than 180 Members offered support for this effort and it is hoped that all of our colleagues join with us.

THE FEDERAL GOVERNMENT NEEDS TO DEVELOP ECONOMIC CONVERSION PLANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. DODD) is recognized for 10 minutes.

● Mr. DODD. Mr. Speaker, I would like to insert in the RECORD the remarks which I delivered to the House Budget Committee Human Resources Task Force this morning.

The problem of realinement of economies which are extremely dependent upon defense related contracts is not only of critical importance to my State of Connecticut, but also to many areas throughout the Nation.

Thank you, and at this time I insert my remarks in the RECORD:

STATEMENT OF HON. CHRISTOPHER J. DODD

Mr. Chairman and members of the committee, I would like first of all to express my enthusiastic support for the Budget Committee's timely decision to hold hearings on the very complex subject of economic conversion, and secondly I would like to thank you for giving me this opportunity to testify before you today.

I am here in several capacities: First and foremost as the Representative of the Second District of Connecticut which is, as many of you know, one of the most defense-dependent congressional districts in the Nation. As of 1962, over 71 percent of the civilian employment in the New London-Groton-Norwich area was estimated to be defense-related, and extremely vulnerable to any reductions or shifts in military spending. Since that time, no significant alteration of that defense-dependent relationship has taken place, and, in fact, the point has recently been driven home again with General Dynamics' announcement that it intends to cease production of the SSN 688 submarines on April 12th of this year. 27,000 individuals are currently employed at the electric boat facility, and the continued employment of more than half of these workers is jeopardized.

I am also here today as the chairman of the Members of Congress for Peace, through Law Task Force on Economic Conversion, that has recently been formed to bring greater attention to the problems of changing patterns in our defense spending, and to help support solutions to these problems.

I believe that there are several key points to be made in the course of any evaluation of the current "state of the art", and I would like to make them now before proceeding with a more detailed analysis of existing Federal programs, and with the presentation of a number of recommendations for future action.

1. First of all, it is clear that existing Federal programs, despite some improvements, are wholly inadequate to cope with the severe economic dislocations, associated with major realignments in our defense program. The suddent termination of the B–1 bomber program and the prospect of additional base closings later on this spring—and the panic these measures have created—have just recently served to underline how deficient the Federal role really is. In a country that is estimated to employ 938,500 people in the manufacturing of products for DOD consumption, and a total of 4.6 million people in defense-related industries, it is imperative that the Federal Government deploy massive resources in reversing its past neglect of conversion issues if we are to help local economies weather adjustments in defense spending.

2. One of the greatest deficiencies in the Federal role is a result of the fact that the present assistance mechanisms are designed mainly to implement recovery strategies rather than to help evolve them, and thus into play too late to have a preventive effect. The lag-time between defense-related layoffs and the economic recovery of a community is calculated to be about five years—and given this, crisis intervention can never be anything other than a weak substitute for thorough advance planning. The government must make a commitment to assist communities in the development of comprehensive conversion plans well before any actual decision to significantly alter defense spending in a given area is made.

3. Federal conversion efforts must focus not solely on the economic adjustment problems of military base closings as they do now, but must move to explicitly include cases of contract terminations or reductions in the planning process. While congressional concern over the issue of base closings has resulted in the adoption of a permanent advance notification system in The Military Construction Authorization Act for Fiscal Year 1978, no similar requirement exists for defense contract realignments despite the fact that the latter have represented an average annual loss of more than $200 million in the last eight years, and that they occur frequently.

4. Federal economic assistance programs must develop a specialized capability of targeting large sums into those relatively few areas of the country where defense-oriented employment is concentrated, and where the greatest impact of defense contract cutbacks could be expected to occur. At present, the eligibility criteria for these programs are extremely broad, and no priority is given to the alleviation of economic adjustment problems resulting from defense realignments.

In order to better demonstrate how Federal programs currently fail to address the needs of local areas suffering the impact of defense realignments, it is important first to understand the relationship of existing programs, the function of these programs, and the policies on which they are based.

At the Federal level, two offices have specific responsibility for providing economic adjustment assistance to local areas impacted by DOD initiated realignments—The Office of Economic Adjustment (OEA) in DOD and EDA's title IX program. In addition since 1970 DOD's OEA has served as the permanent staff to the President's Economic Adjustment Committee (EAC) which includes 19 Federal agencies and departments and is chaired by the Secretary of Defense.

The purpose of the EAC is to identify economic impacts resulting from base closures, base realignments, defense contract cutbacks, defense dependency and fast growth due to defense work. Furthermore the EAC

often proposes strategies for economic recovery and is supposed to coordinate with its 19 member departments and agencies to determine the type of assistance that is needed. In essence, it is OEA's job to use the EAC to create awareness of the special needs of a defense-impacted area so that the resources of ongoing Federal programs may be utilized.

In practice, OEA's relationship with the 19 members of the EAC is a very informal one. OEA has no authority to do anything other than lobby for assistance that it feels an area needs. Since OEA must rely on other Federal agencies to provide the actual assistance needed, OEA's role has been limited to conducting impact analyses.

On the other hand, it is the congressional mandate of EDA's title IX program to provide actual adjustment assistance to areas experiencing economic impacts resulting from Federal policy decisions. Largely in response to concern over base closings, the program was established in 1974 and includes the following forms of assistance: capital improvements, direct payments to workers, business loans and any other type of assistance which EDA deems appropriate.

Both OEA and title IX have tended to concentrate more on base closings than dislocations caused by defense related industries, despite the tremendous size of DOD's procurement budget and the large impact it has on local economies. DOD's procurement budget which accounts for approximately 75 percent of all Federal Government procurement has grown from $36 billion in 1970 to $55.6 billion in 1977.

While increased procurement by DOD is generally viewed as contributing to the health of the economy, often completely ignored are the adverse economic impacts resulting from the large number of DOD contract terminations that occur annually. In fiscal year 1977, 1318 defense contracts having a total value of $410 million were terminated. Over the last 8 years an average of 1422 contracts with an average value of $222 million were terminated annually.

Let me clarify this point by saying that these terminations occurred before the contracts were scheduled to expire. In some cases, the terminations occurred for reasons of convenience or default. Regardless of the reason, however, the impact of these actions on local economies has been ignored by Federal Government.

The following chart identifies the number, the total amount and the average size of DOD contracts terminated since fiscal year 1970. The information in the chart was supplied to me by DOD.

TABLE I.—*Defense contract terminations*

Fiscal year	Number	(1)	(2)
1970	1,559	$143	$91,744
1971	1,342	173	128,821
1972	1,259	122	96,938
1973	1,367	136	99,846
1974	1,418	348	245,064
1975	1,643	211	128,637
1976	1,470	235	159,710
1977	1,378	410	311,317
Average	1,422	222	157,760

[1] Total amount (in millions).
[2] Average size (in actual dollars).

SOURCE: "Military Prime Contract Awards, Size Distribution, for fiscal years 1970–77," published yearly by the Department of Defense—OASD (Comptroller) Directorate for Information Operations and Control.

Of the 11,376 defense contract terminations that have occurred since 1970, OEA has initiated adjustment projects in only 22 cases, whereas in 66 base closures OEA has conducted 126 adjustment projects.

Similarly, industrial dislocation projects have received very little of EDA's title IX program resources. In FY 1975, 1976 and 1977, title IX spent a total of $200 million conducting 150 economic adjustment projects.

Of these projects, 30 were DOD related; 24 were related to base closings; and only 6 projects were related to industrial dislocations.

Of the $200 million spent by title IX, $51 million was spent on all DOD related projects; $45 million was spent on base closure projects; and only $6 million was spent on industrial dislocation projects.

Of the $6 million spent on industrial dislocation projects, $5.8 million was spent on one project—the closing in 1973 of the Burlington Army Ammunition Plant in Burlington, New Jersey which resulted in the elimination of 1700 jobs. The Burlington project involved funds for both planning and capital improvements to make the site more attractive to industry. On the other hand, in the remaining 5 industrial projects, title IX only provided money to evaluate the economic impact and to propose a recovery strategy.

Although in fiscal years 1975, 1976, and 1977 title IX has evaluated defense contractor impacts which caused the elimination of 22,800 jobs, title IX funds have been used only once to provide assistance actually to implement a recovery strategy.

Although title IX is the only program which has the specific responsibility for providing assistance to defense-impacted areas, the largest part of economic aid to these areas has come from other EDA programs and other departments and agencies. Since 1973, EDA, EPA, and HUD have provided the greatest part of the Federal Government's assistance, $265.8 million, which has been channeled primarily into capital improvements and public works.

However, it is difficult for programs other than title IX to be targeted into areas experiencing defense impacts. For example, the eligibility requirements for EDA assistance have become so broad that it is estimated that 75 percent of the Nation now qualifies for EDA assistance. This broadening of EDA's function has stretched EDA's resources and has made it very difficult to address adequately the special needs of areas experiencing extreme hardship.

This is very different from what the original proponents of a National Economic Development Agency had envisioned. The original intention was to aid chronically depressed areas having structural rather than cyclical economic problems. The emphasis was intended to be on business loans to allow for growth of indigenous firms and the attraction of new firms.

However, the history of EDA spending between 1966 and 1975 reflects a much different approach. During this time period, 74 percent of EDA obligations have been for the more politically popular public works projects and only 17 percent have been for business loans.

While the focus of economic development programs has become broader and broader, there are only eight States in which employment in defense-oriented industries accounts for 9 percent or more of the total manufacturing labor force. It is in these States that the greatest impact from defense contract realignments could occur, and therefore, it is in these areas that the greatest need for adjustment assistance can be expected.

The following charts show the distribution of employment in defense-related manufacturing industries. The first chart shows that during the period 1965–1975 the level of defense-oriented manufacturing employment in each region of the country remained relatively stable, and remained concentrated in New England, the Mid-Atlantic, and the West. The second chart ranks all of the States according to the percentage of each State's total labor force working in defense-related manufacturing industries.

TABLE II.—EMPLOYMENT IN DEFENSE-ORIENTED MANUFACTURING INDUSTRIES

Regions	Number of employees in defense-oriented employment			Regional percentage of employment in defense-oriented manufacturing		
	1965	1970	1976	1965	1970	1976
National	1,305.8	1,268.3	938.5	100.0	100.0	100.0
New England (Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut)	150.5	141.1	116.8	11.5	11.1	12.4
Mid-Atlantic (New York, New Jersey, Pennsylvania)	244.5	192.2	142.6	18.7	15.2	15.2
East north-central (Ohio, Indiana, Illinois, Michigan, Wisconsin)	164.0	158.3	97.9	12.6	12.5	10.4
West north-central (Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas)	89.9	102.7	70.3	6.9	8.1	7.5
South Atlantic (Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida)	121.2	127.5	98.3	9.3	10.1	10.5
East south-central (Kentucky, Tennessee, Alabama, Mississippi)	44.5	48.9	51.3	3.4	3.9	5.5
West south-central (Arkansas, Louisiana, Oklahoma, Texas)	76.6	121.6	62.8	5.9	9.6	6.7
Mountain (Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada)	38.8	45.9	34.4	3.0	3.6	3.7
Pacific (Washington, Oregon, California, Alaska, Hawaii)	388.0	308.0	264.2	30.0	24.3	28.2

TABLE III.—STATES RANKED BY PERCENTAGE OF MANUFACTURING LABOR FORCE ENGAGED IN DEFENSE CONTRACT WORK, FISCAL YEAR 1976

Rank and State	[In thousands] Total manufacturing labor force	[In thousands] Defense contract labor force	Percent manufacturing labor force engaged in defense contract work
1. Connecticut	396	61.8	15.60
2. Arizona	106	16.0	15.09
3. California	1,647	234.0	14.20
4. Mississippi	219	23.4	10.68
5. Washington	243	25.3	10.41
6. Vermont	41	4.1	10.00
7. Maryland	232	22.2	9.56
8. Utah	71	6.7	9.43
9. Missouri	416	36.4	8.75
10. Virginia	387	34.0	8.56
11. Massachusetts	593	39.8	6.71
12. Florida	343	22.7	6.61
13. New Hampshire	94	5.8	6.17
14. Texas	859	52.2	6.07
15. Idaho	52	3.0	5.70
16. Kansas	165	9.0	5.45
17. Nevada	13	.7	5.38
18. Minnesota	318	17.1	5.37
19. New York	1,440	77.2	5.36
20. Colorado	141	7.0	4.96
21. New Mexico	30	1.4	4.66
22. New Jersey	753	29.3	3.89
23. Oklahoma	156	5.9	3.78
24. Tennessee	487	17.9	3.67
25. Indiana	682	20.6	3.02
26. Hawaii	24	.7	2.91
27. Ohio	1294	36.7	2.83
28. Pennsylvania	1332	36.0	2.70
29. Iowa	231	5.9	2.55
30. Wyoming	8	.2	2.50
31. Rhode Island	122	2.9	2.37
32. Maine	102	2.4	2.35
33. South Carolina	371	8.3	2.23
34. Alabama	340	7.3	2.14
35. Oregon	193	4.0	2.07
36. Nebraska	88	1.7	1.93
37. Louisiana	192	3.5	1.82
38. Michigan	1041	18.9	1.81
39. Wisconsin	512	8.8	1.71
40. Georgia	477	6.1	1.27
41. North Dakota	16	.2	1.25
42. Illinois	1190	12.9	1.07
43. Kentucky	271	2.7	1.00
44. West Virginia	124	1.2	1.00
45. Delaware	69	.4	.57
46. Arkansas	195	1.1	.56
47. North Carolina	758	3.4	.44
48. Montana	24	<.1	<.1

Source: "Shipments of Defense Oriented Industries, 1976," MA-175(76)-1, U.S. Bureau of the Census, U.S. Government Printing Office, Washington, D.C., 1978.

The important question which these hearings must answer is what must be done to develop a sufficient capability within the Federal Government to provide assistance to areas of our country impacted by defense cutbacks in order for them to be able to convert from defense to non-defense use.

Based on what I have been able to determine from the information I have gathered, I believe it is very evident that the Federal Government currently does not have this capability. In fact, in the case of areas impacted by defense contract cutbacks, Federal assistance is effectively non-existent. The resources of OEA and title IX are limited, but perhaps as importantly, the resources of other Federal programs are spread too thin to be able to focus adequate attention on those few areas of the country where the greatest concentrations of defense-oriented employment is located and where contract realignments most often occur.

What then must we do to create the kind of mechanism which will deal effectively with an area's needs following a defense cutback?

This morning, you have heard our colleague from New York, Mr. Weiss, testify about how legislation he has introduced would deal with this problem. Undoubtedly, the Weiss-McGovern bill is the most comprehensive legislative proposal on this subject.

I support the concept of this legislation; however, I also believe there are many other opportunities on which advocates of conversion planning can seize. Therefore, it is my belief that we should identify those principles on which a sound conversion policy must rest, and then seek to apply those principles whenever policy relating to conversion is being considered.

It seems to me that there are four main principles on which meaningful conversion policy must be founded:

(1) Notice far enough in advance of the time that the actual cutback will occur so that the assessment of the impact can be made and contingency plans can be reviewed and implemented.

(2) Plans for the alternative, non-defense, use of a facility should be developed for all military bases and all defense contractors and periodically updated so that in the event of a cutback there is already available a conversion process that can be initiated;

(3) All elements of the community or communities affected—including labor, community representatives, as well as business management—should be involved in both the development and implementation of alternative use plans; and

(4) The responsibility at the Federal level for coordinating conversion planning and assistance should be vested in an office that has the authority to give direction to the various departments and agencies that must be relied upon to provide the actual assistance.

Already, the task force which I chair for MCPL is seeking to apply these principles which I have discussed to two proposals which are related to the conversion question.

There is now pending in the executive branch an Executive order which would formally recognize and authorize OEA to perform the coordinating role which it has sought to fulfill. As you know, a major criticism made against OEA is that it needs greater authority to be able to make departments and agencies take seriously its recommendations for assistance. The only authority under which OEA operates currently is a Presidential memorandum issued in 1970.

In our letter, we asked the President to include in the Executive order a specific requirement that defense contractors and military installations be required to develop alternative use plans. Furthermore, we asked to meet with his assistant for reorganization, Jack Watson, to discuss this matter further. The letter was delivered only yesterday so I do not have any response as yet. However, I will keep the committee informed of any developments that might result.

Furthermore, our task force plans to testify when hearings are held before the Subcommittee on Labor-Management Relations of the Committee on Education and Labor on the bill H.R. 8065, the Human Resources Act. This legislation which is sponsored by our colleague from New York, Mr. Lundine, was passed by the Committee on Banking, Finance, and Urban Affairs to which it was jointly referred.

This legislation would authorize funds for the establishment of Labor-Management Committees at the plant and industry level. We feel that the bill should also require that industries involved in defense production develop alternative use plans.

In addition, our task force is examining different ways in which the Congress can better monitor the impact of defense procurement on local economies. While our views on this matter have not been formalized as yet, it is our feeling that Congress as well as the agencies have failed to control the economic and social impacts of defense procurement on local areas. I will keep the committee informed of our activities in this area as well.

In sum, Mr. Chairman, I believe that the Congress and the executive branch should promptly move beyond the remedial process we currently rely upon. We must institutionalize, within short order, an adjustment process based on carefully pre-developed conversion schemes which recognize the need for new modes of production to replace the old ones that are being, for one reason or another, eliminated or reduced by Federal action. We must bolster the Federal role in advanced planning and give the responsible Federal agencies the funding they are going to need if they are to successfully cope with the extraordinarily complex problems of defense realignment.

I am confident that we can accomplish our goal of increasing the quantity and the quality of Federal conversion efforts, and I personally will remain committed to their success. Again, Mr. Chairman and members of the committee, I commend you for your leadership in this vital area, and I thank you for taking the time to hear my remarks which I hope will be of assistance during the course of these valuable hearings.●

CORRESPONDENCE WITH STATE DEPARTMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. STUDDS) is recognized for 60 minutes.

Mr. STUDDS. Mr. Speaker, I take this time to place in the RECORD, the following correspondence between myself and the State Department deals with the proposed sale of advanced fighter aircraft by the United States to Saudi Arabia, Israel, and Egypt. The State Department reply to my list of preliminary questions on this subject contains a wealth of information which I believe will be of interest to the public and to Members of the House:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 21, 1978.

Hon. CYRUS VANCE,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: As you know, the House International Relations Committee will soon be asked to make the same judgment which the Administration has already made concerning the wisdom of selling advanced aircraft to Israel, Saudi Arabia and Egypt.

Undoubtedly, your Department will be providing the Committee, and the Congress as a whole, with a comprehensive explanation of the reasons for recommending these arms transfers at this time. My own thinking will be shaped, to a great extent, by the ability of the Administration to demonstate that:

1. These proposed sales will contribute to, or at least not disrupt, progress towards peace in the Middle East;

2. These sales will not create additional long range problems with respect to the arms race, and the political and military balance in the region;

3. These sales are necessary for the security interests of Egypt and Saudi Arabia, and that there is an urgency to this need;

4. The F-15 is uniquely suited to the genuine needs of Saudi Arabia, and that other aircraft, such as the F-14 and the F-16, are not so suited; and

5. These sales are consistent with the President's arms sales policy.

I am attaching a preliminary list of questions with respect to various aspects of the proposed sales. While I would prefer to receive a personal reply to all of them, I realize that the Administration will be preparing an official response to the questions posed in subsection 36(b)(1)(A-M) of the Arms Export Control Act, and that questions similar to mine may be posed by other members of Congress. As a result, I would be fully satisfied, in lieu of answers to some questions, with a description of where comparable responses might be found.

I would like to thank you in advance for any help you may be able to provide.

Sincerely,

GERRY E. STUDDS.

UNDER SECRETARY OF STATE,
FOR SECURITY ASSISTANCE,
Washington, March 21, 1978.

(Unclassified with secret attachments)

Hon. GERRY E. STUDDS,
House of Representatives.

DEAR GERRY: The Secretary has asked me to respond to your thoughtful letter of February 23, in which you discuss the Administration's proposal to sell aircraft to Israel, Egypt and Saudi Arabia. The answer to the series of questions you posed are enclosed. The five general oppositions raised in your letter are among the most important considered by the Administration in deciding whether to proceed with these sales. I would like, therefore, to discuss our thinking on each one of these points.

First, let me assure you that our desire to bring peace to the Middle East is paramount. If we had determined that the sale were not in the interest of bringing peace, we would not have gone forward. This was, of course, the most difficult question to assess. The sale of arms for the purpose of assisting a peace process admittedly seems paradoxical at first blush. A close look at the situation led us to conclude, however, that the United States could not ignore security needs we ourselves had determined to be valid and expect to be trusted as an intermediary. An essential ingredient in movement toward a settlement is confidence. The governments must make hard decisions to move the process along. It is our judgment that this is more likely to occur if the basic defensive needs of the three countries are fulfilled by the United States, the one country able to talk to all sides to the conflict.

Secondly, it is our judgment that the basic political and military balance in the region will not be affected by these purchases. Israel has now, and will retain well into the 1980s, a substantial margin of military superiority—especially air superiority. Our sales to Israel are designed to replace aircraft that will become obsolete and to provide Israel with a continuing edge in military technology. Saudi Arabia is inherently much weaker militarily than its larger neighbors. With 60 F–15s, Saudi Arabia in 1983 will still have less than one-third Iraq's number of combat aircraft and less than one-half Iraq's number of advanced fighters. Egypt now is in a weaker position with respect to aircraft than it was in 1973. The sale of F–5s will assist Egypt only in maintaining its defensive position relative to its neighbors; it will not give Egypt any qualitative or quantitative advantage.

In assessing the question of an arms race in the area, we must consider what might occur if the United States does not fulfill these defense needs. We must assume that other nations would fill this void. This would not have a positive long-range impact on the arms race.

Third, both Egypt and Saudi Arabia have an urgent need to strengthen their air defense capabilities. Egypt has not recieved any new aircraft from the Soviet Union in about three years and its inventory of MIGs is deteriorating. The F–5s will give Egypt the basis for a credible and efficient air defense system for its national territory. Saudi Arabia's air defense now relies heavily on British Lightnings that were purchased in 1966. These planes are scheduled to be retired because they will not be structurally sound by the time the first F–15s arrive in 1982. In fact, the Lightnings are already under restrictions on performance in order to prolong their useful life. Thus both governments have an urgent need to purchase replacement aircraft. In the context of these needs, delay could be taken almost as seriously as rejection.

Fourth, Saudi Arabia was given the opportunity to review the capabilities of four advanced fighters, the F–14, F–15, F–16, and F–18. In addition, consideration was given to the alternative of increasing the Saudi inventory of F–5 aircraft. The Government of Saudi Arabia chose the F–15 because it meets all of the criteria important to Saudi needs. It has the range necessary in a country as large as Saudi Arabia with relatively few airfield facilities. It has the radar capability Saudi Arabia needs in the absence of an adequate ground-based radar system. It is an all-weather aircraft and possesses other air superiority characteristics for its primary role as an air interceptor. It has two engines which the Saudis prefer for safety reasons.

The F–5 has limited range and radar coverage and is not an all-weather fighter. The F–14 has many of the same air superiority characteristics as the F–15, but it is a two-person aircraft; the Saudis prefer a one-person plane. The F–16 is a more effective air-ground aircraft than the F–15, but is less capable as an air interceptor and lacks significant all-weather air interceptor capability. The F–18 is not in U.S. inventories and, under the President's policy, could not be sold abroad. In any event, the F–18 would not be available within the time required to meet Saudi needs. There is, therefore, a strong case for supplying the F–15 as the U.S. aircraft best suited to Saudi Arabia's needs.

Finally, we judged that the sales met the criteria and are consistent with the President's arms transfer policy. The total amount of this sale represents a very large figure, and we will space the contracts over several years. As you know, we are reducing the levels of arms sales this year by eight per cent or $740 million. Clearly, under the operation of our ceiling the spacing of the aircraft package sales will mean there will be further limitations on the sale of U.S. arms abroad in future years. This is in line with the President's policy. Under the terms of that policy, we have an obligation to meet the security needs of our friends. We do so only after the most searching examination in order to ensure that our sales do not exceed minimum feasible levels.

I hope this information and the answers to the questions you posed will be helpful to you as you consider this important proposal. Please call on me if you require additional information. I would note also that we are prepared to offer you and other interested members of the committee a briefing on the military balance in the region and a briefing on the characteristics of the three aircraft. This latter briefing has already been given to a number of House and Senate staffers.

Sincerely,

LUCY WILSON BENSON,
Under Secretary for Security Assistance, Science and Technology.

Enclosure: Answers to questions on proposed aircraft sale. (Secret.)

1. Q. Precisely how will these three sales contribute to the progress of a peace settlement in the Middle East?

A. The sales will contribute to the peace process principally:

By enhancing the confidence of Egypt and Israel in their own security, thereby assisting them to make the hard decisions necessary for a peace settlement;

By demonstrating support for Saudi Arabia, a moderating influence in the area and a country which has strongly supported President Sadat's peace initiative.

By demonstrating US concern for their legitimate security needs and thereby reinforcing our role in working with the parties for a settlement.

2. Q. Should the present efforts to begin meaningful negotiations fail, will we have succeeded in doing anything other than simply upping the military ante in the area?

A. As the sales will not upset the military balance, but will augment the ability of each country to defend itself, our proposal should exercise a stabilizing effect on the region. Nations that are secure behind their borders are less likely to take action in anticipation of an attack.

3. Q. What are the comparative combat capabilities, and the relative costs, of various US advanced aircraft? How do these capabilities compare to those of Russian, French, and British planes which are, or may be, available for export?

A. Classified secret.

4. Q. What are the comparative military capabilities of all the nations in the Persian Gulf and Middle East area?

A. Classified secret.

5. Q. What is the delivery schedule for each of the three proposed sales? How do these mesh with the technical and absorptive abilities of the nations involved?

A. Classified secret.

6. Q. What U.S. training and technical support will be needed in each case, and for how long? What training and support commitments have already been made to the three countries? Have we analyzed our long term ability to meet these commitments without creating manpower or technical shortages in the U.S.?

A. Israel F–15: Only a minimum of additional maintenance training will be required. Technical support is currently being provided under the current Israeli F–15 FMS program and it is expected that approximately 15 man-years additional technical support will be required. No training or support commitments have been made.

Israel F–16: There have been no training or support commitments made to Israel for the F–16. Training and technical support requirements will be established in consultation with the Israelis at a later date. Tentatively, we estimate that two Weapon System Logistics Officers will be needed for three years and 24 man-years of contractor engineering technical services will also be required.

Saudi Arabia F–15: An initial cadre of RSAF technicians and pilots will be trained in the U.S. prior to the arrival of F–15s in Saudi Arabia. The exact requirement for training and technical support in Saudi Arabia by contractor personnel will be determined by a site survey. We estimate on a preliminary basis that approximately 40 USAF personnel will be assigned to program management responsibilities in Saudi Arabia. The number of contractor personnel estimated for initial introduction of the F–15 should be 500–600 personnel at peak employment two years after the Saudis receive the first aircraft in Saudi Arabia. No commitments have been made, however.

Egypt F–5: While this program has not yet been fully defined, the following support is being programed. The estimated U.S. Government involvement will be a management and training supervision team consisting of approximately 10 individuals

for a period of two years. Thereafter, USG program management and assistance would scale down to a three man effort for 3–5 additional years. Contractor involvement would begin with a three part effort: a maintenance technician team; a training team; and a contractor engineering technical services team. The maintenance technician team would consist of approximately 10 technicians who would help maintain the F–5 aircraft for the initial 18–24 month period or until self-sufficiency is attained. The contractor training team as presently envisioned would consist of approximately 12 individuals who would be responsible for some aircrew and technical training in Egypt for a period of approximately one year. The contract engineering technical service team will consist of approximately nine specialized engineers who will be on site to assist the Egyptian Air Force as necessary. They would remain in Egypt for at least 3–5 years with the number of specialists decreasing gradually until no longer required. No training or support commitments have been made.

DOD analysis of each of these sales confirms that we can meet these commitments without creating any manpower or technical shortages in the U.S.

7. Q. Trace the process by which each sale was chosen for a proposed letter of offer. In each case, why is the particular plane selected uniquely adapted to the perceived needs of the country involved?

A. A classified chronology for each sale is attached.

Each country has a legitimate need to maintain a credible defense capability, and in each case the requirement for air defense relates to the area or installations to be protected, the peculiarities of terrain, varying degrees of manpower and technical constraints, and the postulated threat. The Israeli requirement for F–15s and F–16s derives in large part from their need to maintain the kind of qualitative edge that compensates for demographic constraints. They do not have the manpower to expand their forces significantly. The mix of F–15s and F–16s is analogous to the US concept of hi-lo mix in which both the costs and the capabilities of aircraft are considered when structuring for an optimum force mix.

The F–5s offered to Egypt are less sophisticated than the advanced aircraft sought by Israel and Saudi Arabia. The F–5 is well suited to the air defense role for which Egypt intends it. The F–15 for Saudi Arabia is the only aircraft in the US inventory that meets the Saudi requirement for a single-seat, twin-engine, all-weather air superiority fighter. A full description of the unique Saudi requirements and how they relate to the Saudi choice of the F–15 is contained in the classified DOD analysis of the Saudi F–15 request which was forwarded to Chairman Zablocki on March 8.

Q. Would the capabilities of the F–15 be enhanced by the sale of an early warning radar system, such as the AWACS, the E–2C or the British NIMROD?

A. Yes, the capabilities would be enhanced by these systems; however, we do not believe that an F–15 sale to Saudi Arabia will lead to the sale of the AWACS, the E–2C or the British NIMROD. The F–15 has an excellent radar. Were the Saudis to purchase an aircraft with a less effective radar than the F–15, they would be more likely to seek an airborne radar system.

9. Q. Are early warning aircraft included in the planned Saudi military modernization program?

A. Such aircraft are not part of Saudi Arabia's Air Force planning.

10. Q. Has the U.S. discussed such an eventual purchase with Saudi Arabia?

A. No. After the assertion was made last month of Saudi interest in an early warning aircraft, we asked a Saudi official if it were true. He denied any such interest on the part of the Saudi Government.

11. Q. What is the purpose of the Saudi's air base construction program? Against what specific threat are the bases at Turayf, Gurayet and Tabuk aimed at providing protection? Why cannot bases further from Israeli borders serve the same purpose? Were these base locations selected in accordance with—or contrary to U.S.—advice?

A. Saudi military planning stresses dispersal of defensive air and ground units throughout the Kingdom with concentration on the Dhahran area in the oil-rich Eastern Province; at Taif to defend the Mecca-Medina-Jidda complex; and at Khamis Mushayt to defend the southern border. Our military advisers in Saudi Arabia have agreed with the Saudis in the wisdom of this dispersal program but have neither encouraged nor discouraged the establishment of individual bases.

New asphalt strips have been constructed near Turayf and Gurayat (180 and 210 miles respectively from the nearest point in Israel) to replace old dirt strips. This is part of a country-wide program to improve civil aviation and has no direct military application other than the general usefulness of any runway for emergency landings. There are no air base facilities at either of these civilian airfields. Fighter aircraft could not effectively operate from either field.

Tabuk is the only military installation in the northwest portion of the country. Installations have existed at Tabuk since before World War II, and thus pre-date the establishment of the State of Israel. Tabuk sits astride a traditional invasion route into the Kingdom used by both Turks and Egyptians in the past.

The Saudi airbase at Tabuk, located 125 miles from the nearest point in Israel (Saudi Arabia and Israel share no land borders), is an expansion of the civilian airport which has been used by the civil airline since the early 1960s. In 1974 a British firm completed additional facilities which will permit support for a squadron of Lightning interceptors.

12. Q. Is it true that ACDA opposes—or at one time did oppose—the Saudi sale? For what reasons? If their position has changed, for what reasons has it changed? What is the ACDA position with respect to the Egyptian and Israeli sales?

A. As you know, ACDA advises the Secretary of State, the National Security Council, and the President as to the potential arms control impact of prospective transfers under the FMS program. In particular, ACDA evaluates the potential impact of a proposed transfer on the stability of the region that includes the recipient nation, including the likelihood that the transfer may contribute to an arms race, or increase the possibility of outbreak or escalation of conflict, or prejudice the development of bilateral or multilateral arms control arrangements. ACDA also evaluates independently whether a proposed transfer is consistent with the provisions of the President's arms transfer policy. These arms control analyses then constitute one factor which must be weighed against other consideration—military, political, human rights, etc.—in deciding whether or not to approve an arms transfer request.

As a result of such an analysis of possible Middle East aircraft transfers, the Director of ACDA expressed concern over the sale to the Middle East of aircraft as advanced in capability as the F–15. However, at the same time, he also noted that he appreciated the presence of other overriding national interest, and, therefore, was prepared to support a package of the type currently proposed. ACDA has never opposed the transfers under consideration of F–5Es to Egypt or F–16s to Israel. The ACDA position has not changed.

From the arms control standpoint, it is essential that the military balance among Middle East nations be maintained by even-handed treatment of the principal powers, in order to avoid destabilizing the situation. Beyond that, movement toward a peace settlement is, of course, a major arms control objective. It would be ideal if no new transfers were necessary. But given the prospect that movement toward a peace settlement may be facilitated by arms transfers, it is ACDA's view that the arms control risk associated with any given level of transfers is minimized by a balanced package, such as the announced combination of Saudi, Egyptian, and Israeli sales.

13. Q. Is it true that the Office of Policy Analysis and Evaluation of DOD opposes—or did oppose—the Saudi sale? What is the role of this office in the arms sales consideration process?

A. Classified secret.

14. Q. Where will the F–15s be stationed within Saudi Arabia? What control, if any, will the U.S. have over this decision? Does the U.S. have a recommendation?

A. The Saudi Government has indicated its intention to station its F–15s at Dhahran in the Eastern Province, near the Jidda-Mecca-Medina complex at Taif, and possibly at Khamis Mushayt in the South. We agree with these Saudi plans. These are the only three Saudi air bases which presently have the logistics infranstructure to support the permanent basing of F–15 aircraft.

The Saudis have indicated they do not intend to station these aircraft at Tabuk. The F–15 could not be assigned to Tabuk as a main operating base unless significant modifications and improvements were made in the base infrastructure. These changes would include new hangers, technical workshops, space parts storage—all of which would have to be built to American standards specifically designed for the F–15.

15. Q. Should there be an attack on Israel by Egypt or Syria, how likely is it that Israel would act to limit Saudi options by launching a preemptive strike to eliminate the potential threat posed by the F–15s? What would be the consequences of such a strike?

A. Saudi Arabia is not a confrontation state and has abstained from any significant combat in previous Arab-Israeli wars and any threatining gestures toward Israel. Israel has not launched pre-emptive strikes against either Iraq or Libya, nations which have extensive inventories of sophisticated Soviet-supplied equipment. Under these circumstances, and considering Saudi Arabia's intentions to use the F–15 defensively and not to deploy it so as to provoke an Israeli attack, we regard an Israeli pre-emptive strike against Saudi Arabia as unlikely.

16. Q. How will the F–15 sale complicate the military situation for Israel? Will it force them to divert some of their air squadrons from other theaters?

A. Israeli positioning of their air assets is based on their perceptions of all possible threats. Notwithstanding considerable evidence that Saudi F–15s would play no part in any future conflict, the Israelis might choose to modify their aircraft deployments as a hedge against possible Saudi involvement. But given the limited airspace to be defended and the excellent capabilities of the Israeli Air Force, it is most unlikely that any such modified deployment would constitute a diversion of forces from any theater.

a. Will it complicate their (Israeli) identification problems?

A. Aircraft are normally identified by radio call-sign, proper IFF (Identification Friend or Foe) coding and ground based radar tracking. The sale of F–15s to Saudi Arabia would not complicate the Israeli identification problem.

b. How do you tell a friendly F–15 from an unfriendly one?

A. Aircraft are normally identified by radio call-sign, proper IFF coding and ground based radar tracking.

c. Would the sale pose a threat to the survival of the Israeli E–2C?

A. No. The Saudi F–15s are for air defense of Saudi airspace and it is very unlikely that the planes would be used beyond Saudi borders to attack Israeli targets either on the ground or in the air. There is little chance that the Saudi F–15 would constitute a threat to the Israeli E–2C. The E–2C has a stronger radar than the F–15 and hence could acquire the F–15 on the radar scope before the F–15 could see the E–2C. The Israeli aircraft, a highly maneuverable radar platform, will be effectively defended by Israeli fighters and ground-to-air systems.

17. Q. Should war break out, is Saudi Arabia likely to fear a pre-emptive strike from Israel? If so, what steps could/would they take to prevent such a strike?

A. See 15 above.

18. Q. What was the Saudi military role in the 1967 and 1973 wars? Would this role have expanded if the wars had lasted longer?

A. The Saudis did not participate in the 1967 war, nor have they played a significant role in any Arab-Israeli war. During the 1973 war, a Saudi army brigade was stationed in Syria in a reserve position; this unit was engaged in one minor contact with Israeli forces. Also during the October 1973 war, the Saudis sent eight Agusta-Bell helicopters to operate in rearward areas of Egypt on logistic support missions. These helicopters, flown exclusively by Saudi pilots, were sold by the Italian company to the Saudi Air Force.

It is doubtful the Saudi role would have expanded if the wars had lasted longer. The Arab confrontation states do not look to Saudi Arabia for military assistance, but to Saudi financial and diplomatic support.

19. Q. Saudi Arabian Defense Minister Sultan has been quoted (Events, December 3, 1976) as saying that the Saudis have never accepted, and would never accept, arms sales conditions which would prevent them from re-transferring the arms which they receive to a third nation. Presumably this is not an accurate reflection of the Saudis attitude as expressed to the United States. How, then, can this statement be explained?

20. Q. King Khalid has been quoted as telling the New York Times in May, 1976, "When we build up our military strength, we have no aims against anybody except those who took by force our land and our shrines in Jerusalem." Is this an accurate—in context—quote?

21. Q. If statements like the two referred to above are made solely for home consumption, as it has sometimes been said, why was the Khalid statement made to the New York Times? Won't Saudi leaders be under considerable pressure to join in any future war effort against Israel? Is it true that Saudi Arabia experienced riots in 1967 and 1973 due to the lack of greater SA participation in the wars?

A. Each Letter of Offer accepted (DD Form 1513) contains several conditions of sale including the condition that the articles and services to be provided cannot be retransferred to a Third Country without the prior approval of the USG. In all of our conversations with the Saudis—and we have talked to the highest levels—they have indicated that they will abide by the provisions under which the United States supplies military equipment. At the same time they have assured us they have no aggressive intentions against any state in the region. The defensive nature of Saudi Arabia's armed forces modernization program and Saudi assurances they will not train the pilots of other Arab countries on the F–15 or transfer the aircraft were stressed by Vice Minister of Defense Prince Turki in his talks with Under Secretary Benson during her visit to Saudi Arabia this year. I understand similar assurances have been given by the Saudis to recent Congressional delegations visiting Saudi Arabia.

There were no riots in Saudi Arabia in 1967 and 1973 due to lack of greater Saudi participation in the wars. There was rioting in 1967 when groups attacked U.S.-related facilities to protest U.S. support for Israel.

22. Q. Have the Saudis been training Egyptian pilots on their F–5Es despite State Department protests? What could be the purpose of such training?

A. In late 1975 six Egyptian pilots received orientation training in the Saudi F–5s while nine Egyptian maintenance officers attended an English language course in Saudi Arabia. This training was terminated after two months, at our request. A second group—nine technicians—arrived in Saudi Arabia for training in May 1976. At our request that training program was never started and the nine Egyptians left for home. Subsequently, no further training of Arab Confrontation State personnel has been performed.

23. Q. Even if the F–15 is never intended for use against Israel, would not its presence free a greater number of Saudi F–5s for this purpose?

A. The F–15s will fill the air defense mission now performed by the British-made Lightnings after those planes are phased out of the Saudi Air Force. Provision of the F–15 represents a modernizing of an existing capability that already has been integrated into the Saudi air defense structure. Thus, the sale of F–15s to Saudi Arabia will not free F–5s for other missions.

We believe it is extremely unlikely that F–5s would be used in an attack on Israel. Their limited range and vulnerability in the dense Israeli air defense environment make the F–5 unsuitable for attack missions against targets in Israel.

24. Q. Maj. Gen. Keegan, former AF Intelligence, reportedly told the Senate Foreign Relations Committee that the F–15 sale would be: "A situation tailor-made for early compromise of American technology to the Soviets." Given the level of cooperation which exists between the Saudi, Egyptian and Syrian Air Forces, isn't this a serious risk?

A. There is no cooperation between the Saudi and Syrian Air Forces.

There has been orientation training for Egyptian pilots in Saudi Arabia in the past, but the number of pilots involved has been minimal. These activities have occurred only twice (1975 and prior to the 1973 war) and no pilots were ever actually qualified on the F–5 aircraft.

Security measures in Saudi Arabia are excellent and compromise of classified data to the Soviet Union, directly or indirectly, is highly unlikely considering the strong anti-communist attitudes of the Saudi Arabian people. The RSAF is extremely conscientious about military security, particularly physical security involving flight line or maintenance facilities. Although there are third-country nationals in Saudi Arabia, their access to U.S. classified information is not authorized. Airfields and other secured areas in Saudi Arabia have very tight entry and exit controls. Further, Saudi Arabia has no diplomatic relations with any communist country and Saudi controls over entry by foreigners is very strict.

25. Q. What real contributions have the Saudis made to the current attempt to negotiate peace? How much influence do they have with Syria and Jordan?

A. Saudi Arabia's contribution is based foremost on its firm commitment to a negotiated settlement of the Arab-Israeli conflict The Saudis strongly oppose the outbreak of another war which they believe would put intolerable strains on their highly valued relationship with the U.S., and bring about a return of radical and Soviet influence to the Middle East. Within this framework the Saudis have been active in seeking an end to the civil strife in Lebanon, have maintained financial support for Arab moderates and have supported Arab participation in a Geneva Conference.

Saudi Arabia has considerable influence with both Syria and Jordan, but, quite naturally, both of these countries insist on freedom of decision in questions involving their fundamental national interests, as does Egypt.

26. Q. How many weapons—and what type—has Egypt received from sources other than the U.S. since the 1973 war? Did they receive weapons from the USSR as late as 1977? If so, were these restricted to follow-on deliveries of previously signed contracts, or were some under newly assigned agreements?

A. Classified secret.

27. Q. Are France and Egypt proceeding with plans to establish an F–1 plant in Egypt? How does the F–1 compare with US fighter planes?

A. The French and Egyptian Governments have recently denied any plans to sell or coproduce the F–1 in Egypt.

The F–1 was designed essentially to compete against the F–16 for the NATO market; it is comparable, therefore, to the F–16. See also Question 3.

28. Q. Britain, reportedly, has previously refused to sell Jaguars to Egypt on the grounds that this would upset the military balance in the Middle East. Is this true?

A. We are not informed about the content of any discussions which may have taken place earlier on this matter between HMG and the Egyptian Government. In early November 1975, the British press speculated that the British Government was on the verge of approving the sale of Jaguars to Egypt. However, there was no subsequent confirmation of such a decision, and, to the best of our knowledge, the Egyptians have not expressed an interest in over two years relative to the purchase of Jaguar aircraft.

29. Q. Many of our arms sales, particularly to Saudi Arabia and to Iran, have been justified on the grounds of the potential threat to our allies which is posed by the nation of Iraq. At least one recent press report has indicated that Iraq's policies may be becoming more moderate:

"The traditional rivalries of the oil rich Persian Gulf may be easing significantly, diplomats in the region believe, with new efforts at détente in the strategic region. The key element has been a six-month push by Iraq . . . Iraq has promised to end all support of leftist groups opposing the other regimes, according to diplomatic sources, and has pledged to work for better relations and overcome residual hostility and suspicion. Baghdad is moving quickly toward resolution of its 16 year border dispute with Kuwait, and both have withdrawn troops from the area." (Baltimore Sun, 9/7/77.)

(a) Is Iraq moderating its policies? If so, what effect should, or will, this have on requests for U.S. arms by other Persian Gulf countries?

(a) Since the 1958 revolution, the Iraqi posture towards its Arab neighbors in the Gulf region has been cyclical. Threats, intimidation, subversion, and propaganda have been followed by efforts at détente; and then the pattern has repeated itself. The U.S. hopes that Iraqi policy toward the region will develop along more positive cooperative lines, but Iraq's Gulf neighbors, while sharing this hope, remain suspicious and skeptical. The ideologues in Iraq's Baath Party believe that revolution and Baathi-type socialism must be exported, but are willing to pursue a waiting game.

We believe that Iran as well as the Arab states in the Gulf region will remain apprehensive about Iraq's long-term intentions,

as well as about its already significant and growing military strength, and will seek to bolster their defenses accordingly.

(b) What efforts are underway to improve U.S.-Iraqi relations?

(b) The Administration has made quiet efforts to improve U.S.-Iraqi relations, in hopes that we could develop a dialogue at a policy-making level on issues which divide us, which include Iraq's rejectionist stance towards Middle East peace negotiations and its support for certain terrorist groups. Under Secretary Habib visited Iraq in 1977 with this objective in mind. While many important Iraqis want improved relations with the U.S., and seek wider access to American goods and services, Iraqi leadership has been reluctant to make any major steps in this direction.

On the commercial front, however, Iraq began purchasing from Western suppliers in 1972. Iraq-U.S. trade has grown from $26 million in 1972 to $210 million in 1977. Iraq also sends students to the United States for graduate level education. We view these commercial and cultural contacts as possibly leading to a broader dialogue on bilateral issues. Even should U.S.-Iraqi relations improve substantially, we see little or no change in the attitudes of the neighboring states toward the Baathist regime or in their interests in acquiring a modern defensive capability.

30. Q. On the military side, just how great a threat does Iraq post to Saudi Arabia?

(a) Are not the Saudi 5-Es plus their HAWK batteries sufficient to defend against an air attack, and isn't an armored attack from across the desert very unlikely to succeed?

A. (a) Iraq already has substantially more high performance aircraft than Saudi Arabia; its strength in armor, land transport, and manpower far exceeds that of Saudi Arabia. Iraq's offensive capacity is growing at a rate that may make it the best armed Arab military force in the region within a decade. Against this potential threat, Saudi Arabia has to defend widely dispersed population centers and its oil fields. The Saudis' F-5s and HAWKs need to be supplemented by higher-performance aircraft; by 1982 Saudi Arabia will have phased out its aging Lightnings. With the F-15s, Saudi Arabia will have significant defensive capabilities against air attack, but Saudi Arabia in the 1980s could not hold out for a lengthy period alone against a determined Iraqi military effort, whether by armored attack or by other operations.

(b) Doesn't Iraq have overwhelming reasons to fear a counterattack? They would be very vulnerable to such an attack either from SA or from Iran, or both. Don't they have the same overwhelming objective of maintaining freedom of navigation through the Persian Gulf which is central to the strategies of SA and Iran?

(b) In the event Iraq planned an attack against Saudi Arabia, it would have to take into account the possible reactions of Iran and Syria, as well as its increased vulnerability to Israel. By 1983 Iraq should have a sufficient number of modern combat aircraft to maintain an effective defense of its home territory against either Iran or Syria while mounting a strike against Saudi Arabia. In addition, Iraq's oil fields and facilities are more widely dispersed and more heavily defended than comparable installations in Saudi Arabia and Iran.

Iraq supports freedom of navigation in the Persian Gulf through which the bulk of its oil exports now pass. Iraq could, however, continue to export substantial quantities through its pipeline to a Turkish port as well as an ever greater quantity through Syria by pipeline to the Mediterranean (if the Syrians agreed to reopen that pipeline). Although Iraq has superior naval units compared to Saudi Arabia, the Iraqi Navy is clearly outclassed by Iran's and there is little likelihood that Iraq would attempt to use force to close the Persian Gulf to shipping.

31. Q. How would these sales, and components of these sales, be spread during the next few fiscal years?

A. Our plan is to have Letters of Offer valued at about $2.2 billion signed in FY-1978 and 1.3 in FY-1979. The remaining Letters of Offer will be signed in later fiscal years.

32. Q. How close will these sales take us to the ceiling for fiscal 1978?

A. The ceiling for FY-1978 is $8.6 billion. Under our ceiling management plan, we estimated a discretionary balance of approximately $3.3 billion. (This estimate assumes that all AWACS LOAs wil be signed in FY-1978 and sets aside ceiling dollars for significant sales previously approved by Congress but not signed by October 1, 1977, for cases involving major follow-on support and for small miscellaneous cases.) We estimate that about $2.2 billion in LOAs will be signed for the Middle East aircraft package. This leaves a little over $1 billion for other Foreign Military Sales.

33. Q. What other major sales, if any, are expected to be proposed during the remainder of this fiscal year?

A. We will be submitting to Congress pursuant to Section 36(b) of the Arms Export Control Act other Letters of Offer for the sale of defense articles or services valued at $25 million or more or for major defense equipment valued at $7 million or more. We do not anticipate that any of these sales will be major in scope.

34. Q. Will the size of these sales, coupled with the President's determination to stay within the sales ceiling, result in the elimination from consideration, or at least a substantial delay, in the proposal of other major sales? Particularly, the likelihood of additional advanced aircraft sales to Iran?

A. As indicated in Question 33, we do not anticipate any major aircraft sales to Iran this year.

35. Q. Is the President committed to the continuation of an annual reduction in arms sales to nonexempt nations, at least during the remainder of his first term?

A. In his statement of February 1, the President announced that the ceiling for FY 1978 would be $8.6 billion. As to the future, he said, "I intend to make further reductions in the next fiscal year. The extent of next year's reduction will depend upon the world political situation and upon the degree of cooperation and understanding of other nations."

36. Q. The United States turned down Israel's request to coproduce the F-16. This decision was made in accordance with the President's arms sales policy. Why was this decision made, and what has been the response of Israel? Have any other nations commented on this decision?

A. Decisions have not been taken on possible Israeli coproduction of the F-16, and Israel's request remains under consideration. We remain prepared to discuss with Israel all aspects of our arms relationship including the coproduction issue, as and when Israel wishes to proceed.

37. Q. Is the F-15 sale to the Saudis likely to result in any requests by the Saudis to transfer some of their less sophisticated planes to other nations?

A. The F-15s are intended in part to replace the U.K. origin Lightnings, currently in the Saudi inventory. The Lightnings are rapidly nearing the end of their structural life and will no longer be safe to fly. We therefore do not believe these aircraft will be transferred.

Saudi Arabia has requested our approval of the possible transfer of four of their older F-5B aircraft to the Yemen Arab Republic to begin the process of training the Yemenis in Western equipment. That possible transfer is unrelated to the proposed F-15 sale—Congress was notified of this possible transfer on September 20, 1977. The Saudis plan to retain the remainder of their F-5s for ground support and therefore they will not be transferred.

38. Q. A recent study of the Senate Energy and Natural Resources Committee states that the rapid increase in Saudi military expenditures can be traced to, among other factors, the greater arms buildup in Iran. The study also states that the Saudis consider the Iranians to be heretics, while hinting, in addition, that Iran may eventually be tempted by the vast oil reserves of Saudi Arabia once their own petroleum supplies begin to run out. Do the Saudis consider Iran to be an actual or potential threat to their national security?

A. Over the last decade following the British withdrawal from the Persian Gulf, the Saudis and Iranians have come to perceive a basic common interest in the region's security. They share a common recognition of the danger of radical forces to the Persian Gulf. Each regime has a deep concern for the long term political stability of the other and neither harbors territorial ambitions against the other. The Saudis need to be able to play an effective, credible role in cooperating with Iran to defend the Gulf.

39. Q. The Army Corps of Engineers supervises the massive military construction program now on-going in Saudi Arabia. To what extent, and in what way, does the U.S. seek to soothe Saudi sensibilities with respect to the use of Jews in supervising this program? Are Jewish members of the Corps participating? Is there any discrimination with respect to the selection of contractors and subcontractors?

A. The US Army Corps of Engineers' personnel practices are in strict compliance with USG policy that individuals should be considered and selected for overseas assignment on the basis of merit without reference to race, color, religion, national origin, sex, or age. No attempt has been made to exclude Corps personnel of the Jewish faith from assignments in Saudi Arabia, and Jewish staff members have travelled to Saudi Arabia in connection with their responsibilities. We have no record of complaints of discrimination with respect to the selection of contractors or subcontractors or their personnel.

40. Q. Do either the Saudi Arabians or the Egyptians fear an offensive military strike by the Israelis?

A. There is undoubtedly concern in some quarters in Saudi Arabia and Egypt about possible offensive action by Israel. See also question 15.

THE ALCOHOL FUEL ENCOURAGEMENT ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. HAMILTON) is recognized for 60 minutes.

● Mr. HAMILTON. Mr. Speaker, as strange as it may seem to those of us who face the issue daily, there is still no consensus of opinion in the Nation on the dimensions of the energy crisis. Millions of Americans continue to act as if the energy crisis were a figment of someone's imagination. In my congressional correspondence I see a strong undercurrent of belief that Government and business have conspired to hoodwink the public with deceptive claims about energy demand and energy reserves. Perhaps such an attitude is understandable. The current abundance of petroleum and

the ready availability of natural gas this past winter have dimmed memories of long lines at the service station, cold homes, and closed factories. As long as automobiles are fueled, homes are heated, and the wheels of commerce turn, upleasant facts about the future may seem too remote to be of interest. How can we communicate to a skeptical public the possibility that conditions of critical energy shortage could appear, throwing the recovery off-track and precipitating an economic decline the proportions of which would have their only precedent in the Great Depression?

WHAT IS THE ENERGY CRISIS?

I will be the first to admit that the energy crisis is difficult to talk about. The pundits are confused and, as a consequence, the policymakers may be confused too. On the one hand, some experts say that supplies of fossil fuels, especially oil and natural gas, are dwindling and may be exhausted by the end of the century. They advocate research and development of alternative sources of energy which can eventually be used to take up the slack. On the other hand, many economists believe that the primary problem is not one of supply but of price—the cost of getting oil and natural gas out of the ground and into the market. They argue for continued reliance on traditional sources of energy, with increased incentives for the oil and natural gas industries to supply customers at competitive prices. Since these positions are usually presented in opposition to one another, those of us who would respond to the energy crisis find ourselves in a dilemma: Do we increase production of familiar forms of energy, or do we allocate short supplies as we switch to other sources? It is unfortunate that this either-or proposition has become the focus of the energy debate in Washington. The skepticism of the American public was eloquently expressed by one of my constituents:

If you can't tell me what the energy problem is, then don't tell me that there's problem!

As is the case with many other issues of public policy, the most reasonable view of the energy crisis probably lies somewhere between the two extremes. I do not believe that the production versus allocation dilemma is genuine because I 'am not convinced that the opposing views are mutually exclusive. To begin, there are large quantities of oil and natural gas left in the world. I am aware of predictions that the recoverable reserves of these fuels may run dry in as few as 10 years, but under other more generally accepted projections we should have adequate supplies well into the first half of the next century. Increased production could bring the supplies on line and maximum conservation efforts could extend "fossil fuel deadline" a number of years. Nonetheless, simple commonsense tells us that new production of oil and natural gas cannot go on indefinitely. There are limited quantities of these fuels on our planet and once they are used they cannot be replaced. To maintain consumption at present rates, we would have to find a new Texas or a new Alaska every 6 months. This simply could not happen. Furthermore, soaring prices, spot shortages, and outright panic will take hold sometime before the last reserves are gone. A transition to reliance on alternative sources is the only workable answer and the sooner we undertake the transition the easier it will be. Instead of prolonging a sterile debate of production versus allocation, those of us with the responsibility to make policy should be asking which alternative sources of energy hold the most promise for the future.

ALTERNATIVE SOURCES OF ENERGY

On which alternative sources should we pin our hopes? The question is not an easy one to answer because the risks of being mistaken are great. The most prudent policy would be one which moves us ahead on a number of fronts simultaneously. Of course, we should continue our efforts to achieve the full potential of our coal, nuclear, solar, hydroelectric, and geothermal resources. But we should not take a passive stance by assuming that efforts in these areas alone are sufficient. Greater dependence on coal is not possible until labor-management relations in the industry are improved and problems of pollution are met. Nuclear power carries with it the dangers of production mishaps and the proliferation of strategic material. Advances in exploitation of the Sun's energy remained blocked by technological obstacles and practical limitations on use. Hydroelectric and geothermal power are available only in certain regions of the country. It is clear that sources of energy other than these must be researched and developed.

What factors must be taken into account in the choice of exotic sources of energy?

I am no expert in these matters, but I believe that any source which satisfies several of the following eight conditions is a likely candidate:

First. Does the technology exist to produce the source on a large scale?

Second. Is such production economically feasible?

Third. Is the source versatile, that is, can it be used in a wide variety of circumstances?

Fourth. Can the source be used where other alternative sources cannot?

Fifth. Is use of the source free from serious hazards?

Sixth. Can the source be used without substantial changes in existing energy-consuming devices?

Seventh. Is the source renewable?

Eighth. Does use of the source help to solve problems in other areas of public policy?

Surprisingly enough, there may be one alternative source of energy that satisfies all these conditions. That source is alcohol.

ALCOHOL AS A FUEL

When we consider alcohol as a fuel we are really considering two different substances: methanol or wood alcohol, and ethanol or grain alcohol. The common names of these substances indicate the materials from which they are derived. Wood alcohol comes from wood, pulp, and wood wastes, but it can also be generated from coal and urban wastes. Grain alcohol comes from cereal grains, corn, molasses, and other vegetable matter with high starch and sugar content, but it can also be generated from oil and natural gas. Alcohol is produced in the United States by two major processes—fermentation and chemical synthesis. Of our total alcohol output of 700 million gallons per year, 400 million gallons are fermented and the remainder is synthesized from fossil fuels. Synthesis has partly replaced fermentation in the production of alcohol because of the comparatively low price of the fossil fuels. Synthesized alcohol is used in various industrial and chemical processes. All beverage alcohol, however, is fermented.

In recent discussions of alcohol as a fuel the term "gasohol" is often heard. By this term different things are meant. Most people use it to refer to a mixture of 10 percent ethanol and 90 percent gasoline recently developed and marketed as an automotive fuel under the auspices of the State of Nebraska. Others use it to denote any mixture of alcohol and gasoline. Still others take it to mean pure alcohol with no gasoline at all. Not withstanding the semantic dispute, the idea of gasohol is clear enough. Alcohol has potential as a liquid fuel, whether mixed with a petroleum product or in pure form, to power anything from an automobile to an electric utility. Gasohol, whatever it is said to be, may well be one of the fuels of the future.

USE OF ALCOHOL FUELS: PAST AND PRESENT

Unlike some of the more exotic sources of energy, gasohol has been tried successfully many times in the past, particularly as an automotive fuel. The use of alcohol and gasoline together in Europe goes back more than 60 years, when a fuel of 15 percent alcohol and 85 percent gasoline powered all kinds of motor vehicles. It was still in use some time after the First World War, replacing scarce petroleum products and diminishing the need for expensive imports. The most extensive use in Europe took place in Germany during the final stages of the Second World War. The failing Wehrmacht relied heavily on methanol distilled from wood, and on ethanol fermented from starchy agricultural commodities such as potatoes, to keep its war vehicles rolling in the face of declining stocks of oil. There are even more international examples to add to the list. In addition to Germany, more than a dozen other nations have used alcohol fuels in significant quantities. These include Austria, Czechoslovakia, Finland, France, Ireland, Poland, Spain, Sweden, and Yugoslavia in Europe, China and the Philippines in Asia, Brazil and Cuba in South America, and Egypt in Africa. Thus, it is no exaggeration to say that alcohol fuels have found application the world over.

Our parents and grandparents know that gasohol is no stranger to these shores. In the 1930's, service stations in Illinois, Kansas, Missouri, and Nebraska sold an alcohol-gaoline mixture known as Agrol. The blend seemed to work well in engines, but its producers were unable to survive price competition with oil firms that sold pure gasoline. In 1934 Hiram-Walker marketed a motor fuel called Alcolene, a mixture of alcohol and

gasoline, but this product also proved to be too expensive to compete with cheap gasoline. At about the same time, Chrysler Motors modified some cars to burn alcohol fuels and shipped them to a then oil-starved New Zealand. Another automotive manufacturer, International Harvester, used to boast that its vehicles built for export to the Philippines were "powered with engines especially designed to burn alcohol." Of course, alcohol has been employed pure and in various mixes for many decades in high-performance racing engines. Skeptics and detractors will play down these facts, but there is one fact—known to virtually all of us—that is too striking to ignore: some of Henry Ford's first horseless carriages ran on alcohol. But for a few hidden turns of history, we might now be discussing the feasibility of refined petroleum as a fuel.

Critics of gasohol must concede that the fuel has been tried, but they may not be swayed by the fact. In times of war or other national emergency, they will say, it is not unusual for a country to formulate and implement an energy policy that otherwise would not be called for. With some justification they may ask for examples of a modern nonexperimental application of gasohol. Examples are readily available since three nations—Brazil, Sweden, and West Germany—have recently moved themselves toward an alcohol-based economy. Consider the case of Brazil.

Although this South American giant has not been blessed with ample petroleum reserves, it happens to be the world's leading producer of sugar cane. Years ago, in an effort to prop up the sagging sugar cane industry, the Brazilian Government agreed to purchase the alcohol byproduct of sugar cane refining (ethanol) and blend it into all gasoline sold in Brazil. As the result of what was essentially an agricultural support program, Brazilian cars and trucks began to run on fuel with an alcohol content of 2 percent to 10 percent. However, by 1975 the Brazilian Government has seen the potential benefits of the program. By using special financing and by expanding the program to include the native manioc crop, it launched a concerted drive to convert Brazil to an alcohol-based economy. This year, a government budget of $500 million will raise the alcohol content of Brazilian gasoline to 20 percent, reducing total oil imports by 10 percent and saving about $400 million in foreign exchange. By the early 1980's, Brazil may produce nearly 1 billion gallons of alcohol, enough to supply about 20 percent of the nation's gasoline needs. Some projections put this supply figure at 75 percent—energy independence, in effect—by the end of the century. To achieve this goal even more rapidly, the Brazilian Government is considering the use of pure alcohol in passenger cars and a mix of 50 percent alcohol and 50 percent diesel fuel in trucks and buses. In addition, there is speculation that electric power plants in Brazil may be modified to burn alcohol. Beneficial side effects could have been anticipated and should not be overlooked in an assessment of the program. The cash value of Brazil's alcohol exports rose from $7 million in 1970 to $17 million in 1975. Alcohol technology is also exportable, especially to lands rich in agricultural produce. According to Brazilian officials, the new industry may create up to 1 million new jobs in agriculture as previously unfarmed regions are brought into the production scheme. Finally, Brazil stands to gain much in international prestige and strength: It may be the first "oil pauper" to free itself from the grip of the petroleum cartel.

STATE AND LOCAL INITIATIVES

Although the implications of the Brazilian venture have not been fully appreciated in the United States, the beginnings of interest have taken root here, particularly at the State level. As I noted before, Nebraska has developed and marketed an ethanol-gasoline mixture which it continues to use and test in State-owned vehicles. The State of Maine has looked into the matter of tapping its vast forest reserves for methanol. California has conceived an ambitious plan involving the construction of synfuel plants to produce methanol and the cultivation of energy crops in arid regions of the State to provide the raw materials.

It is well known that the State of Indiana has been in the forefront of research and development in alcohol fuels. A recent study funded by the Indiana General Assembly concluded that the production of ethanol from corn could be undertaken in the State. The study envisioned a plant that would convert over 7 million bushels of corn into 20 million gallons of ethanol every year. According to the study, the cost of the plant could be recovered in 5 years and its operation would be highly profitable. In a related development, scientists at Purdue University have discovered a new process by which alcohol can be generated from cellulose, a basic ingredient of plant life. Although cellulose-to-alcohol conversion has been understood for a long time, the Purdue process is much more efficient: it provides a 100 percent return, with each ton of cellulose yielding a ton of fermentable sugar from which alcohol can be derived. While the new process is still in the test tube stage, there can be no doubt that it and similar advances are carrying us a further step toward commercial, nationwide use of alcohol fuels. All Americans have a critical stake in these state and local efforts.

BENEFITS OF ALCOHOL FUELS

As I surveyed the growing literature on gasohol and other alcohol fuels, I was impressed with the great number of potential benefits that the widespread use of these substances would have. Aside from the obvious benefits in energy and agriculture, many governments, universities, private corporations and special interest groups point to exciting side effects that would not be apparent to the layman. Let me discuss very briefly some of the most important benefits and side effects.

IN ENERGY

While it would be misleading to represent alcohol as the cure for all our energy ills, only the shortsighted will discount the significant contribution it could make. Because the raw materials from which alcohol is derived are renewable, we would not have to worry about depletion of this energy source. Unlike oil and natural gas, alcohol could be produced by us virtually at will and on demand. Also, because alcohol would be produced here in the United States using domestic raw materials, then to the extent that we converted to it we could worry less about unreliable foreign sources of energy. There is near unanimous agreement that the importation of half our oil, a good share of it from the volatile Middle East, is exposing us to unacceptable international pressures and risks. In addition, the use of domestic alcohol as a fuel would reduce the massive outflow of dollars to the oil-producing states, an outflow which will very likely cause a record trade deficit this year. If we kept these dollars at home, then our trade account could be balanced, American jobs could be preserved and a measure of stability could be brought to the imperiled international monetary system. Finally, even a minimal reliance on alcohol would free up increasingly scarce supplies of domestic petroleum to be used in the manufacture of fertilizers, plastics, pharmaceuticals, and scores of other products.

IN AGRICULTURE

Besides its beneficial consequences in the area of energy, the use of alcohol as a fuel would cut to the heart of another of our most pressing national problems: The depressed state of American agriculture. We are all too well acquainted with the essential features of this problem. In the early years of this decade a huge foreign demand for our agricultural commodities kept prices up. Farmers grew what they wanted and the prices they received spiralled upward. Those who had no experience of the boom-bust character of farming planned for perpetual prosperity, but bumper crops abroad soon burst the bubble. Prices dropped sharply as surpluses piled up. As had happened so many times in the past, boom gave away to bust. I believe that a shift toward alcohol fuels would have a very positive impact on American agriculture. Consider just a few of the ways it might help to smooth out the boom-bust cycle.

To begin, experts have noted that producers of alcohol fuels have the potential to be the largest new market of farm produce. The existence of such a market could cut down current surpluses and virtually eliminate them in the future. For example, 80 million acres of land yielded 2 billion bushels of wheat last year, but farmers still had a bin-busting 1.1 billion bushel stockpile of the previous year's wheat on hand. If there had been fermentation plants to process the excess wheat, surpluses would have disappeared in the production of more than 4 billion gallons of alcohol, enough to replace slightly less than 4 percent of all the gasoline consumed in private automobiles during the year. Furthermore, the government would not have been obliged to pay the wheat farmers for what they did not sell. Besides the opportunity for greater sales, the new market would provide a stability in sales that

most farmers have not enjoyed to date. The farmer would always have someplace to go with the produce he could not sell as food.

Second, there is the matter of the set-aside under which a farmer is required to let a percentage of his productive land lie fallow in order to qualify for price supports. Farmers have always opposed the set-aside as an inefficient, illogical method of agricultural price control. With the producers of alcohol fuels as customers, however, quota systems such as the set-aside could not be justified. Farmers could bring fallow land into production and then sell the crop to fermentation plants. In addition, they would have an incentive to grow nonconsumable crops on land not fit for the production of food.

Finally, we should be aware that fermentation plants can use agricultural refuse such as corn stalks, distressed grains, and other spoiled, damaged, or inferior crops to make alcohol. At the present time this refuse has little value to the farmer, except in instances where it can be used as a soil supplement, et cetera. However, there are better uses for it. It is estimated that there is enough bad grain in Nebraska alone to make 20 million gallons of alcohol every year. There are also millions of pounds of unsold tobacco in storage—the less desirable bottom leaf—which could be disposed of in the same way.

IN POLLUTION CONTROL

The use of alcohol fuels would be very helpful to us in energy and agriculture, but its benefits are not confined to these areas alone. Environmentalists are excited about alcohol fuels, as well they might be. Since alcohol can be generated from the millions of tons of urban waste that are now being used for landfill or are being discharged into our rivers and seas, we have a ready solution to the many problems of urban waste disposal. Unsightly dumps, polluted coastal waters, and the financial burden of sewage treatment could become things of the past. In any case, the production of alcohol from urban waste may be the only long-range answer for communities where land is scarce and taxpayers are unable to fund adequate sewage treatment facilities. The recent Federal prohibition on ocean disposal of urban waste makes such production look even more attractive. We should also keep in mind that alcohol can be generated from the waste of the timber industry. Because about 35 percent of the timber used in paper and lumber production goes completely to waste, the potential for environmental savings here is enormous. Furthermore, the underbrush and dead timber that now retard our reforestation efforts could be harvested and put to a good use.

IN OTHER AREAS

Many other benefits would flow from the use of alcohol fuels. For example, there would be a huge increase in the availability of distiller's grains, an important byproduct of the conversion of cereal grains to alcohol. Experts sav that there would be over 6 pounds of distiller's grains for each gallon of alcohol produced. Distiller's grains are important because they have a protein content of 20 percent to 30 percent, depending on the type of cereal grain used and the method of processing. They are used principally in animal and poultry feed mixes. but they could be made fit for immediate human consumption. Valuable protein would be brought into the food cycle, and with the additional quantities of distiller's grains on the market it might cost a farmer less to feed his animals.

No discussion of the benefits of alcohol fuels should omit mention of the positive properties of the alcohol-gasoline mixtures themselves. Alcohol—especially ethanol—blends well in gasoline without any special energy-intensive process. Reported problems with separation, corrosion, and cold starts seem to be minor. Gasohol containing 20 percent or less alcohol works well in the typical, unmodified gasoline engine. In fact, because alcohol is a cool-burning fuel there is less engine wear if gasohol is used. Some experts have also cited increased fuel efficiency with gasohol. Researchers in the Nebraska experiment claim that test cars fueled with gasohol containing 10 percent alcohol averaged 5 percent better mileage than test cars powered by gasoline. Scientists at General Motors agree that cars at least 5 years old get better mileage on gasohol. Finally, there is the matter of exhaust emissions. Although knowledgeable sources are divided on just how clean burning gasohol is, it is generally conceded that its use would lower concentrations of one noxious pollutant—carbon monoxide—in a significant way. Of course, pure alcohol is known to be a very clean fuel.

One last benefit of alcohol fuels should be brought up. Alcohol fuels would spawn industry right in the very States where the raw materials were produced. Farming States would become centers of ethanol manufacture. Timber States would become centers of methanol manufacture. The economic development of rural America would surely be enhanced. In addition, the production of alcohol by fermentation is very much a backyard technology as Federal law enforcement officials are well aware. Thus, any small municipality, company or farm cooperative could profit by generating alcohol from locally available raw materials. I am pleased to see that some Government agencies have already realized this. The Office of Minority Business Enterprise recently awarded a grant of more than $86,000 to a small cooperative of black farmers in Alabama for the production of alcohol from farm vegetation. To my way of thinking, other Government agencies should follow suit.

PROBLEMS WITH ALCOHOL FUELS

Since we have some appreciation of the benefits of alcohol fuels, it remains for us to assess the problems. Why are we no nearer to the widespread use of alcohol fuels than we were 50 years ago? Why has the Government provided so little stimulus and so little direction to the development of alcohol fuels? Why did the National Energy Act—the most significant energy bill ever debated in Congress—contain only one sentence on alcohol fuels in its hundreds of pages? Obviously, there are some problems. We cannot call ourselves true proponents of alcohol fuels unless we face the problems squarely and begin to formulate solutions to them.

IN PUBLIC ATTITUDES

One problem is a simple failure to realize how important alternative sources have become. We are an innately conservative people who will usually try to do things as we have in the past. We tend to prefer the established, proven course to radical, uncertain change. However, this is not to say that we cannot rise to the occasion when the circumstances demand it. Whether the issue is a global conflict or a race to the Moon, we more than any other people have shown ourselves to be equal to the task. It may be helpful in this connection to consider the creation of the domestic synthetic rubber industry. During World War II our entire supply of natural rubber were cut off. Some of our foreign sources were overrun and others could not deliver across seas infested by submarines. President Roosevelt responded to the emergency with a crash program to make us self-sufficient in rubber. In the face of balance sheets and engineering problems that would have frightened away even the boldest investor, factories were built, support facilities were provided and huge quantities of synthetic rubber were turned out. Although it was a losing proposition at first, a few years later synthetic rubber was forcing natural rubber out of the market. We could bring about this sort of change again—this time for alcohol fuels. What is missing is the sense of urgency. We must create that sense of urgency with a rational argument from the facts. Doomsaying and scare tactics will get us nowhere.

IN ECONOMICS

A second problem seems just as serious. Many experts claim that, under present conditions, it costs more to produce a gallon of alcohol than a gallon of gasoline. If this is an accurate claim, then alcohol will be at a competitive disadvantage as a fuel even in a mixture with gasoline. Just how great a problem is cost? The answer would seem to depend on a variety of factors, not the least of which are the sources of the cost estimates and the type of alcohol produced. Different sources vary widely in their approximations, and the figures seem to be less certain for methanol than for ethanol. Consider methanol first.

By far and away the most attractive thing about methanol is the low price of the raw materials from which it can be derived. With timber residues running at $20 per ton and yielding 1 gallon of methanol for every 7 pounds, the raw material component of the cost would be very small indeed. It might be even smaller if urban waste were the raw material. However, this is not the only component that must be taken into account. Distillation and transportation costs, just to name two, would have to be added into the equation, and according to a study of alcohol fuels issued this January by the Library of Congress there

are really no solid estimates of what the final cost would be. The 1975 estimate of 14 cents per gallon made by Maine researchers is encouraging since it would make wood-derived methanol very competitive with gasoline (assuring an average production cost of about 36 cents per gallon of gasoline) even in terms of energy equivalence (a volume of methanol delivers about half the energy of the same volume of gasoline), but this estimate is based on conditions of mass production that might not exist for years. Under another estimate of 38 cents per gallon methanol is marginally competitive with higher grades of gasoline, at least in terms of volume equivalence, but the methanol so produced would come from coal. While the conversion of coal to methanol is something we should pursue, we must recognize that it does not have as many benefits as the derivation of methanol from other raw materials. The Library of Congress hazards the guess that the cost of methanol from wood and urban waste would possibly be about the same as the cost of methanol from coal, or perhaps a little more. This is to say that a mixture of such methanol with gasoline could just barely compete with pure gasoline in the market place.

Can the same be said for ethanol? Estimates of the production costs of ethanol are more certain, but unfortunately they do not seem to be as good. This is principally because of the higher price of the raw materials from which ethanol can be derived. Take corn, for example. Using a corn price of $2 per bushel, the best estimate is that ethanol fermented from corn would cost about $1.15 per gallon exclusive of transportation and other costs, enough to make it competitive with $1.20-per-gallon industrial alcohol produced by chemical synthesis but far too much to make it competitive with pure gasoline. Other grains and crops fare better or worse depending on their per bushel price, but none of them can really give an ethanol-gasoline mixture the competitive edge. How large is the gap? There are too many variables for a hard and fast answer, but we can approximate. If we suppose that gasoline costs 65 cents per gallon at the pump, then a mixture of 10 percent ethanol fermented from corn and 90 percent gasoline would cost 70 cents at the pump, about 8 percent more. For ethanol from corn to be competitive under this set of assumptions, the price of corn would have to fall to 75 cents per bushel, too low even to be considered.

Do these layman's cost analyses imply that methanol would limp along in the market without really catching on? Or that ethanol would be infeasible unless it were used industrially or were generated solely from agricultural waste? Given the analyses pessimists will throw up their hands and consign alcohol fuels to the scrapheap of ideas that could not possibly work out. How can we even begin to use gasohol, they will ask, if there is going to be an uncompetitive price difference at the pump? The typical consumer may want to help solve our energy, agricultural and environmental problems, but when faced with paying for fuel out of his own pocket he will always choose the cheaper fuel. This may be true, but we would not base our decision to undertake an alcohol fuels program on sketchy analyses of production costs. Other factors weigh heavily in the scales.

Consider some factors which might change the production cost picture substantially if they were duly taken into account. Omitted from many discussions is the fact that estimates of the cost of alcohol production are often based on the cost of alcohol in the very high state of purity of pharmaceuticals or chemical reagents. Of course, such alcohol costs more because it must be distilled more completely. Alcohol of lesser degrees of purity—which is better as a motor fuel in any case—costs less. Also, alcohol production has marketable byproducts. I have already mentioned distiller's grains, but vegetable oils, fuel oil and other items should not be overlooked. All these byproducts add value to the basic product and tend to offset high production costs. In addition, we should keep in mind that the cost of producing gasoline will be rising faster in the future as the world price of crude oil edges up and the proportion of "old" domestic oil in our refineries drops in relation to the proportion of "new" domestic and foreign oil. Forestry and farming costs will be rising as well, but not nearly as fast. Finally, it is a fundamental tenet of economics that increased capacity lowers cost. Alcohol production at the university or in a handful of pilot plants may not look too economical, but this is not necessarily an argument against the establishment of a nationwide industry. Our only genuine problem in this regard is the choice of the proper means of stimulus to get a fledgling industry rolling.

There is another factor that could brighten the future of alcohol fuels by making gasohol directly competitive with pure gasoline at the pump. That factor is the Federal tax of 4 cents per gallon on motor fuel. If a combination of 10 percent ethanol and 90 percent gasoline costs roughly 5 cents more per gallon than pure gasoline, then a repeal of the tax on the combination would do more than any other single thing to bring alcohol fuels into the market place forthwith. The option is attractive because it could be exercised by act of Congress. It is something that we could do in spite of technological or other problems that may exist. It would be an open invitation to the private sector to grab hold of alcohol fuels and to exploit them to the utmost. The State of Nebraska has already decided to forgo a 3 cents per gallon fuel tax for this purpose, and I am pleased that the Senate has seen fit to add a repeal provision to its version of the National Energy Act. I hope that the Senate provision will ultimately be made law.

Of course, there will be critics of a tax subsidy of this sort. Some well-intentioned people will denounce it as too large a drain on the public treasury. There can be no doubt that the drain could become large. If a 10 percent alcohol-90 percent gasoline mixture were to replace the 108 billion gallons of gasoline that are consumed each year in the United States, the tax subsidy would reach $4.32 billion per year, a sizable loss of revenue. However, two mitigating influences should be considered. First, the tax subsidy would buy us significant energy, agricultural and environmental benefits, and in any case Congress has often agreed to provide bigger tax subsidies to schemes of less merit. Second, the tax subsidy would put little drain on the coffers of Government at first because our present capacity to produce alcohol is so limited. It would become less essential as alcohol production grew, and eventually a fuel tax could be reimposed. The Senate bill has the exemption expiring on January 1, 1985. By that time, alcohol fuels should be able to stand on their own.

A further question must be asked in any comparative analysis of the costs of alcohol fuels and gasoline. That question is this: At what price do we depend on foreign sources of energy, support farmers through the low points in their business cycle, and suffer the consequences of an urban waste disposal problem that is getting out of hand? Alcohol fuels may be costly at the present time, but so are misdirected public policies in the areas of energy, agriculture, and environment. We should not forget that we pay out immense sums of money to import oil, to help the farmer, and to get rid of urban waste. Any fair assessment of the economic viability of alcohol fuels must include these expenditures on the other side of the ledger, since the widespread use of alcohol fuels would serve to cut them down.

There is one last economic problem that demands attention: The capital expenditures needed to establish alcohol production on a national scale would be enormous. It is apparent that the Government will have to take an aggressive role as a "private sector catalyst" beyond selective repeal of the Federal tax on motor fuel. As I see it, three things augur well for such a commitment. First, fermentation plants can be constructed more cheaply than oil refineries. Thus, the capital investment per gallon of fuel produced is lower and each public dollar behind the effort, whether in the form of a tax subsidy or a direct outlay, will have more effect than we might imagine. Second, concentrated production of ethanol has already been tried in the United States and some of the old facilities are still in existence. During World War II these facilities used more than 250 million bushels of wheat to produce ethanol for industrial purposes. We might be able to remodel and recommission them, thereby lowering at least the initial requirement of capital. Last, Congress has shown its readiness to get involved in the launching of the new industry. The Food and Agriculture Act of 1977 includes provisions for research grants and pilot projects for the production and marketing of alcohol and hydrocarbons from agricultural commodities and forest products. As regards the research grants, $24 million was authorized over 5 years, with $3 million allocated for the present fiscal year. As concerns the pilot projects, four were authorized with the De-

partment of Agriculture guaranteeing loans up to $15 million for each. Secretary Bergland is currently entertaining site proposals. Furthermore, the proposed budget for the next fiscal year contains $21 million for alcohol fuels research, up 240 percent from the estimated $8.7 million to be spent this fiscal year.

THE ALCOHOL FUEL ENCOURAGEMENT ACT

To consolidate the gains that have been made and to help make the widespread use of alcohol fuels a reality in America, I am today joining with Representatives DAN GLICKMAN, RICHARD NOLAN, and other Members of Congress in introducing the Alcohol Fuel Encouragement Act. I am convinced that this excellent bill would take us a long way toward the desirable goals of energy independence, farm price stability, and a clean environment. It would address the issue of alcohol fuels in a bold and comprehensive way.

The first major provision of the bill would mandate the availability of alcohol fuels on the Nation's streets and highways. Beginning 3 years after enactment, each service station selling more than 400,000 gallons of motor fuel annually would be required to offer a blend of 10 percent alcohol and 90 percent gasoline to its customers. However, both general and specific exemptions could be granted to protect affected parties from inadvertent noncompliance and the Secretary of Energy could extend the 3-year deadline if it were determined that stores of blended fuel were inadequate to meet requirements. Also, the Secretary could extend time on a case-by-case basis to service station operators who were unable to acquire needed equipment or stores of fuel. This provision is important because it would set the use of alcohol fuels as a national policy and would lift a valuable alternative source of energy from the closed circle of study and research in which it has been trapped.

The second major provision of the bill would provide for amortization of alcohol fuel production facilities over 60 months. This provision especially when taken in concert with the alcohol fuel tax subsidy in the Senate's energy bill, should attract the capital investment needed to assure that enough alcohol would be produced to be marketed nationwide. Even if handsome tax incentives such as these failed to do the job, others could be enacted and offered.

The final major provision of the bill is necessary to free alcohol fuels from certain time-consuming and costly regulations of the Clean Air Act. Under the current motor fuel additives certification program, the Environmental Protection Agency is obliged to ban the use of new gasoline additives unless the manufacturer first proves that the additive will not pollute the air. Even though alcohol is really a gasoline replacement—not an additive—the agency has forbidden its use pending proof of its environmental soundness. The narrowly drawn provision of the bill would simply make alcohol an exception to the proof-before-use rule. It would require the Administrator of the Environmental Protection Agency to show alcohol in gasoline to be environmentally damaging before it could be kept off the market, thereby shifting the onus of proof from the private sector to the Government. It is unlikely that alcohol would be banned at a later time since most studies demonstrate its clean burning properties.

I am impressed by the positive effects that alcohol fuels would have. I am equally impressed with the forceful, commonsense approach embodied in the Alcohol Fuel Encouragement Act. I commend both the exciting concept of alcohol fuels and this excellent bill to the attention of my colleagues. I urge that you give them all due consideration.●

U.S. TROOP WITHDRAWAL FROM SOUTH KOREA

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. SOLARZ) is recognized for 5 minutes.

● Mr. SOLARZ. Mr. Speaker, on Tuesday of this week, I testified before the House International Relations Committee in support of the administration's proposal to transfer approximately $800 million worth of military equipment from the U.S. 2d Division in South Korea to the Armed Forces of the Republic of Korea.

I firmly believe that the United States has a vital interest in maintaining the military balance of power between the North and South. The administration's position realistically seeks to maintain this commitment.

While I deplore the repeated violations of human rights by the Park regime, an abandonment of the U.S. commitment to South Korea might very well result in more severe human rights violations. I encountered this feeling on my trip to the Republic of Korea last year. As I indicate in my testimony, almost all of the dissidents with whom I spoke are more opposed to and afraid of the threat from the North than the government of Park Chung Hee.

I respectfully submit my testimony for the information of House Members:

TESTIMONY BY HON. STEPHEN J. SOLARZ BEFORE HOUSE COMMITTEE ON INTERNATIONAL RELATIONS, SUBCOMMITTEE ON ASIAN AND PACIFIC AFFAIRS ON FISCAL YEAR 1979 SECURITY ASSISTANCE, MARCH 21, 1978

Mr. Chairman, I am appearing here today to testify on behalf of the Carter Administration proposal to transfer approximately $800 million in equipment from the U.S. Second Division in South Korea to the armed forces of the Republic of Korea. While I personally deplore the human rights violations of the Park regime, I feel we have such a strong security interest in maintaining South Korea's defensive and deterrent capabilities, while we withdraw our own ground forces, that we must advocate the approval of this Administration proposal.

Mr. Chairman, I had occasion to undertake a fact-finding mission to the Far East last summer, during which I studied America's relations with Japan, South Korea, and the People's Republic of China. I ask that the report I submitted on my return be made a part of the record of these hearings.

In order to understand why I support the Administration's program to transfer the equipment of the Second Division, I believe it is important to look at several critical issues.

THE MILITARY BALANCE

Clearly, the United States has a vital interest in maintaining a military balance which will minimize the prospects of war in Korea. In the view of most observers, it now appears that North Korea has a substantial superiority over South Korea in the critical categories of air, armor, and artillery. Over the last several months the estimates of the number of tanks and artillery pieces in the North Korean inventory have been substantially upgraded.

The reason for this imbalance basically has to do with the fact that, over the course of the last decade and more, the North has devoted a much larger share of its GNP to military expenditures than the South. Between 1963 and 1972, for example, Pyongyang spent approximately 14 percent of its GNP on defense, while Seoul utilized only 4 percent of its resources for such purposes.

However, there is no reason in principle why South Korea should not be able to ultimately defend itself. Indeed, President Park acknowledged as much himself when he said, in August of 1975, that in 5 years there would no longer be a need for the active assistance of American ground forces. A quick look at the underlying demographic and economic realities of the Korean Peninsula should make it clear that the South has a much stronger human and financial foundation than the North. At $34 million, the population of South Korea is more than twice as large as the population of 16 million in North Korea. And the gross national product of South Korea is also slightly more than twice the size of the GNP in North Korea.

In recent years, the South Koreans have begun to demonstrate their own earnest intention to build armed forces that could independently defend their nation. The share of GNP devoted to national defense has risen to almost seven percent in 1977, a larger fraction than any of our European allies spend for such purposes themselves. In absolute terms, the ROK devoted about $2 billion to defense in 1977—a sixfold increase when compared to 1970 expenditures. In short, the South Koreans have demonstrated the capability and willingness to defend their own country.

Because of our commitment to South Korea, and particularly because of the importance which American allies like Japan attach to our behavior with respect to the Korean peninsula, I believe that we should be willing to provide the military equipment to South Korea which is necessary to redress the current imbalance. I believe the transfer of the Second Division's equipment to be instrumental in this regard. As Secretary of Defense Brown pointed out to the International Relations Committee on 22 February 1978, the equipment slated for transfer is designed to make up for existing deficiencies in the critical areas of firepower, armor, and mobility—and to thereby reduce existing vulnerabilities in the ROK forces.

NORTH KOREAN INTENTIONS

Unfortunately, this Committee is not engaged in an academic exercise when it considers this issue, because there is a very real possibility that weakness in the ROK forces could tempt the North Koreans to adopt an aggressive posture. North Korea today, under the complete control of Kim Il Sung, remains dedicated in word and deed to the reunification of the Korean Peninsula under Communist control. Based on his history, his ideology, his personality, and his politics, it seems fair to say that reunification remains Kim's major personal and political priority. He tried once before to achieve his ambitions through the force of arms and failed. But there are few who doubt that Kim would be prepared to attempt another attack if he thought he could succeed.

The possibility of another war in Korea is not as remote as some might think. From the perspective of Pyongyang there would appear to be few, if any, alternative methods of achieving the much sought after objective of reunification. Certainly it is easy to envision the possibility of a surprise attack designed to quickly seize Seoul (which is only 25 miles from the DMZ). The loss of Seoul, with its demographic and economic importance for the South could have a devastating psychological and political impact on the will of the South Koreans to resist a forced reunification of the Korean Peninsula.

To be sure, neither Russia nor China today appear to have much of an interest in the outbreak of another war on the Korean Peninsula. For the Russians, it would threaten the whole policy of detente. For the Chinese, it would probably bring to a halt the process of normalization which began with the Shanghai communique.

Yet the fact remains that the revolutionary credentials of Russia and China are somewhat dependent on Kim. The very existence of the Sino-Soviet split, which in some respects has been an essential element in the maintenance of a balance of power between East and West, has in other respects given Communist countries like North Korea a measure of political flexibility they otherwise would not have had. If war did break out on the Korean Peninsula, however much they wished it had not, both the PRC and the USSR would undoubtedly feel compelled, given the ideological and political competition between them, to support North Korea anyway. The fear of losing favor with Pyongyang would probably prevail in the calculations of both Moscow and Peking over their fear of alienating the West. And Kim Il Sung, who is very much aware of these elemental political constraints, is thus more or less free to pursue whatever course of action he thinks is in his own best interest. Moreover, today more than ever, North Korea appears capable of waging a war for a certain period of time against the South without resupply from the Soviet Union or China.

It is precisely for this reason that the maintenance of a balance of power in Korea is so important. Let the North develop a decided and demonstrable military superiority over the South and there is a reasonably good chance that Kim would conclude the time had come to strike again. In my view, the only way to deter an attack from the North is to make crystal clear that such an attack would fail.

THE U.S. COMMITMENT ON HUMAN RIGHTS

It is important to realize that the transfer of U.S. equipment to South Korea is proposed at a time when our commitment to, and our alliance with, South Korea is under its most severe test since the early 1950's. In particular, the repressive policies of the Park regime, while essentially stamping out democracy and dissent at home, have effectively fueled the flames of opposition to a continued commitment to the defense of South Korea within the United States.

While I totally deplore the repeated violations of human rights and the suppression of democracy that have characterized the Park regime, on my trip to the Far East last year I was struck by one unmistakable and indivisible fact. In many of the repressive dictatorships that we support, the dissident democratic forces favor the withdrawal of the American presence as a way of weakening the political and military viability of the existing regime. But in South Korea I found the opposite was true. In that country, almost all of the dissident elements with whom I spoke favored a continued American presence and a strengthening of the South Korean armed forces for one reason: no matter how much they may abhor Park Chung Hee, they are even more opposed and more afraid of Kim Il Sung.

So I, for one, feel that even from a human rights standpoint we have a strong reason for providing the necessary military support to preserve the independence of the territorial integrity of South Korea.

WITHDRAWAL AND THE U.S. COMMITMENT

Last year, President Carter announced that the United States would complete withdrawal of all American ground combat forces from South Korea by 1982. To be sure, the President has assured South Korea that American air and naval forces will remain even after the Second Division has been completely removed. These units should not only provide ROK forces with the kind of close air support and naval protection they would need in time of war, but they would also constitute a symbolic manifestation of American intentions in this regard. At the same time, they would provide a continuing incentive to Pyongyang, Peking, and Moscow to reach a peaceful agreement with Seoul designed to normalize the situation on the peninsula, if they want American forces completely removed from Korea.

Given continued American support for South Korea, demonstrated by the presence of U.S. Navy and Air Forces, continued American military assistance, and particular programs such as the compensation package, the withdrawal of the Second Division should not significantly impair the credibility of the American commitment to come to the defense of South Korea. Concerned primarily with the possibility of a surprise attack, and a sudden North Korean seizure of Seoul, the Republic of Korea has concentrated most of its 18 divisions between the 38th parallel and its capital city. Assuming the assets of the Second Division are transferred to the ROK forces, one additional American division will not add significantly to the ability of South Korea to thwart such an attack.

The forces on which South Korea would have to rely in such an eventuality would primarily be their own. Under these circumstances, the Second Division would help, but it is doubtful that it would make the difference. Its value, therefore, is more symbolic than substantive—yet, were we not to withdraw our ground forces, the erosion of public support for our Korean commitment would significantly outweigh the marginal advantages of keeping the Second Division where it is, in terms of the plausibility of the American deterrent.

President Carter's policy of gradually phasing out our infantry presence in South Korea should thus be seen as an exercise in both prudence and preparedness. By recognizing the realities of our political problems back home, it is designed to make more durable the nature of our commitments abroad. And by making the withdrawal of the Second Division implicitly contingent upon the completion of the force improvement program it will ultimately strengthen the capacity of South Korea to defend itself in the future.

We must also carefully understand that America's continued commitment to South Korea is, in some large measure, linked to the capability of the United States to withdraw its ground forces. Indeed, I would venture to say that the gratuitous involvement of U.S. ground forces, caught in a surprise North Korean attack against the South would create a major political controversy in the United States. For better or worse, the memories of our involvement in Vietnam are too compelling to sustain a U.S. ground military involvement under those conditions for very long.

Clearly, the transfer of the Second Division's equipment is a logical and necessary aspect of the Carter Administration's laudable withdrawal policy. It facilitates our withdrawal by making the South Koreans more independent militarily. In addition, by replacing the assets which we would otherwise be taking out, it reaffirms the strengthening and sincerity of our commitment to the security of South Korea.

Reinforcing the strength of our commitment to South Korea is an absolutely fundamental goal in the global context of our national interest. With the collapse of the American-sponsored effort in Indochina, new doubts have been raised about the value and viability of America's commitment to its Asian allies. Certainly, Japan is gravely concerned about the credibility of America's commitment to all of our allies in Asia, and will closely scrutinize our behavior in the Korean situation. If, through a failure of American will, the United States did not live up to its commitment to Korea by providing this equipment, it would raise grave doubts in Japan about the value of their mutual security treaty with us and would encourage the Japanese to think seriously about a major rearmament program—with all the negative consequences that would entail.

Moreover, the withdrawal of our ground forces from South Korea, without the adoption of the compensation package, could conceivably lead Kim Il Sung to conclude that we were not prepared to come to the assistance of South Korea, thereby increasing the possibility for the outbreak of another war on the Korean Peninsula.

For all of these reasons, Mr. Chairman, I think it is strongly in our interest to support the Administration's proposal. I might suggest, however, that the Committee carefully scrutinize the proposal in one regard. As you know, the Administration has asked us to transfer this equipment as a grant without any charge to the Government of South Korea. In my own mind, I am not fully persuaded that the ROK could not pick up at least part of the cost on a loan basis. I would hope that in your examination of this issue you would try your best to establish whether South Korea really can or cannot afford to pay part of the cost of this program. I believe that this proposal would have a much better chance of passage if the Korean government reiterated its own commitment to its own defense by furnishing some of the funds necessary for this program.●

STATEMENT OF CONGRESSMAN JAMES HOWARD ON INTRODUCING THE SURFACE TRANSPORTATION ASSISTANCE ACT OF 1978

(Mr. HOWARD asked and was given permission to extend his remarks at this point in the RECORD.)

Mr. HOWARD. Mr. Speaker, I am introducing today the Surface Transportation Assistance Act of 1978, undoubtedly the most significant piece of transportation legislation ever to come before this body. For the first time in the House, a committee will be marking up and reporting out a single bill covering highways, highway safety, and mass transportation. Furthermore, this legislation is the most far reaching legislation on highways since the 1956 Federal Aid Highway Act and on mass transit since the very well known acts of 1964, 1970, and 1974.

I would like to say, Mr. Speaker, that I am proud of this bill and look forward to bringing it to the floor of this House.

The highway and safety authorizations of this bill from the highway trust fund total $11.1 billion in fiscal year 1979 and $10.9 billion per year for each of the fiscal years 1980, 1981, and 1982. The mass transit authorizations are approximately $4.4 billion for the same 4 years.

In addition the Interstate Highway System is authorized through to completion in the year 1992 at an annual rate of $4 billion per year and the mass transit program to 1988 at $4.5 billion per year.

Mr. Speaker, I came before this body during the energy bill debates last year asking for a 5-cent increase in the gas tax for the highway trust fund and a new mass transit trust fund. I hope it is still possible to obtain a mass transit trust fund out of the energy bill. I also appeared before the Ways and Means Committee this year suggesting that a 2-cent increase in the gas tax would probably be required to finance the highway portion of this legislation. I went down to resounding defeat last year on 5 cents and was told by the Ways and Means Committee this year that any chance for 2 cents might be very difficult.

I find now that a gas tax increase to finance this bill is unnecessary. Instead an alternate proposal for financing will be proposed which merely builds on the longstanding, highly successful structure of the highway trust fund. The Ways and Means Committee recommended and this House passed an extension of the existing 4-cent gas tax until 1985 in the House version of the energy bill. That mere extension, applied to the highway trust fund, will finance the highway and safety titles of this bill. Such a move will obviate any need for a gas tax increase to carry out the provisions of the highway and safety portions of this bill.

Mr. Speaker, I ask the Members of this House to support this bill. It is necessary in all of its parts for the continuance of our vital transportation systems.

INTRODUCTION OF NEW YORK CITY FINANCIAL ASSISTANCE ACT OF 1978

(Mr. MOORHEAD of Pennsylvania asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I am introducing today, with bipartisan cosponsorship by members of the Subcommittee on Economic Stabilization of the Banking Committee, together with the chairman of the full committee, the New York City Financial Assistance Act of 1978.

Through continued monitoring of the New York situation since enactment of the current seasonal financing act in late 1975 and through comprehensive hearings that have just been completed, we have established to our satisfaction the following salient facts:

First, the city has made significant progress toward the goal of a balanced budget, but it still does not have access to the private credit markets.

Second, without further Federal financial assistance beyond the expiration of the present law on June 30, the city faces a serious risk of default, insolvency, or bankruptcy.

Third, such an event, if it should be permitted to occur, would have significant financial repercussions beyond the city itself, including probably on the international exchange rate of the dollar, though the extent of such ripple effects is necessarily a matter of judgment and cannot be calculated precisely.

Fourth, by far the best chance of achieving a permanent solution to the city's problem—indeed, probably the only chance—is to permit the city to borrow at long term, which means that this next, and last, extension of Federal assistance must be chiefly in the form of guarantees of long-term bond issues rather than short-term seasonal assistance.

Fifth, the New York situation is unique and passage of the legislation I have introduced will not set a precedent for other cities, in large part because no other city will want to subject itself to the rigorous external controls that New York has endured and will continue to endure.

Mr. Speaker, I find the task of legislating Federal financial assistance to a single city as distasteful as any Member of this body. It is not the way our constitutional system is supposed to work. While I see little or no danger in the precedent being set, I cannot deny that this assistance involves the exploration of new waters.

But the genius of our system is its flexibility, its ability to rise to new emergencies. We are faced here with an emergency, and rigid interpretations of the meaning of our Federal system should not stand in the way of our meeting that emergency. What we need—and what this country has so often shown in its history—is pragmatism and not rigid ideological consistency.

I cannot deny, Mr. Speaker, that this emergency has arisen in part because of the profligacy of local government in New York in the past, though that is not its only cause. But there are several things to be said about that.

One is that the city is paying for its sins. It has sharply reduced its local personnel and will cut further. Its services have been cut back. It has given up such hopeful experiments as free admission to the city university. It is no longer softheaded in granting eligibility for welfare.

Another thing to be said is that the parable of the prodigal son is part of our tradition. All through our lives we face the fine balance between helping forgiveness and stern retribution, including in our own families. None of us, I venture to say, will regard stern retribution as invariably, and in all cases, the right posture to take.

And finally, like it or not, we do have a national problem here, regardless of the past sins that brought it on. A bankruptcy of New York threatens, to some unknown degree, the municipal bond market and hence the interest rates paid by all our States, cities, school districts, and the like, with the worst effect on those that are basically credit-worthy but are not well known or are vaguely perceived by the market to have potential difficulties. The phenomenon is known as a flight to quality—mentioned by several of our witnesses—and the victims are often the innocent.

We have a national problem, too, in that a bankruptcy of New York is quite likely to lead in the end to outlays by the Federal Government that will far exceed any costs associated with guaranteeing a modest amount of the city's long-term bonds. New York City will not vanish from the Earth on the day it appears in court to declare bankruptcy. In effect, it would become an immediate candidate for a new kind of Federal disaster assistance.

Mr. Speaker, the bill we are introducing provides, we believe, the minimum that is necessary to achieve a lasting solution of the New York problem. A Federal guarantee of up to $2 billion in bonds with a maximum guarantee term of 15 years should make possible the sale of at least 1½ times that amount of bonds in addition, without guarantee, by the special financing entity called the Municipal Assistance Corporation and by the city itself. In turn, those sales of long-term bonds will make possible a start on the desperately needed renovation of the city's infrastructure, will cover the rapidly dwindling but still substantial budget gap, and will probably permit a reduction of debt service through restructuring of some existing debt.

Our bill will permit use of some part of this $2 billion authority in the early years for continued seasonal financing, so that the city does not run out of cash in this period before it can reenter the credit markets. But at no time could a total of more than $2 billion in Federal assistance be outstanding.

The bill was drafted at my request by the Office of Legislative Counsel and by no one else. While it generally reflects the views of the Treasury, it is our bill and not theirs. It differs from the administration proposal chiefly in its provision for seasonal loans if necessary, though within the overall $2 billion ceiling. Apart from that, the bill basically follows the administration proposal as presented to our subcommittee by Secretary Blumenthal on March 2.

Our bill reflects a lengthy analysis and examination by all of the parties concerned, including the Treasury. It is premised on a 4-year plan by the city that will end with a budget balanced by generally accepted accounting principles. A keystone is a significant expansion of budgetary aid from the State of New York, which has already been promised and the first year of which is now moving through the legislature.

A mere extension of Federal seasonal loans, Mr. Speaker, will not solve New York's problem. Indeed, it may not even avert bankruptcy. All of the parties who have examined the situation are agreed that the key to an eventual solution is a Federal guarantee to make possible a sale of long-term bonds. And while I do not dispute that a Federal guarantee is in every true sense assistance by the Federal taxpayer, I believe it is highly probable that no actual outlays will result.

Mr. Speaker, the House will be hearing more of this matter as the time between now and June 30 grows shorter. None of us will enjoy it. But the problem will not go away. Our bill is a responsible way of getting New York on its feet and off our backs. I hope that when the time comes the Members of this body will view the issue with reason and not with

vindictiveness. For in the end, we cannot run away from this problem.

Following is a copy of the bill and a section-by-section analysis thereof.

H.R. 11753

A bill to authorize the Secretary of the Treasury to provide financial assistance for the city of New York

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "New York City Financial Assistance Act of 1978".

TITLE I—EMERGENCY ASSISTANCE

DEFINITIONS

SEC. 101. For purposes of this title, the term—

(1) "city" means the city of New York;

(2) "State" means the State of New York;

(3) "Secretary" means the Secretary of the Treasury;

(4) "independent fiscal monitor" means an agency, board, or other entity authorized by the law of the State which has the authority to control the fiscal affairs of the city during the entire period for which assistance under this title will be outstanding and which authority the State has convenanted will not be repealed, invalidated, or otherwise substantially impaired during such period; and

(5) "financing agent" means any agency, board, or other entity authorized by the law of the State to act on behalf or in the interest of the city with respect to the city's financial affairs.

GUARANTEES

SEC. 102. (a) Upon the written request of the city and the Governor of the State, the Secretary may guarantee the payment, in whole or in part, of interest, principal, or both, of obligations (having a maturity of fifteen years or less) of the city or the financing agent in accordance with this title.

(b) Whenever any obligation is guaranteed under this title, the Secretary shall assess and collect (no less frequently than annually) from the obligor a guarantee fee computed daily at a rate of no less than one-half of one per centum per annum on the outstanding principal amount of such obligations outstanding. The Secretary may periodically escalate the guarantee fee in order to induce the obligor to enter the private market.

(c) If an obligation which is guaranteed under this title is sold, transferred, or otherwise disposed of (other than to a successor in interest or pursuant to a disposition not involving a change in beneficial ownership) other than by the issuer, the guarantee shall thereafter cease to be effective with respect to that obligation.

CONDITIONS OF ELIGIBILITY

SEC. 103. (a) The Secretary may make guarantees under this title only if—

(1) the Secretary determines that the city is effectively unable to obtain credit in the private market or elsewhere in amounts and terms sufficient to meet the city's financing needs;

(2) the city submits, with the approval of the independent fiscal monitor, in such detail and in accordance with such accounting principles as the Secretary may prescribe, a plan for bringing its operating expenses into balance with its recurring revenues for each full fiscal year of the city following the initial application for assistance under this title, and thereafter for as long as any such assistance remains outstanding; and the city agrees to publish, after the completion of each fiscal year covered by the plan, an analysis reconciling its actual revenues and expenditures with projected revenues and expenditures; and the city agrees to publish periodic projections which reflect the impact of the plan on tax rates;

(3) the city submits, with the approval of the independent fiscal monitor, in such detail as the Secretary may prescribe and in accordance with generally accepted accounting principles, a plan for bringing its operating expenses into balance with its recurring revenues for the fourth full fiscal year following the initial application for assistance under this title and for each fiscal year thereafter for as long as such assistance remains outstanding;

(4) the independent fiscal monitor demonstrates that it has the authority to control the fiscal affairs of the city for the entire period during which assistance under this title will be outstanding;

(5) the Secretary has received assurances to his satisfaction that a substantial portion of the long-term borrowing needs of the city will be met through commitments from the State, an agency of the State, private sources, or through capital markets;

(6) the Secretary determines that there is a reasonable prospect of repayment of the obligations to be guaranteed in accordance with their terms and conditions;

(7) the city agrees to have conducted annual independent audits of its books to be done by independent public accountants for each fiscal year during which the Secretary may guarantee obligations under this title or during which any assistance provided under this title remains outstanding; and

(8) the city agrees to comply with any other terms or conditions which the Secretary deems appropriate.

(b) Any determination by the Secretary that the conditions set forth in subsection (a) have been met shall be conclusive, such determination to be evidenced by the making of such guarantee or commitment to guarantee, and the validity of any guarantee so made shall be incontestable in the hands of the holder of such guaranteed indebtedness.

(c) Any term or condition provided for under paragraph (8) of subsection (a) may be modified, amended, or waived by the Secretary at any time.

LIMITATION ON THE AMOUNT OF GUARANTEES OUTSTANDING

SEC. 104. The total amount of all guarantees (exclusive of unearned interest) which may be outstanding under this title at any one time shall not exceed $2,000,000,000.

REMEDIES

SEC. 105. (a) The Secretary shall take such action as may be appropriate to enforce any right accruing to the United States or any officer or agency thereof as a result of the issuance of guarantees under this title. Any sums recovered pursuant to this section shall be paid into the general fund of the Treasury.

(b) The Secretary shall be entitled to recover from the borrower, or any other person liable therefor, the amount of any payments made pursuant to any guarantee agreement entered into under this title, and upon making any such payment, the Secretary shall be subrogated to all the rights of the recipient thereof.

(c) Notwithstanding any other provision of law, the Secretary may provide for the withholding of any payments from the United States to the city or State which may be or may become due pursuant to any law and offset the amount of such withheld payments against any claim the Secretary may have against the city or State pursuant to this title.

(d) The remedies prescribed in this title shall be cumulative and not in limitation of or substitution for any other remedies available to the Secretary or the United States.

(e) With respect to any debt of the United States arising under this title, for the purposes of section 3466 of the Revised Statutes (31 U.S.C. 191), the term "person" shall include the city and any financing agent."

INSPECTION OF DOCUMENTS

SEC. 106. At any time a request for a guarantee is pending or an obligation guaranteed under this title is outstanding, the Secretary is authorized to inspect and copy all accounts, books, records, memorandums, correspondence, and other documents of the city or the financing agent relating to the city's financial affairs.

AUDITS

SEC. 107. No guarantee may be made under this title unless the General Accounting Office is authorized to make such audits as may be deemed appropriate by either the Secretary or the General Accounting Office of all accounts, books, records, and transactions of the city and the financing agent. The General Accounting Office shall report the results of any such audit to the Secretary and to the Congress.

REPORTS TO CONGRESS

SEC. 108. Within three months after the date of enactment of this title, and at six-month intervals until June 30, 1982, and thereafter at twelve-month intervals, the Secretary shall transmit to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Banking, Finance and Urban Affairs of the House of Representatives a report containing a detailed statement of his activities under this title.

TERMINATION OF AUTHORITY

SEC. 109. The authority of the Secretary to make guarantees under this title terminates on June 30, 1982. Such termination does not affect the carrying out of any contract, guarantee, or other obligation entered into pursuant to this title prior to that date, or the taking of any action necessary to preserve or protect the interests of the United States in any amounts advanced or paid out in carrying out operations under this title, except that no commitment to guarantee any obligations under this title shall be effective after such date.

AUTHORIZATION

SEC. 110. There are authorized to be appropriated such sums as may be necessary to carry out this title.

TITLE II—AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

TAXABILITY OF CERTAIN FEDERALLY GUARANTEED OBLIGATIONS.

SEC. 201. (a) CERTAIN FEDERALLY GUARANTEED OBLIGATIONS.—Section 103 of the Internal Revenue Code of 1954 (relating to interest (on certain governmental obligations) is amended by redesignating subsection (f) as subsection (g) and by inserting after subsection (e) the following new subsection:

"(f) CERTAIN FEDERALLY GUARANTEED OBLIGATIONS.—Any obligation—

"(1) which is issued after the date of the enactment of this subsection, and

"(2) the payment of interest or principal (or both) of which is guaranteed in whole or in part under title I of the New York City Financial Assistance Act of 1978 (as in effect on the date of the enactment of this subsection),

shall be treated as an obligation not described in subsection (a)."

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to taxable years ending after the date of the enactment of this Act.

SECTION-BY-SECTION ANALYSIS OF A BILL TO PROVIDE FINANCIAL ASSISTANCE FOR THE CITY OF NEW YORK

Section 1

This section provides that the bill shall be titled the "New York City Financial Assistance Act of 1978".

TITLE I—EMERGENCY ASSISTANCE

Section 101

This section sets forth the definitions of various terms used throughout the bill.

Through the definitions, it makes clear that assistance is to be provided only for New York City, that the independent monitor's existence and authority must be covenanted by the State for so long as assistance under the bill is outstanding, and that the Department of the Treasury is to administer the program.

Section 102

Subsection (a) provides that the Secretary may guarantee the principal, interest, or both, of obligations of the city or a financing agent.

Subsection (a) also provides that such obligations may carry a maturity of up to fifteen years.

This subsection further provides that such guarantees must be applied for in writing by the city and the Governor of the state.

Subsection (b) provides that a fee of not less than one-half of one percent per annum on the outstanding principal amount of guaranteed obligations, computed daily, shall be assessed and collected at least annually.

This subsection also provides that the Secretary may increase the guarantee fee in order to induce the borrower to borrow in the private market.

Subsection (c) provides that the guarantee lapses if the obligation is sold, transferred, or otherwise disposed of, except to a successor in interest or in a disposition not changing the beneficial ownership.

CONDITIONS OF ELIGIBILITY

Section 103(a)

Paragraph (1) of this subsection require that the Secretary make a determination that the city is unable to meet its borrowing needs in the private market or elsewhere.

Paragraph (2) requires the city, with approval of the fiscal monitor, to submit a plan for bringing into balance its operating expenses with its recurring revenues for each full fiscal year after applying for assistance, and for each year such assistance is outstanding.

This paragraph also provides that the Secretary may prescribe the accounting principles and the details of the annual operating budget plans.

Paragraph (2) further requires the city to publish annually during the period covered by the plan an analysis reconciling the previous year's actual revenues and expenditures with projected revenues and expenditures, and to publish periodic projections reflecting the plan's impact on tax rates.

Paragraph (3) requires that, for the fourth full fiscal year after initial application for assistance, and for each fiscal year thereafter while assistance remains outstanding, the plans for bringing operating expenses into balance with recurring revenues be in accordance with generally accepted accounting principles.

Paragraph (4) requires the fiscal monitor to demonstrate that it has the authority to control the fiscal affairs of the city for as long as assistance will be outstanding.

Paragraph (5) requires the Secretary, before issuing guarantees under this Act, to obtain assurances to his satisfaction that a substantial portion of the city's borrowing needs will be met through sources other than Federal assistance provided under this Act.

Paragraph (6) requires the Secretary, before issuing guarantees, to make a determination that there is a reasonable prospect that obligations to be guaranteed will be repaid according to their terms and conditions.

Paragraph (7) requires the city to have audits of its books conducted annually while any assistance under this Act is outstanding. Such audits must be conducted by independent public accountants.

Paragraph (8) gives the Secretary authority to impose upon the city any other terms or conditions which he deems appropriate.

Subsection (b) provides that a determination by the Secretary that the conditions of subsection (a) have been met shall be conclusive.

Subsection (c) provides that the Secretary may modify, amend, or waive the terms and conditions made at his discretion under paragraph (8), subsection (a).

Section 104

This section provides that the amount of guarantees outstanding at any one time may not exceed $2 billion, exclusive of unearned interest.

Section 105

Subsection (a) provides that the Secretary shall take such actions as are necessary to enforce the rights of the United States as a result of the issuance of guarantees under this Act and that sums recovered shall be paid into the general fund of the Treasury.

Subsection (b) gives the Secretary authority to recover from the borrower, any amounts paid by the United States pursuant to guarantees issued, and gives to the Secretary all the rights of the recipient of the payment made by the United States.

Subsection (c) provides that the Secretary may, in the event of a claim of the United States against the city or state pursuant to guarantees issued under this Act, withhold payments due or to become due to the city or state from the United States.

Subsection (d) provides that the remedies prescribed in this Act are cumulative and not in limitation of or substitution for other remedies available to the Secretary or the United States.

Subsection (e) provides that, in the event of insolvency of the city or financing agency, the United States would have priority over other debtors with respect to the payment of debt created under this Act.

Section 106

Provides for the inspection of city documents by the Secretary.

Section 107

Provides for audits by the General Accounting Office.

Section 108

Provides for periodic reports by the Secretary to the Congress.

Section 109

Provides that the Secretary's authority to make guarantees terminates on June 30, 1982.

Section 110

Provides an authorization for the appropriation of such sums as may be necessary.

TITLE II

This title amends the Internal Revenue Code to provide that interest on obligations guaranteed under this Act are taxable for the period of the guarantee.●

SALE OF MILITARY AIRCRAFT TO EGYPT AND SAUDI ARABIA

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MIKVA. Mr. Speaker, today I am sending a letter to President Carter asking the President to reconsider his decision to provide military aircraft to Egypt and Saudi Arabia. I am opposed to providing arms to Egypt and the Saudis until both countries renounce their support for the Palestine Liberation Organization as the sole representative of the Palestinian people. So long as the Arab nations support Palestinian leadership dedicated to destroying Israel there can be no peace. And, refusal by the United States to arm nations unwilling to disavow PLO leadership is the price that they must expect to pay.

Mr. Speaker, at this time I would like to include the text of my letter to President Carter:

MARCH 21, 1978.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I have previously communicated with you my concern that the proposed sales of planes to Saudi Arabia and Egypt would be treated as a condonation of present policies in both of those countries. The recent raid by the Palestinian Liberation Organization on Israeli civilians, in which the PLO took pride in organizing an attack on civilians in a raid that had no military significance whatsoever, accentuates those concerns.

At the present time, both Egypt and Saudi Arabia formally and by declaration support the Palestinian Liberation Organization. They recognize the PLO as the sole representative of all Palestinians. The continual attacks by the PLO on Israeli civilians make it urgent that you, Mr. President, call upon Egypt and Saudi Arabia to withdraw their support of the Rabat decision which designated the PLO as the sole Palestinian representative. This threat to place the PLO in charge of the West Bank is a major roadblock to peace. In addition to its acts of terrorism, the PLO continues to proclaim its goal to eliminate Israel. In fact, after the recent murderous attacks the PLO referred to the heartland of Israel where the incidents took place as "occupied territory." Repudiation of the PLO by Egypt and Saudi Arabia would be a step towards developing an atmosphere in which constructive negotiations could take place.

Egypt and Saudi Arabia cannot pose as positive and stabilizing forces, deserving of U.S. arms, and at the same time continue in their posture of calling for terrorists to head the Palestinians. Some of the leaders in both of those countries have expressed private views that their withdrawal of support of the PLO would cost them some status with other Arab states. The United States ought to make it clear to Egypt and Saudi Arabia that continuing to recognize the PLO and to support the Rabat decision also has a price. It will cost them the close friendship and alliance that they seek with us and will make it impossible for Egypt to achieve the peace it seeks with Israel.

Mr. President, I urge you to move in these areas as rapidly as possible.

Very truly yours,

ABNER J. MIKVA,
U.S. Congressman.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HOLLENBECK) to revise and extend their remarks and include extraneous material:)

Mr. GOLDWATER, for 5 minutes, today.
Mr. SKUBITZ, for 5 minutes, today.
Mr. KEMP, for 5 minutes, today.
Mr. ASHBROOK, for 30 minutes, today.

(The following Members (at the request of Mr. KOSTMAYER) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. DIGGS, for 10 minutes, today.
Mr. PANETTA, for 5 minutes, today.
Mr. ZABLOCKI, for 5 minutes, today.
Mr. NOWAK, for 5 minutes, today.
Mr. WEISS, for 5 minutes, today.
Mr. FOUNTAIN, for 5 minutes, today.
Mr. ULLMAN, for 5 minutes, today.
Mr. ST GERMAIN, for 5 minutes, today.
Mr. BAUCUS, for 10 minutes, today.
Mr. ROYBAL, for 5 minutes, today.
Mr. BRADEMAS, for 5 minutes, today.
Mr. MILFORD, for 5 minutes, today.
Mr. SIKES, for 10 minutes, today.
Mr. DRINAN, for 5 minutes, today.
Mr. KOSTMAYER, for 5 minutes, today.
Mr. DODD, for 10 minutes, today.
Mr. SOLARZ, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BIAGGI, to follow the remarks of Mr. MURPHY of New York and to revise and extend his remarks.

(The following Members (at the request of Mr. HOLLENBECK) and to include extraneous matter:)

Mr. SARASIN.
Mr. ERLENBORN.
Mr. STANTON.
Mr. BADHAM.
Mr. BOB WILSON in three instances.
Mr. MARRIOTT in two instances.
Mr. YOUNG of Florida in three instances.
Mr. GILMAN in four instances.
Mr. BROOMFIELD in two instances.
Mr. MARTIN in two instances.
Mr. WALSH.
Mr. DORNAN in three instances.
Mr. WHITEHURST.
Mr. WAMPLER in two instances.
Mr. ABDNOR.
Mr. KEMP in three instances.
Mr. ASHBROOK in four instances.
Mr. STEERS.
Mr. LENT.
Mr. MILLER of Ohio in four instances.
Mr. HANSEN in five instances.
Mr. WHALEN in two instances.
Mr. MCKINNEY.
Mr. RHODES in two instances.
Mr. WYDLER.
Mr. PRESSLER.

(The following Members (at the request of Mr. KOSTMAYER) and to include extraneous material:)

Mr. RYAN.
Mr. CORMAN.
Mr. LEDERER.
Mr. FARY in two instances.
Mr. STUDDS.
Mr. GONZALEZ in three instances.
Mr. ANDERSON of California in three instances.
Mr. GORE.
Mr. MARKEY.
Mr. MOTTL.
Mr. HAMILTON.
Mr. WALGREN.
Mr. FISHER.
Mr. FRASER in five instances.
Mr. BLANCHARD.
Mr. MILLER of California.
Mr. SOLARZ.
Mr. RODINO in two instances.
Mr. UDALL in two instances.
Mr. BENNETT.
Mr. FAUNTROY.
Mr. WIRTH.
Mr. WRIGHT.
Mr. OTTINGER.
Mr. ROGERS in five instances.
Mr. NOWAK.
Mr. DINGELL.
Mr. SANTINI.
Mr. RICHMOND.
Mr. CARNEY.
Mr. BURLESON of Texas.
Mr. MAZZOLI.
Mr. ST GERMAIN.
Mr. BENJAMIN.
Mr. TEAGUE in six instances.
Mr. FASCELL.
Mr. FLORIO.
Mr. RANGEL.
Mr. AKAKA.

Mr. STUDDS, to extend his remarks in the body of the RECORD, notwithstanding the fact that it exceeds two pages of the RECORD, and is estimated by the Public Printer to cost $1,643.

ENROLLED BILL SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H.R. 3813. An act to amend the Act of October 2, 1968, an Act to establish a Redwood National Park in the State of California, and for other purposes.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to two enrolled bills of the Senate

S. 833. An act for the relief of Ah Young Cho Kwak; and

S. 1135. An act for the relief of Young-soon Choi.

RECESS

The SPEAKER pro tempore. The Chair will observe that the legislative business for the day has been concluded. There are no further special orders, and the Chair would ask unanimous consent that the Chair be given the authority to recess the House, pending a message from the Senate. There will be no other intervening business that the Chair contemplates.

Is there objection to the unanimous-consent request of the Chair?

Mr. BAUMAN. Reserving the right to object, Mr. Speaker, it is my understanding that we are awaiting the adjournment resolution as it has probably been amended by the other body; is that correct?

The SPEAKER pro tempore. It is the understanding of the Chair that the Senate has not amended it, and there is no anticipation that they will amend it.

Mr. BAUMAN. So there will be no occasion for those of us who wish to stay here and solve the farm problem before we take an Easter recess, or junkets around the world, to obtain a vote on whether or not we would adjourn; is that correct?

The SPEAKER pro tempore. There is no vote anticipated by the Chair.

Mr. BAUMAN. That is unfortunate.

Mr. Speaker, the gentleman from Maryland withdraws his reservation of objection and wishes the gentleman from Illinois (Mr. ROSTENKOWSKI) a happy Easter.

The SPEAKER pro tempore. The Acting Speaker pro tempore wishes the gentleman from Maryland (Mr. BAUMAN), and all those within hearing of his voice, a happy Easter.

The House will stand in recess.

Accordingly (at 2 o'clock and 9 minutes p.m.), the House stood in recess subject to the call of the Chair.)

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. ROSTENKOWSKI) at 3 o'clock and 42 minutes p.m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 544. Concurrent Resolution providing for an adjournment of the House from March 22 to April 3, 1978 and a recess of the Senate from March 23 to March 29 or April 3, 1978.

ADJOURNMENT TO MONDAY, APRIL 3, 1978

Mr. CAVANAUGH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER pro tempore. In accordance with House Concurrent Resolution 544 of the 95th Congress, the Chair declares the House adjourned until 12 o'clock meridian on Monday, April 3, 1978.

Thereupon (at 3 o'clock and 43 minutes p.m.), pursuant to House Concurrent Resolution 544, the House adjourned until Monday, April 3, 1978, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

3635. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend title

10, United States Code, to eliminate the annual report on Reserve Forces; to the Committee on Armed Services.

3636. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a list of contract award dates for the period March 15 to June 15, 1978, pursuant to 10 U.S.C. 139(b); to the Committee on Armed Services.

3637. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Naval and Marine Corps Reserve, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

3638. A letter from the Assistant Secretary of the Treasury (Legislative Affairs), transmitting project performance audit reports prepared by the International Bank for Reconstruction and Development, pursuant to section 301(e)(3) of the Foreign Assistance Act of 1961, as amended (87 Stat. 718); to the Committee on Banking, Finance and Urban Affairs.

3639. A letter from the Deputy Administrator of General Services, transmitting a report on GSA's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3640. A letter from the Chairman, Board of Directors, Tennessee Valley Authority, transmitting a report on the agency's activities under the Freedom of Information Act during calendar year 1977, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

3641. A letter from the Secretary, Postal Rate Commission, transmitting a report on the Commission's activities under the Privacy Act during calendar year 1977, pursuant to 5 U.S.C. 552a(p); to the Committee on Government Operations.

3642. A letter from the Chairman, Board of Directors, Tennessee Valley Authority, transmitting a report on the agency's activities under the Government in the Sunshine Act during calendar year 1977, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

3643. A letter from the Secretary of State, transmitting a draft of proposed legislation to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act, and for other purposes; to the Committee on International Relations.

3644. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, to 1 U.S.C. 112b; to the Committee on International Relations.

3645. A letter from the Acting Administrator, U.S. Environmental Protection Agency, transmitting annual reports covering calendar year 1977 on progress in the prevention and control of air pollution, measures taken in relation to motor vehicle emission control, and measures taken to prohibit Federal agencies from entering into contracts with violators of the Clean Air Act, pursuant to sections 313, 202, and 306(e), respectively, of the act, as amended; to the Committee on Interstate and Foreign Commerce.

3646. A letter from the Commissioner, Immigration and Naturalization Service, U.S. Department of Justice, transmitting reports concerning visa petitions approved according certain beneficiaries third and sixth preference classification, pursuant to section 204(d) of the Immigration and Nationality Act, as amended; to the Committee on the Judiciary.

3647. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting several survey reports prepared by the Corps of Engineers; to the Committee on Public Works and Transportation.

3648. A letter from he Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend title 38, United States Code, to increase the rates of disability compensation for disabled veterans; to increase the rates of dependency and indemnity compensation for their surviving spouses and children; and for other purposes; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DELANEY: Committee on Rules. House Resolution 1099. Resolution providing for the consideration of H.R. 11400. A bill to authorize the appropriation of specified dollar amounts for each of the National Science Foundation's major program areas (and certain subprograms), and to provide requirements relating to periods of availability and transfers of the authorized funds (Rept. No. 95–999). Referred to the House Calendar.

Mr. DELANEY: Committee on Rules. House Resolution 1100. Resolution providing for the consideration of H.R. 11495. A bill to authorize research, development, and demonstration projects relating to aviation, and for other purposes (Rept. No. 95–1000). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FISH: Committee on the Judiciary. H.R. 2660. A bill for the relief of Ernesto J. Garcia, Jr., with amendment (Rept. No. 95–1001). Referred to the Committee of the Whole House.

Mr. FISH: Committee on the Judiciary. H.R. 10210. A bill for the relief of Martina Navratilova (Rept. No. 95–1002). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER:

H.R. 11709. A bill to authorize the Secretary of Agriculture to conduct a study regarding purchases of agricultural land by persons who are not citizens or permanent residents of the United States and to require such persons to report such purchases to the Secretary of Agriculture; to the Committee on Agriculture.

By Mr. ANDREWS of North Carolina:

H.R. 11710. A bill to amend the Domestic Volunteer Service Act of 1973, and for other purposes; to the Committee on Education and Labor.

By Mr. VANIK (for himself, Mr. GIBBONS, Mr. ROSTENKOWSKI, Mr. JONES of Oklahoma, Mr. MIKVA, Mr. FISHER, Mr. STEIGER, Mr. VANDER JAGT, and Mr. FRENZEL):

H.R. 11711. A bill to improve the operation of the adjustment assistance programs for workers and firms under the Trade Act of 1974; to the Committee on Ways and Means.

By Mr. AuCOIN (for himself and Mr. LUNDINE):

H.R. 11712. A bill to amend title V of the Housing Act of 1949 to increase and extend authorities thereunder, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BEDELL (for himself and Mr. BALDUS):

By Mr. ERLENBORN:

H.R. 11724. A bill to amend title IX of the Education Amendments of 1972 (relating to nondiscrimination on the basis of sex) to include among organizations whose membership practices are exempted from coverage under the title service fraternities and service sororities; to the Committee on Education and Labor.

By Mr. FLIPPO (for himself, Mr. TREEN, Mr. NOLAN, Mr. MADIGAN, and Mr. PATTERSON of California):

H.R. 11725. A bill to provide for a research, development, and demonstration program to determine the feasibility of collecting in space solar energy to be transmitted to Earth and used to generate electricity for domestic purposes; to the Committee on Science and Technology.

By Mr. FRENZEL:

H.R. 11726. A bill to amend the Internal Revenue Code of 1954 to provide that blood donations shall be considered as charitable contributions deductible from gross income; to the Committee on Ways and Means.

By Mr. GILMAN (for himself, Mr. BEARD of Tennessee, Mr. BIAGGI, Mr. BURKE of Florida, Mr. DE LA GARZA, Mr. GUYER, Mr. MURPHY of Illinois, Mr. NEAL, Mr. RAILSBACK, Mr. RANGEL, Mr. RODINO, Mr. SKUBITZ, Mr. WOLFF, and Mr. ZEFERETTI):

H.R. 11727. A bill to place phencyclidine in schedule I of the Controlled Substances Act, to amend the Controlled Substances Act to increase the criminal penalties under that act for the unlawful manufacture, distribution, or dispensing of, or the possession with intent to distribute or dispense, phencyclidine and to increase the penalties under that act for illegal distribution of phencyclidine to persons under 21 years of age, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GONZALEZ:

H.R. 11728. A bill to amend title 5, United States Code, to include as creditable service under the civil service retirement system periods of service as contract technicans by individuals hired by private authority to perform work under Federal supervision pursuant to a contract between such private authority and the Federal Government, and for other purposes; jointly, to the Committees on Post Office and Civil Service, and Ways and Means.

By Mr. GORE (for himself), Mr. APPLEGATE, Mr. AUCOIN, Mr. BALDUS, Mr. BEARD of Tennessee, Mr. BEVILL, Mr. BLOUIN, Mr. BONIOR, Mr. JOHN L. BURTON, Mr. CHAPPELL, Mr. CORRADA, Mr. FUQUA, Mr. JEFFORDS, Mrs. LLOYD of Tennessee, Mr. MCHUGH, Mr. QUILLEN, and Mr. ROE):

H.R. 11729. A bill to direct the Secretary of Agriculture to establish a program for the purpose of indemnifying owners of dairy cattle which, under any Federal law, are destroyed in order to control or eradicate brucellosis, and for other purposes; to the Committee on Agriculture.

By Mr. HAMILTON:

H.R. 11730. A bill to encourage the use of alcohol in motor vehicle fuels by requiring certain retailers to make alcohol-blended fuels available for sale, by allowing the rapid amortization of facilities producing alcohol for use in motor vehicle fuels, and by exempting alcohol-blended fuels from certain requirements of the Clean Air Act; jointly, to the Committees on Interstate and Foreign Commerce, and Ways and Means.

By Mr. HIGHTOWER (for himself, Mr. GLICKMAN, Mr. JENRETTE, Mr. SEBELIUS, Mr. BURLESON of Texas, Mr. RUNNELS, Mr. KRUEGER, Mr. ROSE, Mr. RISENHOOVER, Mr. BREAUX, Mr. WATKINS, Mr. HALL, Mr. GAMMAGE, Mr. LUJAN, Mr. BAUCUS, Mr. YOUNG of Texas, and Mr. KAZEN):

H.R. 11731. A bill to provide wheat, feed grain, and cotton producers the opportunity to receive parity prices for the 1978 through 1981 crops; to the Committee on Agriculture.

By Mr. HILLIS:

H.R. 11732. A bill to amend the Federal Civil Defense Act of 1950 to allow Federal civil defense funds to be used by local civil defense agencies for natural disaster relief, and for other purposes; to the Committee on Armed Services.

By Mr. HOWARD (for himself, Mr. SHUSTER, Mr. JOHNSON of California, Mr. CLEVELAND, Mr. ANDERSON of California, Mr. ROE, Mr. DON H. CLAUSEN, Mr. MCCORMACK, Mr. HAGEDORN, Mr. BREAUX, Mr. MINETA, Mr. ABDNOR, Mr. NOWAK, Mr. EDGAR, Mr. HEFNER, Mr. FARY, Mr. RAHALL, Mr. APPLEGATE, Mr. EVANS of Georgia, Mr. ROBERTS, Mr. RONCALIO, Mr. GINN, Mr. OBERSTAR, Mr. AMBRO, and Mr. HAMMERSCHMIDT):

H.R. 11733. A bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, for highway safety, for mass transportation in urban and in rural areas, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. HOWARD (for himself, Mr. SHUSTER, Mr. BONIOR, Mr. ALEXANDER, Mr. OTTINGER, Mr. BLOUIN, Mr. WALGREN, and Mr. CORNWELL):

H.R. 11734. A bill to authorize appropriations for the construction of certain highways in accordance with title 23 of the United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. HUBBARD:

H.R. 11735. A bill to amend the Communications Act of 1934 to grant to the Federal Communications Commission the power to regulate pay television and to clarify the intent of the Congress regarding the regulation of pay television; to the Committee on Interstate and Foreign Commerce.

By Mr. JEFFORDS (for himself, Mr. AKAKA, Mr. ALLEN, Mr. BRODHEAD, Mr. EILBERG, Mr. DELLUMS, Mr. BONKER, Mr. BEDELL, Mr. CARTER, Mr. FREY, Mr. HEFTEL, Mr. MOFFETT, Mr. NEAL, Mr. PRESSLER, Mr. MADIGAN, Mr. MITCHELL of Maryland, Mr. MURPHY of Pennsylvania, Mr. PEASE, and Mr. SCHEUER):

H.R. 11736. A bill to authorize the Secretary of State to implement solar energy and other renewable energy projects in certain buildings owned by the United States in foreign countries; to the Committee on International Relations.

By Mr. JEFFORDS (for himself, Mr. AKAKA, Mr. ALLEN, Mr. BRODHEAD, Mr. EILBERG, Mr. DELLUMS, Mr. BONKER, Mr. BEDELL, Mr. CARTER, Mr. FITHIAN, Mr. FRASER, Mr. FREY, Mr. HEFTEL, Mr. MOFFETT, Mr. NEAL, Mr. PRESSLER, Mr. MADIGAN, Mr. MITCHELL, of Maryland, Mr. MURPHY of Pennsylvania, Mr. PEASE, Mr. SCHEUER, and Mr. WAXMAN):

H.R. 11737. A bill to direct the Secretary of Commerce to carry out a global market survey with respect to American-made solar energy technology equipment; to the Committee on Interstate and Foreign Commerce.

By Mr. JOHNSON of Colorado (for himself, Mr. BROWN of Ohio, Mrs. BURKE of California, Mr. DELLUMS, Mr. DRINAN, Mr. EDWARDS of Oklahoma, Mr. HANNAFORD, Mr. LEHMAN, Mr. MCCORMACK, Mr. GARY A. MYERS, Mr. PATTERSON of California, Mrs. SPELLMAN, Mr. STEERS, Mr. STOCKMAN, and Mr. WAXMAN):

H.R. 11738. A bill to direct the Secretary of Agriculture to conduct a study to determine the probable economic effects of a cessation of Federal assistance which serves to promote tobacco production and the manufacturing and marketing of tobacco products for human consumption; to the Committee on Agriculture.

By Mr. LAFALCE (for himself, Mr. AKAKA, Mr. CARNEY, Mr. CHAPPELL, Mr. DOWNEY, Mr. DUNCAN of Tennessee, Mr. EILBERG, Mr. ERTEL, Mrs. FENWICK, Mr. HARSHA, Mr. HUCKABY, Mr. HUGHES, Mr. LENT, Mr. LOTT, Mr. MITCHELL of New York, Mr. MURPHY of Pennsylvania, Mr. NOWAK, Mr. OTTINGER, Mr. PATTISON of New York, Mr. RANGEL, Mr. RICHMOND, Mr. SEIBERLING, Mr. YATRON, and Mr. ZEFERETTI):

H.R. 11739. A bill to amend the Internal Revenue Code of 1954 to encourage the targeting of manufacturing related investments in labor surplus areas by providing, with respect to property placed in service in such areas, an additional depreciation deduction and an additional investment tax credit, and by providing, with respect to real property located in such areas, an additional deduction for State and local real property taxes; to the Committee on Ways and Means.

By Mr. LEACH:

H.R. 11740. A bill to amend title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954 to provide mandatory social security coverage for Members of Congress, offsetting against any benefits based on such coverage the amount of any civil service annuities simultaneously payable (on the basis of such coverage) to such Members or their survivors; to the Committee on Ways and Means.

By Mr. LEDERER (for himself, Mr. BURKE of Massachusetts, Mr. BURLESON of Texas, Mr. CRANE, Mr. DUNCAN of Tennessee, Mr. JENKINS, Mr. KETCHUM, Mr. PICKLE, Mr. WAGGONNER, and Mr. ROSTENKOWSKI):

H.R. 11741. A bill to amend section 118 of the Internal Revenue Code of 1954 to clarify

the treatment of contributions in aid of construction to regulated electric or gas public utilities; to the Committee on Ways and Means.

By Mr. LUKEN (for himself, Mr. D'AMOURS, Ms. MIKULSKI, Mr. JEFFORDS, Mr. HUCKABY, Mr. STEERS, Mr. MADIGAN, Mr. TRIBLE, Mr. BLANCHARD, Mr. CLEVELAND, Mr. NEAL, Mr. MAZZOLI, Mr. CARR, Mr. DENT, and Mr. RYAN):

H.R. 11742. A bill to amend the Internal Revenue Code of 1954 to provide a refundable income tax credit for insulation and other energy-saving property installed on an individual's principal residence; to the Committee on Ways and Means.

By Mr. McHUGH (for himself, Mr. McDADE, Mr. GILMAN, Mr. BINGHAM, Mr. KOSTMAYER, and Mrs. FENWICK):

H.R. 11743. A bill to amend the Wild and Scenic Rivers Act to designate a segment of the Delaware River between the State of New York and the Commonwealth of Pennsylvania as a component of the National Wild and Scenic Rivers System, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. MARLENEE:

H.R. 11744. A bill to amend the Agricultural Act of 1949 for the purpose of directing the Secretary of Agriculture to permit the production of hay on set-asides of acreage on certain farms producing wheat or feed grains; to the Committee on Agriculture.

By Mr. MARTIN:

H.R. 11745. A bill to amend the Internal Revenue Code of 1954 to permit individuals to amortize certain rehabilitation expenditures for certified historic structures which are not depreciable; to the Committee on Ways and Means.

H.R. 11746. A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to claim a credit for amounts paid as tuition to provide education for his dependents; to the Committee on Ways and Means.

By Mr. MIKVA (for himself, Mr. AMBRO, Mr. CORMAN, Mr. CUNNINGHAM, Mr. D'AMOURS, Mr. EDWARDS of California, Mr. EILBERG, Mrs. FENWICK, Ms. HOLTZMAN, Mr. KETCHUM, Mr. LEHMAN, Mr. OTTINGER, Mr. ROSENTHAL, Mr. SANTINI, Mr. STOCKMAN, Mr. VENTO, and Mr. WHITEHURST):

H.R. 11747. A bill to amend the Foreign Assistance Act of 1961 to provide for a reduction of the U.S. contribution to the United Nations; to the Committee on International Relations.

By Mr. MIKVA (for himself, Mr. BRODHEAD, Mr. EDWARDS of Oklahoma, Mr. ERTEL, Mr. FORD of Tennessee, Mr. HUGHES, Mr. LaFALCE, Mr. McHUGH, Mr. RICHMOND, Mr. SCHEUER, Mr. SIMON, Mr. WAXMAN, Mr. WEISS, and Mr. WOLFF):

H.R. 11748. A bill to amend the Foreign Assistance Act of 1961 to provide for a reduction of the United States contribution to the United Nations; to the Committee on International Relations.

By Mr. MIKVA (for himself, Mr. BOLAND, Mr. BYRON, Mr. CARR, Mr. COCHRAN of Mississippi, Mr. DODD, Mr. EILBERG, Mr. FISHER, Mr. FLORIO, Mr. FORSYTHE, Mr. HARRINGTON, Mr. LaFALCE, Mr. LONG of Maryland, Mr. MADIGAN, Ms. MEYNER, Mr. MURPHY of Illinois, Mr. NEAL, Mr. PATTISON of New York, Mr. RINALDO, Mr. RYAN, and Mr. WIRTH):

H.R. 11749. A bill to correct inequities in certain franchise practices, to provide franchisors and franchisees with evenhanded protection from unfair practices, to provide consumers with the benefits which accrue from a competitive and open market economy, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MIKVA (for himself, Mr. DICKS, Mr. GLICKMAN, Mr. LENT, Mr. PATTERSON of California, Mr. RODINO, and Mr. STAGGERS):

H.R. 11750. A bill to amend the Social Security Act and the Internal Revenue Code of 1954 to provide that disability insurance benefits and the medicare program shall be financed from general revenues (pursuant to annual authorizations) rather than through the imposition of employment and self-employment taxes as at present, and to adjust the rates of such taxes (for purposes of financing the OASI program) accordingly; to the Committee on Ways and Means.

By Mr. MILFORD:

H.R. 11751. A bill to authorize the Federal Home Loan Bank Board to allow Federal savings and loan associations to issue reverse annuity mortgage instruments; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MOORE (for himself, Mr. KASTEN, Mrs. HOLT, Mr. ROBERT W. DANIEL, Jr., Mrs. SMITH of Nebraska, Mr. JOHN T. MYERS, Mr. HILLIS, Mr. SYMMS, Mr. LOTT, Mr. EMERY, Mr. MILLER of Ohio, Mr. ARMSTRONG, Mr. DUNCAN of Tennessee, Mr. GRASSLEY, Mr. HANSEN, Mr. KINDNESS, Mr. MADIGAN, and Mr. WHITEHURST):

H.R. 11752. A bill to increase agricultural exports, provide necessary agricultural credit, increase 1978 and 1979 market prices for wheat, feed grains, and cotton, revise and extend the sugar program, modernize and revise meat quotas, establish a farmer- and rancher-elected advisory board, restrict authority for agricultural embargoes, expand purchases of domestically produced agricultural commodities by United States Government agencies, revise certain agricultural tax laws, assign a higher priority for the use of natural gas for agricultural purposes, provide for congressional review of executive regulations and functions, and for other purposes; jointly, to the Committees on Agriculture, International Relations, and Ways and Means.

By Mr. MOORHEAD of Pennsylvania (for himself, Mr. ASHLEY, Mr. BARNARD, Mr. CAPUTO, Mr. FAUNTROY, Mr. LaFALCE, Mr. LUNDINE, Mr. McKINNEY, Mr. PATTISON of New York, Mr. REUSS, and Mr. VENTO):

H.R. 11753. A bill to authorize the Secretary of the Treasury to provide financial assistance for the city of New York; jointly, to the Committees on Banking, Finance and Urban Affairs, and Ways and Means.

By Mr. MOTTL:

H.R. 11754. A bill to designate the Veterans' Administration hospital located at 50 Irving Street, Washington, D.C., as the "Olin E. Teague Veterans' Hospital"; to the Committee on Veterans' Affairs.

By Mr. PANETTA (for himself, Mr. KOSTMAYER, Mr. AKAKA, Mr. BONIOR, Mr. BROWN of California, Mr. CORRADA, Mr. EDWARDS of California, Mr. EILBERG, Mr. HARRINGTON, Mr. LAGOMARSINO, Mr. LEGGETT, Mrs. MEYNER, Mr. MILLER of California, Mr. RYAN, Mr. STARK, Mr. WEAVER, and Mr. WEISS):

H.R. 11755. A bill to provide that contracts for rental assistance payments under section 8 of the U.S. Housing Act of 1937 be administered by local public housing agencies whenever possible, to permit such agencies to manage section 8 housing and to give them control over the eviction of tenants, to provide for higher rents for units which are located in low-vacancy areas or occupied by large families, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PEASE (for himself, Mr. MOFFETT, Mrs. SPELLMAN, Mr. PATTERSON of California, Mr. RANGEL, Mr. SARASIN, Mr. JENRETTE, and Mr. MATHIS):

H.R. 11756. A bill to amend the Export Administration Act of 1969 to prohibit exporting to Uganda of goods subject to control under that act; to the Committee on International Relations.

By Mr. PEASE (for himself, Mr. DERWINSKI, Mr. UDALL, Mr. COLLINS of Texas, Mr. KEMP, Mr. SIMON, Mr. JENRETTE, Mr. FRENZEL, and Mr. MANN):

H.R. 11757. A bill to amend section 8118 of title 5, United States Code, to provide for physical examinations with respect to claims for compensation for work injuries, and to provide that continuation of pay under such section shall not begin until the fourth day of disability; to the Committee on Post Office and Civil Service.

By Mr. PEASE (for himself, Mr. MOFFETT, Mrs. SPELLMAN, Mr. PATTERSON of California, Mr. RANGEL, Mr. SARASIN, Mr. JENRETTE, and Mr. MATHIS):

H.R. 11758. A bill to prohibit the importation of Ugandan products into the United States; to the Committee on Ways and Means.

By Mr. PEASE (for himself, Mr. MOFFETT, Mrs. SPELLMAN, Mr. PATTERSON of California, Mr. RANGEL, Mr. SARASIN, Mr. JENRETTE, and Mr. MATHIS):

H.R. 11759. A bill to amend the Tariff Schedules of the United States in order to prohibit the importation of coffee which is the product of Uganda; to the Committee on Ways and Means.

By Mr. QUIE:

H.R. 11760. A bill to amend the National School Lunch Act to extend the benefits of the act to certain handicapped adults; to the Committee on Education and Labor.

By Mr. RICHMOND (for himself, Mr. SYMMS, Mr. AKAKA, Mr. BALDUS, Mr. GLICKMAN, Mrs. HECKLER, Mr. HEFTEL, Mr. McHUGH, Mr. NOLAN, and Mr. PANETTA):

H.R. 11761. A bill to establish procedures for the purposes of planning the coordination of certain nutrition education activities of Federal Agencies; to establish certain programs for the purposes of coordinating nutrition education activities and of testing and demonstrating methods of increasing the quality, effectiveness, and availability of nutrition information; and for other purposes; to the Committee on Agriculture.

By Mr. RINALDO:

H.R. 11762. A bill to authorize the Secretary of Health, Education, and Welfare to establish a grant program designed to develop methods of prevention and treatment of domestic violence, and for other purposes; jointly, to the Committees on Education and Labor, Interstate and Foreign Commerce, and the Judiciary.

By Mr. ROGERS (for himself and Mr. CARTER):

H.R. 11763. A bill to amend the Public Health Service Act to revise and extend the authorities under that act relating to health services research, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 11764. A bill to amend the Developmental Disabilities Services and Facilities

Construction Act to revise and extend the programs under that act, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ST GERMAIN:

H.R. 11765. A bill to amend the act popularly known as the National Gold and Silver Stamping Act of 1906 to require proper disclosure in representations of quality gold and silver jewelry, to prescribe the minimum statutory standard of fineness of gold articles at 10 karat fineness, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ST GERMAIN (for himself and Mr. LUNDINE):

H.R. 11766. A bill to provide for the furnishing of congregate housing services under the U.S. Housing Act of 1937; to the Committee on Banking, Finance and Urban Affairs.

By Mr. ST GERMAIN (for himself, Mr. REUSS, Mr. ASHLEY, Mr. MOORHEAD of Pennsylvania, Mr. ANNUNZIO, Mr. HANLEY, Mr. PATTERSON of California, Mr. LAFALCE, Mr. MATTOX, Mr. STANTON, Mr. MCKINNEY, Mr. HANSEN, Mr. HYDE, Mr. LEACH, and Mr. HOLLENBECK):

H.R. 11767. A bill to expand and facilitate urban lending investment by Federal savings and loan associations, and to simplify section 5(c) of the Home Owners' Loan Act of 1933; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SKUBITZ (for himself, Mr. RISENHOOVER, Mr. WATKINS, Mr. CHARLES WILSON of Texas, and Mr. WINN):

H.R. 11768. A bill to provide for the construction of the Sam Houston Memorial Highway between Kansas City, Mo., and Houston, Tex.; to the Committee on Public Works and Transportation.

By Mr. SOLARZ (for himself, Mr. AKAKA, Mr. CORRADA, Mr. DELLUMS, Mr. EDWARDS of California, Mr. EILBERG, Mr. FISH, Mr. KREBS, Mr. LLOYD of California, Mr. ROSENTHAL, Mr. SCHEUER, Mr. STOCKMAN, and Mr. WAXMAN):

H.R. 11769. A bill to amend title 5, United States Code, to provide sufficient flexibility in Federal employee work schedules to allow Federal employees to meet the obligation of their faith; to the Committee on Post Office and Civil Service.

By Mr. STEIGER:

H.R. 11770. A bill to amend the Internal Revenue Code of 1954 with respect to the estate and gift tax treatment of certain retirement plans; to the Committee on Ways and Means.

H.R. 11771. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to employers for the expenses of providing training programs for employees and prospective employees; to the Committee on Ways and Means.

H.R. 11772. A bill to amend the Internal Revenue Code of 1954 to provide that an unmarried individual shall be treated as a head of a household if the individual maintains a household for a child of such individual, without regard to whether such household is the home of such individual; to the Committee on Ways and Means.

By Mr. STEIGER (for himself, Mr. JENKINS, Mr. JONES of Oklahoma, and Mr. FRENZEL):

H.R. 11773. A bill to amend the Internal Revenue Code of 1954 to provide pre-1969 tax treatment for capital gains; to the Committee on Ways and Means.

By Mr. UDALL:

H.R. 11774. A bill to amend title 5, United States Code, and the Federal Salary Act of 1967 to require pay rate distinctions for different grades, steps, schedules, and levels under statutory pay systems; to the Committee on Post Office and Civil Service.

By Mr. UDALL (for himself, Mr. SEBELIUS, and Mr. SEIBERLING):

H.R. 11775. A bill to amend the Pennsylvania Avenue Development Corporation Act of 1972 to authorize appropriations and borrowings from the U.S. Treasury to further implementation of the development plan for Pennsylvania Avenue between the Capitol and the White House, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. VANIK:

H.R. 11776. A bill to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition; to the Committee on Ways and Means.

By Mr. WEAVER (for himself, Mr. AMMERMAN, Mr. AUCOIN, Mr. BAUCUS, Mr. BOWEN, Mr. BROWN of California, Mrs. BURKE of California, Mr. PHILLIP BURTON, Mr. DUNCAN of Oregon, Mr. FRASER, Mr. OBERSTAR, Mr. RICHMOND, and Mr. UDALL):

H.R. 11777. A bill to authorize and direct the Secretary of Agriculture to provide cooperative forestry assistance to States and others, and for other purposes; to the Committee on Agriculture.

By Mr. WEAVER for himself, Mr. AMMERMAN, Mr. AUCOIN, Mr. BAUCUS, Mr. BOWEN, Mr. BROWN of California, Mrs. BURKE of California, Mr. PHILLIP BURTON, Mr. DUNCAN of Oregon, Mr. FRASER, Mr. KREBS, Mr. OBERSTAR, Mr. SYMMS, and Mr. UDALL):

H.R. 11778. A bill to authorize and direct the Secretary of Agriculture to carry out forest and rangeland renewable resources research, to provide cooperative assistance for such research to States and other, and for other purposes; to the Committee on Agriculture.

By Mr. WEAVER (for himself, Mr. FOLEY, Mr. AMMERMAN, Mr. AUCOIN, Mr. BAUCUS, Mr. BOWEN, Mr. BROWN of California, Mrs. BURKE of California, Mr. DUNCAN of Oregon, Mr. FRASER, Mr. JEFFORDS, Mr. JENRETTE, Mr. JONES of Tennessee, Mr. KREBS, Mr. LOTT, Mr. MATHIS, Mr. NOLAN, Mr. OBERSTAR, Mr. RICHMOND, Mr. SYMMS, Mr. THORNTON, and Mr. UDALL):

H.R. 11779. A bill to provide for an expanded and comprehensive extension program for forest and rangeland renewable resources; to the Committee on Agriculture.

By Mr. WEISS (for himself, Mr. AKAKA, Mr. BONIOR, Mrs. COLLINS of Illinois, Mr. CONYERS, Mr. EDGAR, Mr. EDWARDS of California, Mr. EILBERG, Mr. FORD of Tennessee, Mr. GARCIA, Mr. HARRINGTON, Ms. HOLTZMAN, Mr. KASTENMEIER, Ms. KEYS, Mr. KILDEE, Mr. LE FANTE, Mr. LENT, Ms. MIKULSKI, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. NOLAN, Mr. PATTISON of New York, Mr. RICHMOND, Mr. ROSENTHAL, and Mr. SEIBERLING):

H.R. 11780. A bill to facilitate the economic adjustment of communities, industries, and workers to civilian-oriented initiatives, projects, and commitments when they have been substantially and seriously affected by reductions in defense contracts, military facilities, and arms export which have occurred as a result of the Nation's efforts to pursue an international arms control policy and to realine defense expenditures according to changing national security requirements, and to prevent the ensuing dislocations from contributing to or exacerbating recessionary effects; jointly, to the Committees on Armed Services, Banking, Finance, and Urban Affairs; Education and Labor, Government Operations, and Ways and Means.

By Mr. WYDLER (for himself, Mr. DOWNEY, Mr. LENT, Mr. PIKE, and Mr. WOLFF):

H.R. 11781. A bill to amend title 28, United States Code, to move the place for holding court for the District Court for the Eastern District of New York to Brooklyn and Hempstead, and for other purposes; to the Committee on the Judiciary.

By Mr. BROWN of California (for himself, Mr. WEAVER, Mr. KREBS, and Mr. AMMERMAN):

H.R. 11782. A bill to require the Secretary of Agriculture to periodically report to the Congress on the status, condition, and productive potential of privately owned forest land; to the Committee on Agriculture.

By Mr. BYRON:

H.R. 11783. A bill to prohibit fuel adjustment clauses in electric utility rate schedules; to the Committee on Interstate and Foreign Commerce.

By Mr. CONYERS:

H.R. 11784. A bill to revise the overtime compensation requirements of the Fair Labor Standards Act of 1938 to provide that after December 31, 1981, employees who work more than 35 hours in any workweek shall receive overtime compensation for such work at twice their regular rate of pay, and for other purposes; to the Committee on Education and Labor.

By Mr. ERTEL (for himself, Mr. STUDDS, Mr. LUKEN, Mr. BOLAND, Mr. MICHAEL O. MYERS, Mr. DAN DANIEL, Mr. MARKEY, Mrs. LLOYD of Tennessee, and Mr. BURKE of Massachusetts):

H.R. 11785. A bill to amend the Tariff Schedules of the United States to repeal, in the case of certain wearing apparel and nonrubber footwear, the special tariff treatment accorded to articles assembled abroad with components produced in the United States; to the Committee on Ways and Means.

By Mr. FRENZEL:

H.R. 11786. A bill to amend the Federal Election Campaign Act of 1971 to make certain changes in the reporting and disclosure requirements of such act, and for other purposes; to the Committee on House Administration.

By Mr. KREBS:

H.R. 11787. A bill to amend the Fair Labor Standards Act of 1938 to exempt from the overtime compensation requirements of that act Federal employees engaged in the grading of fruits and vegetables; to the Committee on Education and Labor.

By Mr. LAFALCE (for himself, Mr. IRELAND, Mr. RICHMOND, and Mr. ST GERMAIN):

H.R. 11788. A bill to establish a Federal Insurance Commission to regulate the insurance industry, to establish Federal Product Liability Tort law standards, and to amend the Internal Revenue Code of 1954 to provide that trusts established for the payment of product liability claims and related expenses shall be exempt from income tax, that a deduction shall be allowed for contributions to such trusts, and for other purposes; jointly, to the Committees on Banking, Finance and Urban Affairs, Interstate and Foreign Commerce, and Ways and Means.

By Mr. MCKINNEY (for himself, Mr. CAPUTO, and Mr. GRADISON):

H.R. 11789. A bill to establish a Neighborhood Reinvestment Corporation; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MATHIS (for himself, Mr. ANDREWS of North Dakota, Mr. BEVILL, Mr. CARNEY, Mr. DAVIS, Mr. DERWINSKI, MR. DORNAN, Mr. EDWARDS of Oklahoma, Mr. EVANS of Georgia, Mr. KEMP, Mr. KETCHUM, Mr. LOTT, Mr. MCDONALD, Mr. MANN, Mr. MOTTL, Mr. WAMPLER, and Mr. YOUNG of Missouri):

H.R. 11790. A bill to insure a comprehensive, periodic review of U.S. participation in the World Bank and the International Monetary Fund; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MAZZOLI:

H.R. 11791. A bill to amend section 601 (a)(2) of the Legislative Reorganization Act of 1946 to provide that the salaries of Senators and Representatives may not be subject to any cost-of-living adjustment under such section before October 1, 1979; to the Committee on Post Office and Civil Service.

By Mr. STARK (for himself, Mr. ADDABBO, Mr. MITCHELL of Maryland, Mr. NOLAN, Mr. KEMP, Ms. KEYS, Mr. EDWARDS of California, Mr. LEHMAN, Mr. EDGAR, Mr. VENTO, Mr. MOAKLEY, Mr. ROE, Mrs. LLOYD of Tennessee, Mr. RICHMOND, Mr. WALGREN, Mr. AKAKA, Mr. FRASER, Mrs. SPELLMAN, Mr. HARRINGTON, Mr. PATTISON of New York, Mr. PATTERSON of California, Mr. BONKER, Mr. Burke of Massachusetts, Mr. BRODHEAD, Mr. PRESSLER, and Ms. COLLINS of Illinois):

H.R. 11792. A bill to amend title XVI of the Social Security Act to provide that an individual who applies for supplemental security income benefits on the basis of disability shall be considered presumptively disabled if he has received social security or supplemental security income benefits as a disabled individual within the preceding 5 years; to the Committee on Ways and Means.

By Mr. STARK (for himself, Mr. SOLARZ, Mr. LE FANTE, and Mr. HANSEN):

H.R. 11793. A bill to amend title XVI of the Social Security Act to provide that an individual who applies for supplemental security income benefits on the basis of disability shall be considered presumptively disabled if he has received social security or supplemental security income benefits as a disabled individual within the preceding 5 years; to the Committee on Ways and Means.

By Mr. WHALEN:

H.R. 11794. A bill to establish a comprehensive program of long-term care services for aged and disabled individuals, and to provide for the creation of community long-term care centers and State long-term care agencies as part of a new administrative structure for the organization and delivery of such services; jointly, to the Committees on Agriculture, Education and Labor, Interstate and Foreign Commerce, the Judiciary, and Ways and Means.

By Mr. DAVIS (for himself, Mr. MANN, Mr. SPENCE, Mr. JENRETTE, Mr. DERRICK, and Mr. HOLLAND):

H.J. Res. 809. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."; to the Committee on Post Office and Civil Service.

H.J. Res. 810. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."; to the Committee on Post Office and Civil Service.

By Mr. GIAIMO (for himself, Mr. COTTER, Mr DODD, Mr. MCKINNEY, Mr. SARASIN, and Mr. MOFFETT):

H.J. Res. 811. Joint resolution to authorize and request the President to issue a proclamation designating April 18, 1978, as "Education Day, U.S.A."; to the Committee on Post Office and Civil Service.

By Mr. GUYER:

H.J. Res. 812. Joint resolution to provide for the designation of March 6, 1979, as "Private Enterprise Day"; to the Committee on Post Office and Civil Service.

By Mr. MOORHEAD of Pennsylvania:

H.J. Res. 813. Joint resolution extending the deadline for the ratification of the equal rights amendment; to the Committee on the Judiciary.

By Mr. ST GERMAIN (for himself, and Mr. GEPHARDT):

H.J. Res. 814. Joint resolution to declare June 4 through 10, 1978, to be "National Neighborhood Week"; to the Committee on Post Office and Civil Service.

By Mr. HANSEN (for himself, Mr. MURPHY of New York, and Mr. ROGERS):

H. Con. Res. 545. Concurrent resolution expressing the sense of the Congress with regard to the disposition by the United States of any right to, title to, or interest in the property of Canal Zone agencies and any real property located in the Canal Zone; to the Committee on Merchant Marine and Fisheries.

By Mr. JEFFORDS (for himself, Mr. AKAKA, Mr. ALLEN, Mr. BRODHEAD, Mr. EILBERG, Mr. DELLUMS, Mr. BONKER, Mr. BEDELL, Mr. CARTER, Mr. FITHIAN, Mr. FRASER, Mr. FREY, Mr. HEFTEL, Mr. MOFFETT, Mr. NEAL, Mr. PRESSLER, Mr. MADIGAN, Mr. MITCHELL of Maryland, Mr. MURPHY of Pennsylvania, Mr. PEASE, Mr. SCHEUER, and Mr. WAXMAN):

H. Con. Res. 546. Concurrent resolution expressing the sense of the Congress that the United Nations should convene a World Alternate Energy Conference having as its major purpose the establishment of an International Alternate Energy Commission to facilitate the transfer among countries of information relating to alternate energy sources and to otherwise encourage the use of alternate energy sources; to the Committee on International Relations.

By Mr. KEMP (for himself, Mr. FRASER, Mr. JACOBS, Mr. WALKER, Mr. MOLLOHAN, Mr. BURGENER, Mr. LE FANTE, Mr. VENTO, Mr. CAPUTO, Mr. COHEN, Mr. DORNAN, and Mr. BOB WILSON of California):

H. Con. Res. 547. Concurrent resolution urging the Canadian Government to reassess its policy of permitting the killing of newborn harp seals; to the Committee on International Relations.

By Mr. CORNWELL (for himself, Mr. AUCOIN, Mr. BEILENSON, Mr. BINGHAM, Mr. BLANCHARD, Mr. BURKE of Florida, Mr. PHILLIP BURTON, Mr. BRODHEAD, Mr. DELLUMS, Mr. DRINAN, Mr. EDWARDS of California, Mr. EILBERG, Mr. EMERY, Mr. EVANS of Delaware, Mr. FRASER, Mr. GUYER, Mr. HARRINGTON, Mr. KEMP, Mr. MARTIN, Mr. MAZZOLI, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. MOAKLEY, Mr. OTTINGER, Mr. PATTERSON of California, and Mr. PEPPER):

H. Res. 1101. Resolution expressing the sense of the House of Representatives with respect to the killing of some 1,000 dolphins by Japanese fishermen in February 1978, and encouraging the Government of Japan to reassess its policy in permitting such killing; to the Committee on International Relations.

By Mr. CORNWELL (for himself, Mr. EDGAR, Mr. EDWARDS of Oklahoma, Mr. JACOBS, Mr. JEFFORDS, Mr. LAGOMARSINO, Mrs. MEYNER, Ms. MIKULSKI, Mr. RICHMOND, Mr. RODINO, Mr. ROE, Mr. SEIBERLING, Mrs. SPELLMAN, Mr. STARK, Mr. STEERS, Mr. STUDDS, Mr. WAXMAN, Mr. WEISS, Mr. WHITEHURST, Mr. WIRTH, Mr. WOLFF, and Mr. YOUNG of Florida):

H. Res. 1102. Resolution expressing the sense of the House of Representatives with respect to the killing of some 1,000 dolphins by Japanese fishermen in February 1978, and encouraging the Government of Japan to reassess its policy in permitting such killing; to the Committee on International Relations.

By Mr. GONZALEZ:

H. Res. 1103. Resolution to recognize the contribution of Bernardo de Galvez to the independence of the United States, and the role of the Order of Granaderos de Galvez; to the Committee on Post Office and Civil Service.

By Mr. LEACH (for himself, Mr. BEILENSON, Mr. KEMP, Mr. STEERS, Ms. HOLTZMAN, Mr. FLOOD, Mr. TRAXLER, Mr. PEPPER, Mr. EDWARDS of California, and Mr. CORMAN):

H. Res. 1104. Resolution condemning the recent poisoning by terrorists of oranges exported from Israel; to the Committee on International Relations.

By Mr. WOLFF (for himself and Mr. BURKE of Florida):

H. Res. 1105. Resolution providing for the printing of the Congressional Resource Guide to the Federal Effort on Narcotics Abuse and Control; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

343. By the SPEAKER: Memorial of the Legislature of the State of New York, relative to human rights in northern Ireland; to the Committee on International Relations.

344. Also, memorial of the Legislature of the State of New York, relative to the proposed sale of fighter planes to Egypt and Saudi Arabia; to the Committee on International Relations.

345. Also, memorial of the Legislature of the State of Idaho, relative to development of gasohol; to the Committee on Science and Technology.

346. Also, memorial of the Legislature of the State of Arizona, relative to th[illegible]omic health of the copper mining industry; to the Committee on Ways and Means.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

421. By the SPEAKER: Petition of Hugh L. Carey, Governor of the State of New York, relative to a national urban policy; to the Committee on Banking, Finance and Urban Affairs.

422. Also, petition of the River Oaks Volunteer Fire Department, Fort Worth, Tex., relative to designating a memorial Sunday for firefighters disabled or killed in the line of duty; to the Committee on Post Office and Civil Service.

423. Also, petition of Charles T. Logue and other members of the Pennsylvania House of Representatives, Harrisburg, relative to an investigation of U.S. involvement in hostilities in northern Ireland; to the Committee on Rules.

SENATE—*Wednesday, March 22, 1978*

The Senate met at 9:30 a.m., on the expiration of the recess, in executive session, and was called to order by Hon. ROBERT MORGAN, a Senator from the State of North Carolina.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty God, Father of all mercies, we, Thine unworthy servants, do give Thee most humble and hearty thanks for all Thy goodness and loving kindness to us, and to all men. We bless Thee for our creation, preservation, and all the blessings of this life; but above all, for Thine inestimable love in the redemption of the world by our Lord Jesus Christ; for the means of grace and the hope of glory. And we beseech Thee, give us that due sense of all Thy mercies, that our hearts may be unfeignedly thankful, and that we may show forth Thy praise, not only with our lips, but in our lives; by giving up our lives to Thy service, and by walking before Thee in holiness and righteousness all our days; through Jesus Christ our Lord, to whom with Thee and the Holy Spirit be all honor and glory, world without end. Amen.

Almighty God, who has given us grace at this time with one accord to make our common supplications unto Thee; and dost promise that where two or three are gathered together in Thy name Thou wilt grant their requests; fulfill now, O Lord, the desires and petitions of Thy servants as may be most expedient for them; granting us in this world knowledge of Thy truth, and in the world to come life everlasting. Amen.

—Common Prayer.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 22, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT MORGAN, a Senator from the State of North Carolina, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. MORGAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent, as in legislative session, that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SPECIAL ORDERS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Tennessee (Mr. BAKER) is recognized, as in legislative session, for not to exceed 15 minutes.

Mr. BAKER. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. BAKER. Mr. President, does the order provide for recognition to speak as in legislative session?

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. BAKER. Mr. President, is special permission or unanimous consent required to introduce a bill during the course of this time?

The ACTING PRESIDENT pro tempore. Yes, unanimous consent is required.

Mr. BAKER. I thank the Chair.

Mr. President, I ask unanimous consent that I may be recognized at this time for the purpose of introducing a bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The Senator from Tennessee is recognized.

S. 2777—JOB OPPORTUNITIES AND FAMILY SECURITY ACT OF 1978

Mr. BAKER. Mr. President, I send to the desk for appropriate reference a bill introduced on behalf of myself, and Senators BELLMON, RIBICOFF, DANFORTH, MARK O. HATFIELD, STEVENS, and YOUNG, entitled the "Job Opportunities and Family Security Act of 1978."

Mr. President, this legislation represents a collective effort to effect necessary and meaningful reform of the present welfare system. Few, if any, problems have so perplexed the Congress and the country as how to adequately and fairly provide for the genuinely needy among us without encouraging dependence and discouraging work.

The bill which we offer today will not solve that problem once and for all, but it will move us a large step forward at a pace we should proceed and a cost we can afford. Though some of the cosponsors of this measure may differ as to what constitutes the ideal welfare system, we all share the view that welfare reform is essential and that it should be enacted this year. We are disturbed by the growing prospect that reform will not be achieved because of the cost and complexity of the administration's proposal. It is for that reason, and others, that we drafted this legislation.

The goals of our welfare reform alternative may be summarized as follows: To increase family stability; to reduce the current inconsistencies among the eligibility criteria of the respective States; to simplify and streamline the administration of welfare so as to avoid duplication and prevent fraud; to provide substantial fiscal relief to State and local governments; to provide major new incentives for the private sector to hire the hard to employ; and to make it more profitable to work than to collect welfare.

In order to achieve these objectives, our bill would begin by reducing major incentives for fathers to abandon their families. This would be done by mandating coverage of intact families in all States. We would attempt to reduce inconsistencies in eligibility criteria by establishing a national minimum benefit floor and a ceiling on benefits for which Federal matching funds would be available. Also, we would adopt uniform asset limitations and standardized deductions from earned income.

We would provide substantial fiscal relief to State and local governments by increasing the Federal matching share of AFDC costs. We would encourage private sector employment by providing job creation tax credits and wage vouchers targeted at the hard to employ. And we would make private employment more profitable than collecting welfare by expanding the earned income tax credit and returning it to the employee in his weekly or monthly paycheck.

In the process of drafting this legislation, Mr. President, I had the honor and the privilege of working with distinguished colleagues on both sides of the aisle:

Senator RIBICOFF, of Connecticut, who possesses such special knowledge and strength in this field and who not only serves as one of our colleagues in the Senate but served as this Nation's first Secretary of Health, Education, and Welfare in the administration of President Kennedy;

Senator BELLMON, of Oklahoma, the distinguished ranking Republican on the Senate Budget Committee who recognizes that few aspects of our effort to rationalize and bring coherence to the welfare system in the United States are more important than the budget impact and its effect on other governmental activities;

And Senator DANFORTH, of Missouri, who has shown such compassion and concern for the underprivileged, the underemployed, and the unemployed and who has brought such distinction to his State, to this body, and to himself in

his first full year of service in the Senate.

These and others have worked, Mr. President. in formulating this measure. I am particularly privileged, to have this opportunity to offer on behalf of all of us, this package, not because it is a perfect answer to the welfare challenge, but because I think it is the best we can do at this time and marks a significant step forward in the process of trying to improve the welfare system.

Mr. RIBICOFF. Mr. President, I am pleased to join with my colleagues Senators BAKER, BELLMON, and DANFORTH, in introducing a welfare reform proposal today. Welfare reform has been a difficult and controversial issue over many, many years. The question of how to help the Nation's poor has generated much discussion but few solutions. The bill we are introducing today is not the final answer to poverty in America, but it is a step forward.

This bill represents a moderate incremental approach. As long as the choices in welfare reform are all or nothing, we will get nothing. However, I do not believe that we should sacrifice another generation of people while we wait for the perfect answer. This legislation will not solve all our problems, but it will improve the operation of a welfare system and the situation of the Nation's poor.

We can all recite what is wrong with our current system. Today we have scattered administration of overlapping and sometimes inconsistent programs. In half of our States we push a father out of the home before we aid his family. We do little to provide meaningful job training or work experience. Too often work does not pay. Benefits vary widely from State to State. And some of our localities are straining under the financial burden.

This bill solves some of the problems in our current nonsystem and lessens others. In this legislation we expand the AFDC-unemployed parents program nationwide into a family security program which provides aid to poor families with children without forcing the unemployed father to desert his family. Mandating AFDC–UP in every State does not increase the fiscal burdens on these States because our bill also provides for an increased Federal match.

Mr. President, I was Secretary of HEW when the AFDC program was first expanded to two-parent families where the father was unemployed. In 1961 we could only get that program on a short-term trial basis. In 1962 I recommended its extension for 5 more years. The program has remained in existence at State option ever since. Times change; we learn from our experiences. Now I believe the country is ready to aid all poor families without forcing them to split up.

Our proposed family security program improves AFDC in other ways. While FSP/AFDC-UP would remain a State-administered program, eligibility criteria and the earned income disregard would be standardized. A national minimum benefit reaching 65 percent of the nonfarm poverty level in 1985 is phased in. At the same time consistency would be encouraged by the establishment of a ceiling of 100 percent of the poverty level on payments for which Federal matching would be available.

Poverty is a national—not a State or local—problem and a national responsibility. This legislation recognizes that fact by increasing the Federal matching rate. This increased match would provide substantial fiscal relief to State and local governments. The design of the increase also provides an incentive for States—many of which have surpluses—to relieve hard-pressed localities of the non-Federal share of costs.

Today the earned income tax credit is our major aid and encouragement to the working poor. This credit in effect rebates to our lowest paid workers their payroll taxes. This is significant because for these workers, payroll taxes are a much greater burden than income taxes. Our bill broadens the earned income tax credit by increasing it from 10 to 15 percent and extending it to the poverty line. Since the earned income tax credit would not be available for subsidized public service jobs, work in the private sector or in regular public jobs would remain more profitable for the employee.

The legislation retains universal coverage for food stamps but allows States the option of cashing them out for the SSI population.

Our bill enlarges the emergency assistance programs of the States and increases flexibility in the use of emergency assistance funds.

The legislation also reduces the SSI age 1 year at a time until it reaches age 62 in 1982.

Today we do too little to link the poor, the inexperienced, and the poorly trained to our regular job market. Public service employment is important. However, it should not be used just to hire those who could find work anyway. Portions of CETA must be targeted to the long-term hard-core unemployed. Our bill does not deal with the countercyclical function of CETA, but it does require some targeted CETA jobs. Most jobs in our economy are in the private sector. We must look there for jobs. WIN can be improved. Those registrants without experience in basic job search and job retention skills must be given those skills. Just pointing a man who has lost hope to a want-ad does not get him a job. State employment agencies have links into the private job market which have not traditionally been used to benefit the poor and the hard to employ. We must use those services.

Many private employers are reluctant to take a chance on the long-term unemployed or recipients of public assistance. Our bill provides some incentive to employers in the form of either a $1 per hour job voucher or $1 per hour tax credit. The employer chooses. Eligible employees are AFDC recipients, those unemployed for 26 weeks, unemployed youth and former CETA public service employment job holders who have sought work unsuccessfully. Employers must pay the prevailing wage and may not displace full-cost workers. In designing these options we have tried to cut out much of the redtape and other problems which discourage employer participation without eliminating protections against abuse. The programs are designed to encourage private employer involvement without Government intervention in the workplace or labor-management contracts.

Our goal is to put people to work. It is better and cheaper to do so for $1 per hour in the private sector than for $3 per hour in a public service job.

Mr. President, this bill is not perfect. If it became law tomorrow, our problems would not be over. But our situation and the situation of our Nation's poor would be better than it is today. And this bill costs under $9 billion as compared to $20 billion for the President's proposal.

I have always believed in moving step by step and in experimenting. This legislation provides authority for statewide pilot tests of a number of different "next steps" such as: complete cash-out of food stamps; consolidated, federalized approaches similar to the administration plan; block grants to States with State flexibility in program design; and one-stop service centers. This bill also provides for a national commission to review the legislation and its effects at the end of 4 years.

Mr. President, poverty is the overhead in the operation of our society—welfare is the cost of our failures. As long as the choices in welfare reform are all or nothing, we will get nothing. Eight years ago we tried and failed to make major improvements in our welfare system. We cannot sacrifice another group of people while we wait for the perfect answer. Let us take a big step forward this year.

I want to pay special tribute to the Senator from Tennessee (Mr. BAKER) and the Senator from Oklahoma (Mr. BELLMON), and the Senator from Missouri (Mr. DANFORTH) for the work on this legislation. The major concept was that of Senator BAKER and Senator BELLMON. When they talked with me about their thoughts and ideas, I was very much intrigued. It seemed to me that, in the work that they had put together, they really approached a new concept which Presidents had worked on and failed; Secretaries of HEW had worked on and failed, and many Members of the legislative bodies had worked on and failed. I have had some discussion about the Baker bill with other Senators and members of the executive branch. Frankly, they have expressed some doubt that from the other side of the aisle could come such a welfare reform package. I have said that, from my experience as Secretary and in this body, unless we get a welfare program that cuts across different philosophical thinking and across party lines, we are not going to get welfare reform. We shall talk about it; we shall argue about it; there will be much heat about it, but no bill will see the light of day.

I do not know whether this one will or not. But for the first time, there is

the possibility of doing something about welfare. I think, having reviewed all welfare proposals, that it is the best one I have seen. It has really been a privilege to work with Senators BAKER, BELLMON, and DANFORTH and their staffs. Ms. Susan Irving of my staff, who has been deeply involved in all welfare and social programs that come across my desk, has worked very closely with the staffs of the other Senators.

I think it is important to realize that there has been complete openness to ideas and changes on the part of Senators BAKER, BELLMON, and DANFORTH. We recognize and realize that this is not the final bill. We know that when it goes through hearings, there will be refinements. I am sure that Senator BAKER, as well as I, will be more than pleased to welcome any constructive changes. Our basic objective is to try to solve the welfare mess. It is a mess; it is expensive; it is debilitating. And we must have a constructive approach. I cannot be too high in my praise of the Senator from Tennessee and the Senator from Oklahoma for what they have achieved.

Somehow, if we are going to have a welfare bill in this session or the next, my prediction is that it will be built around the Baker-Bellmon proposal. So I am proud to join with my colleagues in cosponsoring this legislation.

Mr. President, I ask unanimous consent that a summary of the bill appear at the conclusion of all introductory remarks by the sponsors of this legislation and just before the section-by-section analysis of this bill.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

(See exhibit 1.)

Mr. BAKER. Will the Senator yield to me for just a moment?

Mr. RIBICOFF. I am pleased to yield to the Senator from Tennessee.

Mr. BAKER. Mr. President, I thank the distinguished Senator from Connecticut, not only for his report and for his comments just made, but for his extensive assistance in conceptualizing this program and designing the structure of legislative language that has now been introduced. I believe no one in the Senate, indeed, no one in the country, has a sounder knowledge of this problem than the distinguished Senator from Connecticut. I never cease to be amazed by the breadth of his vision and the depth of his knowledge, and I am pleased to be associated with him in this endeavor.

The PRESIDING OFFICER. Under the previous order, the Senator from Missouri (Mr. DANFORTH) is recognized as in legislative session for not to exceed 15 minutes.

Mr. DANFORTH. Mr. President, I am happy to join as a cosponsor of the job opportunities and family security bill. I am honored to participate in this effort with such distinguished Members of the Senate as Senators BAKER, BELLMON, and RIBICOFF.

The welfare reform bill being introduced today does not attempt to turn the welfare system upside down. Although there is some intellectual appeal in sweeping away everything from the past and starting over with a new, comprehensive program, the people who receive welfare are not intellectual concepts but very real people—the poorest in our Nation—with very real problems and needs. We must be careful that any reforms we make do not just look good on paper, but actually work. Therefore, our proposal does not throw away the old system, but makes critically needed and long called-for reforms in the context of that system.

The proposed plan removes many of the inequities in our existing welfare system. It provides for the first time a nationwide minimum benefit. This guarantees that every welfare recipient will have enough income with which to live, without regard to where he or she resides. The provision for a uniform, nationwide assets test assures that welfare is available to all those who are identically situated throughout the Nation.

The bill also corrects the anti-family bias which presently exists in our welfare system. By mandating welfare coverage for families irrespective of the presence of two parents, the bill reduces the incentive for poor families either to separate or to engage in legal deception.

Perhaps most importantly, the bill provides real job opportunities for those on welfare who are able to work. Rather than depend on a greatly expanded program of public service jobs, our proposal sets forth an ambitious set of incentives for private employers to hire welfare recipients, the long-term unemployed, and unemployed teenagers. At the same time, the bill increases the earned income tax credit so that those who are able to find work have real financial incentives for accepting that work.

And, the bill provides substantial fiscal relief to States and local governments, enabling those governments to use their scarce resources to tackle other, pressing local problems.

We are not holding the bill out as a cure-all for all problems in the welfare system. The bill provides for pilot testing of a variety of alternative approaches to the present welfare programs, including a complete cash out of food stamps, a consolidation of the Federal welfare programs, along the lines of the administration's plan, and the provision of no-strings attached block grants to States. In that way, we will have real experience to measure the value of these alternatives.

In enacting welfare legislation, I believe we must always remember that there are very real people across our Nation who need economic assistance. Our goal must be to improve the assistance that those people receive in a manner which does not disrupt their lives and which does not create new, unforeseen problems.

The bill being introduced today takes a careful, reasoned approach which builds on the current programs to create a much improved and fairer system of benefits for those truly in need.

Mr. President, I suggest the absence of a quorum.

Mr. BAKER. Will the Senator withhold that for just a moment?

Mr. DANFORTH. Yes.

Mr. BAKER. If the Senator will yield to me, I rise only to reiterate my statement of appreciation to the Senator from Missouri. He and his staff assistants have been extremely helpful in negotiating many of the difficult provisions of this bill in its formulation. I want very much again to pay my respects to him and express my appreciation for his valuable assistance.

Mr. President, I suggest the absence of a quorum.

Mr. ROBERT C. BYRD. Mr. President, may I ask the distinguished minority leader out of whose time this will come?

I ask the question because Senator BENTSEN has 5 minutes and I do not want it to prejudice him.

Mr. BAKER. Mr. President, I might say, as I understand it, there are 45 minutes in the aggregate for these three speeches and there are about 15 minutes, I would judge, left of that.

Is that not correct?

The ACTING PRESIDENT pro tempore. The Senator from Missouri has 10 minutes remaining. There was a total of 35 minutes.

Mr. BAKER. I am sorry.

If it is suitable to the Senator from Missouri, then I suggest the absence of a quorum out of his remaining time.

Mr. DANFORTH. Yes. That is suitable to me.

The ACTING PRESIDENT pro tempore. The Senator has such time, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BELLMON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, I want to begin by thanking Senators RIBICOFF, BAKER, and DANFORTH for their comments.

The ACTING PRESIDENT pro tempore. The Chair would inquire as to who yields time.

Mr. DANFORTH. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. DANFORTH. How much time do I have remaining?

The ACTING PRESIDENT pro tempore. The Senator has 8 minutes remaining.

Mr. DANFORTH. I am happy to yield all of that 8 minutes to the Senator from Oklahoma.

The ACTING PRESIDENT pro tempore. The Senator from Oklahoma.

Mr. BELLMON. Mr. President, I am not sure 8 minutes is enough. Does the Senator from Tennessee have remaining time?

Mr. ROBERT C. BYRD. Mr. President,

I suggest the Senator proceed. If he needs more time, we will try to get it.

Mr. BELLMON. I thank my friend from Missouri and my friend from West Virginia.

Mr. President, I thank Senator RIBICOFF and Senator BAKER for their comments and for the opportunity to work with them and their staffs in developing the proposed Job Opportunities and Family Security Act.

I am delighted to join my colleagues today in introducing the Job Opportunities and Family Security Act of 1978. This bill offers the Congress a carefully targeted, workable set of changes to our present welfare programs. It will make substantial improvements in the Nation's welfare system at reasonable cost.

There can be no doubt, Mr. President, that there are significant problems in the public welfare system in this country. I commend President Carter for putting welfare reform on the front burner for congressional consideration. It is my personal belief, however, that in presenting the administration's welfare proposals, President Carter and Secretary Califano have overstated the difficulty of dealing with the problems which exist. There are indeed inequities in current welfare benefits; there is poor management in some aspects of the programs; and insufficient priority is placed on work as an alternative to welfare. But in many of our States, including my State of Oklahoma, we have effective administration and humanitarian responsiveness to the problems of low-income people.

The bill we introduce today starts with the assumption that we can and should build on the strengths and correct the weaknesses in current programs. While there may be theoretical merit in the program consolidation approach President Carter recommends, the risks of unforeseen effects, as well as the high costs, make congressional approval of the President's plan in the foreseeable future highly unlikely.

Mr. President, that is the basic reason for this new approach.

We ought not to put the country through another experience of the type the family assistance program proposal produced in the early 1970's. In that instance, after 3 years of debate, the country was left with the old programs for providing assistance to families, despite a lot of rhetoric about how bad the programs were. In other words, instead of remedying defects in those programs, Congress and the administration struggled for 3 years over replacement of the programs and eventually failed to take any decisive action. That same thing could happen again if we focus our attention only on the administration's so-called comprehensive reform plan.

The bill we introduce today will make substantial improvements in the major problem areas identified by those who are trying to sell the Carter proposals: It will reduce discrepancies between States in payment of benefits. It will cover poor families where the father is present, as well as single-parent families in all States. It will provide cash benefits to people between 62 and 65 who are now ineligible for such benefits. It will enable States to choose whether to have the Federal Government replace food stamps with cash for low income elderly, blind, and disabled persons.

Our bill provides greatly increased work opportunities for welfare recipients and others who are in or on the verge of falling into welfare dependency. These opportunities are provided through a mix of wage subsidies for private jobs, strengthened work search requirements, and carefully-targeted public service jobs.

Mr. President, few issues related to our current welfare programs bother the average citizen as much as the perception that Government fails to make every reasonable effort to make sure welfare recipients who can work do in fact work. Enactment of our bill will provide work opportunities in private businesses and industries and governmental institutions for nearly a million people who would otherwise be totally dependent on public assistance.

Our bill will reduce food stamp costs by 8 percent and will help a million families who would otherwise be dependent leave welfare completely. This is indeed a "job opportunities" as well as a "family security" proposal as the title indicates. It offers real progress in breaking the cycle of welfare dependency and the constantly growing costs of welfare programs.

One of the most troublesome problems this country has encountered is in developing a responsible, workable system for providing essential food, shelter, medical care, and other necessities to the unfortunate members of our society who for one reason or another cannot care for themselves. The efforts to meet this responsibility over the years have resulted in the development of a maze of so-called welfare programs which have grown increasingly costly and which threaten to create in our society a subclass of professional welfare recipients who have little hope of, or in some cases little desire to become self-supporting.

In my experience in government, many attempts have been to "reform" the Nation's welfare system. In practically every case, these reforms have simply meant liberalizing the system and, in spite of their good intentions, have not succeeded in devising a system of helping our less fortunate citizens to help themselves. I sincerely believe this proposal makes major strides in the directions we should go. It puts major emphasis on putting people to work in private sector jobs. It will cause future welfare costs to drop as the cycle of dependency is broken for increasing numbers of families.

This proposal does not pretend to resolve all of the problems which surround the welfare system. But it does deal with the major problems in precise, understandable, workable, and cost-effective ways.

Mr. President, the Congressional Budget Office has analyzed the major components of this bill. I believe this is the first major welfare reform bill that has been exposed to this type of analysis as it was being developed. I ask unanimous consent that a copy of CBO's report, a memo from Robert Fulton of my staff commenting on the report, and a letter from me to Alice Rivlin requesting further analysis on the complete bill be printed in the RECORD at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Within objection, it is so ordered. (See exhibit 2.)

Mr. BELLMON. Mr. President, based on CBO's work, we estimate the added costs of our proposals over the costs of operating the present programs to be in the range of $8 billion in fiscal year 1982, the first year in which all of the changes would be in effect. Between now and fiscal year 1982 costs would increase gradually as different aspects of the program are phased in, starting with less than a billion added costs in fiscal year 1979.

Mr. President, CBO estimates that the Carter welfare bill would cost the Federal Government over $17 billion in fiscal year 1982 as originally introduced, and over $20 billion as amended by the special subcommittee in the House. So, the Baker-Bellmon-Ribicoff-Danforth plan can be implemented at less than half the cost of the Carter plan.

Mr. President, since I came to the Senate, in 1969, Federal costs for public welfare have risen by more than 500 percent. We have not succeeded with that added spending in making much of a dent in the cycle of dependency. I am convinced the proposal we now lay before the Senate will result in permanent improvement in a set of problems that are of great concern to our citizens.

My colleagues and I recognize that our bill can be improved. We are, therefore, anxious to work with other Members of Congress, with representatives of State and local governments, with the Carter administration, and with everyone else who is interested in welfare reform in further improving this bill. We have already had considerable contact with State and local officials and organizations representing them as we developed this bill. As an illustration of the views of some of these officials, I ask unanimous consent to have printed in the RECORD, at the conclusion of my remarks, a statement on our proposal prepared by former HEW Secretary Wilbur Cohen and endorsed by several State welfare officials who have studied our plan.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. (See exhibit 3.)

Mr. BELLMON. Mr. President, I feel that this is an important bill and that those who have worked on it so hard, both the Members of the Senate and members of our staffs, have made an extremely important contribution to the effort of cleaning up the Nation's welfare system and putting in place a program that will help people to break the welfare cycle and become self-supporting and contributing citizens in our society.

I urge the proper committee of the Senate to give this bill immediate and very careful attention, because I believe they will find that it offers a solution to the many problems which have plagued our Government for many decades.

I am pleased to be associated with

those who have brought this bill to the Senate for introduction this morning.

Mr. President, I ask unanimous consent to have printed in the RECORD a section-by-section description of the bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit 4.)

EXHIBIT I

SUMMARY OF JOB OPPORTUNITIES AND FAMILY SECURITY PROGRAM

I. FAMILY SECURITY PROGRAM

Mandate AFDC-Unemployed Parent program in all states with some changes:

(1) unemployment is defined as the equivalent of 130 hours times the federal minimum wage;

(2) initial eligibility is based on the lower of the state payment standard (see below) or definition in (1);

(3) exit from program if exceed either of:

(i) State payment standard, applied to total family income with earned income disregard; or

(ii) 130 times federal minimum wage, without earned income disregard, for 2 successive months.

Minimum need standard: 55% of the nonfarm poverty level in 1981; 60% in 1982, and 65% in 1985.

Value of food stamps added to cash payment to calculate total value of assistance.

No Federal match for payments above 100% of nonfarm poverty line.

SSI resource (assets) limits used in AFDC.

States may have up to three area differentials in payment/need standards—all must be within parameters defined above.

Earned income disregard standardized at $60 plus ⅓ plus actual child care expenses (maximum child care of $100 per child or $300 per family per month). This would increase to $65 (and $110) in FY '83 and to $70 (and $120) in FY '85. If actual work expenses exceeding $60 can be documented by recipient these (up to a maximum additional $60) may be granted instead.

Federal Match:

Gradually increased so that in FY '82 all states would receive match between 80% and 90% unless states did not take over local costs and/or did not reduce error rate.

Increases are: 120% of medicaid match in FY '80, 140% in FY '81 and 160% in FY '82. Except that for states at 75% medicaid match and above, match is increased in three equal jumps to 90%.

Third increase in match is conditional on states assuming entire non-federal share, and administrative responsibilities.

Final FY '82 match is reduced by up to one percentage point for every percent dollar error rate over 4%; maximum reduction of 5%.

Match must be passed through if localities are required to pay any part of cost.

II. FOSTER CARE/SUBSIDIZED ADOPTIONS

Revises Federal funding for foster care and creates new program of Federal support for subsidized adoptions.

Federal matching for adoption subsidies paid to adoptive parents of hard-to-place children, provided family incomes are under 115% of the state median. (Higher income limits permitted in exceptional cases.)

Medicaid coverage for conditions existing at time of adoption or, at state option, full Medicaid coverage.

Federal matching for foster care in public institutions housing less than 25 children.

III. AGE LIMIT FOR SSI

The age limit for eligibility for aid to the elderly under the Supplemental Security Income (SSI) program lowered from 65 to 64 in 1980, to 63 in 1981, and 62 in 1982.

IV. JOBS

A. Private sector:

Employers are offered the option of a tax credit or wage vouchers for one year. Value of either is $1 per hour for hiring an eligible employee for between 30 and 40 hours per week without displacing unsubsidized employees.

Eligible employees are:

(1) If they have unsuccessfully sought work for 90 days; AFDC recipients; people unemployed for 26 weeks and unemployed youth (high school graduates or at least 18 years old).

(2) If they have unsuccessfully sought work for 30 days: former CETA public service job holders who have completed CETA assignment.

The Governor designates a state agency to administer these programs. It may be the state employment agency.

Voucher program requires that employees are hired for between 30 and 40 hours per week at the prevailing wage.

Eligible persons are certified and have a document to show prospective employers. The employer reports the number of hours worked; voucher is validated by the state agency and redeemed through a bank.

Jobs tax credit requires hours of employment to be 102% of total employment in previous year. No employer may receive more than $100,000 in credits in one year.

B. Work incentive program (WIN):

The Governor's control over WIN is increased and he/she is given authority to designate the agency or agencies to administer WIN. The program is converted to an appropriated entitlement.

Job search is required but services to aid in job search and job retention are authorized.

The earned income disregard is applied to WIN public service employment. In-kind services are allowed. Penalty for failure to certify 15% of mandatory registrants is eliminated. Current 13-week limit on work experience assignments is increased to 26 weeks.

C. Public service jobs:

The bill addresses only a portion of CETA. It does not deal with the general countercyclical issue, but only with the existence of public service jobs for target recipients. Needed public service jobs to allow targeting on these participants is estimated at 375,000.

V. AID TO WORKING POOR

Earned income tax credit is expanded and changed:

Increased from 10 percent to 15 percent with coverage extended up to the poverty line (rather than current $4000); phaseout begins at income equal to non-farm poverty level and is at 20 percent;

Credit is paid on an "as earned" basis through reverse withholding;

Credit is not available for subsidized public service employment (WIN or CETA);

Eliminates requirement that worker must be at least 50 percent self-supporting to get EITC.

Emergency assistance:

Repeals current limit on emergency assistance grants which prohibits recipients from getting emergency assistance for a maximum of 30 days in any one year.

Increases authorization to $150 million. This would be in block grants to the states according to the state's share of the AFDC population.

Grants can be used for disaster, temporary and continuing assistance to individuals and families not eligible for AFDC or whose AFDC payment does not meet emergency needs.

(As currently, this will be separate from any steps taken to benefit victims of major disasters such as statewide floods, etc.)

Food stamps:

The only changes in food stamps are the state option to cash-out food stamps for the SSI population and the demonstration projects on broader cash-out.

VI. PILOT TESTS AND EXPERIMENTS

The legislation authorizes the appropriation of such sums as are necessary to conduct pilot tests or demonstrations of various future steps. Specific examples would be:

(1) Cash-out food stamps for AFDC households and/or for households not receiving public assistance.

(2) Consolidated, federalized welfare similar to program proposed by President Carter.

(3) Block grant approaches: States receive Federal block grants and have full flexibility to set eligibility, rules, and benefit levels for cash assistance, food stamps, Medicaid, and social service programs.

(4) "One-stop" service centers at which recipients fill out single application for cash assistance and related benefits and services to which they are entitled.

VII. EVALUATION OF POSSIBLE FUTURE CHANGES

The bill creates a National Commission on Public Assistance to make a three-year study of welfare programs, including the changes made by this bill. The Commission is to submit recommendations for further improvement of these programs.

EXHIBIT 2

U.S. SENATE,
Washington, D.C., March 22, 1978.

Dr. ALICE M. RIVLIN,
Director, Congressional Budget Office, Washington, D.C.

DEAR ALICE: Thank you very much for your letter of March 21 providing CBO's analysis of the preliminary specifications for the welfare reform proposal develoepd by my staff in conjunction with Senator Baker's staff and others.

Your report is a very thorough assessment of our proposal as it stood at the time we sent our specifications to you. As your letter and the report note, our bill, which is being introduced today, differs in several important respects from the specifications which CBO analyzed. The enclosed staff memo from Bob Fulton to me discusses some of the elements CBO did not address in its analytical work on our proposal.

In addition to further study of the cost implications of our bill for fiscal year 1982, the first full year most of the provisions would be in effect, I would greatly appreciate CBO's taking a longer range look at the effects on welfare costs of the various elements of our bill. In particular, I would like to know the longer-range budgetary impact of increasing numbers of welfare recipients getting private sector jobs. Specifically, what would be the budgetary impact by 1987 of removing 500,000 people per year from welfare rolls and putting them on payrolls?

Now that we have the final bill completed, I ask that CBO provide as soon as possible an updated cost-analysis on the complete bill, taking particular account of the provisions which were not addressed in your initial report.

Thank you very much.

Sincerely,

HENRY BELLMON.

Enclosure.

U.S. SENATE,
March 22, 1978.

To: Senator Bellmon.
From: Robert Fulton.
Subject: CBO estimates on Baker-Bellmon-Ribicoff-Danforth welfare reform proposal.

The attached letter and report from the Congressional Budget Office have been prepared in response to your request of last November for a cost analysis of major components of the welfare reform proposal on

which Senators Baker, Ribicoff and Danforth are now co-authors and which several other Senators are now co-sponsoring.

You will note that the "bottom line" in the CBO report is that the features of our plan analyzed by CBO would add $9.33 billion to Federal welfare costs in FY 1982 (over the cost of existing programs) and would reduce state/local costs by $3.05 billion, with a net increase in cost to all levels of governments of $6.28 billion. The following table compares the CBO cost estimates for the Carter plan, the Corman Subcommittee revisions of the Carter plan and the Baker-Bellmon-Ribicoff-Danforth plan:

	Federal cost	State/local cost	Total cost
Baker-Bellmon-Ribicoff-Danforth	$9.33	($3.03)	$6.28
Carter plan	17.36	(3.42)	13.94
Corman subcommittee	20.22	(2.21)	18.02

No CBO cost estimates have as yet been prepared for the Ullman plan, which has been introduced in the House and which has many features similar to those in our bill.

As you will recall, the "Dear Colleague" letter seeking co-sponsors for our bill included an estimate of $8 billion as the projected cost of our program to the Federal Government. That estimate was based on preliminary and incomplete data received from CBO. It is important to recognize however, that the attached CBO letter and report still do not price out our complete bill. The last two pages of the CBO report list a number of features of our plan that have not been analyzed. Several of these features would reduce costs considerably. There are also features which would increase cost which are also not dealt with in the CBO letter, but I am confident that the decreases will outweigh the increases by a considerable amount.

In addition to features not priced out by CBO, there are some aspects of the CBO estimates which raise questions about the computer model used by CBO in estimating some of the elements of our proposal.

For instance, CBO estimates that nearly $900 million of the $3.2 billion in benefits under our earned income tax credit (EITC) would go to families earning more than $15,000 a year. That is highly unlikely, since the earned income tax credit phases out, beginning at the poverty line, at a 20% rate, and we do not increase the credit on the basis of family size beyond a family of seven. This means that the credit will end completely for the largest size family units at about $20,500. A very small portion of the benefits should go to family units, units with incomes above $15,000.

Likewise, the CBO estimate does not take into account one of our key eligibility limitations for families eligible for AFDC benefits on the basis of the unemployment of a parent. This limitation was not in the specifications we originally supplied to CBO. Under our proposal, such families will stay on the rolls only until their earned incomes pass the lower of ¾ times the minimum wage or the state benefit level, whichever is lower. Therefore, it is clear that the $500 million in benefits CBO shows for families with incomes of over $10,000 would not actually be paid out as our bill is actually drafted (approximate Federal share $400 million).

Also CBO notes in its report that it does not take into account revenue increases from added taxes paid by people who have higher incomes as a result of the jobs aspects of our plan. Based on estimates prepared by CBO on the Carter plan, there should be at least 500 million of such offsets.

Finally, CBO's estimates assume that AFDC benefits will average 17% higher under our plan in FY 1982 than they woud be if existing programs remained in effect. CBO does not provide a clear explanation of why this occurs. It is reasonable to conclude that this produces an over-estimate of at least $500 million in our costs.

We can still realistically estimate our plan to cost the Federal government in the neighborhood of $8 billion in FY 1982, calculated as follows:

	Billion
CBO estimate	$9.33
Plus (features not priced by CBO):	
Reduced age limit for SSI	.3
Added WIN funding	.2
Total	9.83
Less:	
Revenue offsets	.5
Reduced EITC	.6
Reduced AFDC-U	.4
Lower increase in AFDC	.5
Net Federal costs	7.83

I recommend we continue to use the "approximately $8 billion cost" in discussing our bill, pending a further analysis by CBO of the complete bill as introduced. We should ask CBO to give particular attention to the cost factors discussed above.

ROBERT FULTON.

U.S. CONGRESS,
Washington, D.C., March 21, 1978.

Hon. HENRY BELLMON,
U.S. Senate, Washington, D.C.

DEAR SENATOR BELLMON: The enclosed document contains an analysis of the welfare reform specifications you sent to the Congressional Budget Office (CBO). These specifications were outlined in your letters of November 18 and December 12, and in a staff memorandum of March 6. As indicated in the document, these specifications for an incremental welfare reform proposal are not identical to the latest draft legislation you and Senator Baker are developing.

The specifications analyzed by CBO would result in increased welfare costs of $6.28 billion over current policy spending levels in fiscal year 1982. This increased expenditure would consist of an additional $9.33 billion of federal spending and a reduction in state and local welfare expenditures of $3.05 billion.

The specifications CBO analyzed would reduce the number of families in poverty in fiscal year 1982 by 975,000. This would represent a reduction in the incidence of poverty over that resulting from a continuation of current programs from 8.1 percent to 7.0 percent. The specifications CBO examined would result in about 1.8 percent of all families losing more thas $100 in income in fiscal year 1982, while 7.9 percent would gain more than $100. The vast majority of families would be unaffected by the reform specifications.

Finally, the specifications would result in a reduction in the poverty gap or the amount of money required to bring every low-income family up to its poverty threshold income. Compared to current welfare programs, the poverty gap would be reduced by $2.3 billion.

I hope this material is useful to you in your planning. CBO will be happy to provide you additional assistance in your work in this important area.

Best wishes,
Sincerely,

ALICE M. RIVLIN,
Director.

Enclosure.

U.S. CONGRESSIONAL BUDGET OFFICE

ANALYSIS OF SPECIFICATIONS FOR AN INCREMENTAL WELFARE REFORM PROPOSAL

(Developed By Senators Bellmon and Baker, March 17, 1978)

This paper provides the Congressional Budget Office's (CBO) analysis of a set of specifications for an incremental welfare reform proposal developed by the staffs of Senators Bellmon and Baker.[1] The components of this welfare reform proposal are those specified in letters sent from Senator Bellmon to CBO on November 18, and December 12, 1977 and in a staff memorandum dated March 6, 1978. These specifications do not conform exactly to the latest draft legislation entitled "Job Opportunities and Family Security Act of 1978" being developed by Senators Bellmon and Baker. This paper outlines the specific components of the incremental reform proposal, and presents preliminary costs and distributional effects of the reform proposal.

SPECIFICATIONS OF BELLMON-BAKER REFORM PROPOSAL

AFDC and Food Stamps.—The major specifications of the reform proposal consist of changes to a number of existing programs. The proposal would modify earned income disregards in the current AFDC program. The proposal would also establish a national minimum AFDC payment standard.

The AFDC disregard work expense formula would be adjusted to be in agreement with modifications adopted by the Senate Committee on Finance under its Public Assistance Amendments of 1977 (H.R. 7200). Based on H.R. 7200, the monthly earnings disregard would be raised to $60 (currently $30) for families whose earned income—less child care expenses—is less than $360. For families with up to $360 monthly earnings, an additional one-third of earnings would be disregarded. For families whose monthly earnings—less child care expenses—exceeded $360, 20 percent of net earnings would be disregarded.[2] All unearned income would be subtracted from the payment standard.

The minimum AFDC payment standard would be equivalent to an amount which, in combination with food stamps, would result in a basic guarantee equivalent to 60 percent of a family's poverty threshold.[3] For a family of four with zero income in fiscal year 1982, the minimum AFDC standard would be $2,028. At this level of assistance, the family would be eligible for $2,484 of food stamps, bringing its total assistance to $4,512.[4]

In developing the estimates presented in this paper for fiscal year 1982, CBO assumed that the maximum AFDC payment standard for each state in July 1976 would be adjusted annually by changes in the overall Consumer Price Index (CPI). This assumption is subject to some question. If states do not increase payment standards to keep pace with inflation, the estimated AFDC costs presented in this paper may be biased upward. Food stamp benefits, however, would be biased downward.

Between July 1976 and fiscal year 1982, CBO assumed prices would increase by 36.2 percent. Given this rate of increase, only one state (Mississippi) would have an AFDC payment which, in combination with food stamps, would be less than 60 percent of a family's poverty threshold. If a state's AFDC payment standard exceeded the national minimum requirement, CBO's estimates assumed the higher AFDC payment standard.

The proposal would mandate the current AFDC unemployed fathers (AFDC–UF) program nationwide and make all two parent families with children eligible for the program if: (1) their earnings were less than the equivalent of a full-time minimum wage job (estimated to be approximately $6,970 in fiscal year 1982), or (2) their earnings were less than the state's payment standard.

The proposal modifies federal matching rates for AFDC and AFDC–UF costs with the maximum federal match being raised to 90 percent in some states in fiscal year 1982. In states where the current federal matching rate is 50 percent, the maximum would be 80 percent. The federal matching rates would be reduced depending on: (1) the state's

Footnotes at end of article.

AFDC payment error rates, and (2) whether the state continued to maintain local cost sharing and administration of the AFDC program.

Public Service Employment—Job Search.—The proposal would authorize 375,000 full-time public service employment job slots paying $3.85 per hour (approximately 15 percent higher than the minimum wage in fiscal year 1982). Priority for the slots would be given first to AFDC units with unemployed fathers, second to single-parent AFDC units and finally to any family in which the primary earner had been unemployed longer than 26 weeks.

The proposal would require those AFDC recipients defined as employable to engage in job search activities. This provision (the same as that adopted by the Senate Committee on Finance under H.R. 7200) would essentially extend the current Work Incentive Program (WIN) requirements to include a continuing job search. In order to facilitate the new job search requirement, the proposal would require states to provide supportive services such as child care and transportation under a program of federal matching payments.

Private Employment Programs.—The proposal would attempt to encourage private and non-profit employment of welfare recipients through the creation of a new job voucher program. The voucher would provide a $1.00 an hour earnings subsidy to employers for new employees who are: the principle wage earner of an AFDC family, an unemployed youth, a CETA public service employment "graduate" or other persons unemployed longer than 26 weeks. Redemption of the voucher would be through the banking system. The proposal would also create a categorical job tax credit program providing a $1.00 an hour tax credit to a private employer for each hour of employment of an eligible person. A private employer could receive the credit for the same types of persons as those who would be eligible for the job voucher program. An employer could participate in either the tax credit or job voucher program but not both. New employees could qualify the employer for these wage subsidies for no more than one year.

Earned Income Tax Credit and Other.—The proposal would modify the earned income tax credit so that the credit would be equivalent to 15 percent of earnings up to a family's poverty threshold and phased-out at 20 percent thereafter. The proposal calls for an expansion of federal funding of the emergency assistance program from approximately $35 million to $150 million. The proposal would provide states the option of "cashing-out" food stamps for SSI beneficiaries.

Based on discussions with Senator Bellmon's staff, CBO has not included in this preliminary analysis any modifications to the current medicaid program or an expansion of Title XX day care funding.

COST OF SPECIFICATIONS

The specifications analyzed by CBO would cost all levels of government $39.05 billion in fiscal year 1982, $31.64 billion in federal costs and $7.41 billion state and local costs (see Table 1).[5]

TABLE 1.—TOTAL AND NET COST OF BELLMON-BAKER WELFARE REFORM PROPOSAL BY LEVEL OF GOVERNMENT IN FISCAL YEAR 1982

[In billions of dollars][1]

	Federal	State and local	Total
Total costs	31.64	7.41	39.05
Total offsets	22.31	10.46	32.77
Net cost	9.33	(3.05)	6.28

TABLE 2.—DIRECT COST OFFSETS OF BELLMON-BAKER WELFARE REFORM SPECIFICATIONS, BY LEVEL OF GOVERNMENT IN FISCAL YEAR 1982

[In billions of dollars][1]

Program[2]	Federal	State and local	Total
AFDC, AFDC-UF	8.93	7.58	16.50
Food stamps	6.69	.34	7.03
SSI	6.09	2.50	8.59
Emergency assistance	.04	.04	.08
Earned income tax credit	.56		.56
Total cost offsets	22.31	10.46	32.77

[1] Figures may not add to totals due to rounding.

[2] Based on CBO 5-yr current policy projections; "Five-year Projections: Fiscal Years 1979–1983" except the AFDC, SSI, and earned income tax credit estimates which were generated by the basic methodologies used to cost the welfare reform plan. Different methodologies underlie the current policy projections which indicate lower AFDC costs and higher SSI costs for 1982. However, in the aggregate the Federal cost estimated under the different methodologies differ by less than 5 percent.

The programs modified or replaced by the plan would cost all levels of government $32.77 billion in fiscal year 1982. $22.31 billion of this would be federal and $10.46 state and local costs. The details of these offsets are shown in Table 2.

Total costs, therefore, would increase by $6.28 billion in fiscal year 1982 under the specifications analyzed. Net federal costs would increase by $9.33 billion. while state and local governments would experience a decline in net spending of approximately $3.05 billion. These estimates do not include some secondary impacts of the reform proposal, such as increased federal and state tax revenues resulting from increased employment and some reduction in benefit payments in other income tested programs such as general assistance, housing assistance, child nutrition, and unemployment compensation programs. As mentioned earlier, CBO has not analyzed the impact of the proposal on the medicaid program. Some savings might be expected. however, given a net reduction in the AFDC caseload under the proposal.

INDIVIDUAL PROGRAMS

AFDC Programs.—Before taking into consideration the impact of the employment programs, the modifications to the regular AFDC program would increase the total amount of AFDC benefits by approximately $1.06 billion to $15.3 billion in fiscal year 1982. The number of AFDC families participating sometime during the year would decline by 390,000 families from current policy estimates of 4,823,000 families. Though this represents a net reduction in participation, some new families would begin to participate as a result of the proposal. Average AFDC benefits would increase approximately 17 percent over current policy estimates. This increase is attributable primarily to the modifications in the earned income disregard raising it from $30 to $60. This provision would increase the average benefit for the lower income families. Also, by terminating participation for some 390,000 families with high earnings and low benefits, the average benefit of participating units would increase. It should be noted that the current policy estimates provided in this paper for AFDC, SSI and the Earned Income Tax Credit rely on a different methodology than those published in CBO's five-year current policy projections, Five-Year Projections: Fiscal Year 1979–1983.

Before taking into consideration the impact of the employment programs. the AFDC–UF program would be expanded under the reform specifications. Approximately 740,000 families would participate in the AFDC–UF program sometime during the year, up from an estimated 217,000 under current law. Benefits would increase from about $525 million to nearly $1.92 billion under the reformed AFDC–UF program. Average benefits per participating family would increase by about 7 percent. The limitation of work expenses and income disregards, and the extension of program eligibility to families with earnings closer to minimum wage earnings, would result in a smaller increase in average benefits than the increase in benefits of the regular AFDC program.

Because the public service job specifications and the job voucher proposal would be targeted on AFDC and AFDC–UF families, benefits under these latter programs would decline. Based on simulation results, for every one dollar spent in the public service employment programs (targeted on AFDC families), AFDC benefits would decline by 54 cents. Therefore, AFDC benefits would decline by approximately $1.66 billion with a spending level of $3.0 billion in the public service job component of the proposal. Approximately 520,000 AFDC and AFDC–UF families would have their AFDC benefits reduced or terminated as a result of a public service job.

Similarly, based on the assumption (developed by staff of Senators Bellmon and Baker) that 350,000 AFDC or AFDC–UF units would benefit from employment as a result of the job voucher program, and that the average wage paid in the subsidized job would be $3.62 (eight percent more than the minimum wage in 1982), AFDC and AFDC–UF benefits would be reduced by $1.22 billion. Total AFDC and AFDC–UF benefits would be $14.35 billion in 1982 (see Table 3).

Federal-State Matching Rates.—Because the specifications would raise the federal matching rate for states by 30 percentage points, up to a maximum of 90 percent, state costs under the AFDC program would decline. However, all payments above the poverty threshold would be borne by the state if a state's AFDC payment standard plus food stamps for a family with no income exceeded their poverty threshold. Further, states failing to meet specified payment error rate standards would have their federal match lowered as follows:

Error rate:	*Approximate reduction in Federal matching rate (percentage points)*
4% but less than 5%	1
5% but less than 6%	2
6% but less than 7%	3
7% but less than 8%	4
8% or more	5

TABLE 3.—COSTS OF BELLMON-BAKER WELFARE REFORM SPECIFICATIONS, BY LEVEL OF GOVERNMENT IN FISCAL YEAR 1982

[In billions of dollars]

Program category	Federal	State	Total
Benefits:			
AFDC, AFDC-UF[1]	10.61	3.74	14.35

TABLE 3.—COSTS OF BELLMON-BAKER WELFARE REFORM SPECIFICATIONS, BY LEVEL OF GOVERNMENT IN FISCAL YEAR 1982

[[In billions of dollars]

Program category	Federal	State	Total
Job voucher	.14	.....	.14
Total administrative	2.80	1.51	4.31
Total costs	31.64	7.41	39.05

[1] Simulation estimates indicate that a weighted average equal to 74 percent of the AFDC and AFDC–UF benefits would be federally funded. Estimates shown include adjustments for the work incentive disregard (currently $30 and ⅓ of additional earnings) for purposes of computing benefits but not for determining eligibility. Including this work incentive disregard for determining eligibility would raise benefit costs by 4.1 percent over estimates shown here. Estimates include adjustment for PSE and job voucher program earnings. Estimate also includes adjustment for quality control penalties on Federal matching rates associated with quality control sanctions).

[2] Includes an estimated $67,000,000 in cash out of food stamp benefits for SSI recipients.

[3] Estimate includes increase in benefits of $67,000,000 from cash out of food stamps.

[4] Estimated cost of the job voucher program based on Mar. 6, 1978, staff memorandum specifying 500,000 full-year, full-time job voucher slots and specific split of types of recipients. Memorandum indicates that the limit and recipient split could be accomplished through specific "capping" provisions in the program.

[5] Employment tax credit provision not estimated.

[6] Administrative costs were assumed to remain the same proporation of program benefits as under existing prereform programs

[7] Based on previous CBO estimate, see S. 95–573, "Public Assistance Amendments of 1977," Committee on Finance, H.R. 7200, Nov. 1, 1977.

The assumptions used in this cost estimate to account for these provisions are detailed in Table A which is attached at the end of this paper. The weighted average federal matching rate of all AFDC benefits, taking into consideration these factors, would be approximately 74 percent in fiscal year 1982. Federal AFDC benefits would be $10.61 billion, state costs would be $3.74 billion.

Public Service Employment.—The specifications call for 375,000 full-time job slots in fiscal 1982. Based on an assumed average wage rate of $3.85 (approximately 15 percent higher than minimum wage in 1982), the costs of the proposal would be $3.0 billion. It was assumed that the administrative costs for these jobs would represent the same proportion of administrative costs to benefits as exist under the Administration's welfare reform proposal—30 percent. Administrative costs of this provision would therefore be $900 million.

Food Stamps.—The food stamp program would not be explicitly modified under the reform proposal, but increased AFDC payments or increased income from employment programs would result in lower food stamp costs. Food stamp benefits would decline by approximately 8 percent ($425 million) from the current policy estimate and reach $5.06 billion in fiscal year 1982 (see Table 3). The number of households participating in the program sometime during the year would decline by 1,265,000 to 8,518,000. The provision which would allow states to cash-out food stamps for SSI benefits would cause food stamp costs to decline by an additional $67 million.[6]

Earned Income Tax Credit (EITC).—Modifications to the current EITC would result in costs of $3.12 billion. An estimated 6,014,000 families would either receive a refundable credit or have their tax liability reduced as a result of this provision in fiscal year 1982. This would be an increase from the 3,426,000 families who would benefit from the current EITC at a cost of about $560 million.

Job Voucher Program—Job Tax Credit.—The job voucher program would be restricted to one per family and the income of the family would have to be 70 percent or less of the BLS lower living standard. The voucher would provide a subsidy of one-dollar per hour for each employee hired under this program. The specifications of the job voucher program appear to provide a substantial inducement to employers ($1.00 per hour subsidy). However, the ability of the program to encourage the hiring of the specified categories of recipients can be questioned based on the disappointing results from the current WIN tax credit program aimed at AFDC recipients. Furthermore, in a previous analysis of employment subsidies, CBO has noted that the more narrowly defined the target category, the larger the administrative cost and the higher the subsidy will probably have to be to induce firms to participate.[7]

Using assumptions provided by Senator Bellmon's staff, the estimated gross cost of the voucher program would be $1.04 billion in 1982.[8] Administrative costs of the voucher program were estimated to be $144 million. Offsetting these increased costs would be a reduction in AFDC benefits of approximately $1.22 billion as indicated above. The net cost to the federal government of the job voucher program, then, would be a savings of $4 million.

No estimates have been developed for the impact of the job tax credit proposal. Assumptions as to the participating firms' marginal tax brackets must be developed in order to estimate revenue losses associated with the provision. A somewhat similar tax credit proposal introduced by Senator Baker in the last Congress (S. 731) was estimated by his staff to result in a revenue loss of $1.9 billion in fiscal year 1979. Offsetting the revenue loss would be a reduction in AFDC-UF benefits. These have not been estimated.

DISTRIBUTIONAL IMPACTS OF PROVISIONS[9]

Incidence of Poverty.—The provisions analyzed by CBO would result in a decline in the number of poor families in fiscal year 1982. Under the current program 7.1 million families (8.1 percent of all families) would be classified as poor. Based on the provisions analyzed by CBO, 6.1 million families (7.0 percent of all families) would be classified as poor (see Table 4).

TABLE 4.—FAMILIES IN POSTTAX, POSTTRANSFER POVERTY UNDER CURRENT POLICY AND UNDER BELLMON–BAKER WELFARE REFORM PROPOSAL, FISCAL YEAR 1982

[Families in thousands]

Category	Posttax, Posttransfer Income		
	Current	Bellmon-Baker reform proposal	Change from current policy
All families	7,060	6,085	−975
Incidence or poverty (percent)	8.1	7.0	−1.1

The proposal would affect different groups of the population differently. In general the proposal would reduce the incidence of poverty among families headed by a person 65 years of age or older less than the incidence among families headed by a person under 65 years of age. The incidence of poverty in families headed by a person under 65 would show a decline from 8.0 percent of all such families to 6.7 percent under the reform provisions (see Tables 5 and 5a).

Footnotes at end of article.

TABLE 5.—NUMBER OF FAMILIES IN POSTTAX, POSTTRANSFER POVERTY BY TYPE OF FAMILY AND REGION OF RESIDENCE UNDER CURRENT SERVICES AND BELLMON-BAKER WELFARE REFORM PROPOSAL, FISCAL YEAR 1982

[Families in thousands]

Characteristics of families	Postcash social insurance income	Posttax, posttransfer income[1]	
		Current policy	Bellmon-Baker reform proposal
All families	9,750	7,060	6,085
Age of head:			
65 and over	2,506	1,530	1,416
Under 65	7,244	5,531	4,668
Employment status of head:			
Working full time	1,392	1,208	1,065
Working part time	1,323	1,034	908
Unemployed	761	573	453
Not in labor force	6,274	4,246	3,601
Race of head:			
White	6,924	5,091	4,421
Nonwhite	2,826	1,965	1,764
Region of residence:			
South	3,670	2,937	2,611
West	1,944	1,290	1,136
Northeast	2,097	1,384	1,101
North-central	2,039	1,449	1,237

[1] Posttransfer excludes medicare and medicaid.

TABLE 5(a).—PERCENT OF FAMILIES IN POSTTAX, POSTTRANSFER POVERTY BY TYPE OF FAMILY AND REGION OF RESIDENCE UNDER CURRENT POLICY AND BELLMON-BAKER REFORM PROPOSAL, FISCAL YEAR 1982

Families in thousands]

Characteristics of families	Postcash social insurance income	Posttax, posttransfer income[1]	
		Current policy	Bellmon-Baker reform proposal
All families	11.2	8.1	7.0
Age of head:			
65 and over	14.3	8.8	8.1
Under 65	1094	8.0	6.7
Employment states of head:			
Working full time	3.1	2.7	2.3
Working part time	11.4	8.9	7.7
Unemployed	17.0	12.8	10.2
Not in labor force	24.9	16.8	15.2
Race of head:			
White	9.1	6.7	5.8
Nonwhite	26.7	18.6	15.7
Region of residence:			
South	13.5	10.8	9.6
West	11.5	7.6	6.7
Northeast	10.6	7.0	5.6
North-central	8.9	6.3	5.4

The proposal would reduce the incidence of poverty in families where the head of the family worked full-time from 2.7 percent to 2.3 percent. Families in which the head would be defined as working part-time, would experience a similar relative reduction in the incidence of poverty, declining from 8.9 percent of all such families under current programs to 7.7 percent under the reform provisions. Such families with an attachment to the labor force would benefit from the expansions of the EITC and AFDC–UF programs, along with the provision of public service employment. Families in which the head would be defined as unemployed, would experience a significant reduction in the incidence of poverty declining from 12.8 percent to 10.2 percent. Expansion of the AFDC–UF program would probably benefit this group the most. Those families defined as not being in the labor force would experience the least reduction in the incidence of poverty.

The proposal would be slightly more effective at reducing the incidence of poverty among nonwhite families as contrasted with white families. The incidence of poverty among white families is reduced from 6.7 percent to 5.8 percent, while the incidence among nonwhites is reduced from 18.6 percent to 15.7 percent.

The incidence of poverty is reduced in all regions of the country, with the Northeast region experiencing a relatively greater decline in poverty. Both the South and West regions would experience approximately the same relative reduction in the incidence of poverty.

In general, while the Northeast would experience the greatest relative decline in poverty under the provisions analyzed, relatively more families would gain income (in absolute terms) in the South. This apparent inconsistency is explained by the level of benefits under the current programs. Approximately 11.2 percent of all families in the South would gain more than $100 following the reform proposal, while 5.1 percent in the Northeast would show such gains (see Table 6). Since benefits under current programs are lower in the South and West relative to other areas of the country, the incidence of poverty shows a greater decline in the Northeast and North Central regions since fewer additional dollars are required to move families out of poverty.

TABLE 6.—PERCENT OF FAMILIES WHO WOULD LOSE, REMAIN UNCHANGED OR GAIN INCOME UNDER THE BELLMON-BAKER WELFARE REFORM PROVISIONS BY REGION IN FISCAL YEAR 1982

	Families losing more than $100	Families with no change	Families gaining more than $100
All regions	1.8	90.3	7.9
South	1.1	87.7	11.2
West	2.0	89.7	8.2
Northeast	2.8	92.1	5.1
North central	1.7	92.2	6.2

Distribution of Benefits by Pre-Welfare Income.—Tables 7 and 7a summarize the distribution of recipients and program benefits under the current welfare system and under the reform provisions in fiscal year 1982. Under the current programs approximately $23.7 billion in welfare benefits would go to families with pre-welfare income of less than $5,000. Under the reform system the amount of benefits going to this income class would be $26.9 billion. Most of this increase would be attributable to the expanded AFDC–UF and, the regular AFDC program, and public service employment programs.

Modifications to the AFDC and AFDC–UF program would shift the distribution of benefits away from the higher pre-welfare income classes toward lower income families. While under current programs the below $5,000 income class would receive 73 percent of the AFDC and AFDC–UF benefits, under the reform provisions these families would receive nearly 74 percent of such benefits.

The provision which would expand the EITC would shift classes. While under current law EITC families with pre-welfare incomes less than $5,000 would receive 38.7 percent of all EITC benefits, under the reform plan this would drop to 15.3 percent. The proportion of EITC benefits going to families in the $5,000 to $9,000 pre-welfare income class would decrease from 34.0 percent under current law to 31.5 under the reform provisions. Classes of families with pre-welfare incomes above $10,000 would experience an increase in amount of and proportion of EITC benefits.

While the provisions analyzed increased the absolute amount of benefits going to all income classes, the distribution of total benefits would be shifted. In absolute terms the pre-welfare income class of less than $5,000 would have an increase in benefits, but its relative share of the total benefits would decrease marginally from 60.0 percent of all the pre-reform benefits to 58.9 percent.

TABLE 7.—DISTRIBUTION OF FAMILIES AND BENEFITS BY PREWELFARE INCOME CLASSES UNDER CURRENT POLICY AND BELLMON-BAKER WELFARE REFORM PROPOSAL: FISCAL YEAR 1982 [1]

Program	Less than $5,000	$5,000 to $9,999	$10,000 to $14,999	$15,000 to $24,999	$25,000 and over	Total

[3] No interaction simulated between Bellmon-Baker changes and general assistance program.
[4] No interaction was simulated between Bellmon-Baker and other welfare programs. Other welfare programs include veterans' pensions, child nutrition, and housing assistance.

Poverty Gap.—The amount of money required to bring all low-income families up to their poverty threshold after counting the benefits of the current social insurance programs would be $35.6 billion in fiscal year 1982. This post-social insurance poverty gap would be reduced by $20.2 billion to $15.3 billion as a result of counting the benefits of the current welfare system. Since benefit costs of the current welfare system would be $39.5 billion, approximately 51 cents out of every dollar spent would be used to close the poverty gap.

The specifications analyzed for the Bellmon-Baker welfare reform proposal would reduce the post-social insurance gap by $22.5 billion, $2.3 billion more than the current welfare system (see Table 8). On the average 49 cents out of every dollar spent in the reformed welfare programs would be used to close the poverty gap. At the margin, the $6.2 billion additional expenditures under the reform provisions would close the poverty gap by $2.3 billion, hence for every dollar spent, 37 cents would go toward eliminating the poverty gap.

TABLE 8.—POVERTY GAP UNDER CURRENT POLICY AND BELLMON-BAKER WELFARE REFORM PROPOSAL IN FISCAL YEAR 1982

[In billions of dollars] [1]

Row	Post-social insurance	Posttax, Posttotal transfer	
		Current policy	Bellmon-Baker
Poverty gap	35.6	15.3	13.1
Reduction in gap		20.2	22.5
Total benefit cost		29.5	45.7
Average effectiveness ratio (2)-(3)		.51	.49

[1] Income excludes medicare and medicaid benefits.

PROVISIONS OF DRAFT BELLMON-BAKER BILL

This analysis was limited to a set of specifications that evolved over a period of three months. A draft bill developed by the staffs of Senators Bellmon and Baker will be submitted in the near future which will include a number of these specifications analyzed. This draft bill, entitled "Job Opportunities and Family Security Program" will, however, include a number of new provisions not covered here.

The provisions of the draft legislation which were not included in this analysis are listed below:

(1) Eligibility for the AFDC–UF program would be based on the average earnings over the two months preceeding application. To be eligible these average earnings would have to be less than three-quarters of a full-time federal minimum wage job.

(2) Up to a maximum of three AFDC cash assistance payment standards could be established within a state, to reflect differences in living costs among regions within a state.

(3) The AFDC assistance unit could not include individuals receiving SSI benefits, or any individual absent from the home for more than 90 days.

(4) The allowable work expense deduction and earned income disregards would be changed from those analyzed in this paper. A $60 standard earned income disregard would be allowed, and one-third of the remaining earnings above this amount. Additionally, recipients who could document work expenses exceeding $60 per month of earned income, would have this additional amount disregarded up to a maximum of $60. A total, therefore, of $120 in work expenses could be disregarded.

(5) AFDC grants would be reduced on a pro-rata basis for the presence of individuals in a household who are not eligible for assistance and who have other means of support.

(6) Financial incentives and matching payments would be paid to states for installing and modernizing computer systems for claims processing and management information systems.

(7) WIN funding authorization would be expanded from $365 million to $565 million.

(8) Federal payments for adoption of hard-to-place children would be provided. This is the same provision as developed by the Senate Finance Committee and included in H.R. 7200. In addition, legislation modifying federal matching of the foster care program would be developed.

(9) The priority selection for the public service jobs would be modified. First priority would go to any audit in any AFDC–UF household who had searched for private employment for at least 3 months. Of the remaining job slots, 50 percent would go to other AFDC recipients and 50 percent to other persons unemployed for longer than 26 weeks.

(10) Employers of persons qualifying for the job voucher program would be required to pay prevailing wages.

(11) AFDC and food stamp recipients whose incomes exceeded a specified level would be required to pay back to the federal government (through the federal income tax system) some or all of the benefits they received.

(12) The age limit for determining eligibility in the SSI program (aged component) would be dropped from 65 to 62, in fiscal year 1982.

TABLE A.—BELLMON-BAKER WELFARE REFORM FEDERAL MATCHING RATE ASSUMPTIONS BY STATE IN FISCAL YEAR 1982—RATES ASSUME A 50-PERCENT REDUCTION IN CURRENT ERROR RATES

[In percent]

State	Current error rate, July to December 1976	Assumed error rate, fiscal year 1982	Current law Federal matching rate, fiscal year 1982 [1]	Bellmon-Baker matching rate, no error rate adjustment, fiscal year 1982	Bellmon-Baker matching rate with error rate adjustment, fiscal year 1982 [2]
Alabama	6.0	3.0	65.8	90.0	90.0
Alaska	12.5	6.3	50.0	80.0	77.0
Arizona	12.4	6.2	56.5	86.5	83.5
Arkansas	7.3	3.7	72.1	90.0	90.0

[1] Source: "Characteristics of State Plans for Aid to Families With Dependent Children," 1976 edition. Estimates are for Federal medical assistance percentage or regular Federal percentage for period Oct. 1, 1977 to Sept. 30, 1979.

[2] Estimates do not include adjustment for States which would continue local sharing of benefit costs of local administration.

FOOTNOTES

[1] Computer modeling and estimating assistance were provided by Mathematica Policy Research, Incorporated, under Basic Ordering Agreement, Task Order IG–01, December 23, 1977.

[2] The new formula for these modifications is as follows:

(1) For families whose monthly earned income less child care expenses is less than $360: AFDC Benefit=G—$Y_u$—.67 max (O, Y_e—CC—60)

(2) For families whose monthly earned income less child care expenses is equal to or greater than $360: AFDC Benefit=G—$Y_u$—.80 max (O, Y_e—CC—110)

Where:

G=AFDC payment standard by state for family with zero income

Y_e=Family earned income
Y_u=Family unearned income
CC=Child care expenses

[3] The estimated OMB poverty threshold for a family of four in fiscal year 1982 would be $7,520.

[4] CBO assumptions for the food stamp *guarantee* in fiscal year 1982 are those consistent with assumptions used to develop all other estimates in this paper (see *Food Stamp Act of 1976*, Report No. 94–1460, September 1, 1976). For a family of four with zero income the food stamp guarantee would be $2,496 annually ($208 monthly). In estimating the value of food stamps a family would be eligible for in fiscal year 1982 CBO included the food stamp standard deduction ($75 a month) and a combination shelter-child care deduction ($92.50 a month). These income deductions are consistent with the recently enacted Food Stamp Act of 1977—Public Law 95–113.

[5] All cost estimates include the 50 states, District of Columbia and outlying territories. The basic demographic and economic assumptions used in this analysis are consistent with assumptions used by CBO in developing previous estimates for the Administration Welfare Reform Bill (H.R. 9030) and the Welfare Reform Subcommittee bill (H.R. 10950).

[6] The basic methodology used to develop the cash-out estimate has been discussed previously and can be found in House Report No. 95–464 accompanying H.R. 7940, *The Food Stamp Act of 1977*, June 24, 1977. This methodology is being reviewed further by CBO.

[7] See Congressional Budget Office, *Employment Subsidies and Employment Tax Credits*, Background Paper (April 1977).

[8] CBO has not developed its own specific assumptions relative to this proposal. The assumptions specified by the staff of Senator Bellmon were that no more than 500,000 full-year, full-time persons would participate in this program and that 300,000 of these would be AFDC recipients if the voucher program did not exist.

[9] The estimates presented in this section reflect the following conditions: (1) the work incentive disregard provision would be used to calculate both eligibility and benefits for the AFDC program; relative to the actual proposal, the poverty reduction impact is upwardly biased in this section since the proposal would not allow the work incentive disregard for calculating program eligibility, (2) the estimates do not reflect the impact of the job voucher program and job tax credit provisions which would bias the poverty reduction estimates downward. Furthermore, the number of public service job holders is underestimated causing a downward bias in the poverty reduction estimates. This is partially offset by higher AFDC payments which reflect the lower public service employment calculations. All estimates in this section exclude the institutionalized population and Puerto Rico, comparable to previous CBO distributional analyses of the Administration's welfare reform proposal.

EXHIBIT 3

STATEMENT BY FORMER HEW SECRETARY WILBUR COHEN

The bill—Job Opportunities and Family Security Act of 1978—introduced by Senators Bellmon, Ribicoff, Baker and Danforth is a constructive and incremental approach to the improvement of the existing welfare system. While it does not solve all the problems which the Administration's proposal attempted to handle, it is a pragmatic and reasonable series of steps in the right direction.

We believe it is sound to undertake those legislative steps which are within our managerial, administrative, and fiscal capacities at the present time. There is nothing in the proposed bill which will impede future incremental improvements on the basis of experience and fiscal ability. Rather, the principle of federal standards incorporated in the bill is a significant step forward. This principle can be extended in the future. The standards established by Congress in the Supplemental Security Income program in 1972 have led the way to the adoption of standards in the Aid to Families with Dependent Children-Unemployed Parents (AFDC–UP) program and we believe that further progress in this direction can be achieved step-by-step which will demonstrate the ability of the federal-state system to work effectively in achieving welfare reform.

The AFDC–UP program, originally enacted in 1961, has been shown to provide a base upon which the coverage can be extended in the course of time to all the working poor.

The broadening of the SSI program to cover individuals age 62–65 will assist in helping many older persons, including any older persons affected by long-term unemployment. It will also result in less pressure on determinations for disability payments under the SSI program.

The proposal includes three provisions which utilize the federal tax system as an incentive to provide employment to low-income individuals and welfare recipients. We believe that it must be recognized that the welfare system cannot and should not be responsible for locating or providing work for welfare recipients. The proposal recognizes this principle and thus should help to advance improvements in the adequacy of welfare payments in the long run.

We recognize that several aspects of any comprehensive welfare reform plan, such as the one advocated by the Administration, are controversial. But we believe it is important to make some progress this year in improving the existing program. We believe that aspects relating to employment and to the financial aid of those persons (with children) who are unemployed and are capable, available, and willing to work will assist in bringing a better understanding to the general public of the constructive aspects of the welfare program.

EXHIBIT 4

SECTION-BY-SECTION DESCRIPTION: JOB OPPORTUNITIES AND FAMILY SECURITY ACT OF 1978

Section 1—The title of the proposed legislation—"Job Opportunities and Family Security Act of 1978"—reflects the two major thrusts of the bill: (1) to provide increased job opportunities, especially in the private sector, for employable recipients of public assistance; and (2) to improve programs which provide support to those citizens who cannot work and those who can and do work but who earn too little to meet their basic needs and those of their families in today's economy.

Title I—Family Security Program—Passage of this bill would begin the process of making much needed changes of terminology in the public welfare field. Both the current Aid to Families With Dependent Children Program and the Work Incentive Program would become components of a renamed program to be known as The "Family Security Program".

Section 101—Aid to Dependent Children of Unemployed Parents:

This section eliminates the option states now have to exclude from coverage in their AFDC programs two-parent families in which at least one of the parents is employable. 27 states and the District of Columbia currently provide support to such families while the remaining states do not.

In addition, section 101 repeals section 407 of the Social Security Act, thereby eliminating the so-called "work force connection" requirement under which a two-parent family is excluded from assistance unless the father has been in the work force during six of the preceding 13 calendar quarters.

Section 101 replaces the "100-hour rule" established by HEW regulations. Those regulations define "unemployment" as work for less than 100 hours in any given month. This provision creates a distinct work discentive by causing abrupt termination of assistance to two-parent families whenever the 100-hour line is crossed. Section 101 provides a new definition of unemployment based on earnings. Specifically, a family will be eligible for assistance if its income from earnings, averaged over a period of two successive months, does not exceed the equivalent of 30 hours per week (130 hours per month) times the Federal minimum wage. When the maximum cash assistance grant under the state program would be lower than the minimum wage equivalent just described, the lower figure will apply.

Section 101 adds to the law a requirement that AFDC recipients who are eligible for Public Service Employment under the Comprehensive Employment and Training Act (CETA) register for and accept such employment.

The provisions of section 101 would take effect October 1, 1980.

Section 102—Variations in Need Standards Within States:

This section allows states to establish up to three different payment standards for AFDC cash assistance, based on differences in living costs among regions of the state. None of these variations would fall below the minimum benefit amounts as defined in section 110. This section would become effective October 1, 1978.

Section 103—Assistance Unit Defined; Earned Income Disregard:

This section revises the definition of AFDC "assistance unit" to make clear that individuals receiving SSI benefits may not be included, and also to exclude persons absent from the home for more than 90 days, unless it can be established that the absence was for the purpose of seeking employment.

Section 103 also revises the allowable work expense deductions and earned income disregards for AFDC recipients who work. Under the new provisions, the first $60 per month of earnings, plus documented work expenses exceeding $60 per month up to an additional $60, plus one-third of earnings above that amount, plus an allowance for child care where necessary shall be deducted from income before offsetting earnings against the AFDC grant. The amounts to be deducted for child care are limited to $100 per month per child and $300 per family, and may not exceed 50 per cent of the recipient's earnings. The two $60 limitations will be increased to $65 in FY 1983 and $70 in FY 1985 to take account of rising costs. Likewise, the $100/$300 child care limitations will increase to $110/$330 in FY 1983 and $120/$360 in FY 1985.

Finally, section 103 would preclude disregard of earned income for any family member who fails to make a timely report to the state agency on earnings received. A similar provision is included in H.R. 7200 as reported by the Senate Finance Committee. However, the H.R. 7200 would preclude disregard of the earnings of all family members—not just the income of the person for whom no report, or an inaccurate report, was made to the state agency.

Section 103 would become effective October 1, 1978.

Section 104—Determination of Benefits in Certain Cases Where Child Lives With Individual Not Legally Responsible for His Support:

This section permits states to make pro-rata reductions in AFDC grants to take into account the presence in the household of individuals who are not eligible for assistance and who have other means of support. This provision is included in the Senate Finance version of H.R. 7200. It would take effect October 1, 1978.

Section 105—Additional Federal Funding for Certain Mechanized Claims Processing and Information Retrieval Systems:

This section adds to the AFDC program provisions similar to ones already in Title XIX for the Medicaid program (section 1903 (a)(3)), providing financial incentives and technical support to the states for installation of modern computerized claims processing and management information systems. States which submit plans approved by HEW for development and operation of such systems will receive 90 percent Federal matching fund for the initial development costs and 75 percent for system operations.

This section is similar to provisions in the Senate Finance Committee's version of H.R. 7200.

Section 105 would become effective October 1, 1978.

Section 106—Miscellaneous State Plan Requirements.

This section makes a conforming change (repeal of section 402(a)(23)) and adds a requirement that members of AFDC assistance units apply for any private or public retirement, disability, unemployment compensation and similar benefits to which they may be entitled.

This section will become effective October 1, 1978.

Section 107—Federal Payments to States; Maximum State Payments Subject to Federal Matching:

This section establishes a ceiling for Federal matching of state-local welfare costs. States would receive Federal matching as described below for AFDC benefits which, when combined with the value of food stamps, would provide a family (with no other income) total support equal to 100 percent of the Federal non-farm poverty line, as established by the Office of Management and Budget. States would be free to pay benefits which would exceed the poverty line (when combined with food stamps), but would themselves be required to pay 100 percent of the costs of going above the poverty line. The maximum benefit for Federal matching, as well as the minimum benefit provided for by section 109, would rise in future years in proportion to the cost of living.

This section also shifts from state and local governments to the Federal Government a substantial part of the current/local share of AFDC costs. The increased Federal matching will be phased in over a period of three years beginning in FY 1980. The percentage increase each state receives each year will be determined as follows:

FY 1980—States which under current law prior to these amendments) would have been entitled to receive 60 percent Federal AFDC matching funds or less under the alternative Medicaid formula will, in FY 1980, receive 10 percent higher Federal match than the Medicaid formula would have entitled them to receive. States which would otherwise be entitled to receive Federal matching funds at higher than a 60 percent rate in FY 1980 will receive Federal funds at the percentage to which the Medicaid formula would have provided, plus one-third of the difference between that State's Federal matching percentage under the Medicaid formula and 90 percent.

FY 1981—All states will receive another increase in the Federal AFDC matching funds percentage identical to the one received in FY 1980

FY 1982—Those states which meet the two conditions described below will receive a third increase in the Federal matching percentage equal to the increases provided in FY 1980 and FY 1981. Those states receiving the full increment in FY 1982 would thus receive Federal matching funds at no less than 80 percent and no more than 90 percent in FY 1982. Under the provisions of section 107, states which failed to meet either of the following conditions would receive reduced Federal matching funds as indicated:

(1) State Funding and Administration—Any state which, by FY 1982, still required local governments to either provide funding for, or administer the AFDC program, will not receive the increased Federal matching scheduled for FY 1982.

(2) Quality Control—Any state, which in the first half of FY 1981, had a dollar error rate in excess of four percent (from payments to ineligibles, overpayments, and underpayments), as determined by the Federal-State quality control program, would receive in FY 1982 a reduction in Federal funding as follows: If a dollar error rate of less than five percent but more than four percent were achieved, the Federal matching rate would be reduced by ten percent of the last full increment of increased Federal match to which the state was entitled. For each rise of one percent in its dollar error rate, the state's Federal matching rate would go down by 10 percent of one of the three increments to which it would otherwise be entitled, up to a maximum loss of up to 50 percent of that increment.

The following table shows how these provisions would apply to a range of states:

	Medicaid match in 1980	Increased Federal Match (fiscal years)		
		1980	1981	1982
States with full State funding and administration, and less than 4 percent dollar error rate by 1982				
State A	50	60	70	80.0
State B	55	65	75	85.0
State C	63	72	81	90.0
State D	69	76	83	90.0
States with local administration and/or funding, and with less than 4 percent dollar error rate by fiscal year 1982:				
State E	50	60	70	70.0
State F	55	65	75	75.0
State G	63	72	81	81.0
State H	69	76	83	83.0
States with full State administration and funding but with greater than 4 percent dollar error rate by fiscal year 1982:				
State I—Dollar error rate of 4.5 percent	50	60	70	79.0
State J—Dollar error rate of 4.5 percent	69	76	83	89.3
State K—Dollar error rate of 5.5 percent	50	60	70	78.0
State L—Dollar error rate of 5.5 percent	69	76	83	88.6
State L—Dollar error rate of 6.5 percent	50	60	70	77.0
State M—Dollar error rate of 6.5 percent	69	76	83	87.9
State N—Dollar error rate of 7.5 percent	50	60	70	76.0
State O—Dollar error rate of 7.5 percent	69	76	83	87.2
State P—Dollar error rate of over 8 percent	50	60	70	75.0
State Q—Dollar error rate of over 8 percent	69	76	83	86.5
States with both local funding and/or administration and greater than 4-percent dollar error rate by fiscal year 1982:				
State R—Dollar error rate of 4.5 percent	50	60	70	69.0
State S—Dollar error rate of 4.5 percent	69	76	83	82.3
State T—Dollar error rate of 5.5 percent	50	60	70	68.0
State U—Dollar error rate of 5.5 percent	69	76	83	81.6
State V—Dollar error rate of 6.5 percent	50	60	70	67.0
State W—Dollar error rate of 6.5 percent	69	76	83	80.9
State X—Dollar error rate of 7.5 percent	50	60	70	66.0
State Y—Dollar error rate of 7.5 percent	69	76	83	80.2
State Z—Dollar error rate over 8 percent	50	60	70	65.0
State AA—Dollar error rate over 8 percent	69	76	83	79.5

Section 108—Determination of Eligibility for, and Amount of, AFDC Payment;

This section authorizes states to base eligibility for, and amount of, AFDC payments on a one-month retrospective accounting period or a one-month prospective period. It also authorizes, but does not require, states to establish monthly reporting requirements.

These provisions will become effective on October 1, 1978.

Section 109—Minimum Benefit Amount:

This section requires that beginning with FY 1981, the combined food stamp and AFDC benefits provided to eligible families with no other income shall be not less than 55 percent of the official non-farm poverty level. The minimum benefit will increase to 60 percent of the non-farm poverty level in FY 1982 and to 65 percent in FY 1985. Based on anticipated increases in living costs between now and FY 1982, the minimum combined food stamps AFDC benefit under this provision for a family of four with no other income in FY 1982 will probably be about $4600.

Section 109 provides deviations from the poverty line in two situations: (1) the minimum benefit standard for a single-member AFDC unit shall be one-fourth of the standard for a family of four; and (2) states will satisfy the minimum benefit requirements for family units larger than seven members as long as their combinations of food stamps and AFDC payments equal at least 60 percent of the poverty line for a family of seven.

Section 110—Resource Limitation:

This section would standardize resource limitations affecting AFDC eligibility by adopting on a national basis the resource limitations used in the Supplemental Security Income (SSI) program. For example, single-member AFDC units would be ineligible if they had liquid assets exceeding $1500 in value. The limit on liquid assets for a family of two or more would be $2250, the same as the limit for a married couple in the SSI program.

Section 110 would take effect at the beginning of FY 1981.

Section 111—Change of Title of "Aid to Families With Dependent Children" to "Family Security Program":

This section would change all references to the AFDC program throughout the Social Security Act to "Family Security Program" or "Aid for Family Security" as appropriate. This change in terminology would take effect at the start of FY 1981.

Section 121—Implementation of Work and Training Requirements:

This section makes the following changes to the Work Incentive Program:

(1) Requires AFDC recipients defined as employable to engage in work search activities. This requirement is also included in the

Senate Finance Committee's version of H.R. 7200.

(2) Exempts from WIN participation AFDC recipients who are: (a) working for not less than 30 hours a week; (b) engaged in a college-level undergraduate educational program for not less than 30 hours a week; or (c) employed in a CETA public service job.

(3) Clarifies for treatment, for purposes of the AFDC income disregard, of wages and training stipends paid under the WIN program. Public service employment and on-the-job training stipends are to be treated as earned income, while work experience and classroom training stipends will not.

(4) Revises the authority of the Secretary of Labor to issue regulations for certain aspects of the WIN program by requiring that all such regulations be jointly issued by the Secretaries of HEW and Labor.

(5) Eliminates the requirement for 60-day counseling before terminating assistance to an AFDC recipient who refuses a job offer or participation in WIN activities.

(6) Authorizes social and supportive services during work search and after employment is accepted.

(7) Authorizes counting of in-kind state and local contributions toward required 10% state-local share of WIN funding.

(8) Exempts from the Fair Labor Standards Act work experience assignments of up to 26 weeks under the WIN program.

Section 121 will take effect October 1. 1978.

Section 122—Placement of Responsibility for WIN Programs With States:

This section makes a number of changes to Part C, Title IV of the Social Security Act to make clear that the primary responsibility for operating the WIN program rests with the States. The Secretaries of Labor and HEW are to issue joint regulations for the WIN program, and the Secretary of Labor is to handle Federal-level administrative functions and oversight.

Section 122 also enables Governors to determine what agency will serve as the WIN agency for their states.

Section 122 will take effect October 1, 1978.

Section 123—Limitations on Amount of Annual Authorization for Programs; Quarterly Payments to States; Allotments to States:

This section provides for WIN funding of $565,000,000 annually (as compared to $365,000,000 appropriated for FY 1978) and makes WIN an appropriated entitlement program as opposed to merely authorizing appropriations under current law. This will assure that the full $565,000,000 is actually made available to the states. The procedures for allocating WIN funds among the states are also clarified.

Section 123 will take effect October 1, 1978.

Section 131—Federal Payments for Adoption Assistance and Foster Care:

This section adds a new Part E to Title IV of the Social Security Act, providing revised authority for Federal funding of state foster care programs, and a new program of Federal support for subsidized adoptions.

This section includes much of the bill language developed by the Senate Finance Committee and included in H.R. 7200 as reported by the Committee (now awaiting Senate Floor action). The states will be able to receive Federal matching for adoption subsidies paid to adoptive parents of hard-to-place children, provided the adoptive parents have incomes under 115% of the state median for a family of four. (In special circumstances, states may pay subsidies to higher income families). The adoption subsidy may not exceed the amounts which could have been payable if the child were in a foster care home. A child with a medical disability existing at the time of adoption will continue to have Medicaid coverage for treatment of that condition, even though the adoptive family is ineligible for Medicaid. States will also have the option to extend full medicaid coverage to such children.

The subsidized adoption program will become effective October 1, 1978 and will terminate September 30, 1982 unless extended by Congress.

Section 131 will also enable states to utilize Federal funding for the first time for foster care provided by public institutions serving no more than 25 resident children. This funding will only be available for children placed in such institutions after the effective date of the Act.

Section 201—Amendment to Title VI of the Comprehensive Employment and Training Act of 1973:

This section extends Title VI of CETA for five years, and provides that no less than 375,000 subsidized public service jobs shall be provided under it each year.

Section 202—Employment of Long-Term Unemployed and Certain Recipients of Aid to Families With Dependent Children:

This section targets CETA Title VI Public Service Jobs, as follows:

First priority: a guaranteed job for one adult in any AFDC-Unemployed Parent household who has searched unsuccessfully for a regular job for 90 days.

Remaining jobs: 50 percent to other AFDC recipients; 50 percent to other persons unemployed for 26 weeks or more, whether or not receiving unemployment compensation.

Section 211—Private Sector Voucher Program for Jobs:

This section adds a new Title IX to the Comprehensive Employment and Training Act, providing for a job voucher program to encourage employment in the private sector of AFDC recipients, persons unemployed for more than 26 weeks, unemployed youth (all of whom have searched for work for at least 90 days) and persons terminated from CETA public service jobs (who have searched for work for at least 30 days).

The vouchers will provide a subsidy of one dollar an hour for one year to for-profit and non-profit private organizations who employ persons who qualify for the vouchers. Eligibility will be certified by a state agency designated by the Governor. Vouchers will be redeemed through the banking system by the Treasury Department.

Employers will be precluded from using voucher-eligible employees to replace or reduce the hours of other employees. Employers will be required to pay prevailing wages, and will be required to choose between participation in the voucher program and claiming the job creation credit. (See section 302.)

Section 211 will become effective on October 1, 1978.

Section 301—Earned Income Credit:

This section enlarges the refundable Earned Income Credit now provided for in section 43 of the Internal Revenue Code, and authorizes distribution of the credit, as earned, through a "reverse withholding" process. The credit will continue to be available only to families with dependent children. The maximum credit would be increased from 10% of the first $4000 of earnings, to 15% of earnings up to the poverty line. The credit will vary by family size, up to a maximum of seven family members. For a family of four, the maximum credit will be approximately $975 in 1979, the first year in which the revised credit will be in effect (based on poverty line of approximately $6500).

Once the credit reaches its maximum, it phases out as income rises at a rate of 20 percent of earnings. This would result in the credit phasing out for a family of four at slightly over $11,000 in 1979, using the above assumptions about the poverty line.

Section 301 provides for special withholding certificates to be filed and periodically updated by employees. It also requires employees to report to their employers promptly any changes in earnings or other circumstances which could make them ineligible for the credit or reduce its size. Employers will off-set the credits distributed to employees against Federal income taxes withheld for employees. In order to provide stronger incentives for searching for and taking regular jobs, the credit will not be available for subsidized public service jobs under either CETA or WIN.

Section 302—Job Creation Credit:

This section would revise the existing temporary jobs credit and make it permanent. The credit would be targeted on the same groups who are eligible for job vouchers under section 211. The credit, like the vouchers, would be for one dollar an hour for one year for each eligible employee. Employers could not receive the tax credit if they participated in the Job Voucher Program.

The credit would be available only after employers increased their employment by more than 2 percent over the prior year's average. To keep employers from having an incentive to hire part-time rather than full-time workers, the employer would be entitled to the credit only if hours worked exceeded the prior year's by more than 5 percent.

The credit would not be refundable; but it would be an off-set against any tax liability the employer owed, up to a maximum of $100,000 per year.

The revised credit would become effective on January 1, 1979.

Section 303—Recoupment of Excess Welfare and Food Stamp Payments:

This section provides for recoupment through the Federal income tax system of amounts paid in AFDC and food stamp benefits to taxpayers who, on an annual basis, have incomes above the point where they would normally be entitled to public benefits. To illustrate: The way the program would work can be seen in the example of a head of a family of four who worked for part of a year during which he received $11,000 in earnings. He was unemployed for the balance of the year during which he received food stamps and/or AFDC worth $1,000. Under this section, he would owe the Treasury $240 over and above any positive tax liability he may have.

The premise behind this section is that people who work intermittently, at relatively high salaries, should not be put in better positions because of the AFDC and food stamp programs than a family with steady employment but similar overall income.

Section 303 would become effective January 1, 1979.

Section 401—Cash Assistance in Lieu of Food Stamps for Supplemental Security Income Recipients:

This section authorizes states to elect to have the Federal Government cash-out food stamps for recipients of Supplemental Security Income (SSI). In those states which elect cash-out, SSI recipients will receive benefit checks increased by the average value of food stamps received by all SSI recipients in that state.

Section 401 will become effective October 1, 1978.

Section 402—Reduction in Age Limit for SSI:

This section would lower the age limit for eligibility for Supplemental Security Income (SSI) on the basis of age from 65 to 64 in 1980, 63 in 1981, and 62 in 1982 and thereafter. Benefits for the elderly under SSI would then have the same age limits as retirement eligibility under Social Security.

Persons newly eligible for SSI on the basis of age would be required to meet the same income and resource limitations as other SSI recipients. States would have an option on whether to provide Medicaid coverage for the newly-eligible SSI recipients.

Section 501—Demonstration Projects:

This section authorizes demonstration projects involving cash-out of food stamps for public assistance and non-public assistance households.

Section 502—Repeal of Section 410 of Social Security Act:

This section repeals an out-of-date provision relating to the food stamp program.

Section 601—Assistance to Meet Emergency Needs:

This section establishes a Federal block grant program of $150 million per year to assist states in responding to temporary, emergency needs of vulnerable people. The money will be divided in proportion to the AFDC population.

The states will have wide latitude in use of the funds. This program would replace the existing much smaller ($35 million per year Federal costs; $35 million state/local), and more restrictive emergency assistance program.

The Secretary of HEW would be required to hold back up to 10% of the funds and use them to respond to special needs as they arose.

Section 701—Demonstration Projects:

This section directs HEW to work with USDA, Labor, HUD and states and localities in running demonstration projects to evaluate the feasibility of consolidated public assistance centers, and of various approaches to making more fundamental changes in the public welfare system. The welfare reform concepts which could be tested under this authority include a Federally-operated, consolidated program approach of the type reflected in the Carter welfare proposals, and an approach under which states would be freed from Federal regulations entirely in the design and operation of their welfare programs.

Section 702—Review of Art:

This section requires HEW in cooperation with Labor, Agriculture, and Treasury to conduct a thorough review of the effects of this act and report to the Congress in the fourth year after the bill is enacted, including recommendations for legislative changes.

Section 703—National Commission on Public Assistance:

This section creates a National Commission on Public Assistance, directed to study current welfare programs, including the modifications made by this bill, and to submit recommendations for further improving these programs (or replacing them with new programs) to the President and the Congress within three years. The Commission would consist of 11 members, with seven appointed by the President and two each by the Speaker of the House and President Pro Tem of the Senate. At least two of the members would be senior officials of state and local governments. The membership would also include recipients and potential recipients of public assistance, as well as experts in program design and operation.

Section 704—Uniform Definitions:

This section requires the Secretary of HEW to work with other cabinet departments in developing uniform definitions of household units and other concepts used in needs-tested programs. Appropriate legislative recommendations will be submitted to the Congress as one of the results of this work.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. BELLMON. I yield.

Mr. BAKER. Mr. President, I take this opportunity to thank the distinguished Senator from Oklahoma for his magnificent contribution to the conceptualization and the formalization of this proposal. Without his valuable assistance, I am not sure we would ever have reached this point. I am happy to be associated with him in this venture.

COMMITTEE MEETING

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Governmental Affairs Committee be authorized to meet until 12:30 p.m. today to consider S. 2236, the bill to strengthen Federal programs and policies for combatting international and domestic terrorism, and to explore ways of preventing nuclear terrorism.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Texas (Mr. BENTSEN) is recognized, as in legislative session, for not to exceed 5 minutes.

S. 2778—PCP CRIMINAL LAWS AND PROCEDURES ACT OF 1978

Mr. BENTSEN. Mr. President, about 7 million Americans, 20 percent of whom are under the age of 18, have used or continue to use one of the most dangerous and insidious drugs known to mankind.

Mr. President, you can buy 5 milligrams of PCP on the street, in the school hallway, at the playground, for a dollar. PCP is the most dangerous, illicit drug in use today. It is one of the least expensive and most available, as well. For the price of a school lunch, an eighth-grade student can literally blow his mind, possibly forever.

The widespread use of phencyclidine, PCP, angel dust, or hog is a plague on the youth of America. The drug can kill and cripple the mind. Consider the following:

A recent survey by the National Institute for Drug Abuse uncovered over 1 million young people under the age of 18 who admitted using PCP. Forty percent of them said they obtained the drug from a friend.

There has been a 50-percent increase in the number of young people using PCP in the past year alone.

The average age of the person admitted to hospital emergency rooms suffering from the effects of PCP is 15 years.

Mr. President, the horrors engendered by the use of angel dust are appalling. The files of the Los Angeles Police Department contain evidence of a young man pulling out his own teeth with pliers while under the influence of PCP; another gouged his eyes from their sockets to avoid seeing grotesque visions; a third young person drank rat poison to kill the rodents he believed had infested his body.

Persons under the influence of PCP are not restricted to doing harm to themselves. Violent, unprovoked attacks on innocent bystanders—such as the recent incident in which a teenager murdered his mother and father with a high-powered rifle while suffering PCP hallucinations—are not uncommon.

Earlier this year, Senator PERCY amended the Criminal Code Reform Act to reschedule PCB into schedule I of the Controlled Substances Act and increase the penalties for trafficking in this terrifying drug. I commend the Senator for this initiative. It is certainly a step in the right direction.

However, I believe that there is more we can do—more we must do—to control the abuse of PCP, to get this curse of a drug off the street.

One of the basic problems in attacking PCP is the fact that any person with a few hundred dollars and perverse instincts can manufacture angel dust at home or even in the back of a van. He can freely order the ingredients from a mail order house, and turn a $200 investment into drugs worth $1,000 on the street. He runs a certain risk of blowing himself up in the process, but this does not deter these entrepreneurs of derangement. Most of the angel dust used by the young people of America today is manufactured by nonprofessional criminals out to make a quick buck.

Mr. President, if there is an achilles heel in the process by which PCP is manufactured and distributed, it is access to piperidine, one essential element of PCP. We produce only 500,000 pounds of piperidine annually—that is one ten-thousandth of a percent of U.S. total organic chemical production. The major legitimate use of piperidine is in curing rubber, but it takes only a few hundred pounds of this chemical to addle the minds of millions of young people.

I noted earlier that most "street" PCP is manufactured by weekend profiteers who are encouraged to participate in the highly lucrative synthesis of PCP by the veil of anonymity that presently surrounds the purchase of chemicals.

Mr. President, when it comes to piperidine the time has come to tear away that veil of secrecy. In this country you have to register to drive a car, you have to present identification to purchase a handgun or dynamite; you have to show proof of age to buy a bottle of whiskey; you cannot obtain most drugs without a prescription. I think anyone who purchases piperidine should be prepared to identify himself.

I am not suggesting a licensing procedure. I do not envision interfering with the normal flow of chemicals throughout our economy. I have no intention of creating cumbersome bureaucratic procedures. I am simply proposing that the individual who goes to a chemical supply company, in person or by mail, to purchase piperidine should be required to present positive identification.

The purpose of the PCP Criminal Laws and Procedures Act of 1978, which I am introducing today, is to bring to the formal attention of the proper authorities the names of persons purchasing piperidine and perhaps producing PCP illegally. The act also increases criminal sanctions for first offense trafficking in PCP to a maximum of 10 years in prison and a fine of up to $100,000.

The present penalty is 5 years in prison and a $15,000 fine.

My legislation would have three primary benefits. It gives law enforcement authorities important information on purchasers of piperidine—people who are either curing rubber legally or destroying minds illegally.

Second, the requirement to register upon purchase of piperidine would obviously deter the casual entrepreneur from obtaining one of the raw materials used in the manufacture of PCP.

Finally, by providing legal procedures for the purchase of piperidine, we give law enforcement officials an added weapon to use in prosecuting illegal PCP manufacturers.

Mr. President, my legislation has been favorably received by the Drug Enforcement Agency and numerous State and local law enforcement agencies.

Obviously, I do not pretend that it will solve the problem of drug abuse among the youth of America. I acknowledge that it will not necessarily eliminate PCP from our streets, schools, and playgrounds. I am well aware of the potential for piperidine leakage and the possibility of increased organized criminal involvement.

I do, however, submit, that the PCP Criminal Laws and Procedures Act of 1978, if enacted, will drive the small, casual producer from the marketplace; lead to a dramatic increase in the street price of PCP; and hopefully substantially decrease usage by the young people of this country.

I commend this legislation to the attention of my colleagues and hope that we shall be able to enact it into law during this session of Congress. I do not think this country can afford to wait any longer before acting to control the abuse of PCP.

THE PANAMA CANAL TREATY

The ACTING PRESIDENT pro tempore. Under the previous order the Senate will now resume consideration of Executive N, 95th Congress, 1st session, Calender No. 2, the Panama Canal Treaty, which the clerk will state.

The legislative clerk read as follows:

Executive N, 95th Congress, 1st Session, the Panama Canal Treaty.

The Senate resumed the consideration of the treaty.

AMENDMENT NO. 86

The ACTING PRESIDENT pro tempore. The pending question is on amendment No. 86 by the Senator from Alabama (Mr. ALLEN). Under the previous order the Senator from Alabama (Mr. ALLEN) is recognized.

Mr. ALLEN. I thank the Chair.

Mr. President, the pending amendment covers two separate related subjects. I ask the Chair if he will kindly have the clerk state the amendment for the benefit of Senators.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. ALLEN) proposes an amendment numbered 86.

Amend Article I by adding at the end of Section 1(d) the following new Subsection:

(e) It is expressly provided, however, that (A) nothing contained in this treaty shall deprive the United States of the right it has under the 1903 and 1955 treaties to prevent the construction of a second canal in Panama by any nation other than the United States; and that (B) nothing contained in the treaty shall prevent the United States from negotiating with any other nation for the construction, maintenance, and operation of a transoceanic canal anywhere in the Western Hemisphere, or from construction, maintaining, and operating any such canal.

Mr. ALLEN. Mr. President, inasmuch as the amendment contains two separate divisible subjects, I ask that the Chair divide the subjects, and I will address my remarks to the first part of the amendment.

The ACTING PRESIDENT pro tempore. The Senator has that right, and the amendment is divided.

Mr. ALLEN. I thank the Chair.

Mr. President, this amendment is one of the most important amendments that will be offered to the Panama Canal Treaty. It covers provisions in the treaty that would prevent the United States for the next 22 years from negotiating with any other country for the construction of a second canal, and it provides that in return for that supposedly no second canal could be constructed in Panama without our permission.

This amendment in its two phases would allow the United States to continue to have the right to prevent another country from building a second canal in Panama but it would not impose this limitation on the United States that we cannot even negotiate with another nation for the construction of a second canal.

Mr. President, it has been stated time and time again by the proponents of these treaties that the two provisions now in the treaty, that is, that no other nation can build a canal in Panama without our consent and that in return for that we must agree that we will not negotiate with another country, such as Nicaragua or Mexico, for the construction of another canal were put in the treaty at our request. That is hardly reasonable, Mr. President, to contend that.

Of course, if we are prevented from negotiating with another nation for the construction of a canal, obviously the negotiators then insisted that in compensation for that, to offset that prohibition on the United States, Panama would have to agree that no other nation could build a canal in Panama. The fallacy of that position, however, Mr. President, is that under the existing treaties—and I say treaties, because there is not only the 1903 treaty, but there is also the 1955 treaty that confirms the monopoly that we have on the construction of canals in Panama—as I shall read in just a moment from the 1903 treaty and the 1955 treaty, we already have the right to prevent any other nation from building a canal in Panama. But under the treaties—now listen to this; this is the way they worded it—we give up that monopoly. We give up the right to prevent any other nation from building a canal in Panama. That monopoly, that right to prevent another nation coming into Panama for building a canal, is wiped out under the treaty that we have. How is it wiped out? It wipes out every single treaty, protocol, agreement, exchange of notes, whatsoever, between the United States and Panama with respect to the Canal Zone and the Panama Canal. And we have to start from scratch.

Under the Panama Canal Treaty, nothing heretofore that has been negotiated in good faith will remain the agreement between the two countries. Every bit of it is wiped out, wiped out in the preamble or the first proviso before we get the articles. So whereas now we can prevent the construction of another canal by another nation in Panama—that is the rule now—in order to get that right again in the new treaties, we have to make the ridiculous commitment that we are not going to negotiate with any other nation that might have a feasible route for another canal. We cannot even negotiate with such a nation for another canal for 22 long years. So, what sort of negotiating was that by our negotiating team? A right that we already have they give up and then in order to get back the right we have just given up we have to make this prohibitive concession that we cannot negotiate with another nation for another canal for 22 years.

Mr. President, when the Panama Canal was on the verge of coming into being, while they were considering routes, the House of Representatives back in 1902, by an almost unanimous vote, 300 some odd to 8, voted for the Nicaraguan route, not the Panamanian route. That was changed in the Senate to go the Panamanian route. But many top engineers of the time felt that the Nicaraguan route was the preferable route. The House of Representatives thought so strongly that they almost unanimously voted for the Nicaraguan route. But under the treaty we have before us we cannot negotiate with Nicaragua for the construction of a canal for 22 long years.

Some say that across Mexico and coming out on the Pacific side at the Bay of Tehuantepec is a good route for a sea-level canal. Well, we cannot negotiate with Mexico. We cannot negotiate with Nicaragua, under the terms of the treaty, for 22 years.

What is the situation now? It is going to be changed by these treaties, while we negotiate all day long, day in and day out, week in and week out, anywhere we want to go for a canal. Why should we give up that right? Mr. President, it does not make sense. Why should we not retain the right, if the Panama Canal is not properly operated? If it becomes too small to take care of our ships, why should we not have the right to negotiate with another nation for another canal? It does not mean we have got to do it, but we are deprived of the right even to negotiate with another country.

Now that right is given up under the treaty and in return for the giving up of that right they say, "Oh, well, in return

for that we will let let you say that you will prevent Panama from allowing another nation to construct a canal across Panama."

Well, we already have that right. So we are making a tremendous concession in return for a right that we already have. Why no reasonable person would negotiate such an agreement, and this is a vital flaw in this treaty.

Some of the proponents of the treaties state that they have open minds with respect to amendments, and I heard the distinguished majority leader on a television program on just Sunday state that he had an open mind with respect to amendments on this treaty. Well, I assume he had that same open mind with respect to amendments to the Neutrality Treaty, but it did not open it up sufficiently, Mr. President, to admit any amendments other than the leadership amendment.

So I think it is going to be interesting, as this debate proceeds, to see to what extent the proponents of the treaties have open minds with respect to amendments.

Now, I would say that any Senator with an open mind with respect to amendments should certainly see the fallacy in a treaty that puts such a burden upon the United States, a burden that does not now exist, a burden of not being able for 22 years to negotiate with another country for another canal, in return for giving us the right to veto another canal in Panama by another nation, which is a right that we now have, to make such a tremendous concession as that in return—in return for what? In return for nothing. Because we already have that right, the right to veto the construction of another canal in Panama.

So I would feel that openminded Senators would see the fallacy of these two provisions in the treaties.

Mr. SARBANES. Will the Senator yield?

Mr. ALLEN. I will yield for a question, yes.

Mr. SARBANES. Could I ask the Senator to what provisions in the Panama Canal Treaty is his amendment directed?

Mr. ALLEN. My amendment is directed to article I. That is what we have under consideration.

Mr. SARBANES. And what provision in article I is it that the Senator feels needs amending or what provision of the treaty before us is it that the Senator feels is deficient and requires this amendment?

Mr. ALLEN. This question is so vital, the question of eliminating this prohibition, that in all likelihood, if the leadership persists in its policy of stonewalling against amendments, if it persists in its policy of demanding that the Senate rubberstamp this treaty without amendment, this is an amendment, or these are amendments, that the leadership is going to have to face time and time again here in this Senate.

Mr. SARBANES. Well, that may be, but just to make it clear, what provision in the Panama Canal Treaty is it that the Senator feels creates the problem that he is addressing?

Mr. ALLEN. I will respond, but I hope the Senator will allow me to complete my response before he interrupts again to ask a question.

The distinguished Senator has asked to what provision of the treaty my amendment is directed. Well, obviously, Mr. President, only amendments to article I can be considered at this time, because in Committee of the Whole that is the procedure, and I am glad that we are in Committee of the Whole, because we have to take these articles one at a time, in order.

At this time we are on article I. So. naturally, my amendment is directed to article I. It adds an addendum to article I.

Now the particular provisions of the treaty that would be supplanted by these two amendments, if they are agreed to by the Senate, can be found in article XII, section 2, subsections (a) and (b), which I will now read for the distinguished Senator's edification.

Mr. SARBANES. May I assure——

Mr. ALLEN (reading):

No new interoceanic canal shall be constructed in the territory of the Republic of Panama during the duration of this Treaty, except in accordance with the provisions of this Treaty, or as the two Parties may otherwise agree.

Mr. President, that is the veto power to which I alluded that the United States is given under this treaty in return for section (b), which I will now read for the further edification of the distinguished Senator from Maryland.

(b) During the duration of this Treaty, the United States of America shall not negotiate with third States for the right to construct an interoceanic canal on any other route in the Western Hemisphere, except as the two Parties may otherwise agree.

Now, Mr. President, that is already the treaty law between the two states involved.

I want to now proceed to read the provision of the 1903 treaty to which I have alluded. We find that in article V of the 1903 treaty. But for just a moment I want to comment on the effect of the 1955 treaty.

We have heard so much, Mr. President, about the United States negotiating with Panama back in 1903, and I have heard the distinguished Senator from Idaho (Mr. CHURCH) say that if the Panamanians had not agreed to that treaty, they were going to face a Colombian firing squad, and that, of course, they had to agree to that treaty, that it was forced on them almost against their will. That, in fact, it was against their will; it was sign the treaty or face the firing squad, is the issue as the Senator from Idaho has stated it.

The 1903 treaty gives us the right to have a monopoly in perpetuity for the construction, maintenance, and operation of the canal. I will read it in full, so it will not be considered my version; it is only four lines:

The Republic of Panama grants to the United States in perpetuity a monopoly for the construction, maintenance and operation of any system of communication by means of canal or railroad across its territory between the Caribbean Sea and the Pacific Ocean.

That is the right that we have under the 1903 treaty. Now, 52 years later Panama and the United States entered into another treaty. Well, they did not have that Colombian firing squad to force Panama to enter into that treaty; it was an arm's-length transaction between sovereign states. So let us not refer to the 1903 treaty as the only basis for rights of the United States to construct, maintain, and operate a canal in the Panama Canal Zone.

First, let us compare the provision I just read with the provision that the distinguished Senator from Maryland called upon me to read. Let us compare those two, and see if they were any different.

Mr. SARBANES. Is the Senator now referring to the provisions of article XII, paragraphs 2 (a) and (b) of the Panama Canal Treaty?

Mr. ALLEN. Yes. I read them a moment ago. I am pleased that the distinguished Senator identifies them at this time.

Mr. SARBANES. The provisions in article XII of the treaty?

Mr. ALLEN. Well, the Senator just got through saying that. There is no need of repeating it.

Mr. SARBANES. All right.

Mr. ALLEN. Now, to compare the provision that is already the law between the two countries, which gives us the monopoly and gives us the veto right on the construction of another canal—frankly, Mr. President, I do not regard that right as being worth a great deal. I do not believe any country is going to be foolish enough to spend $10 billion building a canal in Panama, and then have the Panamanians do as they are doing now, and say "Give us that canal." They might well expropriate it.

So I really feel that that is of small moment, the right that we have from the 1903 treaty and the 1955 treaty, and that is given us in the treaty before us in return for tremendous concessions. I do not put too much stock in that. I do not know of any country, unless it be the Saudis, that could build a canal and spend $10 billion. If they sought to amortize a $10 billion investment, they would have to have some traffic there. So I do not regard that as too much of right, that is worth a great deal to us, the right to say that another nation cannot build a canal in Panama.

But I do regard this prohibition against the United States from even negotiating with another country for another canal as an intolerable prohibition.

All right. I have read the 1903 treaty; now I am going to show how it was brought forward in the 1955 treaty, when there were sovereign states dealing at arm's length with each other.

This is what is provided in the present treaty:

During the duration of this Treaty, the United States of America shall not negotiate with third States for the right to construct an interoceantic canal on any other route in the Western Hemisphere, except as the two Parties may otherwise agree.

That is what we would give up in return for a provision we already have. That provision reads as follows:

No new interoceanic canal shall be constructed in the territory of the Republic of

Panama during the duration of this Treaty, except in accordance with the provisions of this Treaty, or as the two Parties may otherwise agree;

What does that give us in that section that we do not already have? The answer is a great big fat zero. It gives us absolutely nothing in addition to what we already have.

Now, Mr. President, let us look at the 1955 treaty, where concessions were made, where departures were made from the 1903 treaty, and the provisions about the monopoly that the United States has.

In 1955—let us read the heading of that, just for the information of Senators before we get to this paragraph.

This starts off, just to give the history of the 1955 treaty:

Treaty, with Memorandum of Understandings reached;
Signed at Panama January 25, 1955;
Ratification—

We speak loosely here in the Senate sometimes of the Senate ratifying. The Senate does not ratify, it merely gives its advice and, if it approves the treaty, its consent, or it could give its advice and nonassent and, of course, that is what I would like to see the Senate do, give nonassent to this treaty. But we do not ratify it, even though that is a phrase that is sometimes loosely used:

Ratification advised by the Senate of the United States of America July 29, 1955;

Now, this took about 6 months. Talking about all this delay on the present treaty, this was a treaty that there was practically no controversy over, and it took 6 months from the time of the signature to the time that ratification was advised by the Senate, from January 25, 1955, to July 29, 1955.

The present treaty was signed, I believe, September 7, 1977, and we have not been on this treaty much longer than they were on that treaty way back in 1955. So I do not believe we are taking an undue amount of time with respect to the consideration of this treaty;

Ratified by the President of the United States of America August 17, 1955;

So there is where the word "ratification" properly comes in. The President ratifies it, on advice from the Senate.

I do not believe we have given the President the proper advice, Mr. President, unless we point out to him and change provisions which are not in the best interests of the United States. It would be mighty poor advice, it seems to me, with full knowledge that the treaty is defective. How could the Senate properly advise the President to ratify it?

It is our duty, Mr. President, as I see it, under the advise and consent provisions of the Constitution, as part of our advice to point out and to implement that pointing out of defects. We should point out and change defects which are so apparent in the wording of the treaty. That is part of our advice.

The leadership and the floor managers of the treaty apparently do not think that the Constitution places very much authority, power, and duty on the U.S. Senate in considering these treaties.

Pretty soon we are going to see just how openminded are Senators, the leadership, and the managers of the treaty.

I will say this for my distinguished friend, the distinguished Senator from Idaho (Mr. CHURCH): He does not beat around the bush on his attitude with respect to these treaties. He says:

Do not add a single word. Eight words, six words, two words, will kill the treaty.

So we see what his attitude is going to be. I admire that frankness and that candor in stating straight out:

No, we are not going to allow any amendments to pass, no siree.

We know what the attitude of the manager is. He did not say he had an open mind on the treaties. I will say that to the credit of the distinguished Senator from Idaho (Mr. CHURCH).

Mr. SARBANES. Will the Senator yield?

Mr. ALLEN. No, I will not. We have divided time here. The Senator interrupted me a few moments ago. I gave him the information he desired. I prefer he use his own time because it interrupts my chain of thought.

Mr. SARBANES. I will be happy to use my time——

Mr. ALLEN. I hope the Senator will allow me to finish my remarks. He has plenty of time to make such remarks as he wishes. I see him taking notes over there.

Mr. SARBANES. I will say to the distinguished Senator I have not taken a note this morning.

Mr. ALLEN. It might be well for the Senator to start making notes.

Mr. SARBANES. I have been listening to the Senator's comments very carefully.

Mr. ALLEN. I am glad the Senator is paying attention.

Mr. SARBANES. If he feels he has queries he wishes to pose to us during our time, I hope he would be happy to do so. I would hope on occasion he would yield for the purpose of a question. I have one further question I would like to ask the Senator.

Mr. ALLEN. Very well, I will accommodate the distinguished Senator.

Mr. SARBANES. I appreciate that. I wanted to ask this question: The provisions of the Panama Canal Treaty, now pending before us, which create concern in the Senator's mind, and which he is seeking to change, are in article XII of the treaty. Why is he offering his amendment to article I? Why not offer it to article XII when that provision is before the Senate?

Mr. ALLEN. Is that the single question the Senator wanted to ask?

Mr. SARBANES. I would be interested in the Senator's reasoning on that point. By his own admission, I believe his amendment applies to article XII.

Mr. ALLEN. I thought the Senator had a single question to propound. Having propounded it, I hope he permits me to answer it.

Mr. SARBANES. I do not want to argue with the Senator. I hope he will answer my question.

Mr. ALLEN. I will answer it right now. The whole treaty is before the Committee of the Whole of the U.S. Senate. We are limited at this time to article I. Since the entire treaty is before us, since the thrust of the treaty is before us, it is entirely appropriate, I will say to the distinguished Senator, to present any phase of the treaty as an amendment to the first article. My amendment does not change one single word in the wording of article I. All it does is to bring to the fore one of the most important defects in the treaty and to point out a way to correct that defect.

If the leadership is going to stonewall amendments, if the leadership is going to insist that we have rubber stamp treatment of this treaty, then this amendment will be defeated.

I recognize the leadership is at the head of an army of some 60 Senators who are willing to vote according to the recommendations of the leadership. It may be possible that we will have to address this very same question not once but several times when we get down to article XII. We will probably still be needing this amendment.

The PRESIDING OFFICER. The Chair would like to remind the Senator from Alabama that there is no allocation of time.

Mr. ALLEN. Mr. President, I ask unanimous consent that the time between now and the time of the vote on the amendment be equally divided between the managers of the treaty and the Senator from Alabama.

The PRESIDING OFFICER. Is there objection?

Mr. ALLEN. I ask the Chair how much time the Senator from Alabama has consumed.

Mr. SARBANES. Under the unanimous consent request, I thought the time was equally divided between the two sides.

The PRESIDING OFFICER. The only thing the unanimous-consent agreement has in it is that we would vote at 1 o'clock and at 3:30.

Mr. SARBANES. I meant the time between when we started considering the amendment and the vote should be divided.

Mr. ALLEN. That is certainly all right. I will say for the benefit of the leadership, to give full credit to the leadership, the distinguished majority leader asked me last evening before we recessed if I would agree with that. I was going to honor that request even though it had not been made. Of course the time should be equally divided. I now ask the Chair how much time the Senator from Alabama has consumed.

The PRESIDING OFFICER. Without objection, the unanimous-consent request is agreed to.

Mr. ALLEN. How much time has the Senator from Alabama consumed, Mr. President?

The PRESIDING OFFICER. The Senator from Alabama has used 38 minutes. The time began at 10 minutes after 10.

Mr. ALLEN. I thank the Chair.

The distinguished Senator from Maryland wished to make one further inquiry, which he did. He asked me why I was addressing by an amendment to article I something which appears down in article XII. The answer is that the Senator from

Alabama feels that the major issues in this treaty should first be addressed.

In the interest of seeing that the Senate is occupied with the consideration not of frivolous amendments, not of dilatory amendments, but of amendments which go to the very heart of the treaty is the reason the Senator from Alabama has brought up this amendment to article I.

I will say this to the distinguished managers of the treaty: Some interest has been expressed in wondering when this treaty might come to a vote. I say that if the distinguished managers of the bill will allow the Members of the Senate that they lead, the substantial majority of the Senators they lead, to vote their independent convictions in this area, and will see that much needed amendments are agreed to and added to this treaty, we will come to a vote much quicker than if the leadership and the managers of the treaty insist on the Senate rubberstamping these treaties, than if they insist on stonewalling against meritorious amendments.

If the Senate will permit or if the floor managers will permit Senators, if they will release them from blindly following the recommendations of the managers so that they might vote for amendments that are needed, let Mr. Torrijos worry about the ratification down in Panama and let the U.S. Senate give proper advice to the President with regard to the ratification of this treaty, in all likelihood, we could finish action on this treaty in the next few days.

I will say, no matter how the treaty might be amended by such amendments as the one that I have at the desk, as long as the treaty provides for giving the Panama Canal away, then I cannot vote for such a treaty. But there is a difference between not voting for a treaty and allowing an early final vote on the treaty. If we could, if the Senate would, in its wisdom, take care of the American taxpayer, with a substantial amendment providing that we are just going to give the canal to Panama and we are not going to pay them the hundreds of millions of dollars to take it—that is one amendment that needs to be adopted. Even though we are going to give it away, do not burden the American taxpayer, who will be overburdened with taxes, with the duty of paying thousands of millions of dollars to Panama.

If we knock out this provision that we must not negotiate with another country for the building of a canal; if we require the Panama Canal Commission, a commission of nine that takes over immediately—five U.S. citizens, four Panamanian citizens—if we allow those commissioners to be confirmed by the U.S. Senate so that we will not have just anybody that Torrijos names serving on this commission. That is a U.S. commission. It is not a United States–Panamanian commission. It is an agency of the United States.

To say that we are going to have to take as four of the nine commissioners four Panamanians whose names are submitted to us without any right to refuse those names—I challenge the supporters of these treaties to show that the United States has any discretion whatsoever in the naming of these four Panamanian out of nine members of this United States-Panama Canal Commission. We have to take whoever they name. I do not care whether they be men of poor character, violators of laws, rascals if you please, we have to accept those four Panamanians. Not one word about the United States having any discretion.

That is the sort of treaty that has been dumped in our lap. I feel that there are major amendments that should be made.

Another provision, Mr. President, I think needs careful attention. We have about—well, I shall not say the number. We have several thousand U.S. citizens working for the Panama Canal Company. Already, there are some 75 percent—I heard the distinguished Senator from Maryland use the figure 80 percent the other day—of the employees of the Panama Canal Company who are Panamanians. Of this 20 percent that is left who are citizens of the United States, do you know what the treaty provides? It provides that, within 5 years, we have to reduce that 20 or 25 percent that we have by 20 percent. I feel that there ought to be an amendment protecting the U.S. employees, U.S. citizens who are employees of the Panama Canal Company. They should be protected in their employment. If they are doing a good job, they should not be booted out.

The United States is supposed to have the operation of the canal for the next 22 years. What kind of operation is that? What kind of control is that, Mr. President, if we have to agree that we are going to reduce this 25 percent of employees that are U.S. citizens by 20 percent in 5 years?

Then, Mr. President, they talk about the dignity of Panama, when we cannot put any American employees down there, U.S. employees, add them to the work force down there, unless such person has a skill that is not available in Panama.

Well, it is one thing to give them the canal 22 years from now and to say that in the interim, we are going to keep control of the canal, we are going to operate it, and yet, we find that we have to start a systematic reduction right away of employees who are citizens of the United States.

How much more do they want, Mr. President, than 75 percent of the employees? That is a pretty good percentage on an operation that is supposed to be a U.S. operation. They are not satisfied with that. But we cannot send anybody down there unless he has a special skill and, of the employees that are there, we have to get rid of 20 percent of them in the next 5 years.

Mr. President, I was reading a moment ago, and I did digress somewhat. I was pointing out the steps in the ratification of the 1955 treaty. Mighty little has been said, Mr. President, about the 1955 treaty, entered into over 50 years after the first treaty. They talked about how helpless Panama was back in 1903, that we just took advantage of them down there and did not respect their sovereignty and they sent a Frenchman up here to sign a treaty for them, and all of that; even though some nine members of the Panamanian cabinet did sign the instrument of ratification showing approval by the Panamanian Government of the 1903 treaty. We have not heard a great deal about the 1955 treaty, more than 50 years later. I guess by that time, Mr. President, we were not exerting undue influence on them.

The charge has been made here, on the floor, that if the Panamanians had not signed the 1903 treaty, if they had not agreed to it, they would have faced a Colombian firing squad.

(Mr. SASSER assumed the chair.)

Mr. ALLEN. But I do not believe anybody feared a Colombian firing squad in 1955.

Let us go on here where it says, "Ratified by the President of the United States of America, August 17, 1955."

That is the 1955 treaty, ratified by Panama.

August 15, 1955, 2 days before the President ratified:

Ratifications exchanged at Washington, August 23, 1955, proclaimed by the President of the United States of America, August 26, 1955, entered into force August 23, 1955.

Now, let us see what the Panamanians agreed to with respect to the monopoly as to a canal and other interoceanic communication in this treaty 50 years later when they had arms' length bargaining between sovereign states.

I mentioned the provision in the 1903 treaty that did give us a monopoly on all interoceanic communication across Panama by railroad, by canal, even by roads.

Mr. President, in 1955, article III of that treaty, let us read the first paragraph. I think it will shed some light on it:

Subject to the provisions of the succeeding paragraphs of this Article, the United States of America agree that the monopoly granted in perpetuity by the Republic of Panama to the United States for the construction, maintenance and operation of any system of communication by means of canal or railroad across its territory between the Caribbean Sea and the Pacific Ocean, by Article V of the Convention signed November 18, 1903, shall be abrogated as of the effective date of this Treaty in so far as it pertains to the construction, maintenance and operation of any system of trans-Isthmian communication by railroad within the territory under the jurisdiction of the Republic of Panama.

So by this article, in the first paragraph, the United States had a monopoly throughout Panama on any type of interoceanic communication from the Pacific to the Caribbean, whether it be by railroad, by canal, or even by roads.

But in this treaty, article V, the next paragraph, has to do with releasing this monopoly as to roads, but it retained the monopoly as to canals.

So we do not have to go back to 1903 to see this right that the United States has to have a monopoly in perpetuity on another canal.

In releasing it, in releasing as to railroads and roads, they just released, Mr. President, as I read it, the monopoly; they do away with the monopoly as to railroads and roads in Panama outside the Panama Canal Zone.

They retain that monopoly inside the zone. But they retain the monopoly on additional canal construction in all of Panama. This is a sovereign state in 1955, not worried about that Colombian firing squad as the proponents of the treaty say was one of the inducements to agreeing to the 1903 treaty. They reiterate in 1955 this monopoly.

So it seems passing strange to me, Mr. President, that with this right so deeply embedded in the law, reconfirmed in 1955 that the United States has a veto on canal construction in Panama, having that right already and then to proceed to release that right in the Panama Canal Treaty we have before us.

Then in order to get that right back, a right we now have, it seems rather strange Panama forcing our negotiators to put in a provision against our best interests and putting a limitation on the United States of America on negotiating with another nation for the construction of another canal in such other nation.

Why in the world would our negotiators put such a provision as that in there? They say it is put in at our request. Well, they say it was put in in order to get this veto power against another canal by another nation in Panama when we already have that veto power.

Now, what kind of trading is that? The Yankees are supposed to be pretty good traders. It looks to me like the Panamanians outtraded our fellows at every turn.

They get us to release rights and then when we want them back, they say, "Well, we will give them back to you provided you will do something else."

That is how this provision came into the treaty, that we cannot negotiate with another nation for the construction of another canal in a country other than Panama.

So this needs to be adjusted, Mr. President. This is going to be a major test, as I see it, of whether the leadership and the managers of the treaty are going to agree to provisions that will knock out provisions in the treaty directly against the best interests of the people of the United States.

If the leadership says, "Well, this is not needed," it is needed. Without an amendment at this point or later on in the treaty, we are going to find ourselves giving up a right we now have and, in order to get it back, making a concession that is a most ridiculous concession.

Why in the world should this be? The United States has a right to negotiate, I assume, with any nation on any subject. Why should it commit itself in this treaty not to negotiate with another nation for another canal, outside Panama for 22 long years? That is what the treaty provides.

This amendment would knock out those provisions, or it would have the effect of knocking them out, because it goes directly contrary to what it later says in the treaty; and I imagine it would be a mere formality to knock out the two provisions when we get down to them. But this is an issue that needs to be faced right at the very beginning of this debate.

I say again—I cannot emphasize too strongly—that we are really just now getting to the basic issue of these treaties. All that has been decided up to now is that in the year 2000 we are going to defend the canal. Well, many of us felt that the defense provisions were not strong enough. Be that as it may, we voted that under certain conditions we are going to have the right to intervene in Panama for the defense of the canal, even though at some time under this treaty we are providing that our troops have to be out of there, under the Neutrality Treaty, that our troops have to be out of there by the year 2000. That is all we have decided—that we are going to defend the canal.

So the basic thrust of the treaties still has to be addressed. Are we going to give the canal away? Are we going to protect the American taxpayer? If this treaty is approved, it would breathe life into the other treaty. It is absolutely dormant at this time—in a state of suspended animation, as it were, not worth a thing. It has no life, has no effectiveness, has no being, until this treaty is approved.

If this treaty is defeated, the other treaty falls. I argued in the first days of the first debate that we should take up this treaty first, decide first whether we are going to give the canal away, before worrying about whether we are going to defend it in the year 2000.

Let us see how the pending amendment would help cure this defect in the treaty—a major defect in the treaty, I might say. As I say, this is going to be a test of the leadership willingness to accept constructive amendments, whether the managers of the bill are going to insist on rubberstamping the approval of the treaty, whether they are going to stonewall against every amendment that is offered, no matter what its merit, whether we are going to be forbidden from submitting and obtaining passage of a single word change.

Mr. President, I wonder whether the leadership is going to come forward with a leadership amendment on this treaty. They saw some great defects in the other treaty, and they came forward with an amendment that they said takes care of these defects. Well, the amendment was the memorandum, word for word, entered into between the President and the dictator. They saved that treaty. They all said it was doomed. Both leaders said it was doomed, the members of the Foreign Relations Committee said it was doomed, unless the leadership amendment was adopted, and that was going to cure everything.

We discussed the leadership amendment quite a bit here. It had about as many defects as the treaty had, but the amendment is supposed to make acceptable something that was absolutely unacceptable, that was headed for defeat. It made the treaty so acceptable that no other amendments were permitted, not one. I wonder whether the leadership is going to come forward with an amendment to cure the manifest defects in this treaty. I hope they will. I will support it, just as I supported the inadequate leadership amendment on the other treaty. Let us see if the leadership is going to come up with perfecting amendments on this treaty.

I must say, Mr. President, that the Foreign Relations Committee did not make a single committee amendment. They had witnesses for weeks on end. They did not offer a single committee amendment. They gave approval to the leadership amendment, but the committee did not make a single committee amendment to either treaty—not one. I believe there is enough ability on that committee to see these defects and to offer amendments to correct them, but they have not done it. I am going to be watching with great interest to see if the leadership will offer leadership amendments to this treaty, which is full of holes and ambiguities and defects.

Back again to the amendment. It is in two parts. One part, and this is the one on which we will be voting first—there will be two separate votes—reads:

> It is expressly provided that nothing contained in this treaty shall deprive the United States of the right it has under the 1903 and 1955 treaties to prevent the construction of a second canal in Panama by any nation other than the United States.

Is that a radical departure? Is this putting in a surprise provision? Why, no. It is the present treaty between the two countries. It says that whatever the law is under the treaties now in existence between Panama and the United States—and I am referring not only to the 1903 treaty but also to the 1955 treaty—whatever is there, be it much or be it little, with respect to this one issue, the building of another canal in Panama by a nation other than the United States or Panama, whatever rights we now have under these treaties, they are not going to be done away with by the treaty we have before us, the present Panama Canal Treaty. That is all it does.

That is all it does. It does not put in this ignoble provision saying that we cannot negotiate with another nation about a canal in that other country.

Mr. President, what if the opponents of these treaties—or I might say those who have sought to strengthen these treaties—what if those who had thought to strengthen both of these treaties had suggested, I say to the distinguished Senators from Utah (Mr. HATCH and Mr. GARN), what if we or other like-minded Senators had sought to put a provision in either of these treaties that Panama could not negotiate with another nation for the building of a canal? Would there not have been a tremendous outcry from the leadership and the managers of the treaty that we should not heap this indignity on Panama, that we should not prevent them from taking lawful acts to protect their interests, that that would be a gross violation of the dignity and the sovereignty of Panama if we should seek to do any such outrageous thing? But yet we provide that, put that prohibition on ourselves under this treaty, and the managers of the bill apparently are going to seek to keep that provision in there. I will pose that question rhetorically to the distinguished Senators, and I am going to yield the floor in just a minute after I explain the second provision. That says that we will continue to have the right to prevent the construction of a second canal and then the other

provision about which I was alluding to a moment ago:

. . . nothing contained in the treaty shall prevent the United States from negotiating with any other nation for the construction, maintenance, and operation of a transoceanic canal anywhere in the Western Hemisphere, or from constructing, maintaining, and operating any such canal.

That is the rule now between the two countries, and our negotiators very foolishly allowed them to impose that prohibition upon the sovereign United States. This is the kind of stuff that you might think about having happen in reverse order back in 1903. You would not think a provision like that would be inserted in a modern-day treaty, to say the United States shall not have the authority to seek to provide another canal in another country, but for 22 long years we cannot take that action.

The first matter says that we shall continue to have our veto power over the construction by another nation of a canal in Panama irrespective of other provisions in the treaty. That will be the first question to be decided by the first part of this amendment.

I do yield the floor at this time, after asking Mr. President, how much time remains to the Senator from Alabama?

The PRESIDING OFFICER. The Senator from Alabama has 13 minutes remaining.

Mr. ALLEN. I thank the Chair.

I reserve the remainder of my time.

Mr. SARBANES addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. SARBANES. Mr. President, I have listened carefully to the distinguished Senator from Alabama, as I always try to do, and I appreciated him yielding on occasion for a question, although I understood and, of course, respected his desire not to do that too frequently and his desire to simply be allowed to go on and make his statement with respect to the amendment he has pending at the desk; the amendment he has offered to article I which has been now divided. So there will be two votes with respect to the provisions of the amendment. One at 1 p.m. today and one at 3:30 p.m. today.

The first point I wish to make, Mr. President, and it was a point that did come out in the colloquy that we were able to have earlier in the morning, is that as to the Panama Canal Treaty which is now pending before us, the provisions in that treaty to which the Senator from Alabama is now raising questions and concerns are found in article XII of the treaty, in article XII of a treaty which encompasses 14 articles. Yet the amendment that has been proposed to deal with provisions found in article XII has been proposed to article I of the treaty. Under the procedure for considering treaties in the Senate we proceed through the treaty article by article. In other words, article I is first before us for amendment, and when all amendments to article I have been disposed of and if there is no further debate we then move on to article II. Article II will then be before us for amendment. When all amendments to article II have been disposed of and if there is no further general debate we move on to article III, and in that way we move through the treaty article by article.

In addition, Mr. President, at the end of the consideration of all of the articles in sequence, article by article, it is then open to any Member of the Senate, if he wishes, to go back and offer an amendment to any of the articles through which we have passed.

What has happened here is that an amendment has been laid down to article I of the treaty which I do not think anyone would deny deals with article XII of the treaty. I think that is very clear. The distinguished Senator from Alabama in fact quoted the provisions of article XII of this treaty in the course of his exposition with respect to his amendment. I simply want to suggest to the Members of the Senate that, if we are going to consider every amendment to any provision of the treaty first as an amendment to article I of the treaty and then quite possibly again when we reach the relevant and pertinent article to which the amendment is actually addressed, in this instance article XII, and then, in addition, at the conclusion of having gone through all of the articles to go back and offer an amendment yet again, we are on a procedure which would appear to have no end to it.

It is, of course, the prerogative of the distinguished Senator from Alabama and any other Member of the Senate to frame their amendments in such a way as they choose and to offer them when they choose to whatever article they choose to do so. But I simply wish to suggest that the more logical and orderly way to proceed would be to offer amendments to the article to which the amendments are addressed and not to put the Senate in the position of considering amendments when the article to which the amendment applies is not pending before the Senate.

We have a situation here in which an amendment, which clearly goes to article XII of this treaty, has now been laid down to article I of the treaty. There is no provision in article I of the treaty that relates to the question to which the amendment is addressed. The provisions in the treaty that relate to the questions to which the amendment is addressed are to be found in article XII of the Panama Canal Treaty.

For the sake of some order and logic in how we proceed, it seems to this Senator that it would be a more sensible procedure for amendments to be presented at the time when the relevant provisions of the treaty to which they are addressed are before the Senate.

Now, turning to the amendment—and the Senator from Alabama has divided his amendment—turning to that portion of it which will be before us at 1 o'clock for a vote, which seeks to give the United States the right to, in effect, control the use of Panamanian territory with respect to the construction of any other canal in Panama, reference has been made back to the 1903 treaty, and it has been asserted that this is a right which we have under the 1903 treaty.

That may be. But the reason we are here considering these treaties that are before the Senate, the reason we are engaged in this entire debate, is that the 1903 treaty has not proven a satisfactory basis upon which to rest the relationship between the United States and the Republic of Panama.

We have been through that issue at great length in the consideration of the permanent Neutrality Treaty which this body approved by the quite sizable margin of 68 to 32. We have been through that issue, that the 1903 treaty, given how it was arrived at and given the nature of its provisions, has not proven to be a stable basis upon which to rest the relationship between the United States and the Republic of Panama.

We are here to renegotiate that relationship and to arrive at a different, more equitable, more permanent, more stable relationship between our two countries.

One of the things the people of Panama have always been sensitive to with respect to the 1903 treaty is that they do not have jurisdiction and control over their country like any other nation has; that the United States holds a corridor of land through Panama which divides that country in two. It is their territory, their country, and we hold a part of it and exercise jurisdiction over it. Of course, it has always been the contention on the part of the Panamanian people that this is unacceptable to them.

We discussed at great length on the floor of the Senate over the course of the 6 weeks we have now been engaged in this debate how the 1903 treaty was arrived at, the nature of the negotiations by Philippe Bunau-Varilla, the Frenchman, with our Secretary of State, without any Panamanians being involved in the negotiations; the hasty signing of a treaty document in advance of Panamanian negotiators arriving in Washington since it was perceived that the terms would clearly not be acceptable to the Panamanians; and then the subsequent ratification of that document by the Panamanians under the threat that unless they did so the American protection for the Panamanian revolution, leading to their independence from Colombia, that our protection of that would be withdrawn, and that those who had led the independence fight would be left at the mercy of the Colombian armed forces which, under the circumstances fairly clearly meant death at the hands of a firing squad.

Therefore, I think it is understandable, given that choice, why they chose then to subsequently ratify the treaty. But the treaty of 1903 was never accepted, and over the years the resentment toward it and the feeling that it was a completely unfair bargain imposed upon the people of Panama has grown and grown in that country.

It does not really answer anything to take the floor of the Senate, as the Senator from Alabama did earlier this morning, and say, "Well, this is a provision that is in the 1903 treaty and, therefore, it ought to be carried forward."

There are many provisions in the 1903 treaty which are not acceptable for nego-

tiating a new basis of our relationship with Panama.

The whole exercise in which we are engaged is to arrive at a new basis for the relationship between the United States and the Republic of Panama, a basis which is perceived to have equity to it, a basis that protects the interests of both countries, and a basis that is mutually acceptable and, therefore, gives us something on which to rest our relationship in the future.

So the fact that some provision was in the 1903 treaty and is not being carried forward is not an argument for that provision, because the whole 1903 treaty is before us for renegotiation. That is an argument for adhering to the 1903 treaty and, of course, I note there that the distinguished Senator from Alabama has been opposed to revision of our treaty relationship with Panama, has taken early, before these treaties were even presented to the Senate so that we knew their texts and what they involved, the position that he was opposed to revision of that relationship.

In fact, the other day, in all fairness to him, when he talked about amending the treaties and he suggested we should have considered them in reverse order, and he then suggested that had we done that there might have been 90 or 95 Senators or he said even 99 Senators who would then support the treaty—he was careful not to include the 100th—and, of course, in a genial response to a question he allowed as how he could not include the 100th because his own position would, of course, have been in opposition, which conforms to a pledge which he made to his constituency with respect to his position on the treaties. So we understand his opposition, as it were, from the very beginning, even before there was a treaty document before us to consider with respect to these treaties.

Reference was made to the revision in 1955, in the treaty of 1955, and it was mentioned that the preclusion of a canal by another party was carried forward in the 1955 treaty. That is correct.

The fact is that the revisions in 1936 under President Roosevelt's Good Neighbor Policy, and the revisions again in 1955 by President Eisenhower when he held the office of Chief Executive in this country, neither fully answered the concerns of the people of Panama with respect to the treaty of 1903.

Both sought to improve the situation, and did, in fact, improve the situation. But neither treaty was put forward by us, and certainly neither treaty was perceived by the people of Panama, as rectifying fully the 1903 treaty.

It is very important to appreciate that because what we are seeking to do here today is to move from the 1903 treaty and place the relationship between our two countries on a basis that can have a lasting quality to it.

That is why the treaty we approved only last week in a 68-to-32 vote, is called the Permanent Neutrality Treaty. That treaty runs without limitation as to time and is, of course, designed to insure the permanent neutrality of the Panama Canal or of any other canal constructed through the Isthmus of Panama. And I want to underscore that last point.

The regime of neutrality under the Neutrality Treaty which provides for the neutral operation of the Panama Canal and which provides that the Republic of Panama and the United States can take such actions as each of the countries deems are necessary to maintain the neutrality of the canal, those provisions would apply to any canal through the Isthmus of Panama, and those provisions, of course, take effect not after the year 2000, but take effect along with the Panama Canal treaties 6 months after the exchange of instruments of ratification with respect to these treaties.

Now that is very important because it insures a regime of neutrality of any canal through the Isthmus of Panama, and, of course, one of the premises of these treaties is that a neutral canal serves American interests. It best insures our ability to continue to use the canal both for military and for commercial purposes, and as it has been repeatedly said in this debate, the importance of the canal to the United States is its use. If we could not use the canal, if we could not make use of the canal for purpose of transit from one ocean to the other, the canal would not have any value. The canal value lies in its use and that is very important to be understood.

So the 1903 and the 1955 treaties to which the Senator from Alabama has referred constitute the past relationship and that relationship has proven to be inadequate. That relationship is not sufficient to structure a mutual cooperative and constructive framework between the people of Panama and the people of the United States. We are now trying to revive that relationship and arrive at an understanding that will enable us to move forward between the two countries in a way that serves our interests, the interests of the United States, and in a way that serves the interests of the people of the Republic of Panama.

Now I wish to address the Senate with respect to this question of a canal through Panama or through somewhere else and the importance of the provisions that Panama will not, as this new treaty states, allow anyone else to build a canal until the end of the century through their territory without the approval or the permission of the United States, and that we in turn will not negotiate outside of the country of Panama to construct such a canal.

I wish to read testimony that was given before the Foreign Relations Committee by Col. John P. Sheffey, U.S. Army, retired. When he appeared before the committee, Colonel Sheffey stated the following, and I am now quoting:

Mr. Chairman, gentlemen, I am Colonel John P. Sheffey, U.S. Army (Ret.). My experience in Panama Canal affairs has been rather extensive—five years as the Secretary of the Army's Military Assistance for Canal matters, five years as the Executive Director of the President's Atlantic-Pacific Interoceanic Canal Study Commission, and three years in the Department of State as Special Advisor to the U.S. Canal Treaty Negotiator on an appointment that was terminated by the Department of State in 1974. Subsequently, I have maintained contact with the State and Defense negotiators and have followed the development of the current treaty drafts.

He then goes on to say:

First, as the former Executive Director of the $22 million sea-level canal study in 1965–70, I assure you that there are no foreseeable circumstances in which the United States would be likely to consider building a new Isthmian canal outside Panama. The only feasible routes are in Panama. The economic, technical and political objections to the far longer routes in Colombia and Nicaragua eliminate them from practical consideration. Limiting the choice to Panama for the remainder of this century costs the U.S. nothing, and the treaty proposal for this prevents other powers meddling in the matter.

The theoretically feasible routes in Nicaragua and Colombia are 140 miles and 100 miles in length, respectively, as compared with 40 miles or less for the Panamanian route. The movement of large ships in narrow canal waters is a slow and hazardous operation. Ship operators would not readily accept the risk and time lost in transit on these long routes. The construction and operation costs of these longer canals would be three or four times the cost of the shorter canals in Panama, and even the shorter Panamanian routes are not economically feasible at currently forecast traffic levels.

I will read that sentence again. This is from the statement of Colonel Sheffey, who had been the executive director of the $22 million sea-level canal study from 1965 to 1970.

We have here the report of the Atlantic-Pacific Interoceanic Canal Study Commission, the final report which is a very thick document. I think it is fair to say it is over a thousand pages and it has extensive backup documents as well.

That was a special commission authorized by Public Law 88–609 of the 88th Congress. It was chaired by Robert B. Anderson and included as its members Milton S. Eisenhower, Raymond A. Hill, Kenneth E. Fields, and Robert G. Storey.

Mr. President, this was a very extensive study. Anyone interested in this issue really ought to examine carefully the study of this commission.

For example, they have chapters in this book which deal with the isthmian canal interest of the United States and other nations. They analyze the potential canal traffic and revenues. They considered the matter of excavation by nuclear methods. They considered important environmental matters. There was a very extended analysis of the alternatives, very careful analysis of financial feasibility. They dealt with the issue of the management of a sea-level canal and its construction and operation.

Now their conclusion, as Colonel Sheffey stated, was that the only feasible routes are in Panama. The economic, technical and political objections to the far longer routes in Colombia and Nicaragua eliminated them from practical consideration.

Colonel Sheffey stated:

Limiting the choice to Panama for the remainder of this century costs the U.S. nothing, and the treaty proposal for this

prevents other powers meddling in the matter.

Then Colonel Sheffey went on to say:

The construction and operation costs of these longer canals would be three or four times the cost of the shorter canals in Panama, and even the shorter Panamanian routes are not economically feasible at currently forecast traffic levels.

He then stated:

In the 1970 study, the Nicaraguan and Colombian routes were considered only for a sea-level canal constructed by nuclear excavation. Nuclear excavation is of questionable technical feasibility at best, and is politically infeasible beyond doubt. Conventional excavation costs on these longer routes were so great that they were not even estimated with any precision. Today's construction costs on either route would be in excess of $20 billion, and this could easily double by the time such a canal might be needed.

In the question period involving Colonel Sheffey, he was asked about the sea level canal, and he made the following points:

The argument that we need the right to build a canal outside Panama for some unforeseen purpose is an empty one. We cannot build a canal outside Panama.

He went on to say:

When we entered this study in 1965, one of our purposes was to prove that we could build a canal, a technically satisfactory canal, outside Panama because it would give us far better negotiating leverage to renegotiate our relationship with Panama.

We spent $22 million of the taxpayers' money in 5 years and proved only that we could not build outside Panama.

This is from the executive director of the study commission. I have not heard anyone question the quality of work which has gone into the interoceanic canal study commission.

To come back again to the provisions of the amendment of the Senator from Alabama, now before us, it, in effect, seeks to carry forward into this treaty the provisions of the 1903 treaty. I simply want to underscore again that we are here considering these treaties because it is clearly in our interest and has proven necessary to renegotiate the terms of the 1903 treaty. It does not advance us very far in considering these documents to fasten on to some provision of the 1903 treaty and insist that it be carried forward in terms of the relationship between the two countries.

The reason we are here with these new treaties, trying to arrive at a new relationship which will protect our interests, which is fair to the Panamanians, which will be the basis on which we can move into the future, is that so many of the provisions of the 1903 arrangement have proven to be unacceptable. That is the issue which is before the Senate.

Senators only avoid that issue, and the country only avoids it, if one proceeds on the premise that we are going to carry forward provisions of the 1903 treaty. If we could carry forward the provisions of the 1903 treaty as a basis of the relationship between the United States and Panama, we would not be here considering these treaties. That is the reason we are here and the reason we have been here for 6 weeks.

I would hope, Mr. President, that at some time we would reach an understanding on when we are going to conclude our considerations with respect to this treaty. I think it quite reasonable that an appropriate period of time should pass for considering each of the articles. However, I hope we can at least settle when that process is going to come to an end as we did with the Neutrality Treaty.

The reason we are here considering these treaties and have now spent 6 weeks on it, or over 6 weeks on it, is because the provisions of the 1903 treaty are not acceptable. Now to come with an amendment which seeks to carry those provisions forward is to proceed on an assumption that belies the realities of the situation with which we are confronted.

I feel that the proposal offered by the distinguished Senator from Alabama is really premised on the notion that the appropriate course for us to follow is to maintain the 1903 treaty, as revised in 1936 and 1955. Those revisions do not fully answer the problem, and we have to deal with the problem as it is. That is what we are trying to do with the treaties which are before us.

Mr. CHURCH. Mr. President, first of all I commend my colleague, the able Senator from Maryland, for a very fine argument against this amendment. I wonder if he would mind an exchange between us in which he might play the part of Panama and I might play the part of the United States. I ask this because it is useful to remind ourselves that we are dealing here with a treaty, one that has been negotiated at arm's length between two governments.

Normally, the Senate, in exercising its constitutional prerogative, does not undertake to rewrite a treaty that has been negotiated between two governments. We exercise our powers, either by consenting to the treaty as negotiated, or by refusing to consent to it, thus rejecting the treaty as negotiated; or by attaching conditions to our consent. Those conditions can take the form of reservations or understandings affixed to the instrument of ratification.

It has been 54 years since the Senate undertook to amend a treaty by actually changing its language.

A few days ago, it is true that the Senate, in adopting the amendments proposed by the leadership, as recommended by the Senate Foreign Relations Committee, amended the permanent Neutrality Treaty. It was the first time in 54 years that this has happened, though during that period the Senate has considered hundreds of treaties.

In amending the text of the permanent Neutrality Treaty, however, the Senate was careful to adopt interpretive language which had already been consented to by the two governments. Indeed, that language had, in effect, been submitted to the people of Panama and had been passed upon in their earlier plebiscite.

Mr. HATCH. Will the distinguished Senator yield for just one question?

Mr. CHURCH. Yes, I yield.

Mr. HATCH. I have enjoyed the comments of the distinguished Senator from Idaho, but I hope I am not misinterpreting. The distinguished Senator, although he indicates that most treaties, if not the vast majority, have not been amended on the floor of the Senate, is not arguing that the Senate does not have the prerogative or the right to amend, if the Senate finds that the treaties are not properly written, do not protect the United States, are ambiguous, or have other difficulties? It is within the prerogative of the United States to amend for any reason it so desires, even though past practice may have dictated otherwise.

Mr. CHURCH. Of course. I was just now mentioning our adoption of the leadership amendments.

Mr. HATCH. I thank the Senator.

(Mr. HODGES assumed the chair.)

Mr. CHURCH. In fact, as I have stated, the Senate saw fit, for the first time in 54 years, to amend the actual text of the Neutrality Treaty in order to clear up certain ambiguities that the Senate Foreign Relations Committee had identified. Obviously, it is within the power of the Senate to amend the treaty itself, but we were careful to do so in a way that had already been agreed upon by both the Government of the United States and the Government of Panama, the two parties to the Neutrality Treaty.

Mr. HATCH. Will the Senator yield for just one other question on that precise point?

Mr. CHURCH. Yes, I yield.

Mr. HATCH. Just so we understand at this point, the Senator is emphasizing that, although this is the first time in so many years that a treaty has been amended, the treaty was amended to use the precise language of the two governments. If I understand the Senator correctly, and just to correct the record, it is my understanding, and I believe the Senator would concur, that the Senate has the authority, the power, and the right, if it so desires, to amend a treaty for any reason the Senate desires, whether or not it is to amend to clarify language agreed upon by the two respective powers.

Mr. CHURCH. Of course, the Senate has that power.

Mr. HATCH. I thank the Senator.

Mr. CHURCH. But the usual practice of the Senate, when it has wished to impose a condition or make a change, has been not to amend the text of the treaty itself, but to amend the articles of ratification by adding reservations or understandings, so that the Senate's consent rests upon the conditions stipulated in the articles of ratification.

Now, this is the normal way of proceeding, for the reason that a treaty represents a contract negotiated between two sovereign governments. If we choose to change the treaty language, then, of course, the effect of that, unless we adopt language that has already been agreed to by the two governments, is to force a renegotiation of the treaty.

The able Senator from Maryland is a lawyer, and a good one. I, myself, am a lawyer——

Mr. SARBANES. And, I may add, Mr. President, a good one, a very good one.

Mr. CHURCH. Well, now that we have established our credentials——

Mr. SARBANES. We have to have some reciprocity here, just as we do in treaty negotiations.

Mr. CHURCH. Very well. I am going to ask if the Senator from Maryland would, for the moment, just for purposes of this debate, consent to play the role of lawyer for the Government of Panama and I shall act, for purposes of the debate, as the lawyer for the United States.

Mr. SARBANES. Let me say I am willing to do that for the purposes of the debate, as the able Senator from Idaho has suggested, but I want it very clearly understood, because the argument has been asserted on the floor of this body that there is an oversensitivity to Panamanian concerns, that those of us supporting these treaties do it, first and foremost, because we believe that the treaties serve American interests.

Mr. CHURCH. Absolutely.

Mr. SARBANES. We happen, among other things, to have a perception that American interests are served if there is a relationship between the United States and Panama which is acceptable to both peoples and protects their mutual interests; such a relationship may well serve American interests better than a situation like the 1903 treaty, which was arrived at in such a way and was so unfairly structured that it has provoked constant resentment and antagonism on the part of one of the parties to the relationship. That is one of the reasons these treaties are important and why they serve American interests.

Mr. CHURCH. Of course.

I ask the Senator to join me at an imaginary negotiating table only for the purpose of making a point that seems to be lost in this debate. As the Senator has correctly observed, the 1903 treaty was so odius to the Panamanian Government and its people that indignation over it led, in 1964, to serious riots and bloodshed, in which American lives, as well as Panamanian lives, were lost. The shock of such violence erupting in that small country led to a Presidential decision that the time had come to work out new treaty arrangements with Panama.

Now, if the Senator would, for a moment, take off his Senatorial hat, as I shall take off mine, and cast himself in the role of a lawyer negotiating for the Government of Panama, I shall cast myself in the role of a lawyer negotiating for the United States. Now, I put to you the following proposition.

The proposition is contained in this amendment offered by the Senator from Alabama. I ask you to agree to the following provision for the new treaty: First, that the United States, under the new treaty, will retain the rights it had under the old treaty; namely, to hold in perpetuity the exclusive right to construct a new canal in Panama. That is to say, we want to exclude any other country from ever building a new canal in Panama, thus depriving the Government of Panama, in perpetuity, from ever negotiating with any country except our own for the purpose of building a new canal in Panama.

However, the United States will not be so bound. For we shall insist on our right to negotiate with any government we please, should we decide to build a new canal.

All I am asking you to do, as the representative of Panama, is to relinquish Panama's right to negotiate with any country forever, while the United States shall have an unfettered right to negotiate with any country, at any time, for a new canal.

Now, Panama, are you willing to accept this provision in the treaty?

Mr. HATCH. If the Senator will yield——

Mr. SARBANES. Having put the question, I think the questioner himself ought to recognize an absence of any element of evenhandedness in that approach.

Mr. CHURCH. Well, after all, Panama should give a little here.

Mr. SARBANES. I must say I am being very restrained in that response, because I have great respect and affection for the questioner and I, in the end, want to have a good relationship between our two parties. But if you would just read your question again, and think about it for a moment, I would have to say to you that it is all take and no give. I cannot regard that as even the semblance of an evenhanded proposal.

Mr. CHURCH. All I am asking you to do is to give us the right in perpetuity to exclude any other country from negotiation with Panama for a new canal. Only the United States may build a new canal in Panama, provided we want one there.

On the other hand, the United States must naturally preserve its option to build a new canal in another country, should we decide some other place better serves our needs. Even then, Panama would remain bound by this provision to deal with no other government.

Now, why do you find that unacceptable? I am sure it would be approved in the United States overwhelmingly.

Mr. SARBANES. I am not fully familiar with all of your slang or phrases, but I think there is the phrase about having your cake and eating it, too, that well applies to this proposal that you are putting forward.

Mr. HATCH. Will the two distinguished lawyers yield for maybe a thought here, for just a second?

All I know is that I would have to admit both Senators are distinguished lawyers, but if I am a citizen of the United States, if I might play that role, I think I might want a different counsel representing me in these negotiations. [Laughter.]

As a matter of fact, I think I would want a counsel who would not start off by asking what I consider to be an objectionable question, but might start off pointing out the relationship that we have had, a good relationship, the $250 million that we put into the economy last year, and many other things, to try and show that maybe there is some reciprocity that might be very much interesting to our Panamanian friends.

Mr. CHURCH. I thank the Senator for his intervention.

Mr. HATCH. Well, I would rather have you be U.S. Senators who are actively working for our country. If we are going to have lawyers working for our country, have lawyers who know how to negotiate.

Mr. CHURCH. May I say to the Senator, even if he were there with all his skills, and made this proposal at the negotiating table I doubt that he would get any different response from the Panamanians than the reply offered by the Senator from Maryland.

Mr. HATCH. Will the Senator yield on that point?

Mr. CHURCH. I would prefer not to be interrupted again.

Mr. HATCH. It would be fair if the Senator would on that point, just that point, and then I will sit down.

Mr. CHURCH. I thought the Senator——

Mr. HATCH. And allow it to continue.

Mr. CHURCH (continuing). Wished me to yield for a question.

The PRESIDING OFFICER. The Senator from Idaho has the floor.

Mr. CHURCH. I am happy to yield for a question.

Mr. HATCH. I would be very appreciative of the Senator from Idaho.

I would like to have been the negotiator of these treaties because I believe that we would have had a more forceful negotiation which would have benefited both countries, not just the country of Panama.

In addition to that, I think there would have been a lot of things pointed out that would have been for the benefit of both countries.

Mr. CHURCH. And the Senator's question?

Mr. HATCH. And the Senator's question is this: If the distinguished Senator from Idaho was the negotiator, would the distinguished Senator from Idaho beginning the negotiations for this canal, have started off with a question like the question he just asked of the other distinguished Senator and lawyer from Maryland and expect any nation, I do not care how small, insignificant, weak, ineffectual, or unrelated to the United States, to even negotiate? The answer is probably "no."

Mr. CHURCH. If I may supply my own answer to the Senator's question, it is this: The proposition I put to the Senator from Maryland was taken from the text of the amendment offered by the Senator from Alabama.

Mr. HATCH. Yes, out of context and——

Mr. CHURCH. Oh, no, not out of context.

Mr. HATCH. Surely.

Mr. CHURCH. It was paraphrased quite accurately. The Senator is wrong. He obviously knows that the proposition is so one-sided it could not possibly float.

Mr. HATCH. In the context it was given.

Mr. CHURCH. Well, the context in which it was written. It was the amendment itself which I read from.

Mr. HATCH. If we are going to be lawyers, let us at least be fair lawyers and fair negotiators, and let us consider all ramifications and not just take something out of context that seems to be repugnant to everybody and act as if that is going to be an effective negotiation for the United States of America, because it

certainly is not, nor is it, I might add, good law.

Mr. CHURCH. Nor, I might add, a proposal worthy of serious consideration.

Mr. SARBANES. Does the Senator from Utah, with all of his great skills, think there is any possibility that, if a plane was placed at his disposal, he could fly down to Panama now and say to the Panamanians, "I want you to agree to the following proposition. No other country is to be able to build a canal through Panama except the United States, but the United States can go anywhere else it wants other than Panama in order to build a canal," and expect the Panamanian people to agree to that?

Mr. HATCH. If I may answer that——

Mr. SARBANES. As being an even-handed proposition?

Mr. HATCH. I can answer that. I think I will be able to.

If I were negotiating this, I would not start off with that proposition.

Second, I would not have negotiated these awful treaties.

Third, as a lawyer who has written a lot of contracts and negotiated a lot of contracts and millions and millions of dollars in contracts, I certainly would not have had the imprecise, poor legal language that had to come from imprecise, poor negotiations.

Now, with the fait accompli——

Mr. SARBANES. Having said all that, what is the answer to the question?

Mr. HATCH. Let me answer it in my way. I know the Senator asked the question.

All I am saying is this, if I were negotiating, I believe I could have gone down to Panama and come back with new treaties which would have benefited both countries and which would have had that provision in it.

I know I could have done it. But, on the other hand, I would not have negotiated from a position of weakness, as our two lawyers are doing here. I would have negotiated from a position of strength and I would have come up with treaties that benefited my Nation first and foremost, and yet still would have been fair to the Panamanians.

I am willing—and I am not a betting man—but I am willing to bet I would have come back with that exact provision in the treaty.

Mr. CHURCH. Mr. President, if I may reclaim the floor, I must say that the Senator's confidence in himself is limitless.

Mr. HATCH. I think Senator Allen could have, also, and a number of other Senators I have confidence in, a number of other people.

Mr. CHURCH. If I may reclaim the floor, Mr. President.

The PRESIDING OFFICER. The Senator from Idaho has the floor.

Mr. CHURCH. Perhaps, the Senator from Utah has been endowed with the gift of working miracles. But the proposition we are faced with is a very plain one. I read it from the pending amendment.

It is a proposition which, in effect, stipulates that the United States, in perpetuity, shall have the exclusive right to build a new canal in Panama, that Panama can deal with no other country. But, on the other hand, the United States need not build a new canal in Panama, but reserves the right, on its part, to negotiate with any other country it may choose.

It would take a magician, indeed, to get the other party to agree to such a proposition in an arms-length negotiation.

Now, what proposition was agreed to?

Well, it is contained in section 2 of article XII and it is a proposition based upon some semblance of balance between the two countries. It is based upon a quid pro quo, which is always the case when governments negotiate at arm's length.

The provision is as follows:

2. The United States of America and the Republic of Panama agree on the following:

(a) No new interoceanic canal shall be constructed in the territory of the Republic of Panama during the duration of this Treaty, except in accordance with the provisions of this Treaty, or as the two Parties may otherwise agree.

In other words, the two governments consent that no new interoceanic canal will be built in Panama unless both governments agree.

Now, that gives us a veto. The Panamanians have conceded it to us. They may not go to another government—they cannot go to Japan, for example—and say, "You come in and make an arrangement with us whereby we will permit you to build a sea level canal across our country." Under this treaty, they have given up that right. They have said, "We will not allow a new canal to be built unless the United States consents to it." That is an important right we have obtained, and the Panamanians have agreed to it, under the terms of the treaty.

What did they get in exchange for giving us the exclusive option, in effect, to build a new canal in Panama, or at least a veto that could prevent them from dealing with any other country for that purpose? What did they get in exchange? That is covered in part (b) of section 2, article XII, of the treaty. It reads:

During the duration of this treaty, the United States of America shall not negotiate with third states for the right to construct an interoceanic canal on any other route in the Western Hemisphere except as the two parties may otherwise agree.

So we got a veto preventing Panama from dealing with any other country to build a sea level canal across Panama; and the Panamanians, in return, got a veto to prevent us from negotiating with any other country for that purpose, for the duration of the treaty. That was the quid pro quo.

We felt, on our side, that it was a good trade, because we do not have any intention of building a canal in any other country, anyway. We had already spent $22 million hiring the best of engineers to explore thoroughly all alternative canal routes in Central America. They came back to us, after careful study, and said in their report to the President of the United States that they found no feasible route for a sea level canal in any other country except Panama.

So, in effect, we gave away little or nothing in return for the Panamanian concession that we should have the right to veto their dealing with any other country on a new canal for the duration of the treaty.

As a matter of fact, I am told by those who negotiated the treaty that this was a provision we sought on our initiative, because we felt it served the American interest so well.

It is obvious what is intended here. If the Senate were to adopt this amendment, it would simply gut the treaty. It is an amendment unacceptable on its face. No self-respecting government could accede to it. If we are going to have a treaty entered into voluntarily by two sovereign governments, then it has to be based upon a certain evenhandedness. There has to be fair consideration given to the legitimate interests of both sides. Otherwise, of course, no treaty can be consummated; no agreement can be reached.

So, Mr. President, since we did not have magicians negotiating and had to deal with normal considerations of fair play, we have in this treaty a provision that reflects not only the sensitivities but also the interests of both parties.

I believe it is a provision highly favorable to the United States, one of the better provisions in the treaty, from the standpoint of American interests.

However, if the Senate should decide against this provision, if the Senate should wish to preserve for the United States its option to deal with other countries in Central America on the building of a sea level canal, the way to do that is by reservation to the articles of ratification, not by attempting to amend the text of the treaty itself.

Perhaps Senators believe that the exhaustive study that has been made heretofore on this subject, and the large amount of money spent on it, is insufficient to convince them that the engineers were right when they concluded that the alternative routes outside of Panama were not feasible. Perhaps the Senate wants a new investigation of that question, on which we could spend $35, $40, or perhaps $50 million, to reinquire into the matter during the next 5 years.

If that is the judgment of the Senate, the way to reach this provision in the treaty is not by trying to substitute a proposition so one-sided that it could not possibly be accepted by Panama, and thus kill the treaty; the way to do it is through an appropriate reservation to the articles of ratification.

For these reasons, Mr. President, I hope the Senate will reject this amendment.

I ask the Chair how much time remains to the two sides on the amendment?

The PRESIDING OFFICER. The Senator from Alabama has 13 minutes, and the Senator from Idaho has 20 minutes.

Mr. CHURCH. I thank the Chair.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH. I yield myself as much of Senator ALLEN's time as I may require.

Mr. President, I have enjoyed the remarks of the distinguished Senator from Idaho. I know that he is very sincere and dedicated in his approach to try to resolve these problems and to try to put forth the best logic and position he can for the proponents of these treaties.

On the other hand, I had to interrupt him when the two attorneys were talking, because I felt that if we are going to negotiate these treaties, let us start from the beginning.

I was almost ready to interrupt him again, before the distinguished Senator admitted that it is his understanding that we voluntarily offered to do this. We voluntarily offered to put this provision in, binding the United States to not be able to build a new sea level canal anywhere else without the country of Panama's basically expressed provision. I do not think that is negotiating for our benefit. I do not think our negotiators were taking care of the good old United States of America, when they voluntarily bound us to the will or whim of a country of 1.7 million people, however much we want to have good relations between the two nations.

The fact is that nobody else is going to build a sea level canal in this hemisphere. As a matter of fact, back at the turn of the century, when this matter was being considered, the preferable route was thought to be through Nicaragua.

We all know the historical aspects surrounding the preferable route through Nicaragua and the force and power of Teddy Roosevelt, and others, who gradually overturned what seemed to be the overwhelming sentiment at the time and allowed us to go into the relations and negotiations with Panama which resulted in the 1903 treaty.

What I am saying is this: If we are going to have negotiators representing the United States of America, then let us get negotiators who represent the United States of America who are not people going down there just to volunteer binding commitments of the United States of America which we would not otherwise have to have.

I am not an engineer and I do not purport to say which route would be better and whether routes through Nicaragua would be better or whether there could even be a sea level canal or whether a route through Panama is better.

I heard both sides, and I have heard both arguments. I have heard persuasive arguments both ways.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. HATCH. I am delighted to yield.

Mr. SARBANES. Has the Senator read the interoceanic canal study of the Atlantic-Pacific canal study?

Mr. HATCH. No; I have read parts of it. I have not read it all. I have not read all 1,000 pages.

Might I ask the Senator from Maryland has he read it?

Mr. SARBANES. I think it is fair to say I have, yes.

Mr. HATCH. All of it, every page, from beginning to end?

Mr. SARBANES. No, I cannot guarantee the Senator that.

Mr. HATCH. That is what I cannot guarantee.

Mr. SARBANES. I think I studied this commission report and I know what is in it and I know its conclusions and recommendations.

Mr. HATCH. I have, also. I would say I have studied it as much as the Senator.

Mr. SARBANES. I do not know how the Senator knows that but, in any event, what does the Senator then think of the conclusions and recommendations?

Mr. HATCH. I think it is a good study, and the conclusions may be accurate. I do not know. I have also read the background materials for the 1903 study from what Senators at that time who wanted the Nicaraguan canal. I do not know. I am not an engineer. I cannot make the ultimate decision on that matter, and it may very well be this is the only definitive and important study.

My point is not that. My point is why do we bind the United States of America in any way? Why did we not negotiate to allow us without question to build it if we want to or not? I think we could have done it. I think when we volunteer to bind ourselves to the whims and fancies of Panama we did not have to do that.

That is one of the things that I find some fault with in the negotiations. It is only one of the things. I think there are many, many things we can find some fault with.

I know a lot of people in our society believe that our negotiators, at least one of them was representing certain banking concerns to which are owed upward of a billion and a half dollars, and that there was a definite conflict of interest, and that he was appointed for only 6 months for no other reason than he could avoid the confirmation process of the U.S. Senate, so that he did not have to come in and present his credentials and justify them in front of the Senate committees and prove that he did not have any conflicts of interest.

That is going to be a cloud that hangs over these treaties forevermore if they are passed.

And for anyone to act like it does not hang over bothers me, and for anyone to think we had the best negotiations in this matter bothers me also, especially when we look at the language of the treaty, which I think as a composite whole does not protect the United States of America the way it should. That is why some of these——

Mr. SARBANES. Mr. President, will the Senator yield on my time on that point?

Mr. HATCH. I am delighted to yield.

Mr. SARBANES. I do not want to consume the Senator's time.

Mr. HATCH. I understand our time is going rapidly.

Mr. SARBANES. I do not think the Senator should take the floor of the Senate and place a cloud over the integrity of Ambassador Linowitz. The Senator may want to quarrel with the negotiators on the substance of what they achieved—that is what we are supposed to be here arguing about as reasonable people. But to cast doubt on people's motives or integrity, that is an entirely different matter and I deplore it.

Ambassador Linowitz received from the Department of State a letter on the matter of conflict of interest. That letter has been placed in the RECORD and has been referred to previously in this debate. The letter set out a ruling from the legal adviser to the State Department that there was no conflict of interest present between his role as a negotiator and the various holdings which he had.

The Senator from Utah may want to differ with the negotiators over the substance of the treaty provisions, but I do not think he should place a dark cloud over people who have served the country well in many capacities, including both Ambassador Bunker and Ambassador Linowitz, and others.

Mr. HATCH. Let me add to the statement of the distinguished Senator from Maryland that I said "some people."

Let me go further. I do not think what has——

Mr. SARBANES. I do not think that takes care of the situation. If the Senator will yield, I think we are proceeding on my time.

Mr. HATCH. I am happy to allow the Senator to proceed on his time. But let me respond when I start.

Mr. SARBANES. Let me make the point.

I do not think it takes care of the point for the Senator to raise the issue and then attribute it to some other people and leave that dark cloud hanging.

If the Senator subscribes to that view, and if he does then I am most disappointed to hear it, he should let us know what his position is. I do not think he should trot out something which casts a dark cloud on the personal qualities of very distinguished people and then attribute it over to some other people.

If the Senator wants to disagree with the substance of what the negotiators have reached and question that, this is what a good part of this debate is about, but do not cast aspersions on the personal qualities of dedicated individuals.

Mr. HATCH. Mr. President, if I might respond——

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. SARBANES. I yield to my colleague from Maryland.

Mr. HATCH. Mr. President, who has the floor?

Mr. SARBANES. Mr. President, it is on my time.

The PRESIDING OFFICER. No. I think the floor is held by the Senator from Utah.

Mr. SARBANES. I see. I thank the Chair.

Mr. HATCH. Mr. President, I am delighted to yield to the distinguished Senator from Maryland, Senator MATHIAS. Is it on this point?

Mr. MATHIAS. Yes, it is.

Mr. HATCH. Mr. President, could I

make a point before he does that if I may?

I wish to answer the other distinguished Senator from Maryland. Let me say this: I did not put the cloud of Ambassador Linowitz's service over these treaties. The President did.

When there was a fuss raised about him being on the board of directors of Marine Midland Bank, he resigned temporarily, saying he will go back on, as I understand it, as soon as these treaties are concluded and any conflict of interest is resolved.

Mr. SARBANES. No.

Mr. HATCH. That is my understanding.

Mr. SARBANES. No.

Ambassador Linowitz, prior to that, had received a letter from the legal adviser of the State Department saying there was no conflict of interest.

Mr. HATCH. Then why did he resign?

Mr. SARBANES. Because a number of people perhaps including the Senator from Utah——

Mr. HATCH. Not including the Senator from Utah.

Mr. SARBANES. I do not know for a fact—who attacked him in any event, and he said, so that we do not even leave the basis for the attack he was quite happy to get off the board, but he had received an authoritative letter telling him there was no conflict of interest in response to his own careful inquiry.

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. HATCH. I am delighted to yield to the distinguished Senator from Michigan.

Mr. GRIFFIN. Mr. President, who in the devil is the State Department to do the job of the U.S. Senate? The Senate is the body that should decide whether or not there is a conflict of interest in the case of a nomination of a person to perform a diplomatic service. It may be true that someone in the State Department issued such a legal opinion, but as far as this Senator is concerned, that is no answer for me.

Mr. SARBANES. No; but that is an answer as far as the integrity of Ambassador Linowitz is concerned. He put the issue to appropriate legal officials and received a response.

Mr. HATCH. Who preselected them?

Mr. SARBANES. The Senator might want to say that he may disagree with the legal adviser, but the question is——

Mr. GRIFFIN. We did not get a chance to.

Mr. SARBANES. The question was put. The Senator had his opportunity.

I want to pursue with the Senator from Michigan——

Mr. HATCH. On the Senator's time. Is this on the Senator's time?

Mr. SARBANES. Yes. I assume all of this is on my time.

Mr. HATCH. All of this is on the Senator's time.

Mr. SARBANES. Because the Senator from Michigan never raised that point until after——

Mr. GRIFFIN. Now the Senator is going on to a different issue, is he not?

Mr. SARBANES. No. It is the same issue and as the Senator knows we have discussed it before.

Mr. GRIFFIN. The Senate can be concerned about it just the same. Even if this Senator were negligent in any way, that does not resolve the matter. Let us go back to whether or not he was a member of the board of directors of this bank; let us go back to whether this bank made a loan in the neighborhood of $50 million to the Government of Panama headed by Mr. Torrijos, and did he remain on the board of directors after he undertook the job of negotiator? If he did, never mind what this Senator did or did not do. Maybe I did not do my duty. I thought I did. But it seems to me that is beside the point. The Senator from Maryland is dodging the issue.

Mr. SARBANES. No; I am not dodging the issue.

I will ask directly to the Senator from Michigan whether he is asserting that Ambassador Linowitz had a conflict of interest and that his integrity in negotiating this treaty, therefore, should be questioned?

Mr. GRIFFIN. Under the Constitution those who are appointed to perform diplomatic functions are supposed to be confirmed by the U.S. Senate. As I have said before, I think it was very ill advised for President Carter—when he knew he would have to come to the Senate with the treaty for our consent after it was negotiated—to circumvent the Senate by obviously appointing Mr. Linowitz on a temporary basis, so the nominee would not have to come before the Senate.

Whether being a member of the board of directors of a bank which has a $50 million loan outstanding to the Republic of Panama, headed by the dictator Torrijos, is a conflict of interest in such a situation is a question that the Senate should have had an opportunity to pass upon.

It troubles me, frankly, that the administration and Mr. Linowitz himself, did not go through the regular channels and bring this out in advance. That would have been the thing to do, and then to have explained it.

Mr. SARBANES. Mr. President, I ask unanimous consent to have printed at this point in the RECORD the exchange of correspondence between the chairman of the Committee on Foreign Relations and the Secretary of State concerning the appointment of Ambassador Linowitz to a temporary 6-month appointment, an appointment which I might point out was authorized under legislation enacted by the Congress of the United States. I ask unanimous consent that that material be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JANUARY 31, 1977.

Hon. CYRUS R. VANCE,
Secretary of State, Department of State, Washington, D.C.

DEAR MR. SECRETARY: I am writing you with respect to our recent conversation concerning the appointment of Mr. Sol Linowitz.

It is my understanding that this appointment will be made for a period not to exceed six months and for the purpose of putting Mr. Linowitz in the position of U.S. co-negotiator on the Panama Canal talks. As I indicated to you, I have no objection to this arrangement for a not-to-exceed-six-month period, so long as the negotiations from the U.S. side are headed up jointly by Ambassador Bunker and Mr. Linowitz. I am sure you will agree with me that Ambassador Bunker has performed admirably throughout his tenure as chief negotiator and I am confident, as I am sure you are, that he will continue to perform in this fashion until these negotiations are brought to a successful conclusion.

I know that you will apprise me of any misunderstanding on my part about Mr. Linowitz's role. Similarly, I would appreciate being informed beforehand of any change in the co-negotiating procedure.

Sincerely,

JOHN SPARKMAN,
Chairman.

THE SECRETARY OF STATE,
Washington, February 10, 1977.

Hon. JOHN SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate.

DEAR MR. CHAIRMAN: Thank you for your letter of January 31 concerning the appointment of Mr. Sol Linowitz. This is to confirm that your understanding that Mr. Linowitz is to be appointed as Co-Negotiator with Ambassador Bunker on the Panama Canal Talks, with the personal rank of Ambassador for a period not to exceed six months, is entirely correct. There has been absolutely no change in the co-negotiating procedure.

Sincerely,

CYRUS VANCE.

EXCERPT FROM FOREIGN SERVICE ACT OF 1946, AS AMENDED

APPOINTMENTS

SEC. 501. (a) The President shall, by and with the advice and consent of the Senate, appoint ambassadors and ministers, including career ambassadors and career ministers.

(b) The President may, in his discretion, assign any Foreign Service officer to serve as minister resident, chargé d'affaires, commissioner, or diplomatic agent for such period as the public interest may require.

(c) On and after the date of enactment of the Foreign Relations Authorization Act of 1972, no person shall be designated as ambassador or minister, or be designated to serve in any position with the title of ambassador or minister, unless that person is appointed as an ambassador or minister in accordance with subsection (a) of this section or clause 3, section 2, of article II of the Constitution, relating to recess appointments, except that the personal rank of ambassador or minister may be conferred by the President in connection with special missions for the President of an essentially limited and temporary nature of not exceeding six months.

EXHIBIT 2

DEPARTMENT OF STATE,
Washington, D.C., March 7, 1977.

Hon. JOHN J. SPARKMAN,
Chairman, Senate Foreign Relations Committee, U.S. Senate.

DEAR MR. CHAIRMAN: In light of certain statements by a member of the Senate and a member of the House with respect to Ambassador Sol M. Linowitz, I would like to make the following observations which may assist you and the members of your Committee in responding to questions or inquiries.

Ambassador Linowitz was appointed, last February 10, as Co-Negotiator for the Panama Canal Treaty, in the capacity of Special Government Employee with a six-month appointment to the personal rank of Ambassador, in accordance with applicable Federal and Department of State regulations and established procedures. He is serving in this capacity without compensation.

The Department of State conflict of interest regulations provide that no Department employee may "have a direct or indirect financial interest that conflicts substantially, or appears to conflict substantially, with his

Government duties and responsibilities" (22 CFR 10.735-205). Pursuant to these regulations, Mr. Linowitz prior to his appointment submitted to the Department a full statement of his memberships on boards of directors as well as his financial holdings. These were reviewed thoroughly by the Office of the Legal Adviser.

In the cases of two companies, Pan American World Airways, Inc., and Marine Midland Banks, Inc., Mr. Linowitz furnished information from them outlining their activities and financial interests in Panama. Appended are the statements from the Presidents of these two companies. Based on the Department's review, Mr. Linowitz agreed that in the unlikely event any aviation issues arise during the course of the treaty negotiations which might be of possible interest to Pan American, he would recuse himself from participation in the negotiation of any such issues. Continued membership on the board of Marine Midland Bank did not violate the applicable regulations because of the relatively low level of financial transactions of the bank with and in Panama.

Mr. Linowitz also agreed that his law firm "is not now and will not while I am serving in this capacity, represent any client on any matter related to the Panama Canal Treaty negotiation or the Canal Zone."

In the case of Mr. Linowitz' financial interests, two companies in which he had small shareholdings—AT&T and Texaco—did have business which the Legal Adviser believed might be affected by the outcome of the Canal Treaty negotiations. Consequently, Mr. Linowitz agreed to sell his shares in those companies, and has done so.

As a result of the Department's review and the foregoing undertakings by Mr. Linowitz, the Acting Legal Adviser gave a written opinion which concluded that the requirements of the applicable statutes and Department of State regulations on conflicts of interest had been satisfied.

Sincerely yours,

KEMPTON B. JENKINS,
Acting Assistant Secretary for Congressional Relations.

NOTE

Note to F. C. Wiser.

Re Pan Am Activities in Panama—Intertrade.

Intertrade is a small distribution company, wholly-owned by Pan Am. Established in 1972, its principal functions are:

Provides bonded warehouse services, including customs clearance services and some inventory management services. It now has facilities at three locations: Colon Free Zone, Panama Airport, and Panama City.

Provides extensive local trucking services primarily between the Airport and its bonded warehouses.

Acts as Pan Am's General Sales Agent in Colon and certain other points in Panama.

Provides sea-air transhipment services; arranges for the receipt of goods by sea from Japan and other points in the Orient and for onward shipment, usually by air to points in Central and South America.

As indicated in the attached 1977 projections, 1977 Intertrade sales are expected to increase from the 1976 level of $703,000 to $946,000 and net profit before tax from $125,000 to $142,000. Pan Am originally invested $10,000 to establish the company. The underlying book value of our equity is now $170,000.

Intertrade is under the direction of Art Sumner, who has been with Pan Am 35 years, most of them as a resident of Panama. The other 58 employees are citizens of Panama.

Also attached is a recent brochure on Intertrade which may be of interest.

I understand you are being provided with information on SDISA through Art Best.

CHARLES W. TRIPPE.

JANUARY 7, 1977.

Note to F. C. Wiser.

Subject Pan American Operation, Panama.

Sales office location: Edificio Hatillo, Avenida Justo Arosemena, Panama City, Republic of Panama.

Hours/Telephone: Mon.-Fri. 8:00 am–12 Noon/1:00 pm-5:30, Sat.-Sun. closed. Telephone: 25–5425.

Airport/location: Tocumen International Airport, located approximately 18 miles from Panama City. The Airport operation at the present time is 100% handled by Pan American personnel, with the exception of inbound cargo, which is handled by Intertrade.

Director: Reeder Chaney Office Phone: 25–6510. Home Phone 26–0859.

Mr. Chaney is the only international employee in Panama, and is responsible for not only Panama, but offline west coast/South American General Sales Agents in Colombia, Ecuador, Bolivia and Peru.

Present Employment: 151 people.

Passenger Operations: 75 movements/month.

Passenger Sales/1976: $10,000,000.

Cargo Sales/1976: $4,000,000.

General Information: New Airport and terminal facilities will be in operation by fall of 1977.

Separate Corporations in Panama:

(a) Intertrade (separate report being prepared by C. Trippe).

Intertrade is wholly owned Panamanian cargo company and is the general Sales Agent for Pan American on the Atlantic side of the canal for cargo and passengers. They are also general Sales Agents for Pan Am for the balance of the Republic of Panama, other than the City of Panama.

An agreement has recently been signed with Intertrade to do all of our inbound cargo handling at Tocumen Airport.

(b) SDISA (Servicios y Diversiones Internacionales, S.A.).

A Pan Am wholly owned Panamanian Catering operation located at Tocumen Airport servicing all carriers.

A. S. BEST.

PAN AMERICAN OPERATION, PANAMA

Prior to World War II, Pan American operated from both the Atlantic and Pacific side of the Canal Zone in Panama. When World War II started, the operation at France Field, located on the Atlantic side, was consolidated with the operation at Albrook Field on the Pacific side.

Pan American's operation continued at Albrook Field until the Republic of Panama developed an International Airport at Tocumen in October, 1949.

At one time, our operation in Panama was considerably more active than at present. Due to retrenchment in military forces, reduction in Panama Canal Zone international employees, long-range and wide-bodied aircraft, Pan Am has decreased its total activity through Panama.

The present 151 employees represent only 9.2 percent of our employees in Latin America or slightly over 1 percent of our employees worldwide in the field marketing group. Likewise, today the total sales of $10,000,000 for passengers and $4,000,000 for cargo represents .8 percent of our revenue.

MARINE MIDLAND BANKS, INC., OPERATIONS RELATED TO PANAMA

A. Past or Dormant Investments.—

1. Banco Inmobiliario de Panama S.A.—This is a small mortgage bank in Panama that engages in medium- to long-term housing mortgages and the warehousing of mortgage paper. We have just sold our 2½ percent interest.

2. Financiera Centroamericana S.A.—This is a general finance company engaged in commercial, industrial, and real estate lending in Central America, as well as holding an equity interest directly and indirectly in bonded warehouses in Central America and the Caribbean. This 22.4 percent investment was just disposed of.

3. Servicio de Anuario Telefonico Internacional S.A.—This company sold and distributed telephone books in several Latin American countries. We have preferred shares at modest value. This investment will be written off.

B. Current Investments.—

Marine, through Intermarine London, owns Bream Shipping, which was formed a few years back in conjunction with the international lending operations of Intermarine London. This company is presently not being used; however, it has limited assets resulting from prior activities conducted external to Panama.

C. Branch Operations.—

Most international banks have involvements in Panama consistent with that country's currency relationship with the dollar and its favorable climate as a financial center. Accordingly, the Marine started in Panama with a Regional Representative Office for Central America in 1971. It subsequently opened a branch operation in October 1973 to complement the Representative Office with a primary focus on generating corporate business in Panama and Central America, as well as deposit gathering from Latin America. As of November 30, 1976, it has total claims of approximately $32.4 million (of which $18.5 million is claims in Panama, and the remainder is almost entirely claims due from other Central American corporate clients). In Panama much of its business involves financing trade of corporations located in the Colon Free Trade Zone. The combined Representative Office and Branch have a staff of 25, 3 of whom are U.S. nationals. This operation is not large when compared to the activities of several others.

As a large international money center bank, the Marine conducts business throughout the world. Panama has long been a center for trade, as well as a notable financial center. Loans in Panama are a national consequence of the position of the bank and the country.

Marine Midland, either directly from New York or through the Bahamas or Panama Branch or foreign affiliate, has a $100,000 short-term, unsecured loan available to the Hydroelectric Power Authority of Panama.

There is a $100,000 loan to the Agricultural Development Bank in Panama.

There is a $4 million loan to the Republic of Panama, due in November, 1983. There is Marine's share in a $115 million international syndicated loan, managed by Citibank/New York. InterUnion/Paris, in which Marine directly owns 45 percent, also has a loan of $2 million to the Republic of Panama.

In addition to these direct loans to the Government of Panama or institutes of the Government, the Marine is engaged in normal short-term lending operations through the banks and the private sector in that country.

* * * * *

Intermarine owns two Panamanian special-purpose shipping companies, International Ship Finance (Panama) Inc., and Avon Shipping, Inc. These companies each own a Panamanian flag vessel on behalf of Japanese owners, which vessels are financed by Intermarine. These corporations are financing vehicles, and they are only notionally involved with Panama.

Mr. HATCH. Mr. President, how much time do we have remaining for the Senator from Alabama and the other Senators?

The PRESIDING OFFICER. The Senator from Alabama has three minutes remaining. The Senator from Maryland has 15 minutes.

Mr. HATCH. Parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HATCH. All of this last colloquy was supposed to be charged to the Senator from Maryland. I believe we have more time.

Mr. SARBANES. Mr. President, I think what I said was that in order to be fair to the Senator from Utah, whatever time I consumed from the point I arose either to make responses or ask questions should come out of my time. If that is not reflected in the time figure just given to us by the Chair it should be.

The PRESIDING OFFICER. The time was allocated to the Senator who was speaking. Fifteen minutes and three minutes.

Mr. HATCH. Let me just say this, in closing: I believe that when we talk about negotiating treaties we ought to talk about why these treaties are not negotiated well, and when our ambassadors voluntarily bind the United States to something which they would not ordinarily have to bind them, then I call that pretty poor negotiation.

Having to go through the approach made by the distinguished Senator from Idaho in taking it out of context, as though he were negotiating for the United States, was not quite accurate in my judgment.

In addition, I think there will be a cloud over these treaties because Ambassador Linowitz, whether he is right or wrong—and I am not passing judgment on that—was appointed for only 6 months so he could avoid the confirmation process of the Senate, when they knew he was a member of the board of directors of Marine Midland Bank; when he has still maintained his membership on the board of directors, as I understand it, of Pan American World Airways, which has extensive interests in Panama; when he was a full partner, as I understand it, in the Coudert Brothers law firm, an international law firm, representing various international interests, and because of other, I think, pretty important issues.

It is my understanding—I do not believe I am incorrect in stating—that these treaties were negotiated in the last hours of that 6-month appointment.

Those things bother a lot of American citizens and deserve to be brought up here on the floor.

When I hear this type of a colloquy and interchange, as though they are negotiating effectively for the United States of America, and when we volunteer through these ambassadors to bind ourselves to things to which we would not have ordinarily been bound, I do not think we have been represented well.

I thank the Chair.

The PRESIDING OFFICER. All the time of the Senator from Utah has expired.

The Senator from Maryland.

Mr. SARBANES. Mr. President, how much time remains to the managers of the bill?

The PRESIDING OFFICER. Fifteen minutes or all of the time until 1 o'clock.

Mr. SARBANES. I thank the Chair.

Mr. President, I want to go back to this strange idea that some opponents of the treaties were to have that, when you negotiate a treaty or negotiate an agreement, you can unilaterally impose all of the terms and conditions.

By definition an agreement has to be arrived at between two parties. These agreements have been negotiated between the executive branch of our Government and the Government of Panama, and they are now presented to the Senate for advice and consent.

It is clear that the Senate has not simply taken the treaties as presented. We have, in fact, amended the Neutrality Treaty. Senator BYRD and Senator BAKER joined in proposing amendments to the Neutrality Treaty, and those were accepted by the Senate, by an overwhelming vote.

A number of reservations and understandings were adopted to the resolution of ratification, so the Senate has been working its will on these treaties.

On the other hand, when a treaty comes before us we should recognize, while it is wide open to do anything we want to it, that in doing so we may, in fact, lose the agreement with the other party. Then we have to make the judgment in terms of what is being proposed, whether it is of such sufficient consequence that it is worth running the risk of losing the agreement. That is simply what it boils down to, and people ought to recognize that as these amendments are proposed and judged. Many of the amendments, are not really addressed to a substantive concern but are designed to be simply for one purpose, and that is to defeat the treaties by indirection by making it impossible to have an agreement between the two parties.

I yield to my distinguished colleague from Maryland.

Mr. MATHIAS. I thank my colleague for yielding.

As he knows, I was trying to get the floor a moment ago to make a very simple and brief statement. The name of Sol Linowitz has been raised in this debate, and I merely want to say that I have known Sol Linowitz for a number of years. I view him as a man of obvious talent and capability. But beyond that he has always been a man who has been of the highest integrity. He has always been conscious of the special obligations of public service, and has been scrupulously observing the limits which bind and restrain the lives of those who are engaged in any form of public service.

I think the United States has been fortunate in having Sol Linowitz available to perform important public service when we have needed him.

I thank the Senator for yielding.

Mr. SARBANES. I thank the able Senator for his thoughtful and sensitive comment.

I want to return to that subject because I think it is quite important. I do not think in the course of debating these treaties and their substance we ought to cast any reflections or aspersions on American citizens who have served this country with distinction and with dedication.

I want to read into the RECORD a letter from the Department of State, from the Acting Assistant Secretary for Congressional Relations, to the chairman of the Committee on Foreign Relations, dated March 7, 1977, in other words, just over 1 year ago. The letter follows:

DEAR MR. CHAIRMAN: In light of certain statements by a member of the Senate and a member of the House with respect to Ambassador Sol M. Linowitz, I would like to make the following observations which may assist you and the members of your Committee in responding to questions or inquiries.

Ambassador Linowitz was appointed, last February 10, as Co-Negotiator for the Panama Canal Treaty, in the capacity of Special Government Employee with a six-month appointment to the personal rank of Ambassador, in accordance with applicable Federal and Department of State regulations and established procedures. He is serving in this capacity without compensation.

The Department of State conflict of interest regulations, provide that no Department employee may "have a direct or indirect financial interest that conflicts substantially, or appears to conflict substantially with his Government duties and responsibilities" (22 CFR 10.735-205). Pursuant to these regulations, Mr. Linowitz prior to his appointment submitted to the Department a full statement of his memberships on boards of directors as well as his financial holdings. These were reviewed thoroughly by the Office of the Legal Adviser.

In the cases of two companies, Pan American World Airways, Inc., and Marine Midland Banks, Inc., Mr. Linowitz furnished information from them outlining their activities and financial interests in Panama. Appended are the statements from the Presidents of these two companies. Based on the Department's review, Mr. Linowitz agreed that in the unlikely event any aviation issues arise during the course of the treaty negotiations which might be of possible interest to Pan American, he would excuse himself from participation in the negotiation of any such issues. Continued membership on the board of Marine Midland Bank did not violate the applicable regulations because of the relatively low level of financial transactions of the bank with and in Panama.

Mr. Linowitz also agreed that his law firm "is not now and will not while I am serving in this capacity, represent any client on any matter related to the Panama Canal Treaty negotiation on the Canal Zone."

In the case of Mr. Linowitz' financial interests, two companies in which he had small shareholdings—AT&T and Texaco—did have business which the Legal Adviser believed might be affected by the outcome of the Canal Treaty negotiations. Consequently, Mr. Linowitz agreed to sell his shares in those companies, and has done so.

As a result of the Department's review and the foregoing undertakings by Mr. Linowitz, the Acting Legal Adviser gave a written opinion which concluded that the requirements of the applicable statutes and Department of State regulations on conflicts of interest had been satisfied.

Now, that is the letter that was sent to the chairman of the committee in response to an inquiry from the chairman concerning the conflicts-of-interest question. Now, the attachments to those letters, which, of course, set out, as pointed out in the letter, both the activities of Pan American and Marine Midland loans—this lists the loans, and this has been referred to earlier——

Mr. GRIFFIN. What was the loan level of activity of the Marine Midland Bank?

Mr. SARBANES. I was just about to read that. It has listed under "loans" the following:

As a large international money center bank, the Marine conducts business throughout the world. Panama has long been a center for trade, as well as a notable financial center. Loans in Panama are a national consequence of the position of the bank and the country.

Marine Midland, either directly from New York or through the Bahamas or Panama Branch or foreign affiliate, has a $100,000 short-term, unsecured loan available to the Hydroelectric Power Authority of Panama.

There is a $100,000 loan to the Agricultural Development Bank in Panama.

There is a $4 million loan to the Republic of Panama, due in November, 1983. There is Marine's share in a $115 million international syndicated loan, managed by Citibank/New York. InterUnion/Paris, in which Marine directly owns 45 percent, also has a loan of $2 million to the Republic of Panama.

Mr. GRIFFIN. Forty-five percent of how much?

Mr. SARBANES (reading):

In addition to these direct loans to the Government of Panama or institutes of the Government, the Marine is engaged in normal short-term lending operations through the banks and the private sector in that country.

Mr. GRIFFIN. That was 45 percent of how much?

Mr. SARBANES. If the Senator will let me conclude, the attachment also covers what are referred to as "past or dormant investments," and it also covers the branch operations of Marine Midland with respect to their branch operations in Panama. Of course, as has been pointed out on this floor, Panama serves as an international banking center for South America and Central America, and has, I think, some 85 banks, not only American but a number of Japanese and European banks as well.

Now, this material from which I am quoting, as I pointed out in reading the letter from the Department of State, was made available to the State Department, setting out the activities——

Mr. GRIFFIN. Will the Senator yield for one inquiry?

Mr. SARBANES. Let me just quote that section:

In the cases of two companies, Pan American World Airways, Inc., and Marine Midland Banks, Inc., Mr. Linowitz furnished information from them outlining their activities and financial interests in Panama. Appended are the statements from the Presidents of these two companies.

So those statements were submitted to the Department of State for examination by the acting legal adviser prior to giving this written opinion, which concluded that Mr. Linowitz had met all the requirements of the applicable statutes and Department of State regulations on conflicts of interest, that those requirements had been satisfied.

Mr. GRIFFIN. Before the time runs out, will the Senator yield to me for just one inquiry?

Mr. SARBANES. Sure.

Mr. GRIFFIN. The Senator has said that the Marine Midland Bank had a 45-percent interest in a particular loan arranged by a group of banks. I do not think the figure of 45 percent of what was clear. What was the size of the loan, 45 percent of how much, that the Marine Midland Banks had outstanding to the Republic of Panama in that one loan?

Mr. SARBANES. Well, as I read this, I thought I read that paragraph, but I will read it again.

Mr. GRIFFIN. If so, I did not catch it.

Mr. SARBANES. For the benefit of the Senator from Michigan:

There is a $4 million loan to the Republic of Panama, due in November, 1983. There is Marine's share in a $115 million international syndicated loan, managed by Citibank/New York InterUnion/Paris, in which Marine directly owns 45 percent, also has a loan of $2 million to the Republic of Panama.

Mr. GRIFFIN. Of how much? Forty-five percent of how much; If the Senator does not have the information, I will tell him: It is 45 percent of $115 million.

Mr. SARBANES. I thought I read that for the Senator.

Mr. GRIFFIN. I am trying to get the Senator to say how much. I did not hear him say that; 45 percent of $115 million.

Mr. SARBANES (reading):

There is a $4 million loan to the Republic of Panama, due in November, 1983. There is Marine's share in a $115 million international syndicated loan, managed by Citibank/New York InterUnion/Paris, in which Marine directly owns 45 percent, also has a loan of $2 million to the Republic of Panama.

Mr. GRIFFIN. I am sorry.

Mr. SARBANES. Mr. President, I just want to go on.

Mr. GRIFFIN. So that is about $57 million.

Mr. SARBANES. That is the third time that I have read that paragraph to the Senator from Michigan, and I hope he has heard that paragraph now.

Mr. GRIFFIN. You stated that was a low level of activity.

Mr. SARBANES. Mr. President, if I may proceed, this information was submitted to the Department of State by Mr. Linowitz, who asked for a ruling with respect to whether there were any conflicts of interest, and he did that prior to his appointment:

Pursuant to these regulations. Mr. Linowitz prior to his appointment submitted to the Department a full statement of his memberships on boards of directors as well as his financial holdings. These were reviewed thoroughly by the Office of the Legal Adviser.

In the cases of two companies, Pan American World Airways, Inc., and Marine Midland Banks, Inc., Mr. Linowitz furnished information from them outlining their activities and financial interests in Panama. Appended are the statements from the Presidents of these two companies.

And then the Department then went on and said, in concluding:

As a result of the Department's review and the foregoing undertakings by Mr. Linowitz, the Acting Legal Adviser gave a written opinion—

The PRESIDING OFFICER. All time has expired.

Mr. SARBANES (reading):

which concluded that the requirements of the applicable statutes and Department of State regulations on conflicts of interest had been satisfied.

(The following proceedings occurred later in the day and are printed at this point in the RECORD by unanimous consent.)

Mr. SARBANES. Mr. President, earlier in the day I had an exchange with the distinguished Senator from Utah and the distinguished Senator from Michigan concerning Ambassador Linowitz and some conflict-of-interest questions which they raised, and I pointed out that material had been submitted to the State Department and examined and he had been given a legal opinion that there were no conflicts of interest before he entered on his assignment, a temporary 6-month appointment, as an ambassador to be involved in the negotiations.

In the course of that I read from a submission that was made by Marine Midland, on whose board he served, concerning their interest in Panama and, of course, the State Department ruled that the extent of their interest was at such a low level of financial transactions that there was no violation of any conflict of interest.

In reading a paragraph from that submission there was a misprint in the CONGRESSIONAL RECORD which made the meaning somewhat unclear, and I want to correct that RECORD and read now the exact, correct, disclosure or submission made by Marine Midland as to its loans to Panama.

The statement that they filed at the time when Ambassador Linowitz had requested a ruling with respect to any conflict of interest pertaining to his various holdings included the following provision:

LOANS

As a large international money center bank, the Marine conducts business throughout the world. Panama has long been a center for trade, as well as a notable financial center. Loans in Panama are a national consequence of the position of the bank and the country.

Marine Midland, either directly from New York or through the Bahamas or Panama Branch or foreign affiliate, has a $100,000 short-term, unsecured loan available to the Hydroelectric Power Authority of Panama.

There is a $100,000 loan to the Agricultural Development Bank in Panama.

There is a $4 million loan to the Republic of Panama, due in November, 1983. This is Marine's share in a $115 million international syndicated loan, managed by Citibank/New York. InterUnion/Paris, in which Marine directly owns 45 percent, also has a loan of $2 million to the Republic of Panama.

That paragraph is where the misprint occurred, and there was some question raised that Marine Midland had a 45-percent share in the $115 million international syndicate loan. That was not the case. Marine's share of the $115 million loan was $4 million only.

The 45-percent figure referred to Marine Midland's ownership in InterUnion/Paris which had a $2-million loan to the Republic of Panama. So Marine Midland had an ownership interest of 45 percent in a bank which had a $2-million loan to Panama and in addition Marine Midland had a $4-million share in the $115-million syndication, and that was the extent

of this loan involvement on the part of Marine Midland.

Understandably, I think because of the typographical misprint the Senator from Michigan took the view and suggested that Marine Midland had a 45-percent interest in the $775-million syndicated loan.

That was not the case. They had $4 million which was their share in that. In other words, their share of it was about 3½ percent, not 45 percent. I think that is an important fact to get on the record since the State Department, in its legal opinion, indicated "that continued membership on the board of Marine Midland Bank did not violate the applicable regulations because of the relatively low level of financial transactions of the bank with and in Panama."

I ought to point out that later on, even after obtaining this ruling, that there was no conflict of interest; Ambassador Linowitz, because of the queries some people had raised and, I think, because of the sensitivity that has always characterized his public service, and his own deep sense of integrity, went ahead and resigned from the board of Marine Midland voluntarily, although he was clearly not required to do that and, in fact, had been given a legal opinion that there was no conflict of interest.

I mention all of this again simply to underscore the outstanding service which Ambassador Linowitz has rendered this country, and to once again urge that while people may disagree with the substantive judgments of our negotiators or, in fact, with other people involved in the treaty, that we ought not to cast any aspersions on people's personal qualities in the course of carrying forward this debate.

It is important to underscore in this debate that Ambassador Linowitz has behaved throughout with a very high sense of standards and an uncompromising sense of integrity.

(This concludes proceedings which occurred later in the day.)

● Mr. THURMOND. Mr. President, I rise in support of part 1 of the Allen amendment to the pending Panama Canal Treaty.

This amendment would expressly provide that nothing contained in the treaty would deprive the United States of the right to prevent the construction in Panama of a second canal by any nation other than the United States.

Many might feel that this privilege granted to the United States in the 1903 and 1955 treaties is protected by article 12, part 2, section a of the current treaty.

That section reads as follows:

The United States of America and the Republic of Panama agree on the following:

(a) No new interoceanic canal shall be constructed in the territory of the Republic of Panama during the duration of this Treaty, except in accordance with the provisions of this Treaty, or as the two Parties may otherwise agree.

Thus, we can see upon examination of the pending treaty that the prohibition against construction in Panama of another canal by another state is negotiable and may be accomplished if the United States and Panama agree to it.

Mr. President, much has been said about what the United States had to give up to get an agreement from Panama that they would not allow another country to build a second canal in Panama. To keep what we already had in the original treaties it is claimed the United States had to offer a quid pro quo in the form of a provision preventing us from even negotiating to build another canal elsewhere.

The Senate must remember that the greatest giveaway of all is the treaty itself, in which we are giving the canal to Panama. One would think that after that giveaway we would not have to offer a quid pro quo to balance each provision of the treaty.

By surrendering the right to even negotiate with another country for another canal route, we not only surrender the canal, but surrender as well our leverage over Panama to keep the canal open.

Mr. President, this is the Western Hemisphere we are dealing with in these treaties. It is our national security and our economic health involved here. We are the ones with a small Navy which has to be shifted back and forth through the canal. We are the ones who need minerals from other nations that have to be shifted through the canal.

Once we act on these treaties it is final. When we pass a law and make a mistake we can do it over. If the Senate passes this treaty then the action is final. We will have to live with it forever.

Mr. President, I urge acceptance of this amendment by the Senate.●

The PRESIDING OFFICER. All time having expired under the previous order, the hour of 1 o'clock p.m. having arrived, the Senate will now proceed to vote on the division 1.

Mr. SARBANES. Mr. President, have the yeas and nays been ordered on division 1?

The PRESIDING OFFICER. They have not.

Mr. HELMS. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second?

There is not a sufficient second.

Mr. SARBANES. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I ask unanimous consent that further proceedings under the quorum call be dismissed and I ask for the yeas and nays.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SARBANES. Mr. President, I move to table the pending amendment of the Senator from Alabama and I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. The Senator can only move to table division 1.

Mr. ROBERT C. BYRD. That is what he is doing.

Mr. SARBANES. That is what I am doing. I am moving to table division 1, which is now pending for a vote at 1 o'clock, and I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

(Mr. NELSON assumed the chair).

Mr. CRANSTON. I announce that the Senator from Alaska (Mr. GRAVEL), the Senator from Hawaii (Mr. INOUYE), the Senator from South Dakota (Mr. McGOVERN), the Senator from New Hampshire (Mr. McINTYRE), the Senator from Alabama (Mr. SPARKMAN), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that the Senator from Colorado (Mr. HASKELL) is absent on official business.

I further announce that, if present and voting, the Senator from New Hampshire (Mr. McINTYRE) and the Senator from Alaska (Mr. GRAVEL) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Nebraska (Mr. CURTIS) and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

The result was announced—yeas 56, nays 35, as follows:

[Rollcall Vote No. 74 Ex.]

YEAS—56

Abourezk	Hart	Metzenbaum
Anderson	Hatfield,	Morgan
Baker	Mark O.	Moynihan
Bayh	Hathaway	Muskie
Bellmon	Hayakawa	Nelson
Bentsen	Heinz	Pearson
Bumpers	Hodges	Pell
Byrd, Robert C.	Hollings	Percy
Case	Huddleston	Proxmire
Chafee	Humphrey	Ribicoff
Chiles	Jackson	Riegle
Church	Javits	Roth
Clark	Kennedy	Sarbanes
Cranston	Leahy	Sasser
Culver	Long	Stafford
Danforth	Magnuson	Stevenson
Durkin	Mathias	Stone
Eagleton	Matsunaga	Weicker
Glenn	Melcher	Williams

NAYS—35

Allen	Garn	Randolph
Bartlett	Griffin	Schmitt
Biden	Hansen	Schweiker
Brooke	Hatch	Scott
Burdick	Hatfield,	Stennis
Byrd,	Paul G.	Stevens
Harry F., Jr.	Helms	Thurmond
Cannon	Johnston	Tower
DeConcini	Laxalt	Wallop
Dole	Lugar	Young
Domenici	McClure	Zorinsky
Eastland	Nunn	
Ford	Packwood	

NOT VOTING—9

Curtis	Haskell	McIntyre
Goldwater	Inouye	Sparkman
Gravel	McGovern	Talmadge

So the motion to lay on the table was agreed to.

Mr. CHURCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

SCHEDULE FOR NEXT WEEK

Mr. ROBERT C. BYRD. Mr. President, may I have the attention of the Members of the Senate?

Mr. President, there is at the desk House Concurrent Resolution No. 544 which provides for adjournment of the House on today over until 12 o'clock meridian on Monday, April 3. That resolution also provides that when the Senate recesses at the close of business tomorrow, it stand in recess until Wednesday, March 29, or April 3, as determined by the Senate on tomorrow, Thursday, March 23.

Now, Mr. President, I have asked that the verbiage of the resolution be worded in this manner so as to give the Senate the option no later than the close of business tomorrow to either recess until next Wednesday or the following Monday.

I have sought to secure an agreement on this treaty for a final vote.

I think that in view of the fact that the Senate has been debating the treaty now for 27 days, it is a part of the package. While the Senate was considering the Neutrality Treaty, the debate was wide-ranging and actually covered both treaties because, as I have said, and as some others in here have said many times, the two treaties constitute the package.

So we have been on the treaty now for 27 days. There is other legislation that is important and we are going to have to attend to it sooner or later.

I think Senators are entitled to know whether or not they are going to be required to come back next Wednesday or whether or not they can fulfill the schedule which was originally laid out for them which would allow them to come back on April 3.

Now, in my judgment, 27 days constitute an ample time for debate on these treaties.

I am not pressing to close the debate today, or tomorrow, or even the first week of April. But it seems to me that we ought to be able, and I think Senators are entitled to know, to reach a date, to agree on a date for a final vote, because I think all Senators want to be here when the final vote occurs, those who oppose and those who support the treaty. They want to be here. They want to cast their vote on that occasion and they are entitled to know sometime in advance when that date is going to occur.

I would like to see the Senate proceed to recess until April 3. The joint leadership made that announcement earlier this year, that that would be the period of time for the Easter nonlegislative period.

We cannot always foresee what eventualities may occur. I never anticipated that the debate on the treaties would extend 7 or 8 or 9 weeks, and we are already in the sixth week.

I think it is about time that we reached an agreement, if it is at all possible, on a date certain when a final vote will occur. That was done on the first treaty. I respect the opponents of the treaty for their consideration in that matter and for their helping us to reach an agreement.

We have been on these treaties now a total of 175 hours as of 11 minutes after 1 p.m. today. I cannot understand why it is not possible at this time to say that we will have had enough by April 10, or April 15, or some such. We could easily give the Senate another 10 days after it returns, if we stayed out until April 3, and that would seem to me to be a very reasonable length of time.

That is not pressing the opponents. That is not any attempt to gag anybody to institute the gag rule or to stop the debate suddenly. But the time has come when the leadership needs to know so that we can tell our Members on our respective sides of the aisle what they can expect.

I would hope that those who are opposing the treaty would see what they can do to help the leadership to bring about an agreement as to a time to vote.

I am not suggesting that it be April 3. I am not suggesting that it be April 10 even. But it would seem to me that we could agree on a date during the week of April 10, say April 14, that is on a Friday, Friday of that week. That would give the Senate 10 days, not counting Saturdays, 10 days after returning on April 3.
